THE UNITED ILLUMINATING COMPANY

NOTES TO FINANCIAL STATEMENTS

(A) BUSINESS ORGANIZATION AND STATEMENT OF ACCOUNTING POLICIES

The United Illuminating Company (UI) is a regulated operating electric public utility established in 1899. UI is engaged principally in the purchase, transmission, distribution and sale of electricity for residential, commercial and industrial purposes. UI is regulated as an electric distribution company by the Connecticut Public Utilities Regulatory Authority (PURA) and is also subject to regulation by the Federal Energy Regulatory Commission (FERC).

UI is a wholly owned subsidiary of UIL Holdings Corporation (UIL Holdings). UIL Holdings, whose primary business is ownership of its operating regulated utility businesses, is a wholly owned subsidiary of Avangrid Networks, Inc. (Networks), which is a wholly-owned subsidiary of Avangrid, Inc., which is a 81.5% owned subsidiary of Iberdrola, S.A., a corporation organized under the law of the Kingdom of Spain.

UI is also a party to a joint venture with Clearway Energy, Inc., a subsidiary of Global Infrastructure Partners (GIP), pursuant to which UI holds 50% of the membership interests in GCE Holding LLC, whose wholly owned subsidiary, GenConn Energy LLC, or GenConn, operates peaking generation plants in Devon, Connecticut, or GenConn Devon, and Middletown, Connecticut, or GenConn Middletown.

Accounting Records

The accounting records of UI are maintained in conformity with accounting principles generally accepted in the United States of America (GAAP) and in accordance with the uniform systems of accounts prescribed by the FERC and the PURA.

Basis of Presentation

The preparation of financial statements in conformity with GAAP requires management to use estimates and assumptions that affect (1) the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the financial statements and (2) the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

UI's total comprehensive income is equal to net income for the three and six months ended June 30, 2020 and 2019.

UI has evaluated subsequent events through the date its financial statements were available to be issued, August __, 2020.

Revenues

UI presents revenue in accordance with Accounting Standards Codification (ASC), Topic 606 "Revenue from Contracts with Customers" (ASC 606). UI derives its revenues primarily from tariff-based sales of electricity. For such revenues, UI recognizes revenues in an amount derived from the electricity delivered to customers. Other major sources of revenue are electricity transmission and wholesale sales of electricity.

Tariff-based sales are subject to PURA, which determines prices and other terms of service through the ratemaking process. Customers have the option to obtain the electricity directly from the UI or from another supplier. For customers that receive their electricity from another supplier, UI acts as an agent and delivers the electricity by that supplier. Revenue in those cases is only for providing the service of delivery of the electricity. UI calculates revenue earned but not yet billed based on the number of days not billed in the month, the estimated amount of energy delivered during those days and the estimated average price per customer class for that month. Differences between actual and estimated unbilled revenue are immaterial.

Transmission revenue results from others' use of UI's transmission system to transmit electricity and is subject to FERC regulation, which establishes the prices and other terms of service. Long-term wholesale sales of electricity are based on individual bilateral contracts. Short-term wholesale sales of electricity are generally on a daily basis based on market prices and are administered by an independent entity, ISO-New England, Inc.

The performance obligation in all arrangements is satisfied over time because the customer simultaneously receives and consumes the benefits as UI delivers or sells the electricity or provides the transmission service. UI records revenue for all of those sales based upon the regulatory-approved tariff and the volume delivered or transmitted, which corresponds to the amount that UI has a right to invoice.

There are no material initial incremental costs of obtaining a contract in any of the arrangements. UI does not adjust the promised consideration for the effects of a significant financing component if it expects, at contract inception, that the time between the delivery of promised goods or service and customer payment will be one year or less. UI does not have any material significant payment terms because it receives payment at or shortly after the point of sale.

UI also records revenue from Alternative Revenue Programs (ARPs), which is not ASC 606 revenue. Such programs represent contracts between the UI and their regulators. UI's ARPs include revenue decoupling mechanisms, other ratemaking mechanisms and annual revenue requirement reconciliations. UI recognizes and records only the initial recognition of "originating" ARP revenues (when the regulatory-specified conditions for recognition have been met). When UI subsequently includes those amounts in the price of utility service billed to customers, they record such amounts as a recovery of the associated regulatory asset or liability. When they owe amounts to customers in connection with ARPs, they evaluate those amounts on a quarterly basis and include them in the price of utility service billed to customers and do not reduce ARP revenues.

UI also has various other sources of revenue including billing, collection, other administrative charges, sundry billings, rent of utility property, and miscellaneous revenue. It classifies such revenues as other ASC 606 revenues to the extent they are not related to revenue generating activities from leasing, derivatives, or ARPs.

Revenues disaggregated by major source are as follows:

	Three Months Ended		Six Months Ended	
	June 30, 2020	June 30, 2019	June 30, 2020	June 30, 2019
(Thousands)				
Regulated operations – electricity	$ 220,335	$ 213,801	$ 476,795	$ 472,567
Other (a)	(436)	1,581	1,920	3,475
Revenue from contracts with customers	**219,899**	**215,382**	**478,715**	**476,042**
Leasing revenue	322	331	647	665
Alternative revenue programs	9,535	9,352	24,899	12,507
Other Revenue	340	360	816	802
Total operating revenues	**$ 230,096**	**$ 225,425**	**$ 505,077**	**$ 490,016**

(a) Primarily includes certain intra-month trading activities, billing, collection, and administrative charges, sundry billings, and other miscellaneous revenue.

Regulatory Accounting

Generally accepted accounting principles for regulated entities in the United States of America allow UI to give accounting recognition to the actions of regulatory authorities in accordance with the provisions of ASC 980 "Regulated Operations." In accordance with ASC 980, UI has deferred recognition of costs (a regulatory asset) or has recognized obligations (a regulatory liability) if it is probable that such costs will be recovered or obligations refunded in the future through the ratemaking process. UI is allowed to recover all such deferred costs and is required to refund such obligations to customers through its regulated rates. See Note (C) "Regulatory Proceedings", for a discussion of the recovery of certain deferred costs and the refund of certain obligations, as well as a discussion of the regulatory decisions that provide for such recovery and require such refunding.

UI also has obligations under long-term power contracts, the recovery of which is subject to regulation. If UI, or a portion of its assets or operations, were to cease meeting the criteria for application of these accounting rules, accounting standards for businesses in general would become applicable and immediate recognition of any previously deferred costs would be required in the year in which such criteria are no longer met (if such deferred costs are not recoverable in the portion of the business that continues to meet the criteria for application of ASC 980). UI expects to continue to meet the criteria for application of ASC 980 for the foreseeable future. If a change in accounting were to occur, it could have a material adverse effect on the earnings and retained earnings of UI in that year and could also have a material adverse effect on the ongoing financial condition of UI.

Unless otherwise stated below, all of UI's regulatory assets earn a return. UI's regulatory assets and liabilities as of June 30, 2020 and December 31, 2019 included the following:

	Remaining Period	June 30, 2020	December 31, 2019
		(In Thousands)	
Regulatory Assets:			
Unamortized redemption costs	2 to 14 years	$ 6,177	$ 6,567
Pension and other post-retirement benefit plans	(a)	217,917	217,917
Unfunded future income taxes	(b)	157,336	154,538
Contracts for differences	(c)	75,016	72,686
Excess generation service charge	(d)	14,881	-
Deferred transmission expense	(e)	23,370	10,967
COVID-19 cost recovery	(f)	876	-
Revenue decoupling mechanism	2 years	18,719	7,540
Other	(g)	32,435	37,564
Total regulatory assets		546,727	507,779
Less current portion of regulatory assets		51,955	35,086
Regulatory Assets, Net		$ 494,772	$ 472,693
Regulatory Liabilities:			
Accumulated deferred investment tax credits	15.5 - 19 years	$ 12,650	$ 13,015
Excess generation service charge	(d)	-	11,418
Middletown/Norwalk local transmission network service collections	31 years	17,675	17,962
Pension and other post-retirement benefit plans	(a)	14,861	14,861
Asset removal costs	(f)	65,948	65,452
Tax reform	(h)	319,682	316,378
Other	(g)	30,352	22,760
Total regulatory liabilities		461,168	461,846
Less current portion of regulatory liabilities		22,871	17,326
Regulatory Liabilities, Net		$ 438,297	$ 444,520

(a) Life is dependent upon timing of final pension plan distribution; balance, which is fully offset by a corresponding asset/liability, is recalculated each year in accordance with ASC 715 "Compensation-Retirement Benefits." See Note (F) "Pension and Other Benefits" for additional information.

(b) The balance will be extinguished when the asset, which is fully offset by a corresponding liability; or liability has been realized or settled, respectively.

(c) Asset life is equal to delivery term of related contracts (which vary from approximately 3 - 10 years); balance fluctuates based upon quarterly market analysis performed on the related derivatives (Note J); amount, which does not earn a return, is fully offset by corresponding derivative asset/liability. See "Contracts for Differences" discussion above for additional information.

(d) Regulatory asset or liability which defers generation-related and nonbypassable federally mandated congestion costs or revenues for future recovery from or return to customers. Amount fluctuates based upon timing differences between revenues collected from rates and actual costs incurred.

(e) Regulatory asset or liability which defers transmission income or expense and fluctuates based upon actual revenues and revenue requirements.

(f) COVID-19 cost recovery represents deferred COVID-19 related costs in the state of Connecticut based on the order issued by PURA on April 29, 2020 requiring the utilities to track COVID-19 related expenses and lost revenue and create a regulatory asset.

(g) Amortization period and/or balance vary depending on the nature, cost of removal and/or remaining life of the underlying assets/liabilities; revenue decoupling mechanism and certain other amounts are not currently earning a return.

(h) Balance includes customer impacts from the remeasurement of deferred income tax balances as a result of the Tax Act enacted by the U.S. federal government on December 22, 2017. Reductions in accumulated deferred income tax balances due to the reduction in the corporate income tax rates from 35% to 21% under the provisions of the Tax Act will result in amounts previously and currently collected from customers for these deferred taxes to be refundable to such customers, generally through future rates. The amount and timing of potential settlement are determined PURA and IRS Normalization rules.

Derivatives

UI is party to contracts, and involved in transactions, that are derivatives.

Contracts for Differences (CfDs)

Pursuant to Connecticut's 2005 Energy Independence Act, PURA solicited bids to create new or incremental capacity resources in order to reduce federally mandated congestion charges, and selected four new capacity resources. To facilitate the transactions between the selected capacity resources and Connecticut electric customers, and provide the commitment necessary for owners of these resources to obtain necessary financing, PURA required that UI and The Connecticut Light and Power Company (CL&P) execute long-term contracts with the selected resources. In August 2007, PURA approved four CfDs, each of which specifies a capacity quantity and a monthly settlement that reflects the difference between a forward market price and the contract price. UI executed two of the contracts and CL&P executed the other two contracts. The costs or benefits of each contract will be paid by or allocated to customers and will be subject to a cost-sharing agreement between UI and CL&P pursuant to which approximately 20% of the cost or benefit is borne by or allocated to UI customers and approximately 80% is borne by or allocated to CL&P customers.

PURA has determined that costs associated with these CfDs will be fully recoverable by UI and CL&P through electric rates, and in accordance with ASC 980 "Regulated Operations," UI has deferred recognition of costs (a regulatory asset) or obligations (a regulatory liability). The CfDs are marked-to-market in accordance with ASC 815 "Derivatives and Hedging." For those CfDs signed by CL&P, UI records its approximate 20% portion pursuant to the cost-sharing agreement noted above. As of June 30, 2020, UI has recorded a gross derivative asset of $2.2 million, a regulatory asset of $75.0 million and a gross derivative liability of $77.2 million ($74.5 million of which is related to UI's portion of the CfD signed by CL&P). See Note (J) "Fair Value of Financial Instruments" for additional CfD information.

The gross derivative assets and liabilities as of June 30, 2020 and December 31, 2019 were as follows:

	June 30, 2020	December 31, 2019
	(In Thousands)	
Gross derivative assets:		
Current Assets	$ 372	$ 331
Deferred Charges and Other Assets	$ 1,835	$ 1,807
Gross derivative liabilties:		
Current Liabilities	$ 12,761	$ 11,442
Noncurrent Liabilities	$ 64,462	$ 63,382

The unrealized gains and losses from fair value adjustments to these derivatives, which are recorded in regulatory assets or regulatory liabilities, for the three-month periods June 30, 2020 and 2019, were as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2020	2019	2020	2019
	(In Thousands)		(In Thousands)	
Regulatory Assets - Derivative liabilities	$ (1,611)	$ (1,179)	$ 2,331	$ 1,235
Regulatory Liabilities - Derivative assets	$ -	$ -	$ -	$ -

Equity Investments

UI is party to a 50-50 joint venture with Clearway Energy, Inc., in GenConn, which operates two peaking generation plants in Connecticut. UI's investment in GenConn is being accounted for as an equity investment, the carrying value of which was $92.3 million and $93.6 million as of June 30, 2020 and December 31, 2019, respectively. As of June 30, 2020, there was an immaterial amount of undistributed earnings from UI's equity investment in GenConn.

UI's pre-tax income from its equity investment in GenConn was $2.0 million and $2.4 million for the three-month periods ended June 30, 2020 and 2019, respectively. UI's pre-tax income from its equity investment in GenConn was $3.7 million and $4.4 million for the six-month periods ended June 30, 2020 and 2019, respectively

Cash distributions from GenConn are reflected as either distributions of earnings or as returns of capital in the operating and investing sections of the Statement of Cash Flows, respectively. UI received cash distributions from GenConn of $2.0 million and $2.4 million during the three-month periods ended June 30, 2020 and 2019, respectively. UI received cash distributions from GenConn of $5.1 million and $6.5 million during the six-month periods ended June 30, 2020 and 2019, respectively.

Variable Interest Entities

UI has identified GenConn as a variable interest entity (VIE), which is accounted for under the equity method. UI is not the primary beneficiary of GenConn, as defined in ASC 810 "Consolidation," because it shares control of all significant activities of GenConn with its joint venture, Clearway Energy, Inc. As such, GenConn is not subject to consolidation. GenConn recovers its costs through CfDs, which are cost of service-based and have been approved by PURA. As a result, with the achievement of commercial operation by GenConn Devon and GenConn Middletown, UI's exposure to loss is primarily related to the potential for unrecovered GenConn operating or capital costs in a regulatory proceeding, the effect of which would be reflected in the carrying value of UI's 50% ownership position in GenConn and through "Income from Equity Investments" in UI's Financial Statements. Such exposure to loss cannot be determined at this time. For further discussion of GenConn, see "Equity Investments" as well as Note (C) "Regulatory Proceedings – Electric Distribution and Transmission – Equity Investment in Peaking Generation."

UI has identified the selected capacity resources with which it has CfDs as VIEs and has concluded that it is not the primary beneficiary as it does not have the power to direct any of the significant activities of these capacity resources. As such, UI has not consolidated the selected capacity resources. UI's maximum exposure to loss through these agreements is limited to the settlement amount under the CfDs as described in "Derivatives – Contracts for Differences (CfDs)" above. UI has no requirement to absorb additional losses nor has UI provided any financial or other support during the periods presented that were not previously contractually required.

UI has identified the entities for which it is required to enter into long-term contracts to purchase Renewable Energy Credits (RECs) as VIEs. In assessing these contracts for VIE identification and reporting purposes, UI has aggregated the contracts based on similar risk characteristics and significance to UI. UI is not the primary beneficiary as it does not have the power to direct any of the significant activities of these entities. UI's exposure to loss is primarily related to the purchase and resale of the RECs, but, any losses incurred are recoverable through electric rates. For further discussion of RECs, see Note (C) "Regulatory Proceedings – Electric Distribution and Transmission – New Renewable Source Generation."

Adoption of New Accounting Pronouncements

Changes to the disclosure requirements for fair value measurement and defined benefit plans

In August 2018, the FASB issued amendments related to disclosure requirements for both fair value measurement and defined benefit plans.

The amendments concerning fair value measurement remove, modify and add certain disclosure requirements, in order to improve the overall usefulness of the disclosures and reduce unnecessary costs to companies to prepare the disclosures. UI adopted the amendments effective January 1, 2020, with no material effect to its disclosures. Certain amendments are to be applied prospectively, and all others are to be applied retrospectively.

The amendments concerning disclosure requirements for defined benefit plans are narrow in scope and apply to all employers that sponsor defined benefit pension or other postretirement plans. The amendments change annual disclosures requirements, including removal of disclosures that are no longer considered cost beneficial, adding certain new relevant disclosures and clarifying specific requirements of disclosures concerning information for defined benefit pension plans. UI adopted the amendments effective January 1, 2020, and they will not materially affect the disclosures for the fiscal year ending December 31, 2020. As required, the application will be on a retrospective basis.

Clarifying guidance for certain collaborative arrangements with respect to revenue recognition

The FASB issued amendments in November 2018 to clarify the interaction between the guidance for certain collaborative arrangements and the guidance applicable to ASC 606. A collaborative arrangement is a contractual arrangement under which two or more parties actively participate in a joint operating activity and are exposed to significant risks and rewards that depend on the activity's commercial success. The targeted improvements clarify that certain transactions between collaborative arrangement participants are within the scope of ASC 606 and thus subject to all of its guidance. UI adopted the amendments effective January 1, 2020, with no material effect to its results of operations, financial position, cash flows and disclosures. As required, UI retrospectively applied the amendments to the date of our initial application of ASC 606.

Accounting Pronouncements Issued But Not Yet Adopted

The following are new accounting pronouncements issued as indicated, that UI has evaluated or is evaluating to determine their effect on its financial statements.

Simplifying the accounting for income taxes

In December 2019, the FASB issued an accounting standards update that is intended to reduce complexity in accounting for income taxes. The amendments remove specific exceptions to the general principles in ASC 740, Income Taxes, eliminating the need for an entity to analyze whether the following apply in a given period: (1) exception to the incremental approach for intra-period tax allocation, (2) exceptions to accounting for basis differences when there are ownership changes in foreign investments and (3) exception in interim period income tax accounting for year-to-date losses that exceed anticipated losses. The amendments also improve financial statement preparers' application of income-tax related guidance and simplify U. S. GAAP for (1) franchise taxes that are partially based on income, (2) transactions with a government that result in a step up in the tax basis of goodwill, (3) separate financial statements of legal entities that are not subject to tax and (4) enacted changes in tax laws in interim periods. The amendments are effective for public business entities for fiscal years beginning after December 15, 2020, and interim periods within those fiscal years. Early adoption is permitted, including adoption in any interim period for which financial statements have not been issued, with adoption of all amendments in the same period. Application is on a retrospective and/or modified retrospective basis, or a prospective basis, depending on the amendment aspect. UI expects its adoption will not materially affect its results of operations, financial position, and cash flows.

Facilitation of the effects of reference rate reform on financial reporting

In March 2020, the FASB issued amendments to provide temporary optional guidance to entities to ease the potential burden in accounting for, or recognizing the effects of, reference rate reform on financial reporting. The amendments respond to concerns about structural risks of interbank offered rates, and particularly, the risk of cessation of the London Interbank Offered Rate (LIBOR). The guidance is elective and applies to all entities, subject to meeting certain criteria, that have contracts, hedging relationships, and other transactions that reference LIBOR or another reference rate expected to be discontinued due to reference rate reform, around the end of 2021. The guidance applies to contracts that have modified terms that affect, or have the potential to affect, the amount or timing of contractual cash flows resulting from the discontinuance of the reference rate reform. The amendments are effective for all entities as of March 12, 2020, through December 31, 2022, although the FASB has indicated it will monitor developments in the marketplace and consider whether developments warrant an extension. UI expects the adoption will not materially affect its results of operations, financial position and cash flows.

(B) CAPITALIZATION

Common Stock

UI had 100 shares of common stock, no par value, outstanding at June 30, 2020 and December 31, 2019.

(C) REGULATORY PROCEEDINGS

Rates

Utilities are entitled by Connecticut statutes to charge rates that are sufficient to allow them an opportunity to cover their reasonable operating and capital costs, to attract needed capital and to maintain their financial integrity, while also protecting relevant public interests.

UI's approved three-year distribution rate schedules became effective January 1, 2017 and include, among other things, annual tariff increases and an ROE of 9.10% based on a 50% equity ratio, continuation of UI's existing earnings sharing mechanism (ESM) pursuant to which UI and its customers share on a 50/50 basis all distribution earnings above the allowed ROE in a calendar year, continuation of the existing decoupling mechanism, and the continuation of a requested storm reserve. Any dollars due to customers from the ESM continue to be first applied against any storm regulatory asset balance (if one exists at that time) or refunded to customers through a bill credit if such storm regulatory asset balance does not exist. UI continues to charge the rates that were in effect at the end of the rate plan.

Power Supply Arrangements

Under Connecticut law, UI's retail electricity customers are able to choose their electricity supplier while UI remains their electric distribution company. UI purchases power for those of its customers under standard service rates who do not choose a retail electric supplier and have a maximum demand of less than 500 kilowatts and its customers under supplier of last resort service for those who are not eligible for standard service and who do not choose to purchase electric generation service from a retail electric supplier. The cost of the power is a "pass-through" to those customers through the GSC charge on their bills.

UI must procure the power to serve its standard service load pursuant to a procurement plan approved by PURA. Under the procurement plan UI procures wholesale power for its standard service customers on a full requirements basis pursuant to contracts with a maximum duration of 12 months, with the delivery of such wholesale power to commence no later than one year from the applicable bid day.

UI has wholesale power supply agreements in place for its entire standard service load for 2020, and 70% for the first half of 2021. Supplier of last resort service is procured on a quarterly basis, however, from time to time there are no bidders in the procurement process for supplier of last resort service and in such cases UI manages the load directly.

UI determined that its contracts for standard service and supplier of last resort service are derivatives under ASC 815 "Derivatives and Hedging" and elected the "normal purchase, normal sale" exception under ASC 815 "Derivatives and Hedging." UI regularly assesses the accounting treatment for its power supply contracts. These wholesale power supply agreements contain default provisions that include required performance assurance, including certain collateral obligations, in the event that UI's credit rating on senior debt were to fall below investment grade. If such an event had occurred as of June 30, 2020, UI would have had to post an aggregate of approximately $13.2 million in collateral.

New Renewable Source Generation

Under Connecticut Public Act (PA) 11-80, Connecticut electric utilities are required to enter into long-term contracts to purchase Connecticut Class I RECs from renewable generators located on customer premises. Under this program, UI is required to enter into contracts totaling approximately $200 million in commitments over an approximate 21-year period. The obligations were initially expected to phase in over a six-year solicitation period and peak at an annual commitment level of about $14 million per year after all selected projects are online. PA 17-144, PA 18-50, and PA 19-35 extended the original six-year solicitation period of the program by adding seventh, eighth, ninth, and tenth years, and increased the original funding level of this program by adding up to $64 million in additional commitments by UI. Upon purchase, UI accounts for the RECs as inventory. UI expects to partially mitigate the cost of these contracts through the resale of the RECs. PA 11-80 provides that the remaining costs (and any benefits) of these contracts, including any gain or loss resulting from the resale of the RECs, are fully recoverable from (or credited to) customers through electric rates.

In October of 2018, UI entered into five PPAs totaling approximately 50 MW from developers of offshore wind and fuel cell generation. These PPAs originated from an RFP issued by DEEP, under PA 17-144 which provides that the net costs of the PPAs are recoverable through electric rates. The PPAs were filed for PURA approval on October 25, 2018. On December 19, 2018, PURA issued its final decision approving the five PPAs, and approved UI's use of the non by-passable federally mandated congestion charges for all customers to recover the net costs of the PPAs.

On December 28, 2018, DEEP issued a directive to UI to negotiate and enter into PPAs with twelve projects, totaling approximately 12 million MWh, that were selected as a result of the Zero Carbon RFP issued by DEEP pursuant to PA 17-3, which provides that the net costs of the PPAs are recoverable through electric rates. One of the selected projects is the Millstone nuclear facility located in Waterford, Connecticut which is owned by Dominion Energy, Inc. UI completed negotiations and executed the PPA with the Millstone nuclear facility. UI filed the PPA with PURA on March 29, 2019, and PURA approved the PPA in September 2019. UI finalized negotiations and executed ten PPAs with ten of the remaining selected projects that were filed with PURA on May 31, 2019. At the direction of PURA, UI refiled Amended and Restated PPA's for nine of these projects in November 2019 and PURA approved those nine PPAs also in November 2019. The remaining PPA has been executed and submitted for approval to PURA. The twelfth selected project has declined to continue negotiations.

In August 2019, DEEP issued a RFP for up to 2,000 MW of offshore wind. On December 5, 2019, DEEP announced that it had selected Vineyard Wind, an affiliate of UI, to provide 804 MW of offshore wind through the development of its Park City Wind Project. DEEP also ordered Eversource and UI to negotiate PPAs with Vineyard Wind. Similar to the case with the zero carbon PPAs discussed above, the net costs of the PPAs are recoverable through electric rates. The PPA was filed for PURA approval on May 21, 2020.

Transmission

PURA decisions do not affect the revenue requirements determination for UI's transmission business, including the applicable ROE. UI's transmission rates are determined by a tariff regulated by the FERC and administered by ISO New England, Inc. (ISO-NE). Transmission rates are set annually pursuant to a FERC authorized formula that allows for recovery of direct and allocated transmission operating and maintenance expenses, and for a return of and on investment in assets. For 2020, UI is using an estimated overall allowed weighted-average ROE for its transmission business of 11.26% as of June 30, 2020.

On December 28, 2015, the FERC issued an order instituting section 206 proceedings and establishing hearing and settlement judge procedures. Pursuant to section 206 of the FPA, the FERC instituted proceedings because it found that ISO-NE Transmission, Markets, and Services Tariff is unjust, unreasonable, and unduly discriminatory or preferential. The FERC stated that ISO-NE's Tariff lacks adequate transparency and challenge procedures with regard to the formula rates for ISO-NE Participating Transmission Owners (PTOs), including UI. The FERC also found that the current Regional Network Service (RNS) and Local Network Service (LNS) formula rates appear to be unjust, unreasonable, unduly discriminatory or preferential or otherwise unlawful as the formula rates appear to lack sufficient detail in order to determine how certain costs are derived and recovered in the formula rates. On August 17, 2018, the PTOs submitted a formula rate settlement proposal, which was contested by certain parties, yet supported by the presiding judge. On May 22, 2019, FERC rejected the settlement and on June 15, 2020, the PTOs submitted an uncontested formula rate settlement. The PTOs requested that FERC approve the settlement by November 1, 2020, and make the formula rate tariff sheets effective on January 1, 2021. If, however, FERC approves the settlement after November 1, 2020, the PTOs requested that FERC make formula rate tariff sheets effective on the first January 1st that is at least two months after FERC approves the settlement. UI is unable to predict the outcome of this proceeding at this time.

On September 30, 2011, the Massachusetts Attorney General, DPU, PURA, New Hampshire Public Utilities Commission, Rhode Island Division of Public Utilities and Carriers, Vermont Department of Public Service, numerous New England consumer advocate agencies and transmission tariff customers collectively filed a joint complaint with the FERC, pursuant to sections 206 and 306 of the Federal Power Act, against several New England Transmission Owners (NETOs), including UI, claiming that the current approved base ROE of 11.14% used by NETOs in calculating formula rates for transmission service under the ISO-New England Open Access Transmission Tariff (OATT) was not just and reasonable and seeking a reduction of the base ROE with refunds to customers for the 15-month refund periods beginning October 1, 2011 (Complaint I), December 27, 2012 (Complaint II), July 31, 2014 (Complaint III) and April 29, 2016 (Complaint IV).

On October 16, 2014, the FERC issued its decision in Complaint I setting the base ROE at 10.57% and a maximum total ROE of 11.74% (base plus incentive ROEs) for the October 2011 – December 2012 period as well as prospectively from October 16, 2014. On March 3, 2015, the FERC upheld its decision and further clarified that the 11.74% ROE cap will be applied on a project specific basis and not on a transmission owner’s total average transmission return. The complaints were consolidated and the administrative law judge issued an initial decision on March 22, 2016. The initial decision determined that, (1) for the fifteen month refund period in Complaint II, the base ROE should be 9.59% and that the ROE Cap (base ROE plus incentive ROEs) should be 10.42% and (2) for the fifteen month refund period in Complaint III and prospectively, the base ROE should be 10.90% and that the ROE Cap should be 12.19%. The initial decision in Complaints II and III is the administrative law judge’s recommendation to the FERC Commissioners.

UI reserved for refunds for Complaints I, II and III consistent with the FERC’s March 3, 2015 decision in Complaint I. Refunds were provided to customers for Complaint I. UI’s total reserve associated with Complaints II and III is $7.2 million as of June 30, 2020, which has not changed since December 31, 2019, except for the accrual of carrying costs. If adopted as final by the FERC, the impact of the initial decision by the FERC administrative law judge would be an additional aggregate reserve for Complaints II and III of $4.3 million, which is based upon currently available information for these proceedings.

Following various intermediate hearings, orders and appellate decisions, on October 16, 2018, the FERC issued an order directing briefs and proposing a new methodology to calculate the NETOs ROE that is contained in NETOs’ transmission formula rate on file at the FERC (the October 2018 Order). Pursuant to the October 2018 Order, the NETOs filed initial briefs on the proposed methodology in all four Complaints on January 11, 2019 and replied to the initial briefs on March 8, 2019.

On November 21, 2019, the FERC issued rulings on two complaints challenging the base return on equity for Midcontinent Independent System Operator, or MISO transmission owners. These rulings established a new zone of reasonableness based on equal weighting of the DCF and capital-asset pricing model for establishing the base return on equity. This resulted in a base return on equity of 9.88% as the midpoint of the zone of reasonableness. Various parties have requested rehearing on this decision, which was granted. On May 21, 2020, FERC issued a ruling, which, among other things, adjusted the methodology to determine the MISO transmission owners’ ROE, resulting in an increase in ROE from 9.88% to 10.02% by utilizing the risk premium model in addition to the DCF model and capital-asset pricing model under both prongs of Section 206 of the FPA, and calculated the zone of reasonableness into equal thirds rather than employing the quartile approach. UI cannot predict the outcome of these proceedings, including the potential impact the MISO transmission owners' ROE proceeding may have in establishing a precedent for the pending four Complaints.

Equity Investment in Peaking Generation

UI is party to a 50-50 joint venture with Clearway Energy, Inc. in GenConn, which operates two peaking generation plants in Connecticut. The two peaking generation plants, GenConn Devon and GenConn Middletown, are both participating in the ISO-New England markets. PURA had approved revenue requirements for the period from January 1, 2020 through December 31, however GenConn filed to reopen the related docket with PURA on April 3, 2020, for the purposes of resetting 2020 revenue requirements after a recalculation of excess deferred income taxes. GenConn expects the results of this reopened filing to occur prior to the final decisions associated with its planned 2021 revenue requirements filing which is expected in the fourth quarter of 2020.

(D) SHORT-TERM CREDIT ARRANGEMENTS

UI funds short-term liquidity needs through an agreement among Avangrid's regulated utility subsidiaries (the Virtual Money Pool Agreement), a bi-lateral intercompany credit agreement with Avangrid (the Bi-Lateral Intercompany Facility) and a bank provided credit facility to which UI is a party (the Avangrid Credit Facility), each of which are described below.

The Virtual Money Pool Agreement is an agreement among the investment grade-rated, regulated utility subsidiaries of Avangrid under which the parties to this agreement may lend to or borrow from each other. This Agreement allows Avangrid to optimize cash resources within the regulated utility companies which are prohibited by regulation from lending to unregulated affiliates. The interest rate on transactions under this agreement is the A2/P2 non-financial 30-day commercial paper rate published by the Federal Reserve. UI has a lending/borrowing limit of $100 million under this agreement. As of June 30, 2020, there was $1.6 million outstanding under this agreement. There were no borrowings under this agreement as of December 31, 2019. There were no note receivables under this arrangement as of June 30, 2020 and December 31, 2019.

The Bi-Lateral Intercompany Facility provides for borrowing of up to $500 million from Avangrid at the A2/P2 non-financial 30-day commercial paper rate published by the Federal Reserve. There were $24.2 million in borrowings under this agreement as of June 30, 2020. There were no borrowings under this agreement as of December 31, 2019.

On June 29, 2020, Avangrid, Inc. and its subsidiaries, including UI, entered into a revolving credit facility agreement with a several lenders (the 2020 Avangrid Credit Facility) that provides for maximum borrowings up to $$2.5 billion in the aggregate. The 2020 Avangrid Credit Facility replaces and supersedes the prior revolving credit facility entered into by Avangrid, Inc. and its subsidiaries on June 29, 2018, which provided maximum borrowings of up to $2.5 billion in the aggregate.

Under the 2020 Avangrid Credit Facility, UI has a maximum sublimit of $400 million. Additionally, under the Avangrid Credit Facility, each of the borrowers, including UI, will pay an annual facility fee that is dependent on their credit rating. The facility fees will range from 15 to 30 basis points. The maturity date for the Avangrid Credit Facility is June 28, 2021. As of June 30, 2020 and December 31, 2019, UI did not have any outstanding borrowings under the 2020 Avangrid Credit Facility.

(E) INCOME TAXES

The significant portion of UI's income tax expense, including deferred taxes, is recovered through its regulated utility rates. UI's annual income tax expense and associated effective tax rate is impacted by differences between the timing of deferred tax temporary difference activity and deferred tax recovery. UI's effective tax rate is also impacted by permanent differences between the book and tax treatment of certain costs. UI uses an estimated annual effective tax rate approach to calculate interim period income tax expense for ordinary income. UI also records separate income tax effects for significant unusual or infrequent items. The annualized effective income tax rates for the three-month period ended June 30, 2020 and 2019 were 20.19% and 17.35% respectively.

(F) PENSION AND OTHER BENEFITS

UI made pension contributions of $9.8 million during the six months ended June 30, 2020. UI currently expects to make additional pension contributions of approximately $22.9 million in 2020. Such contribution levels will be adjusted, if necessary, based on actuarial calculations.

The following table represents the components of net periodic benefit cost for pension and other postretirement benefits (OPEB) as well as the actuarial weighted-average assumptions used in calculating net periodic benefit costs for the three-month and six-month periods ended June 30, 2020 and 2019:

	Three Months Ended June 30,			
	Pension Benefits		Other Post-Retirement	
	2020	2019	2020	2019
	(In Thousands)			
Components of net periodic benefit cost:				
Service cost	$ 1,336	$ 1,298	$ 163	$ 189
Interest cost	4,813	5,553	457	563
Expected return on plan assets	(7,082)	(6,024)	(422)	(404)
Amortization of:				
Prior service costs	-	(602)	(384)	(384)
Actuarial (gain) loss	5,822	5,795	(200)	(275)
Net periodic benefit cost	$ 4,889	$ 6,020	$ (387)	$ (312)

	Six Months Ended June 30,			
	Pension Benefits		Other Post-Retirement	
	2020	2019	2020	2019
	(In Thousands)			
Components of net periodic benefit cost:				
Service cost	$ 2,672	$ 2,597	$ 326	$ 377
Interest cost	9,625	11,106	913	1,126
Expected return on plan assets	(14,163)	(12,049)	(844)	(808)
Amortization of:				
Prior service costs	-	(1,204)	-	(769)
Actuarial (gain) loss	11,645	11,589	-	(550)
Net periodic benefit cost	$ 9,779	$ 12,039	$ 395	$ (623)
Discount rate	3.19%	4.09%	3.19%	4.09%
Average wage increase	3.80%	3.80%	N/A	N/A
Return on plan assets	7.40%	7.40%	6.25%	6.25%
Health care trend rate (current year - pre/post-65)	N/A	N/A	6.75%/5.50%	7.00%/5.75
Health care trend rate (2029/2025 - pre/post-65)	N/A	N/A	4.50%/4.50%	4.50%/4.50

N/A – not applicable

(G) RELATED PARTY TRANSACTIONS

During the six-month periods ended June 30, 2020 and 2019, UI received cash distributions from GenConn. See Note (A) Business Organization and Statement of Accounting Policies – Equity Investments.

Inter-company Transactions

UI receives various administrative and management services from and enters into certain inter-company transactions with UIL Holdings and its subsidiaries. For the six-month periods ended June 30, 2020 and 2019, UI recorded inter-company expenses of $26.3 million and $29.1 million, respectively, which consisted primarily of operation and maintenance expenses. Costs of the services that are allocated amongst UI and other of UIL Holdings' regulated subsidiaries are settled periodically by way of inter-company billings and wire transfers and are included in Accounts receivable from affiliates and Accounts payable to affiliates in the accompanying balance sheets.

Dividends/Capital Contributions

For the six-month period ended June 30, 2020, UI paid $40 million in dividends to UIL Holdings. For the six-month period ended June 30, 2019, UI did not pay dividends to UIL Holdings.

(H) COMMITMENTS AND CONTINGENCIES

In the ordinary course of business, UI and its subsidiaries are involved in various proceedings, including legal, tax, regulatory and environmental matters, which require management's assessment to determine the probability of whether a loss will occur and, if probable, an estimate of probable loss. When assessments indicate that it is probable that a liability has been incurred and an amount can be reasonably estimated, UI accrues a reserve and discloses the reserve and related matter. UI discloses material matters when losses are probable but for which an estimate cannot be reasonably estimated or when losses are not probable but are reasonably possible. Subsequent analysis is performed on a periodic basis to assess the impact of any changes in events or circumstances and any resulting need to adjust existing reserves or record additional reserves. However, given the inherent unpredictability of these legal and regulatory proceedings, we cannot assure you that our assessment of such proceedings will reflect the ultimate outcome, and an adverse outcome in certain matters could have a material adverse effect on our results of operations or cash flows.

Connecticut Yankee Atomic Power Company

UI has a 9.5% stock ownership share in the Connecticut Yankee Atomic Power Company, an inactive nuclear generating company (Connecticut Yankee), which has completed the physical decommissioning of its generation facilities and is now engaged primarily in the long-term storage of its spent nuclear fuel. Connecticut Yankee collects its costs through wholesale FERC-approved rates from UI and several other New England utilities. UI recovers these costs from its customers through electric rates.

Every six years, pursuant to the statute of limitations, Connecticut Yankee needs to file a lawsuit to recover damages from the Department of Energy (the "Government") for breach of the Nuclear Spent Fuel Disposal Contract to remove Spent Nuclear Fuel and Greater than Class C Waste as required by contract and the Nuclear Waste Policy Act beginning in 1998. The damages are the incremental costs for the Government's failure to take the spent nuclear fuel.

From 2012 to 2016 Connecticut Yankee filed three claims against the DOE (Phase I, II and III) for the years from 1995 to 2012 and received damage awards, which flow through Connecticut Yankee to shareholders (including UI) based on its' percentage of ownership) to reduce retail customer charges. UI refunded its share of such awards to its customers through the nonbypassable federally mandated congestion charge. On May 22, 2017, Connecticut Yankee filed its next case (Phase IV) in the Federal Court of Claims (Court), seeking damages for the period from January 1, 2013 through December 31, 2016 and submitted their claimed Phase IV damages to the DOE in late August 2017. The Court issued its decision on the Phase IV trial on February 21, 2019, awarding Connecticut Yankee $40.7 million. On April 23, 2019, the notice of appeal period expired and the Phase IV trial award became final. The Government has paid Connecticut Yankee the full amount of the damage award which will not be distributed to shareholders and will instead be used to meet its obligations, including storing spent nuclear fuel safely and reliably for 15 years and to pay down its obligation to pay the DOE a one-time fee in connection with pre-1983 spent nuclear fuel.

The trial court decisions, the appeals court decisions in this case, and legal precedents, provide strong support that the Yankee Companies will continue to recover future costs caused by the Government's breach. The Company cannot predict the exact outcome or the timing of these proceedings.

Environmental Matters

In complying with existing environmental statutes and regulations and further developments in areas of environmental concern, including legislation and studies in the fields of water quality, hazardous waste handling and disposal, toxic substances, climate change and electric and magnetic fields, UI may incur substantial capital expenditures for equipment modifications and additions, monitoring equipment and recording devices, as well as additional operating expenses. The total amount of these expenditures is not now determinable. Environmental damage claims may also arise from the operations of our subsidiaries. Significant environmental issues known to UI at this time are described below.

Site Decontamination, Demolition and Remediation Costs

English Station

In January 2012, Evergreen Power, LLC (Evergreen Power) and Asnat Realty LLC (Asnat), then owners of a former generation site on the Mill River in New Haven (English Station) that UI sold to Quinnipiac Energy in 2000, filed a lawsuit in federal district court in Connecticut related to environmental remediation at the English Station site. This proceeding was stayed in 2014 pending resolutions of other proceedings before the Connecticut Department of Energy and Environmental Protection (DEEP) concerning the English Station site. In December 2016, the court administratively closed the file without prejudice to reopen upon the filing of a motion to reopen by any party.

In December 2013, Evergreen Power and Asnat filed a subsequent lawsuit related to the English Station site. On April 16, 2018, the plaintiffs filed a revised complaint alleging fraud and unjust enrichment against UIL Holdings and UI and adding former UIL Holdings officers as named defendants alleging fraud. On February 21, 2019, the court granted our Motion to Strike with respect to all counts except for the count against UI for unjust enrichment. The counts stricken include all counts against the individual defendants as well as against UIL Holdings. The plaintiffs have appealed the court's decision to strike. UI cannot predict the outcome of this matter.

On April 8, 2013, DEEP issued an administrative order addressed to UI, Evergreen Power, Asnat and others, ordering the parties to take certain actions related to investigating and remediating the English Station site. This proceeding was stayed while DEEP and UI continue to work through the remediation process pursuant to the consent order described below. Status reports are periodically filed with DEEP.

On August 4, 2016, DEEP issued a partial consent order (the consent order), that, subject to its terms and conditions, requires UI to investigate and remediate certain environmental conditions within the perimeter of the English Station site. Under the consent order, to the extent that the cost of this investigation and remediation is less than $30 million, UI will remit to the State of Connecticut the difference between such cost and $30 million to be used for a public purpose as determined in the discretion of the Governor of the State of Connecticut, the Attorney General of the State of Connecticut and the Commissioner of DEEP. UI is obligated to comply with the terms of the consent order even if the cost of such compliance exceeds $30 million. Under the terms of the consent order, the State will discuss options with UI on recovering or funding any cost above $30 million such as through public funding or recovery from third parties; however, it is not bound to agree to or support any means of recovery or funding. UI has initiated its process to investigate and remediate the environmental conditions within the perimeter of the English Station site pursuant to the consent order.

As of June 30, 2020 and December 31, 2019, the remaining amount reserved for this matter was $17.4 million and $16.4 million, respectively. UI cannot predict the outcome of this matter.

On April 24, 2020, ACV Environmental Services Company (ACV) filed a lawsuit in Connecticut Superior Court against UI arising out of a contract dispute for services rendered by ACV in the demolition of the Station B at the English Station site. The complaint seeks damages in the amount of $5 million on claims of breach of contract, breach of the covenant of good faith and fair dealing, quantum merit, and unjust enrichment. The claims arise from the alleged non-payment of certain change order requests. UI cannot predict the outcome of this matter.

Other

In May 2019, UI obtained an updated remediation evaluation of the property adjacent to the New Haven Harbor Generating Station. As a result, UI recorded an additional $6.0 million reserve in June 2019, the minimum of the range of remediation estimates. As of June 30, 2020 and December 31, 2019, the amount reserved for this property was $7.8 million.

THE UNITED ILLUMINATING COMPANY

NOTES TO FINANCIAL STATEMENTS

(I) FAIR VALUE MEASUREMENTS

As required by ASC 820 "Fair Value Measurements and Disclosures," financial assets and liabilities are classified in their entirety, based on the lowest level of input that is significant to the fair value measurement. UI's assessment of the significance of a particular input to the fair value measurement requires judgment, and may affect the valuation of the fair value of assets and liabilities and their placement within the fair value hierarchy levels.

The following tables set forth the fair value of UI's financial assets and liabilities, other than pension benefits and other postretirement benefits, as of June 30, 2020 and December 31, 2019:

	Fair Value Measurements Using			
	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
June 30, 2020		(In Thousands)		
Assets:				
Derivative assets	$ -	$ -	2,207	$ 2,207
Supplemental retirement benefit trust life insurance policies	-	11,453	-	11,453
	-	11,453	2,207	13,660
Liabilities:				
Derivative liabilities	-	-	77,223	77,223
	-	-	77,223	77,223
Net fair value assets/(liabilities), June 30, 2020	$ -	$ 11,453	$ (75,016)	$ (63,563)
December 31, 2019				
Assets:				
Derivative assets	$ -	$ -	$ 2,138	$ 2,138
Supplemental retirement benefit trust life insurance policies	-	12,568	-	12,568
	-	12,568	2,138	14,706
Liabilities:				
Derivative liabilities	-	-	74,824	74,824
	-	-	74,824	74,824
Net fair value assets/(liabilities), December 31, 2019	$ -	$ 12,568	$ (72,686)	$ (60,118)

Fair value measurements categorized in Level 3 of the fair value hierarchy are prepared by individuals with expertise in valuation techniques, pricing of energy and energy-related products, and accounting requirements. The derivative assets consist primarily of CfDs. The determination of fair value of the CfDs was based on a probability-based expected cash flow analysis that was discounted at the June 30, 2020 or December 31, 2019 risk-free interest rates, as applicable, and an adjustment for non-performance risk using credit default swap rates. Certain management assumptions were required, including development of pricing that extended over the term of the contracts. UI believes this methodology provides the most reasonable estimates of the amount of future discounted cash flows associated with the CfDs.

Additionally, on a quarterly basis, UI performs analytics to ensure that the fair value of the derivatives is consistent with changes, if any, in the various fair value model inputs. Additional quantitative information about Level 3 fair value measurements is as follows:

	Unobservable Input	Range at June 30, 2020	Range at December 31, 2019
Contracts for differences	Risk of non-performance	0.76% - 0.98%	0.05% - 0.45%
	Discount rate	0.29% - 0.49%	1.69% - 1.83%
	Forward pricing ($ per MW)	$2.00 - $5.30	$3.80 - $7.03

Significant isolated changes in the risk of non-performance, the discount rate or the contract term pricing would result in an inverse change in the fair value of the CfDs.

The determination of the fair value of the supplemental retirement benefit trust life insurance policies was based on quoted prices as of June 30, 2020 and December 31, 2019 in the active markets for the various funds within which the assets are held.

The following tables set forth a reconciliation of changes in the fair value of the assets and liabilities above that are classified as Level 3 in the fair value hierarchy for the six month period ended June 30, 2020:

	Six Months Ended June 30, 2020 (In Thousands)	
Net derivative assets/(liabilities), December 31, 2019	$	(72,686)
Unrealized gains and (losses), net		(2,330)
Net derivative assets/(liabilities), June 30, 2020	$	(75,016)
Change in unrealized gains (losses), net relating to net derivative	$	(2,330)
