Independent Auditors' Report

Shareholder and Board of Directors
The United Illuminating Company:

Opinion

We have audited the financial statements of The United Illuminating Company (the Company), which comprise the balance sheets as of December 31, 2025 and 2024, and the related statements of income, comprehensive income, changes in common stock equity, and cash flows for the years then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2025 and 2024, and the results of its operations and its cash flows for the years then ended in accordance with U.S. generally accepted accounting principles.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with U.S. generally accepted accounting principles, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

KPMG LLP, a Delaware limited liability partnership, and its subsidiaries are part of the KPMG global organization of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

Note 1. Significant Accounting Policies

***Background and nature of operations*:** The United Illuminating Company (UI, the company, we, our, us) is a regulated operating electric public utility engaged in the purchase, transmission, distribution, and sale of electricity for residential, commercial and industrial purposes. UI is regulated as an electric distribution company by the Connecticut Public Utilities Regulatory Authority (PURA) and is also subject to regulation by the Federal Energy Regulatory Commission (FERC). UI serves approximately 348,200 customers as of December 31, 2025 in its service territory of approximately 335 square miles in southwestern Connecticut.

UI is a wholly-owned subsidiary of UIL Holdings Corporation (UIL Holdings). UIL Holdings, whose primary business is ownership of its operating regulated utility businesses, is a wholly-owned subsidiary of Avangrid Networks, Inc. (Networks), which is a wholly-owned subsidiary of Avangrid, Inc., which is a wholly-owned subsidiary of Iberdrola, S.A., a corporation organized under the law of the Kingdom of Spain.

Agreement and Plan of Merger: On May 17, 2024, AGR entered into an Agreement and Plan of Merger (the Merger Agreement) with Iberdrola and Arizona Merger Sub, Inc (Merger Sub). As a result of the consummation of the Merger on December 23, 2024 (closing date), Merger Sub merged with and into Avangrid (the Merger), with Avangrid continuing as the surviving corporation and a wholly-owned subsidiary of Iberdrola. On the closing date, each share of common stock issued and outstanding immediately prior to the closing date (other than common stock owned by the Merger, Merger Sub or any other direct or indirect wholly owned Subsidiary of the Merger, and in each case not held on behalf of the third parties (collectively, the Excluded Shares)) was converted into a right to receive $35.75 per share of common stock in cash, without interest.

On the closing date, (i) all shares of common stock ceased to be outstanding, were cancelled and ceased to exist and (ii) each Excluded Share ceased to be outstanding and was cancelled without payment of any consideration and ceased to exist. As a result of the consummation of the Merger on December 23, 2024, Iberdrola became the direct owner of 100 shares of common stock of Avangrid which represents the only outstanding capital of the Company. On the closing date, the New York Stock Exchange (NYSE) filed with the Securities and Exchange Commission (the SEC) a notification of removal from listing on Form 25 in order to delist the common stock from the NYSE and deregister the common stock under Section 12(b) of the Securities Exchange Act of 1934, as amended (the Exchange Act). Following the effectiveness of the Form 25, on January 2, 2025, Avangrid filed with the SEC a Form 15 requesting the termination of registration of the common stock under Section 12(g) of the Exchange Act and the suspension of reporting obligations under Section 13 and 15(d) of the Exchange Act with respect to the common stock.

***Basis of presentation*:** The accompanying financial statements have been prepared in accordance with generally accepted accounting principles in the United States (U.S. GAAP).

***Significant Accounting Policies*:** We consider the following policies to be the most significant in understanding the judgments that are involved in preparing our financial statements:

***Revenue recognition*:** We recognize revenues when we transfer control of promised goods or services to our customers in an amount that reflects the consideration we expect to be entitled to in exchange for those goods or services. Refer to Note 4 for further details.

***Regulatory accounting*:** We account for our regulated operations in accordance with the authoritative guidance applicable to entities with regulated operations that meet the following criteria: (i) rates are established or approved by an independent, third-party regulator; (ii) rates are designed to recover the entity's specific costs of providing the regulated services or products and;

(iii) there is a reasonable expectation that rates are set at levels that will recover the entity's costs and can be collected from customers. Regulatory assets primarily represent incurred costs that have been deferred because of their probable future recovery from customers through regulated rates. Regulatory liabilities represent: (i) the excess recovery of costs or accrued credits that have been deferred because it is probable such amounts will be returned to customers through future regulated rates; or (ii) billings in advance of expenditures for approved regulatory programs.

We amortize regulatory assets and liabilities and recognize the related expense or revenue in our statements of income consistent with the recovery or refund included in customer rates. We believe it is probable that our currently recorded regulatory assets and liabilities will be recovered or settled in future rates.

***Equity method investments*:** We account for joint ventures and other equity investments that do not meet consolidation criteria using the equity method. We reflect earnings (losses) recognized under the equity method in the statements of income as "Earnings (losses) from equity method investments." We recognize dividends received from equity method investments as a reduction in the carrying amount of the investment and not as dividend income. We assess and record an impairment of our equity method investments in earnings for a decline in value that we determine to be other than temporary.

***Utility plant*:** We account for utility plant at historical cost. In cases where we are required to dismantle installations or to recondition the site on which they are located, we record the estimated cost of removal or reconditioning as an asset retirement obligation (ARO) and add an equal amount to the carrying amount of the asset.

Development and construction of our various facilities are carried out in stages. We expense project costs during early stage development activities. Once we achieve certain development milestones and it is probable that we can obtain future economic benefits from a project, we capitalize salaries and wages for persons directly involved in the project, and engineering, permits, licenses, wind measurement and insurance costs. We periodically review development projects in construction for any indications of impairment.

We transfer assets from “Construction work in progress” to “Utility plant” when they are available for service.

We determine depreciation expense for utility plant in service using the straight-line method, based on the average service lives of groups of depreciable property, which include estimated cost of removal. Consistent with FERC accounting requirements, we charge the original cost of utility plant retired or otherwise disposed of to accumulated depreciation. Our composite rates for depreciation were 2.8% of average depreciable property for 2025 and 2.7% of average depreciable property for 2024. We amortize our capitalized software cost, which is included in other plant, using the straight line method, based on useful lives of 1-15 years. Capitalized software costs were approximately $321.1 million as of December 31, 2025, and $314.5 million as of December 31, 2024. Depreciation expense was $108.5 million in 2025 and $100.5 million in 2024. Amortization of capitalized software was $16.5 million in 2025 and $18.6 million in 2024.

We charge repairs and minor replacements to operating expenses, and capitalize renewals and betterments, including certain indirect costs.

Allowance for funds used during construction (AFUDC) is a non-cash item that represents the allowed cost of capital, including a return on equity (ROE), used to finance construction projects. We record the portion of AFUDC attributable to borrowed funds as a reduction of interest expense and record the remainder as other income. AFUDC rates are determined in accordance with

applicable FERC guidelines for each regulated utility using an annual rate that is compounded semiannually.

Our balances of major classes of utility plant and associated useful lives are shown below as of December 31:

Utility Plant	Estimated useful life range (years)	2025	2024
(Thousands)			
Distribution	5-75	$ 2,222,054	$ 2,221,057
Transmission	5-60	1,497,998	1,370,091
Other	1-58	534,970	505,298
Total Utility Plant in Service		**4,255,022**	**4,096,446**
Total accumulated depreciation		(1,310,433)	(1,235,332)
Total Net Utility Plant in Service		**2,944,589**	**2,861,114**
Construction work in progress		333,858	284,497
Total Utility Plant		**$ 3,278,447**	**$ 3,145,611**

***Leases*:** We determine if an arrangement is a lease at inception. We classify a lease as a finance lease if it meets any one of specified criteria that in essence transfers ownership of the underlying asset to us by the end of the lease term. If a lease does not meet any of those criteria, we classify it as an operating lease. On our balance sheets, we include, for operating leases: "Operating lease right-of-use (ROU) assets" and "Operating lease liabilities (current and non-current)"; and for finance leases: finance lease ROU assets in "Other assets" and liabilities in "Other current liabilities" and "Other liabilities."

ROU assets represent our right to use an underlying asset for the lease term and lease liabilities represent our obligation to make lease payments arising from the lease. We recognize lease ROU assets and liabilities at commencement of an arrangement based on the present value of lease payments over the lease term. We use the incremental borrowing rate based on information available at the lease commencement date to determine the present value of future payments, except when the rate implicit in the lease is determinable. A lease ROU asset also includes any lease payments made at or before commencement date, minus any lease incentives received, and includes initial direct costs incurred. We do not record leases with an initial term of 12 months or less on the balance sheet for all classes of underlying assets, and we recognize lease expense for those leases on a straight-line basis over the lease term. We include variable lease payments that depend on an index or a rate in the ROU asset and lease liability measurement based on the index or rate at the commencement date, or upon a modification. We do not include variable lease payments that do not depend on an index or a rate in the ROU asset and lease liability measurement. A lease term includes an option to extend or terminate the lease when it is reasonably certain that we will exercise that option. We recognize lease (rent) expense for operating lease payments on a straight-line basis over the lease term, or we recognize the amount eligible for recovery under our rate plan, such as actual amounts paid. We amortize finance lease ROU assets on a straight-line basis over the lease term and recognize interest expense based on the outstanding lease liability.

We have lease agreements with lease and non-lease components, and account for lease components and associated non-lease components together as a single lease component, for all classes of underlying assets.

***Impairment of long-lived assets*:** We evaluate utility plant and other long-lived assets for impairment when events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment evaluation is based on an undiscounted cash flow analysis at the

lowest level to which cash flows of the long-lived assets or asset groups are largely independent of the cash flows of other assets and liabilities. We are required to recognize an impairment loss if the carrying amount of the asset exceeds the undiscounted future net cash flows associated with that asset.

The impairment loss to be recognized is the amount by which the carrying amount of the long-lived asset exceeds the asset's fair value. Depending on the asset, fair value may be determined by use of a discounted cash flow model, with assumptions consistent with a market participant's view of the exit price of the asset.

***Fair value measurement*:** Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants as of the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place in either the principal market for the asset or liability, or, in the absence of a principal market, in the most advantageous market for the asset or liability.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset according to its highest and best use, or by selling it to another market participant that would use the asset according to its highest and best use.

We use valuation techniques that are appropriate in the circumstances and for which sufficient data is available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs. All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy based on the transparency of input to the valuation of an asset or liability as of the measurement date.

The three input levels of the fair value hierarchy are as follows:

- Level 1 - inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.
- Level 2 - inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability either directly or indirectly, for substantially the full term of the contract.
- Level 3 - one or more inputs to the valuation methodology are unobservable or cannot be corroborated with market data.

Categorization within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. Certain investments are not categorized within the fair value hierarchy. These investments are measured based on the fair value of the underlying investments but may not be readily redeemable at that fair value.

***Derivatives and hedge accounting*:** Derivatives are recognized on our balance sheets at their fair value. To be a derivative under the accounting standards for derivatives and hedging, an agreement would need to have a notional and an underlying, require little or no initial net investment and could be net settled. We recognize changes in the fair value of a derivative contract in earnings unless specific hedge accounting criteria are met.

Derivatives that qualify and are designated for hedge accounting are classified as cash flow hedges. We report the gain or loss on the derivative instrument as a component of Other Comprehensive Income (OCI) and later reclassify amounts into earnings when the underlying transaction occurs, which we present in the same income statement line item as the earnings effect of the hedged item. For all designated and qualifying hedges, we maintain formal documentation of the hedge and effectiveness testing in accordance with the accounting standards for derivatives and hedging. If we determine that the derivative is no longer highly effective as a hedge, we will discontinue hedge accounting prospectively. For cash flow hedges of forecasted transactions, we estimate the future cash flows of the forecasted transactions and evaluate the probability of the occurrence and timing of such transactions. If we determine it is probable that the forecasted transaction will not occur, we immediately recognize in earnings hedge gains and losses previously recorded in OCI.

Changes in conditions or the occurrence of unforeseen events could require discontinuance of the hedge accounting or could affect the timing of the reclassification of gains or losses on cash flow hedges from OCI into earnings.

***Cash and cash equivalents*:** Cash and cash equivalents include cash, bank accounts, and other highly liquid short-term investments. We consider all highly liquid investments with a maturity date of three months or less when acquired to be cash equivalents and include those investments in “Cash and cash equivalents.” Restricted cash represents cash legally set aside for a specified purpose as part of an agreement with a third party. Restricted cash is included in “Other non-current assets” on our balance sheets. We classify book overdrafts representing outstanding checks in excess of funds on deposit as “Accounts payable and accrued liabilities” on our balance sheets. We report changes in book overdrafts in the operating activities section of the statements of cash flows.

Concentration of risk: We maintain our cash and cash equivalents in accounts with major financial institutions in the form of demand deposits and money market accounts. Deposits in these financial institutions may exceed the amount of federal deposit insurance provided on such deposits.

***Statements of cash flows*:** Supplemental disclosure of cash flow information is as follows:

		2025		2024
(Thousands)				
Cash paid during the year ended December 31:				
Interest, net of amounts capitalized	$	47,052	$	45,563
Income taxes paid, net	$	53,636	$	20,057

Of the income taxes paid, substantially all was paid to AGR under the tax sharing agreement. Interest capitalized was $5.3 million in 2025 and $7.7 million in 2024. Accrued liabilities for utility plant additions were $35.9 million as of December 31, 2025 and $51.3 million as of December 31, 2024.

***Trade receivables and unbilled revenues, net of allowance for credit losses*:** We record trade receivables at amounts billed to customers and we record unbilled revenues based on an estimate of energy delivered or services provided to customers. The estimates for unbilled revenues are determined based on various assumptions, including current month energy load requirements, billing rates by customer class and delivery loss factors. Changes in those assumptions could significantly affect the estimated amounts of unbilled revenues.

The allowance for credit losses is our best estimate of the amount of probable credit losses in our existing accounts receivable, determined based on experience. Each month we review our allowance for credit losses and past due accounts by age. When we believe that a receivable will not be recovered, we charge off the account balance against the allowance. Changes in assumptions about input factors and customer receivables, which are inherently uncertain and susceptible to change from period to period, could significantly affect the allowance for credit losses estimates.

Trade receivables at December 31 include unbilled revenues of $75.4 million for 2025 and $72.4 million for 2024, and are shown net of an allowance for credit losses at December 31 of $14.1 million for 2025 and $14.2 million for 2024. Trade receivables do not bear interest, although late fees may be assessed. Credit loss expense was $63.0 million in 2025 and $64.1 million in 2024.

We establish our allowance for credit losses, including for unbilled revenue (also referred to as contract assets), by using both historical average loss percentages to project future losses, and by establishing a specific allowance for known credit issues or for specific items not considered in the historical average calculation. We also consider whether we need to adjust historical loss rates to reflect the effects of current conditions and forecasted changes considering various economic indicators (e.g., Gross Domestic Product, Personal Income, Consumer Price Index, Unemployment Rate) over the contractual life of the trade receivables. We write off amounts when we have exhausted reasonable collection efforts.

***Variable Interest Entities*:** We have identified GenConn as a variable interest entity (VIE), which is accounted for under the equity method. We are not the primary beneficiary of GenConn, as defined in ASC 810 "Consolidation," because it shares control of all significant activities of GenConn with its joint venture, Clearway Energy, Inc. As such, GenConn is not subject to consolidation. GenConn recovers its costs through Contracts for Differences (CfDs), which are cost of service-based and have been approved by PURA. As a result, with the achievement of commercial operation by GenConn Devon and GenConn Middletown, our exposure to loss is primarily related to the potential for unrecovered GenConn operating or capital costs in a regulatory proceeding, the effect of which would be reflected on our balance sheets in the carrying value of our 50% ownership position in GenConn and in our statements of income through “Earnings (losses) from equity method investments.” Such exposure to loss cannot be determined at this time.

We have identified the selected capacity resources with which it has CfDs as VIEs and have concluded that we are not the primary beneficiary as we do not have the power to direct any of the significant activities of these capacity resources. As such, we have not consolidated the selected capacity resources. Our maximum exposure to loss through these agreements is limited to the settlement amount under the CfDs as described in Note 11. We have no requirement to absorb additional losses nor have we provided any financial or other support during the periods presented that were not previously contractually required.

We have identified the entities for which we are required to enter into long-term contracts to purchase Renewable Energy Credits (RECs) as VIEs. In assessing these contracts for VIE identification and reporting purposes, we have aggregated the contracts based on similar risk characteristics and significance to UI. We are not the primary beneficiary as we do not have the power to direct any of the significant activities of these entities. Our exposure to loss is primarily related to the purchase and resale of the RECs, but, any losses incurred are recoverable through electric rates.

***Debentures, bonds and bank borrowings*:** We record bonds, debentures and bank borrowings as a liability equal to the proceeds of the borrowings. We treat the difference between the

proceeds and the face amount of the issued liability as discount or premium and accrete the amounts as interest expense or income over the life of the instrument. We defer incremental costs associated with the issuance of the debt instruments and amortize them over the same period as debt discount or premium. We present bonds, debentures and bank borrowings net of unamortized discount, premium and debt issuance costs on our balance sheets.

***Inventory*:** Inventory comprises materials and supplies that we use for construction of new facilities and repairs of existing facilities. These inventories are carried and withdrawn at the lower of cost and net realizable value and reported on the balance sheets within “Materials and supplies.”

***Government grants*:** We record government grants as a reduction to the related utility plant to be recovered through rate base, in accordance with the prescribed FERC accounting.

In accounting for government grants related to operating and maintenance costs, we recognize amounts receivable as an offset to expenses in the statements of income in which we incur the expenses.

***Accrued removal obligations*:** We meet the requirements concerning accounting for regulated operations and recognize a regulatory liability for the difference between removal costs collected in rates and actual costs incurred. We classify those amounts as accrued removal obligations.

***Environmental remediation liability*:** In recording our liabilities for environmental remediation costs the amount of liability for a site is the best estimate, when determinable; otherwise it is based on the minimum liability or the lower end of the range when there is a range of estimated losses. We record our environmental liabilities on an undiscounted basis.

***Post-employment and other employee benefits*:** We sponsor defined benefit pension plans that cover the majority of our employees. We also provide health care and life insurance benefits through various postretirement plans for eligible retirees.

We evaluate our actuarial assumptions on an annual basis and consider changes based on market conditions and other factors. All of our qualified defined benefit plans are funded in amounts calculated by independent actuaries, based on actuarial assumptions proposed by management.

We account for defined benefit pension or other postretirement plans, recognizing an asset or liability for the overfunded or underfunded plan status. For a pension plan, the asset or liability is the difference between the fair value of the plan’s assets and the projected benefit obligation (PBO). For any other postretirement benefit plan, the asset or liability is the difference between the fair value of the plan’s assets and the accumulated postretirement benefit obligation. We generally reflect all unrecognized prior service costs and credits and unrecognized actuarial gains and losses as regulatory assets rather than in OCI, as management believes it is probable that such items will be recoverable through the ratemaking process. Certain non-qualified plan expenses are not recoverable through the ratemaking process and we present the unrecognized prior service costs and credits and unrecognized actuarial gains and losses in accumulated other comprehensive loss. If a plan meets settlement or curtailment accounting criteria, we recognize a regulatory asset or liability if these costs are probable of recovery from ratepayers. We use a December 31st measurement date for our benefits plans.

We amortize prior service costs for both the pension and other postretirement benefits plans on a straight-line basis over the average remaining service period of employees active on the date of

the amendment. Effective March 31, 2022, the amortization period for prior service cost changes for the UI Pension Plan was updated from average remaining service to future expected lifetime as the plan was frozen, or predominantly frozen, to future accruals. We amortize unrecognized actuarial gains and losses in excess of 5% of the greater of PBO or market-related value of assets (MRVA) related to the pension and other postretirement benefits plans on straight line basis over future working lifetime. Effective March 31, 2022, the amortization period for the UI Pension Plan was updated from future working lifetime to future expected lifetime as the plan was frozen, or predominantly frozen, to future accruals. Our policy is to calculate the expected return on plan assets using the market-related value of assets. We determine that value by recognizing the difference between actual returns and expected returns over a five-year period.

***Income taxes*:** In August 2022, the Inflation Reduction Act of 2022 ("IRA") was signed into law in the United States. The IRA created a new corporate alternative minimum tax (“CAMT”) of 15% on adjusted financial statement income and an excise tax of 1% on the value of certain stock repurchases. The CAMT and other various applicable provisions of the IRS are effective for the Company for periods beginning after December 31, 2022. The impact of CAMT will depend on our facts in each year, as well as on anticipated guidance from the U.S. Department of Treasury.

AGR, the parent company of Networks, files a consolidated federal income tax return and various state income tax returns, some of which are unitary as required or permitted, including all of the activities of its subsidiaries. Each subsidiary company is treated as a member of the consolidated group and determines its current and deferred taxes based on the separate return with benefits for loss method. As a member, UI settles its current tax liability or benefit each year directly with AGR pursuant to a tax allocation agreement between AGR and its members.

The aggregate amount of the related party income tax receivable balance due from AGR was $46.7 million and $6.5 million at December 31, 2025 and 2024, respectively.

We use the asset and liability method of accounting for income taxes. Deferred tax assets and liabilities reflect the expected future tax consequences, based on enacted tax laws, of temporary differences between the tax basis of assets and liabilities and their financial reporting amounts. In accordance with U.S. GAAP for regulated industries, we have established regulatory assets and liabilities for the net revenue requirements to be recovered from or refunded to customers for the related future tax expense or benefit associated with certain of these temporary differences. We defer investment tax credits when earned and amortize them over the estimated lives of the related assets. We also recognize the income tax consequences of intra-entity transfers of assets other than inventory when the transfer occurs.

Deferred tax assets and liabilities are measured at the expected tax rate for the period in which the asset or liability will be realized or settled, based on legislation enacted as of the balance sheet date. We charge or credit changes in deferred income tax assets and liabilities that are associated with components of OCI directly to OCI. Significant judgment is required in determining income tax provisions and evaluating tax positions. Our tax positions are evaluated under a more-likely-than-not recognition threshold before they are recognized for financial reporting purposes. We record valuation allowances to reduce deferred tax assets when it is more likely than not that we will not realize all or a portion of a tax benefit. We consider the effect of the alternative minimum tax system in determining the need for a valuation allowance for deferred taxes. Deferred tax assets and liabilities are netted and classified as non-current on our balance sheets.

We record the excess of state franchise tax computed as the higher of a tax based on income or a tax based on capital in "Taxes other than income taxes" and "Taxes accrued" in our financial statements.

Positions taken or expected to be taken on tax returns, including the decision to exclude certain income or transactions from a return, are recognized in the financial statements when it is more likely than not the tax position can be sustained based solely on the technical merits of the position. The amount of a tax return position that is not recognized in the financial statements is disclosed as an unrecognized tax benefit. Changes in assumptions on tax benefits may also impact interest expense or interest income and may result in the recognition of tax penalties. Interest and penalties related to unrecognized tax benefits are recorded within “Interest expense, net of capitalization” and “Other Income” and “Other Deductions” in our statements of income.

Uncertain tax positions are classified as non-current unless expected to be paid within one year. Our policy is to recognize interest and penalties on uncertain tax positions as a component of interest expense in the statements of income.

Our income tax expense, deferred tax assets and liabilities, and liabilities for unrecognized tax benefits reflect management’s best assessment of estimated current and future taxes to be paid. Significant judgments and estimates are required in determining the income tax components of the financial statements.

Adoption of New Accounting Pronouncements

Although we are not a public business entity, we adopt new accounting standards based on public business entity guidance aside from the effective dates in certain situations where we may follow the effective dates for private entities.

There have been no new accounting pronouncements adopted as of and for the year ended December 31, 2025 that have a material impact on UI’s financial statements.

Accounting Pronouncements Issued But Not Yet Adopted

The following are new accounting pronouncements not yet adopted that we have evaluated or are evaluating to determine their effect on UI’s financial statements.

(a) Simplified credit loss guidance

In July 2025, FASB issued guidance to simplify applying ASC 326, Financial instruments – Credit losses, to current accounts receivable and contract assets arising from transactions accounted for under ASC 606, Revenue from contracts with customers, including those assets acquired in a business combination or recognized through the consolidation of a variable interest entity that is not a business if those assets arose from transactions that the acquiree or variable interest entity accounted for under ASC 606. The update introduces (1) a practical expedient allowing entities to assume current conditions remain unchanged over the remaining life of these assets, and (2) an accounting policy election for non-public entities, permitting consideration of post–balance sheet cash collections when estimating expected credit losses, provided the practical expedient is also elected. The amendment is effective for all entities in interim and annual periods for fiscal years beginning after December 15, 2025. We do not expect the new guidance to have a material impact on our results of operations, financial position and cash flows.

(b) Accounting for internal-use software costs

In September 2025 FASB issued guidance to modernize internal-use software guidance to eliminate the old stage-based capitalization model and to introduce a probable-to-complete threshold, requiring management authorization, funding commitment, and a probable expectation

of completion before capitalization begins. It provides enhanced guidance and examples for applying this threshold, including factors for assessing significant development uncertainty such as novel features or ongoing revisions to performance requirements. Existing rules for external-use software, types of costs eligible for capitalization, and the point at which capitalization ceases remain unchanged. The amendment is effective for all entities in interim and annual periods for fiscal years beginning after December 15, 2027. We do not expect the new guidance to have a material impact on our results of operations, financial position and cash flows.

(c) Hedge accounting improvements

In November 2025, the FASB issued guidance, which provides refinements to hedge documentation and easing of certain operational requirements. The amendments primarily affect cash flow hedges, with targeted changes to fair value and net investment hedges. They (1) allow hedging a clearly related variable price component of a forecasted nonfinancial transaction, (2) permit grouping forecasted transactions with similar risk exposure, and (3) introduce a model for cash flow hedging “choose-your-rate” debt that lets borrowers change documented indexes or tenors without automatically ending hedge accounting. The amendment is effective for interim and annual reporting periods in fiscal years beginning after December 15, 2026, for public business entities, and after December 15, 2027, to all other entities. We are evaluating to determine the effect of this amendment on our hedge accounting programs and overall financial statements.

(d) Accounting for government grants

In December 2025, FASB issued amendments to provide comprehensive guidance on recognizing, measuring, and presenting government grants under ASC 832, Accounting for government grants by business entities, which previously only addressed disclosures. The amendment responds to the lack of explicit U.S. GAAP guidance that led to diverse practices and reliance on other GAAP or International Financial Reporting Standards (IFRS) by analogy. It classifies grants into asset-related and income-related categories, offering two approaches for asset-related grants: the cost accumulation approach (reducing the asset’s carrying amount) and the deferred income approach (recognizing income systematically over the asset’s useful life). Income-related grants, such as operating expense reimbursements, are recognized over the period the related costs occur, while grants for past costs or immediate support are recognized when the probable threshold is met. The amendment also includes guidance for business combinations, specifying when deferred income should or should not be recognized by the acquirer. The amendment is effective for public entities in fiscal years beginning after December 15, 2028, and for others after December 15, 2029, with transition options including modified prospective, modified retrospective, or full retrospective approaches. We do not expect the new guidance to have a material impact on our results of operations, financial position and cash flows.

***Use of estimates and assumptions*:** The preparation of our financial statements in conformity with U.S. GAAP requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting periods. Significant estimates and assumptions are used for, but not limited to: (1) allowance for credit losses and unbilled revenues; (2) asset impairments; (3) investments in equity instruments; (4) depreciable lives of assets; (5) income tax valuation allowances; (6) uncertain tax positions; (7) reserves for professional, workers’ compensation, and comprehensive general insurance liability risks; (8) contingency and litigation reserves; (9) fair value measurements; (10) earnings sharing mechanism; (11) environmental remediation liabilities; and (12) pension and other postretirement employee benefits. Future events and their effects cannot be predicted with certainty; accordingly, our accounting estimates require the exercise of judgment. The accounting estimates used in the preparation of our financial statements will change as new events occur, as more experience is

acquired, as additional information is obtained, and as our operating environment changes. We evaluate and update our assumptions and estimates on an ongoing basis and may employ outside specialists to assist in our evaluations, as considered necessary. Actual results could differ from those estimates.

***Union collective bargaining agreements*:** Approximately 56% of our employees are covered by a collective bargaining agreement. There are no collective bargaining agreements that will expire within the coming year.

Note 2. Industry Regulation

Rates

Utilities are entitled by Connecticut statutes to charge rates that are sufficient to allow them an opportunity to cover their reasonable operating and capital costs, to attract needed capital, and to maintain their financial integrity, while also protecting relevant public interests.

On September 9, 2022, UI filed a distribution revenue requirement case. UI's filing proposed a three-year rate plan commencing September 1, 2023 through August 31, 2026. PURA issued a Final Decision on August 25, 2023, which approved an annual revenue requirement of $384.9 million and a 1-year rate plan commencing on September 1, 2023. This represents an increase of $22.9 million to the Company's currently approved base distribution revenue requirement. PURA established an allowed return on equity of 9.10%, but reduced the allowed ROE by an aggregate 47 basis point reduction (i.e., to 8.63%), and 2 basis points were reversed by PURA on June 13, 2025, bringing the total ROE to 8.65%, subject to certain conditions and timelines. The Final Decision established a capital structure consisting of 50% common equity and 50% debt. The Final Decision resulted in an average increase in base distribution rates of about 6.6% and an average increase in customer bills of about 2% compared to current levels. Given the expiration of the rate plan, UI had been operating under the 2023 approved rate schedules. On September 18, 2023, UI filed an appeal of the PURA's Final Decision in Connecticut Superior Court, because of actual and legal errors related to the treatment of deferred assets, plant in service, and operating expenses. A decision was issued by the Court on March 13, 2025, which largely upheld PURA's Final Decision. We cannot predict the outcome of this matter.

On November 12, 2024, UI filed an application to adjust its rates and charges which proposes to amend UI's existing rate schedules effective November 1, 2025, in order to address a significant deficiency in distribution-related operating revenues. More specifically, the UI application proposes a change in base distribution rates to be implemented in the rate year beginning November 1, 2025, with proposed rates designed to provide incremental operating revenues of approximately $105 million. UI's application also includes several measures to moderate the impact of the proposed rate update for customers, including, a low-income discount rate to provide rate relief to UI's disadvantaged customers, as well as proposing to continue an economic development rate to support continued commercial growth in UI's service territory. In April and May, 2025, UI attended 9 days of evidentiary hearings in support of its application. PURA released a Final Decision on this application on October 28, 2025, approving approximately $65 million in increased operating revenues, with a return on equity rate of 9.45%, 9.25% after 20 basis point reduction, and a 51% equity ratio. The company filed a motion for reconsideration in November 2025 with a focus on the applied ROE penalties, and the disallowances for inflation protections, Board of Directors expenses, and audit expenses. PURA approved our request for reconsideration, and issued a decision on these issues on March 3, 2026. PURA removed the 20 basis point penalties, raising UI's ROE to 9.45%.

Connecticut Energy Legislation

On June 29, 2023, the Governor of Connecticut signed into law an energy bill titled *An Act Strengthening Protections for Connecticut Consumers*, which, among other things, provided PURA with additional powers to regulate the State's public service companies. More specifically, the Act modified certain ratemaking mechanisms such as revenue decoupling, allows PURA to initiate more frequent rate reviews in between rate cases, modifies electric distribution billing formats, precludes recovery of rate case expenses and appeals from rate proceedings, and mandates various reporting requirements.

On July 1, 2025, the Governor of Connecticut signed into law Public Act 25-173 (formerly Senate Bill 4) *An Act Concerning Energy Affordability, Access and Accountability*. This Act is broad in scope and includes language that provides PURA and the electric distribution companies in Connecticut to modify the process for procuring electric supply, requires any transmission projects to develop project alternatives if certain conditions are met, reduces the Class I Renewable Portfolio Standard percentages for years 2026 – 2030, and specifies the conduct of PURA regarding PURA terms and voting requirements for rate cases and other decisions. We will continue to review the requirements of this Act for the next legislative session.

Power Supply Arrangements

Under Connecticut law, UI's retail electricity customers can choose their electricity supplier while UI remains their electric distribution company. UI purchases power for those of its customers under standard service rates who do not choose an alternative retail electric supplier and have a maximum demand of less than 500 kilowatts, as well as its customers under supplier of last resort service who are not eligible for standard service rates and do not choose to purchase electric generation service from an alternate retail electric supplier. The cost of the purchased power is a "pass-through" to those customers through the General Services Charge (GSC) charge on their bills.

UI must procure the power to serve its standard service load pursuant to a procurement plan approved by PURA. Under the procurement plan, UI procures wholesale power for its standard service customers on a full requirements basis pursuant to contracts with a maximum duration of 12 months, with the delivery of such wholesale power to commence no later than one year from the applicable bid day.

At the conclusion of the period ended December 31, 2025, UI has wholesale power supply agreements in place for 100% of the first half of 2026, 80% for the second half of 2026, and 10% for the first half of 2027. Supplier of last resort service is procured on a quarterly basis and UI has a wholesale power supply agreement in place for the first and second quarters of 2026.

UI determined that its contracts for standard service and supplier of last resort service are derivatives under ASC 815 "Derivatives and Hedging" and elected the "normal purchase, normal sale" exception under ASC 815 "Derivatives and Hedging." UI regularly assesses the accounting treatment for its power supply contracts. These wholesale power supply agreements contain default provisions that include required performance assurance, including certain collateral obligations, in the event that UI's credit rating on senior debt were to fall below investment grade. If such an event had occurred as of December 31, 2025, UI would have had to post collateral of approximately $29.3 million. We would have been and remain able to provide such collateral.

New Renewable Source Generation

Under Connecticut Public Act (PA) 11-80, Connecticut electric utilities are required to enter into long-term contracts to purchase Connecticut Class I Renewable Energy Certificates (RECs) from renewable generators located on customer premises. Under this program, UI was initially required to enter into contracts totaling approximately $200 million in commitments over an approximate 21-year period. The obligations were initially expected to phase in over a six-year solicitation period and peak at an annual commitment level of about $14 million per year after all selected projects are online. PA 17-144, PA 18-50 and PA 19-35 extended the original six-year solicitation period of the program by adding seventh, eighth, ninth, and tenth years, and increased the original funding level of this program by adding up to $64 million in additional commitments by UI. Upon purchase, UI accounts for the RECs as inventory. UI expects to partially mitigate the cost of these contracts through the resale of the RECs. PA 11-80 provides that the remaining costs (and any benefits) of these contracts, including any gain or loss resulting from the resale of the RECs, are fully recoverable from (or credited to) customers through electric rates.

In October of 2018, UI entered into five Power Purchase Agreements (PPAs) totaling approximately 50 MW from developers of offshore wind and fuel cell generation pursuant to state law that provides the net costs of the PPAs are recoverable through electric rates. On December 19, 2018, PURA approved the PPAs, and approved UI's use of the non-bypassable federally mandated congestion charges for all customers to recover the net costs of the PPAs.

In 2019, UI entered into PPAs with 11 projects, totaling approximately 12 million MWh, pursuant to state law that provides that the net costs of the PPAs are recoverable through electric rates. UI terminated eight of these contracts in 2022 and 2023, and the remaining three projects with existing contracts from these 2019 procurements are with Millstone Nuclear, Seabrook Nuclear and Revolution Wind.

In 2020, Pursuant to Connecticut Act Concerning the Procurement of Energy Derived From Offshore Wind, UI entered into a PPA with Vineyard Wind, an affiliate of UI, to provide 804 MW of offshore wind through the development of its Park City Wind Project. Similar to the case with the zero carbon PPAs discussed above, the net costs of the PPAs are recoverable through electric rates. On October 13, 2023, PURA approved the termination of this agreement between UI and its affiliate for the development of Park City Wind Project.

Revenues are recorded gross from contracts with customers when UI is a principal if it controls a promised good or service before transferring that good or service to the customer. Revenues are recorded net of expenses and regulatory deferrals from contracts with customers when UI is an agent if it arranges for another entity to provide the goods or services.

Transmission

PURA decisions do not affect the revenue requirements determination for UI's transmission business, including the applicable ROE. UI's transmission rates are determined by a tariff regulated by the FERC and administered by ISO New England, Inc. (ISO-NE). Transmission rates are set annually pursuant to a FERC authorized formula that allows for recovery of direct and allocated transmission operating and maintenance expenses, and for a return of and on investment in assets.

On September 30, 2011, the Massachusetts Attorney General, DPU, PURA, New Hampshire Public Utilities Commission, Rhode Island Division of Public Utilities and Carriers, Vermont Department of Public Service, numerous New England consumer advocate agencies and

transmission tariff customers collectively filed a joint complaint (Complaint I) with the FERC pursuant to sections 206 and 306 of the Federal Power Act against several New England Transmission Owners (NETOs) claiming that the approved base ROE of 11.14% used by NETOs in calculating formula rates for transmission service under the ISO-New England Open Access Transmission Tariff (OATT) was not just and reasonable and seeking a reduction of the base ROE to 9.2%. UI is a NETO with assets and service rates that are governed by the OATT and will thereby be affected by any FERC order resulting from the filed complaint.

On December 26, 2012, a second related complaint (Complaint II) for a subsequent rate period was filed requesting the ROE be reduced to 8.7%. On July 31, 2014, a third related complaint (Complaint III) was filed for a subsequent rate period requesting the ROE be reduced to 8.84%. On April 29, 2016, a fourth complaint (Compliant IV) was filed for a rate period subsequent to prior complaints requesting the base ROE be 8.61% and ROE cap be 11.24%. On October 16, 2014, the FERC issued its decision in Complaint I, setting the base ROE at 10.57% and a maximum total ROE of 11.74% (base plus incentive ROEs) for the October 2011 – December 2012 period as well as prospectively from October 16, 2014. On March 3, 2015, the FERC upheld its decision and further clarified that the 11.74% ROE cap will be applied on a project specific basis and not on a transmission owner's total average transmission return. Complaints II and III were consolidated and the administrative law judge issued an initial decision on March 22, 2016. The initial decision determined that, (1) for the fifteen month refund period in Complaint II, the base ROE should be 9.59% and that the ROE cap (base ROE plus incentive ROEs) should be 10.42% and (2) for the fifteen month refund period in Complaint III and prospectively, the base ROE should be 10.90% and that the ROE Cap should be 12.19%. The initial decision in Complaints II and III is the administrative law judge's recommendation to the FERC Commissioners.

UI reserved for refunds for Complaints I, II and III consistent with the FERC's March 3, 2015 decision in Complaint I. Refunds were provided to customers for Complaint I. UI's total reserve associated with Complaints II and III is $10.0 million as of December 31, 2025, which has not changed since December 31, 2024, except for the accrual of carrying costs. If adopted as final by the FERC, the impact of the initial decision by the FERC administrative law judge would be an additional aggregate reserve for Complaints II and III of $4.2 million, which is based upon currently available information for these proceedings.

Following various intermediate hearings, orders and appellate decisions, on October 16, 2018, the FERC issued an order directing briefs and proposing a new methodology to calculate the NETOs ROE that is contained in NETOs' transmission formula rate on file at the FERC (the October 2018 Order). Pursuant to the October 2018 Order, the NETOs filed initial briefs on the proposed methodology in all four Complaints on January 11, 2019 and replied to the initial briefs on March 8, 2019.

On November 21, 2019, the FERC issued rulings on two complaints challenging the base return on equity for Midcontinent Independent System Operator, or MISO transmission owners. These rulings established a new zone of reasonableness based on equal weighting of the DCF and capital-asset pricing model for establishing the base return on equity. This resulted in a base return on equity of 9.88% as the midpoint of the zone of reasonableness. Various parties requested rehearing on this decision, which was granted. On May 21, 2020, FERC issued a ruling, which, among other things, adjusted the methodology to determine the MISO transmission owners' ROE, resulting in an increase in ROE from 9.88% to 10.02% by utilizing the risk premium (RP) model in addition to the DCF model and capital-asset pricing model under both prongs of Section 206 of the FPA, and calculated the zone of reasonableness into equal thirds rather than employing the quartile approach. On November 19, 2020, FERC issued an order addressing arguments raised on rehearing of its May 21, 2020 order making minor adjustments to certain typographical errors with regard to some of the case inputs it included in its risk premium model

analysis. However, those minor adjustments did not affect the outcome of the case, leaving the 10.02% ROE established by the May 21, 2020 order in place. Parties to these orders affecting the MISO transmission owners' base ROE petitioned for their review at the D.C. Circuit Court of Appeals in January 2021. The NETO's submitted an amici curia brief in support of the MISO transmission owners' on March 17, 2021. On August 9, 2022, the D.C. Circuit Court vacated FERC's orders and remanded the matter back to FERC. The D.C. Circuit Court held that FERC failed to offer a reasoned explanation for its decision to reintroduce the RP model after initially, and forcefully, rejecting it and that because FERC adopted that significant portion of its model in an arbitrary and capricious fashion, the new ROE produced by that model cannot stand. On October 17, 2024, FERC issued its order on remand in the MISO ROE complaint proceedings. In this order, FERC reduced the MISO transmission owners' base ROE to 9.98% by eliminating the risk premium model from the ROE calculation, consistent with the DC Circuit's remand, and affirmed the refunds ordered in Opinion 569 (which were not addressed on appeal by the DC Circuit). On November 13, 2024, the NETOs submitted a supplemental brief into the NETO ROE case. The supplemental brief primarily addresses distinctions between the MISO transmission owners' and the NETOs' ROE cases. On March 25, 2025, FERC issued an order on rehearing in the MISO ROE complaint proceeding that sustained the same result as the October 17, 2024, order.

MISO transmission owners affected by the October 17, 2024 order petitioned for review of the ordered refunds at the D.C. Circuit Court of Appeals in February 2025. The NETO's submitted an amici curia brief in support of the MISO transmission owners on August 21, 2025.

On March 19, 2026, the FERC issued its decision on the four Complaints. For Complaint I, FERC set the base ROE at 9.57% and a maximum total ROE of 12.09% (base plus incentive ROEs) for the October 2011 - December 2012 period as well as prospectively from October 16, 2014. The calculation method adopted uses only the DCF and capital-asset pricing models and does not adopt the use of the expected earnings and risk premium models. FERC dismissed Complaints II, III and IV. The company is reviewing the decision, including matters related to effective dates, potential rehearing or appeal. No determination has been made as to the ultimate impact, if any, on the company's financial position, results of operations, or cash flows. We cannot predict the outcome of this proceeding.

On April 15, 2021, the FERC issued a supplemental Notice of Proposed Rulemaking (Supplemental NOPR) that proposes to eliminate the 50 basis-point ROE incentive for utilities who join Regional Transmission Organizations after three years of membership. The NETOs submitted initial comments in opposition to the Supplemental NOPR on June 25, 2021 and reply comments on July 26, 2021. If the elimination of the 50 basis-point ROE incentive adder becomes final, we estimate we would have an approximately $2 million reduction in earnings per year. We cannot predict the outcome of this proceeding.

Equity Investment in Peaking Generation

UI is a party to a joint venture with Clearway Energy, Inc., a subsidiary of Global Infrastructure Partners (GIP), pursuant to which UI holds 50% of the membership interests in GCE Holding LLC, whose wholly-owned subsidiary, GenConn Energy LLC, or GenConn, operates peaking generation plants in Devon, Connecticut (GenConn Devon) and Middletown, Connecticut (GenConn Middletown). The two peaking generation plants are both participating in the ISO-New England markets.

GenConn and PURA have completed settlement of all previous appeals related to annual revenue requirements for fiscal periods 2020 to 2025 as of June 10, 2025. Per the Settlement agreement

and on a forward basis GenConn will utilize fixed debt to equity structure in its annual filings for approval of its revenue requirements. On June 27, 2025, GenConn filed with PURA requesting approval of its 2026 revenue requirements. GenConn received a final decision on December 17, 2025 from PURA approving $43.9 million revenue requirements for the 2026 operating year.

PURA Investigation of the Preparation for and Response to the Tropical Storm Isaias and Connecticut Storm Reimbursement Legislation

On August 6, 2020, PURA opened a docket to investigate the preparation for and response to Tropical Storm Isaias by the electric distribution companies in Connecticut including UI. Following hearings and the submission of testimony, PURA issued a final decision on April 15, 2021, finding that UI “generally met standards of acceptable performance in its preparation and response to Tropical Storm Isaias," subject to certain exceptions noted in the decision, but ordered a 15-basis point reduction to UI's ROE in its next rate case to incentivize better performance and indicated that penalties could be forthcoming in the penalty phase of the proceedings. On June 11, 2021, UI filed an appeal of PURA’s decision with the Connecticut Superior Court.

On May 6, 2021, in connection with its findings in the Tropical Storm Isaias docket, PURA issued a Notice of Violation to UI for allegedly failing to comply with standards of acceptable performance in emergency preparation or restoration of service in an emergency and with orders of the Authority, and for violations of accident reporting requirements. PURA assessed a civil penalty in the total amount of $2 million. PURA held a hearing on this matter and, in an order dated July 14, 2021, reduced the civil penalty to approximately $1 million. UI filed an appeal of PURA’s decision with the Connecticut Superior Court. This appeal and the appeal of PURA’s decision on the Tropical Storm Isaias docket have been consolidated. On October 17, 2022, the court denied UI’s appeal and affirmed PURA’s decisions in their entirety. UI filed a notice of appeal to Connecticut's Appellate court on November 7, 2022.

On October 29, 2024, the Supreme Court remanded the appeal to PURA with an order to vacate its ROE penalty and to recalculate its minor accident fine. The Court did not modify the Trial Court's decision to uphold the $1 million fine for the emergency storm response performance. On December 11, 2024, PURA entered an order vacating the ROE penalty and reducing the minor accident fine from $61,000 to $2,500.

Minimum Equity Requirements for Regulated Subsidiaries

Pursuant to agreements with PURA, UI is restricted from paying dividends if paying such dividend would result in a common equity ratio lower than 300 basis points below the equity percentage used to set rates in the most recent distribution rate proceeding as measured using a trailing 13-month average calculated as of the most recent quarter end. In addition, UI is prohibited from paying dividends to their parent if the utility’s credit rating, as rated by any of the three major credit rating agencies, falls below investment grade, or if the utility’s credit rating, as determined by two of the three major credit rating agencies, falls to the lowest investment grade and there is a negative watch or review downgrade notice.

Note 3. Regulatory Assets and Liabilities

Pursuant to the requirements concerning accounting for regulated operations we capitalize, as regulatory assets, incurred and accrued costs that are probable of recovery in future electric rates. We base our assessment of whether recovery is probable on the existence of regulatory orders that allow for recovery of certain costs over a specific period, or allow for reconciliation or deferral of certain costs. When costs are not treated in a specific order we use regulatory precedent to

determine if recovery is probable. We also record, as regulatory liabilities, obligations to refund previously collected revenue or to spend revenue collected from customers on future costs. Of the total regulatory assets net of regulatory liabilities, approximately $185.3 million represents the offset of accrued liabilities for which funds have not been expended. The remainder is either included in rate base or accruing carrying costs.

Details of other regulatory assets and other regulatory liabilities are shown in the tables below. They result from various regulatory orders that allow for the deferral and/or reconciliation of specific costs. Regulatory assets and regulatory liabilities are classified as current when recovery or refund in the coming year is allowed or required through a specific order or when the rates related to a specific regulatory asset or regulatory liability are subject to automatic annual adjustment.

Regulatory assets at December 31, 2025 and 2024 consisted of:

As of December 31,	2025	2024
(Thousands)		
Contracts for differences	$ 32	$ 14,151
COVID-19 cost recovery	5,027	6,713
Deferred transmission expense	34,804	2,907
Environmental remediation costs	17,209	13,838
Excess generation service charge	28,510	47,346
Non-bypassable charges	—	24,545
Pension and other postretirement benefit plans	64,197	72,027
Pension and other postretirement benefits cost deferrals	17,014	18,983
Storm costs	25,442	26,573
System benefit charge	—	44,741
Unamortized losses on reacquired debt	3,458	3,957
Unfunded future income taxes	139,319	129,968
Other	20,144	16,963
Total regulatory assets	**355,156**	**422,712**
Less: current portion	72,448	142,288
Total non-current regulatory assets	**$ 282,708**	**$ 280,424**

Contracts for differences represent the deferral of unrealized gains and losses on contracts for differences derivative contracts. The balance fluctuates based upon quarterly market analysis performed on the related derivatives. The amounts, which do not earn a return, are fully offset by a corresponding derivative asset/liability.

COVID-19 cost recovery represents deferred COVID-19-related costs in the state of Connecticut based on the order issued by PURA on April 29, 2020, requiring utilities to track COVID-19-related expenses and lost revenue and create a regulatory asset.

Deferred transmission expense represents deferred transmission income or expense and fluctuates based upon actual revenues and revenue requirements.

Environmental remediation costs includes spending that has occurred and is eligible for future recovery in customer rates. Environmental costs are currently recovered through a reserve mechanism whereby projected spending is included in rates with any variance recorded as a regulatory asset or a regulatory liability. The amortization period will be established in future

proceedings and will depend upon the timing of spending for the remediation costs. It also includes the anticipated future rate recovery of costs that are recorded as environmental liabilities since these will be recovered when incurred. Because no funds have yet been expended for the regulatory asset related to future spending, it does not accrue carrying costs and is not included within rate base.

Excess generation service charge represents deferred generation-related costs or revenues for future recovery from or return to customers. The amount fluctuates based upon timing differences between revenues collected from rates and actual costs incurred.

Non-bypassable charges represent non-bypassable federally mandated congestion costs or revenues for future recovery from or return to customers. The amount fluctuates based upon timing differences between revenues collected from rates and actual costs incurred.

Pension and other postretirement benefit plans represent the actuarial losses on the pension and other postretirement plans that will be reflected in customer rates when they are amortized and recognized in future pension expenses.

Pension and other postretirement benefits cost deferrals include the difference between actual expense for pension and other postretirement benefits and the amount provided for in rates. The recovery of these amounts will be determined in future proceedings.

Storm costs are allowed in rates based on an estimate of the routine costs of service restoration. UI is also allowed to defer unusually high levels of service restoration costs resulting from major storms when they meet certain criteria for severity and duration. A portion of this balance is amortized through current rates, and the remaining portion will be determined through future rate cases.

System benefits charge represents the mechanism by which UI recovers costs associated with hardship uncollectible customer accounts, arrearage forgiveness programs, and other customer assistance programs. The amount fluctuates based upon timing differences between revenues collected from rates and actual costs incurred.

Unamortized losses on reacquired debt represent deferred losses on debt reacquisitions that will be recovered over the remaining original amortization period of the reacquired debt.

Unfunded future income taxes represent unrecovered federal and state income taxes primarily resulting from regulatory flow through accounting treatment and are the offset to the unfunded future deferred income tax liability recorded. The income tax benefits or charges for certain plant related timing differences, such as removal costs, are immediately flowed through to, or collected from, customers. This amount is being amortized as the amounts related to temporary differences that give rise to the deferrals are recovered in rates.

Other includes items such as deferred loss on sale of non-utility property.

Regulatory liabilities at December 31, 2025 and 2024 consisted of:

As of December 31,	2025	2024
(Thousands)		
2017 Tax Act	$ 198,578	$ 201,764
Accrued removal obligations	77,817	79,809
Accumulated deferred investment tax credits	8,439	9,169
Conservation and load management	—	4,668
Middletown/Norwalk local transmission network service collections	14,522	15,096
Non-bypassable charges	77,217	—
Pension and other postretirement benefit plans	26,374	16,267
Pension and other postretirement benefits cost deferrals	1,010	1,423
Revenue decoupling mechanism	11,619	2,879
Rate refund - FERC ROE proceeding	9,984	9,254
System benefit charge	21,339	—
Other	5,235	5,548
Total regulatory liabilities	**452,134**	**345,877**
Less: current portion	115,450	14,124
Total non-current regulatory liabilities	**$ 336,684**	**$ 331,753**

2017 Tax Act represents the impact from remeasurement of deferred income tax balances as a result of the Tax Act enacted by the U.S. federal government on December 22, 2017. Reductions in accumulated deferred income tax balances due to the reduction in the corporate income tax rates from 35% to 21% under the provisions of the Tax Act will result in amounts previously and currently collected from utility customers for these deferred taxes to be refundable to such customers.

Accrued removal obligations represent the differences between asset removal costs recorded and amounts collected in rates for those costs. The amortization period is dependent upon the asset removal costs of underlying assets and the life of the utility plant.

Accumulated deferred investment tax credits represent investment tax credits related to plant investments that are deferred when earned and amortized over the estimated lives of the related assets.

Conservation and load management represents the difference between UI's costs for customer conservation measures and the amounts collected in rates for those costs.

Middletown/Norwalk local transmission network service collections represents allowance for funds used during construction of the Middletown/Norwalk transmission line, which is being amortized over the useful life of the project.

Non-bypassable charges represent non-bypassable federally mandated congestion costs or revenues for future recovery from or return to customers. The amount fluctuates based upon timing differences between revenues collected from rates and actual costs incurred.

Pension and other postretirement benefit plans represent the actuarial gains on the pension and other postretirement plans that will be reflected in customer rates when they are amortized and recognized in future pension expenses.

Pension and other postretirement benefits cost deferrals include the difference between actual expense for pension and other postretirement benefits and the amount provided for in rates. The recovery of these amounts will be determined in future proceedings.

Revenue decoupling mechanism represents the mechanism established to disassociate the utility's profits from its delivery/commodity sales.

Rate refund - FERC ROE proceeding represents the reserve associated with the FERC proceeding around the base return on equity (ROE) reflected in ISO-NE's open access transmission tariff.

System benefits charge represents the mechanism by which UI recovers costs associated with hardship uncollectible customer accounts, arrearage forgiveness programs, and other customer assistance programs. The amount fluctuates based upon timing differences between revenues collected from rates and actual costs incurred.

Other includes items such as deferral of CAM gross earnings tax expense collected in base distribution rates for periods between January 1, 2020 and August 31, 2023.

Note 4. Revenue

We recognize revenue when we have satisfied our obligations under the terms of a contract with a customer, which generally occurs when the control of promised goods or services transfers to the customer. We measure revenue as the amount of consideration we expect to receive in exchange for providing those goods or services. Contracts with customers may include multiple performance obligations. For such contracts, we allocate revenue to each performance obligation based on its relative standalone selling price. We generally determine standalone selling prices based on the prices charged to customers. Certain revenues are not within the scope of ASC 606, such as revenues from leasing, derivatives, other revenues that are not from contracts with customers and other contractual rights or obligations, and we account for such revenues in accordance with the applicable accounting standards. We exclude from revenue amounts collected on behalf of third parties, including any such taxes collected from customers and remitted to governmental authorities. We do not have any material significant payment terms because we receive payment at or shortly after the point of sale.

The following describes the principal activities from which we generate revenue.

UI derives its revenue primarily from tariff-based sales of electricity service to customers in its Connecticut territory with no defined contractual term. For such revenues, we recognize revenues in an amount derived from the electricity delivered to customers. Other major sources of revenue are electricity transmission and wholesale sales of electricity.

Tariff-based sales are subject to PURA regulation, which determines prices and other terms of service through the ratemaking process. Customers have the option to obtain the electricity directly from UI or from another supplier. For customers that receive their electricity from another supplier, UI acts as an agent and delivers the electricity by that supplier. Revenue in those cases is only for providing the service of delivery of the electricity.

Transmission revenue results from others’ use of the utility’s transmission system to transmit electricity and is subject to FERC regulation, which establishes the prices and other terms of service. Long-term wholesale sales of electricity are based on individual bilateral contracts. Short-

term wholesale sales of electricity are generally on a daily basis based on market prices and are administered by an independent entity, ISO-New England, Inc.

The performance obligation in all arrangements is satisfied over time because the customer simultaneously receives and consumes the benefits as UI delivers or sells the electricity or provides the transmission service.

UI records revenue from Alternative Revenue Programs (ARPs), which is not ASC 606 revenue. Such programs represent contracts between UI and their regulators. UI ARPs include revenue decoupling mechanisms, other ratemaking mechanisms, and annual revenue requirement reconciliations.

UI also has various other sources of revenue including billing, collection, other administrative charges, sundry billings, rent of utility property, and miscellaneous revenue. It classifies such revenues as other ASC 606 revenues to the extent they are not related to revenue generating activities from leasing, ARPs, or other activities.

Revenues disaggregated by major source for the years ended December 31, 2025 and 2024 are as follows:

Years Ended December 31,	2025	2024
(Thousands)		
Regulated operations – electricity	$ 1,333,967	$ 1,305,682
Other (a)	13,348	16,517
Revenue from contracts with customers	**1,347,315**	**1,322,199**
Leasing revenue	7,352	6,511
Alternative revenue programs	39,841	5,485
Other revenue	4,636	6,694
Total operating revenues	**$ 1,399,144**	**$ 1,340,889**

(a) Primarily includes certain intra-month trading activities, billing, collection, and administrative charges, sundry billings, and other miscellaneous revenue.

Note 5. Income Taxes

Current and deferred taxes charged to expense (benefit) for the years ended December 31, 2025 and 2024 consisted of:

Years Ended December 31,	2025	2024
(Thousands)		
Current		
Federal	$ 8,738	$ 14,757
State	3,819	81
Current taxes charged to expense	**12,557**	**14,838**
Deferred		
Federal	18,470	5,262
State	(2,161)	3,062
Deferred taxes charged to expense	**16,309**	**8,324**
Investment tax credits	(730)	(730)
Total Income Tax Expense	**$ 28,136**	**$ 22,432**

The differences between tax expense per the statements of income and tax expense at the 21% statutory federal tax rate for the years ended December 31, 2025 and 2024 consisted of:

Years Ended December 31,		2025		2024
(Thousands)				
Tax expense at federal statutory rate	$	32,840	$	27,388
Depreciation/amortization and other plant differences not normalized		(2,780)		(2,595)
State taxes net of federal benefit		1,310		2,483
Investment tax credit amortization		(730)		(730)
Excess ADIT amortization		(2,342)		(3,306)
Other, net		(162)		(808)
Total Income Tax Expense	**$**	**28,136**	**$**	**22,432**

Income tax expense for the year ended December 31, 2025 was $4.7 million lower than it would have been at the statutory federal income tax rate of 21% due predominately to Excess Accumulated Deferred Income Tax (ADIT) amortization, and depreciation/amortization and other plant differences not normalized, partially offset by state taxes. This resulted in an effective tax rate of 18.0%. Income tax expense for the year ended December 31, 2024 was $5.0 million lower than it would have been at the statutory federal income tax rate of 21% due predominately to Excess ADIT amortization, and depreciation/amortization and other plant differences not normalized, partially offset by state taxes. This resulted in an effective tax rate of 17.2%.

Deferred tax assets and liabilities as of December 31, 2025 and 2024 consisted of:

December 31,		2025		2024
(Thousands)				
Non-current Deferred Income Tax Liabilities (Assets)				
Property related	$	474,470	$	467,938
Unfunded future income taxes		37,439		34,922
Federal and state tax credits		(14,793)		(16,313)
Investment in GenConn		30,461		31,492
Postretirement benefits		(1,577)		(7,790)
Regulatory liability due to "Tax Cuts and Jobs Act"		(53,462)		(54,325)
Other		21,897		9,668
Total Non-current Deferred Income Tax Liabilities	**$**	**494,435**	**$**	**465,592**
Deferred tax assets	$	69,832	$	78,428
Deferred tax liabilities		564,267		544,020
Net Accumulated Deferred Income Tax Liabilities	**$**	**494,435**	**$**	**465,592**

As of December 31, 2025, UI had $6.2 million of state tax credit carry forwards with no valuation allowance offset. As of December 31, 2024, UI had $7.7 million of gross state tax credit carry forwards with no valuation allowance offset. The state tax credit carry forwards have a five-year carryforward period are scheduled to expire in tax years 2025 through 2029 if not utilized.

As of December 31, 2025, UI had $8.6 million of Corporate Alternative Minimum Tax (CAMT) credit with no valuation allowance offset. As of December 31, 2024, UI had $8.6 million of CAMT credit with no valuation allowance offset. CAMT credit can be carried forward indefinitely until fully utilized.

Uncertain tax positions are classified as non-current unless expected to be paid within one year. We net our liability for uncertain tax positions against all same jurisdiction deferred tax assets, net

operating losses and tax credit carryforwards. Our policy is to recognize interest and penalties on uncertain tax positions as a component of interest expense in the statements of income. As of December 31, 2025 and 2024, UI did not have any gross income tax reserves for uncertain tax positions.

There were no additional accruals for interest and penalties on tax reserves as of December 31, 2025 and 2024.

Note 6. Non-current Debt

Long-term debt as of December 31, 2025 and 2024 consisted of:

As of December 31,		2025		2024	
(Thousands)	Maturity Dates	Balances	Interest Rates	Balances	Interest Rates
Senior unsecured notes	2028 - 2049	$ 1,144,460	2.02% - 6.51%	$ 1,144,460	2.02% - 6.51%
Unamortized debt issuance costs and discount		(5,689)		(6,435)	
Total Debt		**1,138,771**		**1,138,025**	
Less: debt due within one year, included in current liabilities		—		99,538	
Total Non-current Debt		**$ 1,138,771**		**$ 1,038,487**	

On July 31, 2025, UI issued $100 million aggregate principal amount of Green Private Bond maturing in 2035 at an interest rate of 5.57%.

On August 15, 2024, UI issued $100 million aggregate principal amount of unsecured notes maturing in 2039 at an interest rate of 5.67%.

Long-term debt, including sinking fund obligations, due during the next five years consist of:

2026	2027	2028	2029	2030	Total
(Thousands)					
$ —	$ —	$ 100,000	$ —	$ 75,000	$ 175,000

We have no debt covenant requirements related to the maintenance of financial ratios in our long-term debt agreements at December 31, 2025 and 2024.

Note 7. Bank Loans and Other Borrowings

UI had no short-term debt outstanding at December 31, 2025 and 2024. UI funds short-term liquidity needs through an agreement among Avangrid's regulated utility subsidiaries (the Virtual Money Pool Agreement), a bi-lateral intercompany credit agreement with Avangrid (the Bi-Lateral Intercompany Facility), and a bank provided credit facility to which UI is a party (the AGR Credit Facility), each of which are described below.

The Virtual Money Pool Agreement is an agreement among the investment grade-rated, regulated utility subsidiaries of Avangrid under which the parties to this agreement may lend to or borrow from each other. This Agreement allows Avangrid to optimize cash resources within the regulated utility companies which are prohibited by regulation from lending to unregulated affiliates. The interest rate on transactions under this agreement is the A2/P2 non-financial 30-day commercial paper rate published by the Federal Reserve. UI has a lending/borrowing limit of $100 million

under this agreement. UI had no debt outstanding under this agreement at December 31, 2025 and 2024.

The Bi-Lateral Intercompany Facility provides for borrowing of up to $500 million from Avangrid at the A2/P2 non-financial 30-day commercial paper rate published by the Federal Reserve. UI had no debt outstanding under this agreement at December 31, 2025 and 2024.

On December 22, 2025, the utilities (New York State Electric and Gas Corporation (“NYSEG”), Rochester Gas and Electric Corporation (“RG&E”), Central Maine Power Company (“CMP”), The United Illuminating Company (“UI”), Connecticut Natural Gas Corporation (“CNG”), The Southern Connecticut Gas Company (“SCG”) and The Berkshire Gas Company (“BGC”)) executed a new credit facility with an aggregate limit of $1,500 million and a termination date of December 23, 2030. Under the terms of the revolving credit facility, each borrower has a maximum borrowing entitlement, or sublimit, which can be periodically adjusted to address specific short-term capital funding needs, subject to the maximum limit contained in the agreement. NYSEG has a maximum sublimit of $1,000 million, RG&E has $500 million, CMP has $375 million, UI has a maximum sublimit of $150 million, SCG has a maximum sublimit of $75 million, and CNG and BCG have maximum sublimits of $50 million. The new facility has set minimum sublimits of $600 million for NYSEG, $250 million for RG&E, $150 million for CMP, $25 million for UI, CNG, SCG, and BGC. The facility fees range from 5 to 25 basis points. UI had no debt outstanding under this agreement at December 31, 2025 and 2024.

In the AGR Credit Facility we covenant not to permit, without the consent of the lender, our ratio of total indebtedness to total capitalization to exceed 0.65 to 1.00 at any time. For purposes of calculating the maximum ratio of indebtedness to total capitalization, the facility excludes from net worth the balance of accumulated other comprehensive loss as it appears on the balance sheet. The facility contains various other covenants, including a restriction on the amount of secured indebtedness we may maintain. Continued un-remedied failure to comply with those covenants for five business days after written notice of such failure from the lender constitutes an event of default and would result in acceleration of maturity. Our ratio of indebtedness to total capitalization pursuant to the revolving credit facility was 0.41 to 1.00 at December 31, 2025. We are not in default as of December 31, 2025.

Note 8. Preferred Stock

At December 31, 2025, UI had 1,119,612 shares of $100 par value preferred stock, 2,400,000 shares of $25 par value preferred stock, and 5,000,000 shares of $25 par value preference stock authorized but unissued.

Note 9. Leases

We have operating leases for land, office buildings, facilities, and certain equipment. We do not have any finance leases. Certain of our lease agreements include rental payments adjusted periodically for inflation or are based on other periodic input measures. Our leases do not contain any material residual value guarantees or material restrictive covenants. Our leases have remaining lease terms of 1 year to 38 years, some of which may include options to extend the leases for up to 40 years, and some of which may include options to terminate the leases within one year. We consider extension or termination options in the lease term if it is reasonably certain we will exercise the option.

The components of lease cost and other information related to leases were as follows:

For the Years Ended December 31,		2025		2024
(Thousands)				
Lease cost				
Operating lease cost	$	3,637	$	3,917
Short-term lease cost		175		173
Variable lease cost		148		127
Total lease cost	**$**	**3,960**	**$**	**4,217**

Balance sheet and other information for the years ended December 31, 2025 and 2024 was as follows:

As of December 31,		2025		2024
(Thousands, except lease term and discount rate)				
Operating Leases				
Operating lease right-of-use assets	$	11,150	$	11,307
Operating lease liabilities, current		846		623
Operating lease liabilities, long-term		14,945		15,201
Total operating lease liabilities	$	15,791	$	15,824
Weighted-average Remaining Lease Term (years)				
Operating leases		19.56		19.61
Weighted-average Discount Rate				
Operating leases		3.71%		3.76%

For the years ended December 31, 2025 and 2024, supplemental cash flow information related to leases was as follows:

For the Years Ended December 31,		2025		2024
(Thousands)				
Cash paid for amounts included in the measurement of lease liabilities:				
Operating cash flows from operating leases	$	1,461	$	1,098
Right-of-use assets obtained in exchange for lease obligations:				
Operating leases	$	793	$	250

As of December 31, 2025, maturities of lease liabilities were as follows:

(Thousands)	Operating Leases
Year Ending December 31,	
2026	$ 1,284
2027	3,382
2028	918
2029	926
2030	933
Thereafter	15,866
Total lease payments	**23,309**
Less: imputed interest	(7,518)
Total	**$ 15,791**

Most of our leases do not provide an implicit rate in the lease; thus we use our incremental borrowing rate based on the information available at the commencement date in determining the present value of lease payments.

Note 10. Environmental Liability

From time to time environmental laws, regulations and compliance programs may require changes in our operations and facilities and may increase the cost of electric service.

English Station

In January 2012, Evergreen Power, LLC (Evergreen Power) and Asnat Realty LLC (Asnat), then owners of a former generation site on the Mill River in New Haven (English Station) that UI sold to Quinnipiac Energy in 2000, filed a lawsuit in federal district court in Connecticut related to environmental remediation at the English Station site. This proceeding was stayed in 2014 pending resolutions of other proceedings before the DEEP concerning the English Station site. In December 2016, the court administratively closed the file without prejudice to reopen upon the filing of a motion to reopen by any party.

On April 8, 2013, DEEP issued an administrative order addressed to UI, Evergreen Power, Asnat and others, ordering the parties to take certain actions related to investigating and remediating the English Station site. This proceeding was stayed while DEEP and UI continue to work through the remediation process pursuant to the consent order described below. Status reports are periodically filed with DEEP.

On August 4, 2016, DEEP issued a partial consent order (the PCO), that requires UI to investigate and remediate certain environmental conditions within the perimeter of the English Station site. Under the PCO, if the cost of this remediation is less than $30 million, UI will remit to the State the difference between such cost and $30 million. If the cost of such compliance exceeds $30 million, UI must comply with the PCO, but may seek to recover costs above $30 million in consultation with the State.

UI continues its activities to investigate and remediate the environmental conditions at the site. In 2023 and 2024 DEEP sent UI a series of letters requesting details on remediation plans and security, which UI responded to.

On January 25, 2024, DEEP issued a notice of declaratory ruling to determine the “high occupancy standard” necessary “to abate on-site pollution and impacts for industrial/commercial

use of the Site…inside the buildings" as referenced in section (B)(1)(e)(4) of the PCO. UI submitted its written comments objecting to the proceedings on March 11, 2024. DEEP issued a Declaratory Ruling on May 28, 2024 declaring that the high occupancy standard is applicable. On July 3, 2024, UI appealed DEEP's ruling to the Connecticut Superior Court and was granted a request to move the case to the complex litigation docket. On July 31, 2025 the Court issued a decision that sustained UI's appeal and remanded the matter to DEEP due to alleged ambiguities in the language of the PCO. There is no timetable for DEEP to proceed with further fact-finding. On August 19, 2025 UI appealed the Court's decision. The appeal is presently pending and has yet to be briefed.

On January 29, 2024, DEEP also served UI with a Summons and Complaint seeking injunctive relief and enforcement of the consent order from the Connecticut Superior Court. UI filed its Answer and Special Defenses on May 13, 2024. A procedural schedule was set by the court that establishes a trial date of October 20, 2026. The case is docketed under the Complex Litigation Docket of the Connecticut Superior Court. DEEP filed a motion to strike UI's amended special defenses on November 21, 2024, and UI responded on December 23, 2024. This Motion was granted in part, however, UI filed Amended Special Defenses on November 6, 2024. DEEP again filed a Motion to Strike. The Court heard this Motion at the aforementioned March 31, 2025 hearing. DEEP also filed a Motion to Dismiss UI's Counterclaim for a declaratory ruling on the applicable remediation standard under the PCO. UI timely responded to the Motion to Dismiss. The Motion to Dismiss was granted on February 7, 2025. DEEP also filed a motion to strike UI's amended special defenses, which the Court granted in part and denied in part. UI's Special Defenses of waiver and estoppel survived the motion while the contract-based defenses were stricken.

On November 5, 2025, the parties entered into settlement discussions presided over by a mediator. Those discussions are ongoing. The parties have sought extensions of time in the two matters so that the litigation is effectively stayed while settlement discussions take place.

The amount reserved related to English Station was $20.2 million and $19.9 million as of December 31, 2025 and 2024, respectively. We cannot predict the outcome of this matter.

Other

In 2025, UI initiated remedial action at the property referred to as the East Shore Site located in New Haven. Following procurement for the remedial action activities, UI updated its reserve. The amount reserved for this property was $18.3 million as of December 31, 2025 and $14.6 million as of December 31, 2024, respectively.

UI also holds a reserve for remediation of 801 Bridgeport Ave, the site of a former operations center. The amount reserved for this site was $0.3 million as of December 31, 2025 and $0.4 million as of December 31, 2024.

Our environmental liability accruals are recorded on an undiscounted basis and are expected to be paid through the year 2075.

Note 11. Accounting for Derivative Instruments and Hedging Activities

Our operating and financing activities are exposed to certain risks, which are managed by using derivative instruments. All derivative instruments are recognized as either assets or liabilities at fair value on our balance sheets in accordance with the accounting requirements concerning derivative instruments and hedging activities.

Derivatives not designated as hedging instruments

Pursuant to Connecticut's 2005 Energy Independence Act, PURA solicited bids to create new or incremental capacity resources in order to reduce federally mandated congestion charges, and selected four new capacity resources. To facilitate the transactions between the selected capacity resources and Connecticut electric customers, and provide the commitment necessary for owners of these resources to obtain necessary financing, PURA required that UI and The Connecticut Light and Power Company (CL&P) execute long-term contracts with the selected resources. In August 2007, PURA approved four CfDs, each of which specifies a capacity quantity and a monthly settlement that reflects the difference between a forward market price and the contract price. UI executed two of the contracts and CL&P executed the other two contracts. The costs or benefits of each contract will be paid by or allocated to customers and will be subject to a cost-sharing agreement between UI and CL&P pursuant to which approximately 20% of the cost or benefit is borne by or allocated to UI customers and approximately 80% is borne by or allocated to CL&P customers.

PURA has determined that costs associated with these CfDs will be fully recoverable by UI and CL&P through electric rates, and in accordance with ASC 980 "Regulated Operations," UI has deferred recognition of costs (a regulatory asset) or obligations (a regulatory liability). The CfDs are marked-to-market in accordance with ASC 815 "Derivatives and Hedging." For those CfDs signed by CL&P, UI records its approximate 20% portion pursuant to the cost-sharing agreement noted above. As of December 31, 2025, UI has recorded a gross derivative asset of $0.1 million ($0 of which is related to UI's portion of the CfD signed by CL&P), a regulatory asset of $0 million, a gross derivative liability of $0.2 million ($0 million of which is related to UI's portion of the CfD signed by CL&P), and a regulatory liability of $0. As of December 31, 2024, UI had recorded a gross derivative asset of $0.5 million ($0 of which is related to UI's portion of the CfD signed by CL&P), a regulatory asset of $14.2 million, a gross derivative liability of $14.6 million ($14.0 million of which is related to UI's portion of the CfD signed by CL&P), and a regulatory liability of $0.

The unrealized gains and losses from fair value adjustments to these derivatives, which are recorded in regulatory assets, for the years ended December 31, 2025 and 2024, respectively, were as follows:

	Years Ended December 31,	
	2025	2024
(Thousands)		
Derivative assets	$ (336)	$ (436)
Derivative liabilities	$ 14,456	$ 16,213

Note 12. Fair Value of Financial Instruments and Fair Value Measurements

The estimated fair value of debt amounted to $1,148 million as of December 31, 2025 and $1,098 million as of December 31, 2024. The estimated fair value was determined, in most cases, by discounting the future cash flows at market interest rates. The interest rate curve used to make these calculations takes into account the risks associated with the electricity industry and the credit ratings of the borrowers in each case. The fair value hierarchy for the fair value of debt is considered as Level 2.

Assets and liabilities measured at fair value on a recurring basis

The financial instruments measured at fair value as of December 31, 2025 and December 31, 2024, consisted of:

As of December 31, 2025	Level 1	Level 2	Level 3	Total
(Thousands)				
Derivative assets				
Contracts for differences	$ —	$ —	$ 127	$ 127
Equity investments with readily determinable fair values				
Supplemental retirement benefit trust life insurance policies	—	23,293	—	23,293
Total	**$ —**	**$ 23,293**	**$ 127**	**$ 23,420**
Derivative liabilities				
Contracts for differences	$ —	$ —	$ (158)	$ (158)
Total	**$ —**	**$ —**	**$ (158)**	**$ (158)**

As of December 31, 2024	Level 1	Level 2	Level 3	Total
(Thousands)				
Derivative assets				
Contracts for differences	$ —	$ —	$ 463	$ 463
Equity investments with readily determinable fair values				
Supplemental retirement benefit trust life insurance policies	—	20,026	—	20,026
Total	**$ —**	**$ 20,026**	**$ 463**	**$ 20,489**
Derivative liabilities				
Contracts for differences	$ —	$ —	$ (14,614)	$ (14,614)
Total	**$ —**	**$ —**	**$ (14,614)**	**$ (14,614)**

We had no transfers to or from Level 1 and 2 during the years ended December 31, 2025 and 2024. Our policy is to recognize transfers in and transfers out as of the actual date of the event or change in circumstances that causes a transfer, if any.

Valuation techniques: We determine the fair value of our derivative assets and liabilities and non-current equity investments utilizing market approach valuation techniques:

- UI enters into CfDs, which are marked-to-market based on a probability-based expected cash flow analysis that is discounted at risk-free interest rates and an adjustment for non-performance risk using credit default swap rates. We include the fair value measurement for these contracts in Level 3 (Refer to Note 11 for further discussion of CfDs).
- We measure the fair value of the supplemental retirement benefit life insurance trust based on quoted prices in the active markets for the various funds within which the assets are held and include the measurement in Level 2.

The determination of fair value of the CfDs was based on a probability-based expected cash flow analysis that was discounted at risk-free interest rates, as applicable, and an adjustment for non-performance risk using credit default swap rates. Certain management assumptions were required, including development of pricing that extends over the term of the contracts. We believe this methodology provides the most reasonable estimates of the amount of future discounted cash flows associated with the CfDs. Additionally, on a quarterly basis, we perform analytics to ensure that the fair value of the derivatives is consistent with changes, if any, in the various fair value model inputs. Significant isolated changes in the risk of non-performance, the discount rate or the

contract term pricing would result in an inverse change in the fair value of the CfDs. Additional quantitative information about Level 3 fair value measurements of the CfDs is as follows:

Unobservable Input	Range at December 31, 2025	Range at December 31, 2024
Risk of non-performance	0.48%	0.46% - 0.48%
Discount rate	3.47%	4.16% - 4.25%
Forward pricing ($ per MW)	$2.59	$2.59 - $2.61

The reconciliation of changes in the fair value of financial instruments based on Level 3 inputs for the years ended December 31, 2025 and 2024, respectively, is as follows:

Years Ended December 31,	2025	2024
(Thousands)		
Beginning balance	$ (14,151)	$ (29,928)
Unrealized gains, net	14,120	15,777
Ending balance	**$ (31)**	**$ (14,151)**

Note 13. Postretirement and Similar Obligations

The UI pension plan provides benefits under a traditional defined benefit formula and was closed to newly-hired employees in 2005. The plan was amended, effective as of the close of business on December 31, 2020, to freeze benefit accruals for UI Collectively Bargained Group 1 participants and to permit in-service distributions to UI Collectively Bargained Group 1 participants who are at least age 60. The plan was remeasured as of December 9, 2020 as a result of this amendment. On March 31, 2022, the Board approved to freeze benefit accruals for the non-union participants of the UI pension plan, with an effective date of June 30, 2022.

UI employees are eligible to participate in the UIL Holdings Corporation 401(k) Employee Stock Ownership Plan. Employees may defer a portion of their compensation and invest in various investment alternatives. Matching contributions are made in the form of cash which is subsequently invested in various investment alternatives offered to employees. The matching expense totaled approximately $11.3 million for 2025 and $9.4 million for 2024.

We provide other postretirement benefits, consisting principally of health care and life insurance benefits, for retired employees and their dependents. The healthcare plans are contributory and participants' contributions are adjusted annually. For Medicare eligible non-union retirees, UI provides a subsidy through a Health Reimbursement Account (HRA) for retirees to purchase coverage on the individual market. Medicare eligible union retirees have the option of receiving a subsidy through an HRA or paying contributions and participating in company-sponsored retiree health plans.

Non-Qualified Retirement Benefit Plans

We sponsor various unfunded non-qualified pension plans for certain current employees, former employees, and former directors. The total liability for these plans, which is included in Other non-current liabilities on our balance sheets, was $9.8 million and $9.7 million at December 31, 2025 and 2024, respectively. On March 31, 2022, the Board approved to freeze benefit accruals for the non-union participants of the UI supplemental executive retirement plan, with an effective date of June 30, 2022.

Qualified Retirement Benefit Plans

Obligations and funded status as of December 31, 2025 and 2024 consisted of:

	Pension Benefits		Postretirement Benefits	
As of December 31,	**2025**	**2024**	**2025**	**2024**
(Thousands)				
Change in benefit obligation				
Benefit obligation as of January 1,	**$ 366,284**	**$ 400,738**	**$ 44,058**	**$ 47,850**
Service cost	—	—	230	292
Interest cost	18,858	17,937	1,970	2,129
Plan amendments	—	—	(11,613)	—
Actuarial loss (gain)	15,295	(21,352)	2,097	(1,780)
Benefits paid	(32,214)	(31,039)	(4,598)	(4,433)
Benefit obligation as of December 31,	**$ 368,223**	**$ 366,284**	**$ 32,144**	**$ 44,058**
Change in plan assets				
Fair value of plan assets at January 1,	**$ 284,791**	**$ 295,039**	**$ 38,309**	**$ 34,373**
Actual return on plan assets	36,762	9,407	5,400	5,098
Employer contributions	22,051	11,384	3,661	3,271
Benefits paid	(32,214)	(31,039)	(4,598)	(4,433)
Fair value of plan assets at December 31,	**$ 311,390**	**$ 284,791**	**$ 42,772**	**$ 38,309**
Funded status at December 31,	**$ (56,833)**	**$ (81,493)**	**$ 10,628**	**$ (5,749)**

During 2025, the pension benefit obligation had an actuarial loss of $15.3 million, primarily due to an $11.9 million loss from decreases in discount rates. During 2025, the postretirement benefit obligation had an actuarial loss of $2.1 million, primarily due to a $1.3 million loss from decreases in discount rates. During 2025, the postretirement benefit obligation had a reduction of $11.6 million due to plan amendments. The amendments were driven by a Company decision to reduce postretirement benefit accruals for union and non-union employees.

During 2024, the pension benefit obligation had an actuarial gain of $21.4 million, primarily due to a $25.9 million gain from increases in discount rates. During 2024, the postretirement benefit obligation had an actuarial gain of $1.8 million, primarily due to a $2.8 million gain from increases in discount rates.

Amounts recognized as of December 31, 2025 and 2024 consisted of:

	Pension Benefits		Postretirement Benefits	
As of December 31,	**2025**	**2024**	**2025**	**2024**
(Thousands)				
Non-current liabilities	$ (56,833)	$ (81,493)	$ 10,628	$ (5,749)

We have determined that we are allowed to defer as regulatory assets or regulatory liabilities items that would otherwise be recorded in accumulated other comprehensive income pursuant to the accounting requirements concerning defined benefit pension and other postretirement plans.

Amounts recognized as regulatory assets or regulatory liabilities for the years ended December 31, 2025 and 2024 consisted of:

	Pension Benefits		Postretirement Benefits	
Years Ended December 31,	2025	2024	2025	2024
(Thousands)				
Net loss (gain)	$ 62,336	$ 68,979	$ (9,910)	$ (10,670)
Prior service cost (credit)	$ 1,860	$ 3,048	$ (10,832)	$ —

Our accumulated benefit obligation (ABO) for all qualified defined benefit pension plans was $368.2 million and $366.3 million as of December 31, 2025 and 2024, respectively. Our postretirement benefits were partially funded at December 31, 2025 and 2024.

The PBO and ABO exceeded the fair value of pension plan assets for our qualified plans as of December 31, 2025 and 2024. The following table shows the aggregate projected and accumulated benefit obligations and the fair value of plan assets for the relevant periods.

As of December 31,	2025	2024
(Thousands)		
Projected benefit obligation	$ 368,223	$ 366,284
Accumulated benefit obligation	$ 368,223	$ 366,284
Fair value of plan assets	$ 311,390	$ 284,791

As of December 31, 2025 and 2024, the accumulated postretirement benefits obligation for all the qualified plans exceeded the fair value of plan assets.

Components of net periodic benefit cost and other changes in plan assets and benefit obligations recognized in income and regulatory assets and liabilities for the years ended December 31, 2025 and 2024 consisted of:

	Pension Benefits		Postretirement Benefits	
For the years ended December 31,	2025	2024	2025	2024
(Thousands)				
Net Periodic Benefit Cost:				
Service cost	$ —	$ —	$ 230	$ 292
Interest cost	18,858	17,937	1,970	2,129
Expected return on plan assets	(17,916)	(20,159)	(2,550)	(2,234)
Amortization of prior service cost (credit)	1,188	1,188	(781)	—
Amortization of actuarial loss (gain)	3,093	3,773	(1,513)	(1,004)
Net Periodic Benefit Cost	**$ 5,223**	**$ 2,739**	**$ (2,644)**	**$ (817)**
Other changes in plan assets and benefit obligations recognized in regulatory assets and regulatory liabilities:				
Current year prior service cost	$ —	$ —	$ (11,613)	$ —
Amortization of prior service (cost) benefit	(1,188)	(1,188)	781	—
Current year actuarial gain	(3,549)	(10,600)	(754)	(4,645)
Amortization of actuarial (loss) gain	(3,093)	(3,773)	1,513	1,004
Total Other Changes	**$ (7,830)**	**$ (15,561)**	**$ (10,073)**	**$ (3,641)**
Total Recognized	**$ (2,607)**	**$ (12,822)**	**$ (12,717)**	**$ (4,458)**

We include the net periodic benefit cost in other operating expenses for the service component and other deductions for the non-service component. The net periodic benefit cost for

postretirement benefits represents the amount expensed for providing health care benefits to retirees and their eligible dependents.

The weighted-average assumptions used to determine benefit obligations as of December 31, 2025 and 2024 consisted of:

	Pension Benefits		Postretirement Benefits	
As of December 31,	**2025**	**2024**	**2025**	**2024**
Discount rate	5.05%	5.41%	4.92%	5.33%
Rate of compensation increase	N/A	N/A	N/A	N/A
Interest crediting rate	N/A	N/A	N/A	N/A

The discount rate is the rate at which the benefit obligations could presently be effectively settled. We determined the discount rates by developing yield curves derived from a portfolio of high grade non-callable bonds with yields that closely match the duration of the expected cash flows of our benefit obligations.

The weighted-average assumptions used to determine net periodic benefit cost for the years ended December 31, 2025 and 2024 consisted of:

	Pension Benefits		Postretirement Benefits	
Years Ended December 31,	**2025**	**2024**	**2025**	**2024**
Discount rate	5.41%	4.69%	5.33%/5.00%	4.65%
Expected long-term return on plan assets	7.00%	7.50%	6.50%	6.50%
Rate of compensation increase	N/A	N/A	N/A	N/A

We developed our expected long-term rate of return on plan assets assumption based on a review of long-term historical returns for the major asset classes, the target asset allocations, and the effect of rebalancing of plan assets discussed below. Our analysis considered current capital market conditions and projected conditions. Our policy is to calculate the expected return on plan assets using the market related value of assets. We amortize unrecognized actuarial gains and losses in excess of 5% of the greater of PBO or MRVA related to the pension and other postretirement benefits plans on straight line basis over future working lifetime. Effective March 31, 2022, the amortization period for the UI Pension Plan was updated from future working lifetime to future expected lifetime as the plan was frozen, or predominantly frozen, to future accruals.

Assumed health care cost trend rates used to determine benefit obligations as of December 31, 2025 and 2024 consisted of:

As of December 31,	**2025**	**2024**
Health care cost trend rate assumed for next year	8.40% / 10.10%	8.90% / 6.20%
Rate to which cost trend rate is assumed to decline (ultimate trend rate)	4.50%	4.50%
Year that the rate reaches the ultimate trend rate	2039/2039	2039/2032

Contributions

We make annual contributions in accordance with our funding policy of not less than the minimum amounts as required by applicable regulations. We expect to contribute $10.9 million to our pension plan during 2026. We expect to contribute $2.1 million to our other postretirement benefit plans during 2026.

Estimated future benefit payments

Expected benefit payments and Medicare Prescription Drug, Improvement and Modernization Act of 2003 (Medicare Act) subsidy receipts reflecting expected future service as of December 31, 2025 consisted of:

(Thousands)	Pension Benefits	Postretirement Benefits	Medicare Act Subsidy Receipts
2026	$ 35,496	$ 3,277	$ —
2027	$ 33,783	$ 3,069	$ —
2028	$ 32,586	$ 2,964	$ —
2029	$ 32,213	$ 2,743	$ —
2030	$ 30,099	$ 2,693	$ —
2031 - 2035	$ 135,946	$ 11,794	$ —

Plan assets

Our pension benefits plan assets are held in a master trust providing for a single trustee/ custodian, a uniform investment manager lineup, and an efficient, cost-effective means of allocating expenses and investment performance to each plan under the master trust. Our primary investment objective is to ensure that current and future benefit obligations are adequately funded and with volatility commensurate with our tolerance for risk. Preservation of capital and achievement of sufficient total return to fund accrued and future benefits obligations are of highest concern. Our primary means for achieving capital preservation is through diversification of the trust's investments while avoiding significant concentrations of risk in any one area of the securities markets. Within each asset group, further diversification is achieved through utilizing multiple asset managers and systematic allocation to various asset classes and providing broad exposure to different segments of the equity, fixed-income and alternative investment markets.

The asset allocation policy is the most important consideration in achieving our objective of superior investment returns while minimizing risk. We have established a target asset allocation policy within allowable ranges for our pension benefits plan assets within broad categories of asset classes made up of Return-Seeking and Liability-Hedging investments. We have targets of 15%-70% for Return-Seeking assets and 30%-85% for Liability-Hedging assets. Return-Seeking investments generally consist of domestic, international, global, and emerging market equities invested in companies across all market capitalization ranges. Return-Seeking assets also include investments in real estate, global asset allocation strategies and hedge funds. Liability-Hedging investments generally consist of long-term corporate bonds, annuity contracts, long-term treasury STRIPS, and opportunistic fixed income investments. Systematic rebalancing within the target ranges increases the probability that the annualized return on the investments will be enhanced, while realizing lower overall risk, should any asset categories drift outside their specified ranges.

The fair values of pension benefits plan assets, by asset category, as of December 31, 2025, consisted of:

As of December 31, 2025		Fair Value Measurements		
(Thousands)	Total	Level 1	Level 2	Level 3
Asset Category				
Cash and cash equivalents	$ 12,363	$ —	$ 12,363	$ —
U.S. government securities	44,055	44,055	—	—

Total	**$ 284,791**			

Valuation Techniques

We value our pension benefits plan assets as follows:

- Cash and cash equivalents - Level 1: at cost, plus accrued interest, which approximates fair value. Level 2: proprietary cash associated with other investments, based on yields currently available on comparable securities of issuers with similar credit ratings.
- U.S. government securities - at the closing price reported in the active market in which the security is traded.
- Common stock - at the closing price reported in the active market in which the security is traded.
- Corporate bonds - based on yields currently available on comparable securities of issuers with similar credit ratings.
- Preferred stocks - at the closing price reported in the active market in which the individual investment is traded.
- Registered investment companies - at the closing price reported in the active market in which the individual investment is traded.

- Common collective trusts - the fair value is primarily derived from the quoted prices in active markets of the underlying securities. Because the fund shares are offered to a limited group of investors, they are not considered to be traded in an active market.
- Other investments, principally annuity and fixed income - based on yields currently available on comparable securities of issuers with similar credit ratings.
- Other investments measured at net asset value (NAV) - fund shares offered to a limited group of investors and alternative investments, such as private equity and real estate oriented investments, partnership/joint ventures and hedge funds are valued using the NAV as a practical expedient.

Our postretirement benefits plan assets are held with trustees in multiple voluntary employees' beneficiary association (VEBA) and 401(h) arrangements and are invested among and within various asset classes to achieve sufficient diversification in accordance with our risk tolerance. This is achieved for our postretirement benefits plan assets through the utilization of multiple institutional mutual and money market funds, providing exposure to different segments of the fixed income, equity and short-term cash markets. Our postretirement benefits plan assets are invested in a VEBA arrangement that is not subject to income taxes.

We have established a target asset allocation policy within allowable ranges for postretirement benefits plan assets of 49%-69% for equity securities and 31%-51% for fixed income. Equity investments are diversified across U.S. and non-U.S. stocks, investment styles, and market capitalization ranges. Fixed income investments are primarily invested in U.S. bonds and may also include some non-U.S. bonds. Other asset classes, including alternative investments, are used to enhance long-term returns while improving portfolio diversification. We primarily minimize the risk of large losses through diversification but also through monitoring and managing other aspects of risk through quarterly investment portfolio reviews. Systematic rebalancing within target ranges increases the probability that the annualized return on investments will be enhanced, while realizing lower overall risk, should any asset categories drift outside their specified ranges.

The fair values of other postretirement benefits plan assets, by asset category, as of December 31, 2025, consisted of:

As of December 31, 2025		**Fair Value Measurements**		
(Thousands)	**Total**	**Level 1**	**Level 2**	**Level 3**
Asset Category				
Cash and cash equivalents	$ 321	$ —	$ 321	$ —
Registered investment companies	42,451	42,451	—	—
Total	**$ 42,772**	**$ 42,451**	**$ 321**	**$ —**

The fair values of pension benefits plan assets, by asset category, as of December 31, 2024, consisted of:

As of December 31, 2024		**Fair Value Measurements**		
(Thousands)	**Total**	**Level 1**	**Level 2**	**Level 3**
Asset Category				
Cash and cash equivalents	$ 871	$ —	$ 871	$ —
Registered investment companies	37,438	37,438	—	—
Total	**$ 38,309**	**$ 37,438**	**$ 871**	**$ —**

Valuation techniques

We value our postretirement benefits plan assets as follows:

- Cash and cash equivalents - Level 1: at cost, plus accrued interest, which approximates fair value. Level 2: proprietary cash associated with other investments, based on yields currently available on comparable securities of issuers with similar credit ratings.
- Registered investment companies - at the closing price reported in the active market in which the individual investment is traded.

Pension and postretirement plan equity securities did not include any Iberdrola common stock as of both December 31, 2025 and 2024.

Note 14. Equity Method Investments

UI is a party to a 50-50 joint venture with Clearway Energy, Inc. in GenConn, which operates two peaking generation plants in Connecticut. UI's investment in GenConn is being accounted for as an equity investment, the carrying value of which was $72.1 million and $75.1 million as of December 31, 2025 and 2024, respectively.

UI's pre-tax income from its equity investment in GenConn was $1.7 million and $2.3 million for the years ended December 31, 2025 and 2024, respectively.

Cash distributions from GenConn are reflected as either distributions of earnings or as returns of capital in the operating and investing sections of the statements of cash flows, respectively. UI received cash distributions from GenConn of $4.7 million and $5.9 million during the years ended December 31, 2025 and 2024, respectively.

The following represents summarized financial information of GenConn as of and for the years ended December 31, 2025 and 2024, respectively:

Years Ended December 31,		2025		2024
(Thousands)				
Current assets	$	50,709	$	42,984
Non-current assets	$	260,018	$	277,086
Current liabilities	$	19,240	$	16,124
Non-current liabilities	$	147,390	$	153,864
Operating revenues	$	46,660	$	46,968
Income	$	3,370	$	4,489

Note 15. Other Income and Other Deductions

Other income and other deductions for the years ended December 31, 2025 and 2024, respectively, consisted of:

Years Ended December 31,		2025		2024
(Thousands)				
Interest and dividends income	$	6,483	$	5,022
Allowance for funds used during construction		14,921		12,973
Carrying costs on regulatory assets		9,435		13,982
Miscellaneous		126		92
Total other income	**$**	**30,965**	**$**	**32,069**
Pension non-service components	$	(2,653)	$	(2,131)
Miscellaneous		(6,355)		(4,529)
Total other deductions	**$**	**(9,008)**	**$**	**(6,660)**

Note 16. Related Party Transactions

Certain Networks subsidiaries, including UI, borrow from AGR, the parent of Networks, through intercompany revolving credit agreements. For UI, the intercompany revolving credit agreements provide access to supplemental liquidity. See Note 7 for further detail on the credit facility with AGR.

Avangrid Service Company provides administrative and management services to Networks operating utilities, including UI, pursuant to service agreements. The cost of those services is allocated in accordance with methodologies set forth in the service agreements. The cost allocation methodologies vary depending on the type of service provided. Management believes such allocations are reasonable. The charge for operating and capital services provided to UI by AGR and its affiliates was approximately $80.5 million and $89.3 million for the years ended December 31, 2025 and 2024, respectively. Cost for services includes amounts capitalized in utility plant, which was approximately $10.7 million in 2025 and $8.8 million in 2024, respectively. The remainder was primarily recorded as operations and maintenance expense. The charges for services provided by UI to AGR and its subsidiaries were approximately $18.9 million in 2025 and $15.4 million in 2024. All charges for services are at cost. All of the charges associated with services provided are recorded as revenues to offset other operating expenses on the financial statements.

The balance in accounts payable to affiliates of $63.1 million at December 31, 2025 and $78.3 million at December 31, 2024 is primarily due to UIL Holdings. The balance in accounts receivable from affiliates of $67.3 million at December 31, 2025 is primarily receivable from Avangrid Service Company, and the balance of accounts receivable from affiliates of $0.3 million at December 31, 2024 is receivable from various companies.

The balance in notes receivable from affiliates of $7.7 million at December 31, 2025 is receivable from BGC and CNG. The balance in notes receivable from affiliates $23.0 million at December 31, 2024 is receivable from CMP. Notes receivable from affiliates relate to the Virtual Money Pool Agreement as discussed in Note 7 of these financial statements.

Note 17. Subsequent Events

The company has performed a review of subsequent events through April 10, 2026, which is the date these financial statements were available to be issued.

Independent Auditors' Report

The Stockholder and Board of Directors
The Berkshire Gas Company:

Opinion

We have audited the financial statements of The Berkshire Gas Company (the Company), which comprise the balance sheets as of December 31, 2025 and 2024, and the related statements of income, changes in common stock equity, and cash flows for the years then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2025 and 2024, and the results of its operations and its cash flows for the years then ended in accordance with U.S. generally accepted accounting principles.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with U.S. generally accepted accounting principles, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.

KPMG LLP, a Delaware limited liability partnership, and its subsidiaries are part of the KPMG global organization of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee.

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, no such opinion is expressed.

- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.

- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

Notes to Financial Statements

Note 1. Summary of Significant Accounting Policies, New Accounting Pronouncements and Use of Estimates

***Background and nature of operations*:** The Berkshire Gas Company (Berkshire, the company, we, our, us), engages in natural gas transportation, distribution and sales operations in Massachusetts serving approximately 40,600 customers in its service area totaling 738 square miles as of December 31, 2025. Berkshire is regulated by the Massachusetts Department of Public Utilities (DPU) as it relates to utility service.

Berkshire is the principal operating utility of Berkshire Energy Resources (BER), a wholly-owned subsidiary of UIL Holdings Corporation (UIL Holdings). BER is a holding company whose sole business is ownership of its operating regulated gas utility. UIL Holdings, whose primary business is ownership of its operating regulated utility businesses, is a wholly-owned subsidiary of Avangrid Networks, Inc. (Networks), which is a wholly-owned subsidiary of Avangrid, Inc. (AGR), which is a wholly-owned subsidiary of Iberdrola, S.A. (Iberdrola), a corporation organized under the laws of the Kingdom of Spain.

Agreement and Plan of Merger: On May 17, 2024, AGR entered into an Agreement and Plan of Merger (the Merger Agreement) with Iberdrola and Arizona Merger Sub, Inc (Merger Sub). As a result of the consummation of the Merger on December 23, 2024 (closing date), Merger Sub merged with and into Avangrid (the Merger), with Avangrid continuing as the surviving corporation and a wholly-owned subsidiary of Iberdrola. On the closing date, each share of common stock issued and outstanding immediately prior to the closing date (other than common stock owned by the Merger, Merger Sub or any other direct or indirect wholly-owned Subsidiary of the Merger, and in each case not held on behalf of the third parties (collectively, the Excluded Shares)) was converted into a right to receive $35.75 per share of common stock in cash, without interest.

On the closing date, (i) all shares of common stock ceased to be outstanding, were cancelled and ceased to exist and (ii) each Excluded Share ceased to be outstanding and was cancelled without payment of any consideration and ceased to exist. As a result of the consummation of the Merger on December 23, 2024, Iberdrola became the direct owner of 100 shares of common stock of Avangrid which represents the only outstanding capital of the Company. On the closing date, the New York Stock Exchange (NYSE) filed with the Securities and Exchange Commission (the SEC) a notification of removal from listing on Form 25 in order to delist the common stock from the NYSE and deregister the common stock under Section 12(b) of the Securities Exchange Act of 1934, as amended (the Exchange Act). Following the effectiveness of the Form 25, on January 2, 2025, Avangrid filed with the SEC a Form 15 requesting the termination of registration of the common stock under Section 12(g) of the Exchange Act and the suspension of reporting obligations under Section 13 and 15(d) of the Exchange Act with respect to the common stock.

***Basis of presentation*:** The accompanying financial statements have been prepared in accordance with generally accepted accounting principles in the United States (U.S. GAAP) and are also maintained in accordance with the uniform system of accounts prescribed by the Federal Energy Regulatory Commission (FERC) and the DPU.

***Significant Accounting Policies*:** We consider the following policies to be the most significant in understanding the judgments that are involved in preparing our financial statements:

***Revenue recognition*:** We recognize revenues when we transfer control of promised goods or services to our customers in an amount that reflects the consideration we expect to be entitled to in exchange for those goods or services. Refer to Note 4 for further details.

***Regulatory accounting*:** We account for our regulated operations in accordance with the authoritative guidance applicable to entities with regulated operations that meet the following criteria: (i) rates are established or approved by an independent, third-party regulator; (ii) rates are designed to recover the entity's specific costs of providing the regulated services or products and; (iii) there is a reasonable expectation that rates are set at levels that will recover the entity's costs and can be collected from customers. Regulatory assets primarily represent incurred costs that have been deferred because of their probable future recovery from customers through regulated rates. Regulatory liabilities represent: (i) the excess recovery of costs or accrued credits that have been deferred because it is probable such amounts will be returned to customers through future regulated rates; or (ii) billings in advance of expenditures for approved regulatory programs.

We amortize regulatory assets and liabilities and recognize the related expense or revenue in our statements of income consistent with the recovery or refund included in customer rates. We believe it is probable that our currently recorded regulatory assets and liabilities will be recovered or settled in future rates.

***Goodwill*:** Goodwill represents future economic benefits arising from other assets acquired in a business combination that are not individually identified and separately recognized. Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred, the fair value of any noncontrolling interest and the acquisition date fair value of any previously held equity interest in the acquiree over the fair value of the net identifiable assets acquired and liabilities assumed.

Goodwill is not amortized, but is subject to an assessment for impairment performed in the fourth quarter or more frequently if events occur or circumstances change that would more likely than not reduce the fair value of the reporting unit to which goodwill is assigned below its carrying amount. A reporting unit is an operating segment or one level below an operating segment and is the level at which we test goodwill for impairment.

In assessing goodwill for impairment, we have the option to first perform a qualitative assessment to determine whether a quantitative assessment is necessary. If we determine, based on qualitative factors, that the fair value of the reporting unit is more likely than not greater than the carrying amount, no further testing is required. If we bypass the qualitative assessment, or perform the qualitative assessment but determine it is more likely than not that its fair value is less than its carrying amount, we perform a quantitative test to compare the fair value of the reporting unit to its carrying amount, including goodwill. If the carrying amount of the reporting unit exceeds its fair value, we record an impairment loss as a reduction to goodwill and a charge to operating expenses, but the loss recognized would not exceed the total amount of goodwill allocated to the reporting unit.

***Utility plant*:** We account for utility plant at historical cost. In cases where we are required to dismantle installations or to recondition the site on which they are located, we record the estimated cost of removal or reconditioning as an asset retirement obligation (ARO) and add an equal amount to the carrying amount of the asset.

Development and construction of our various facilities are carried out in stages. We expense project costs during early stage development activities. Once we achieve certain development milestones and it is probable that we can obtain future economic benefits from a project, we capitalize salaries and wages for persons directly involved in the project, and engineering, permits, licenses, wind measurement and insurance costs. We periodically review development projects in construction for any indications of impairment.

We transfer assets from “Construction work in progress” to “Utility plant” when they are available for service.

We determine depreciation expense for utility plant in service using the straight-line method, based on the average service lives of groups of depreciable property, which include estimated cost of removal. Consistent with FERC accounting requirements, we charge the original cost of utility plant retired or otherwise disposed of to accumulated depreciation. Our composite rates for depreciation were 2.4% of average depreciable property for 2025 and 2.5% of average depreciable property for 2024. We amortize our capitalized software cost, using the straight-line method, based on useful lives of 6 to 12 years. Depreciation expense was $9.4 million in 2025 and $9.0 million in 2024. Amortization of capitalized software was $1.4 million in 2025 and $1.2 million in 2024.

We charge repairs and minor replacements to operating expenses, and capitalize renewals and betterments, including certain indirect costs.

Allowance for funds used during construction (AFUDC) is a non-cash item that represents the allowed cost of capital, including a return on equity (ROE), used to finance construction projects. We record the portion of AFUDC attributable to borrowed funds as a reduction of interest expense and record the remainder as other income. AFUDC rates are determined in accordance with applicable FERC guidelines for each regulated utility using an annual rate that is compounded semiannually.

Our balances of major classes of utility plant and associated useful lives are shown below as of December 31:

Utility Plant	**Estimated useful life range (years)**	**2025**	**2024**
(Thousands)			
Gas distribution plant	4-68	$ 331,028	$ 306,658
Software	6-12	16,529	15,367
Land		2,305	2,305
Buildings and improvements	50-55	36,380	34,223
Other plant	25-55	17,492	17,459
Utility plant at original cost		**403,734**	**376,012**
Less accumulated depreciation		(117,196)	(112,376)
Net Utility Plant in Service		**286,538**	**263,636**
Construction work in progress		8,711	5,973
Total Utility Plant		**$ 295,249**	**$ 269,609**

***Leases*:** We determine if an arrangement is a lease at inception. We classify a lease as a finance lease if it meets any one of specified criteria that in essence transfers ownership of the underlying asset to us by the end of the lease term. If a lease does not meet any of those criteria, we classify it as an operating lease. On our balance sheets, we include, for operating leases: "Operating lease right-of-use (ROU) assets" and "Operating lease liabilities (current and non-current)"; and for finance leases: finance lease ROU assets in "Other assets" and liabilities in "Other current liabilities" and "Other liabilities."

ROU assets represent our right to use an underlying asset for the lease term and lease liabilities represent our obligation to make lease payments arising from the lease. We recognize lease ROU assets and liabilities at commencement of an arrangement based on the present value of

lease payments over the lease term. We use the incremental borrowing rate based on information available at the lease commencement date to determine the present value of future payments, except when the rate implicit in the lease is determinable. A lease ROU asset also includes any lease payments made at or before commencement date, minus any lease incentives received, and includes initial direct costs incurred. We do not record leases with an initial term of 12 months or less on the balance sheet for all classes of underlying assets, and we recognize lease expense for those leases on a straight-line basis over the lease term. We include variable lease payments that depend on an index or a rate in the ROU asset and lease liability measurement based on the index or rate at the commencement date, or upon a modification. We do not include variable lease payments that do not depend on an index or a rate in the ROU asset and lease liability measurement. A lease term includes an option to extend or terminate the lease when it is reasonably certain that we will exercise that option. We recognize lease (rent) expense for operating lease payments on a straight-line basis over the lease term, or we recognize the amount eligible for recovery under our rate plan, such as actual amounts paid. We amortize finance lease ROU assets on a straight-line basis over the lease term and recognize interest expense based on the outstanding lease liability.

We have lease agreements with lease and non-lease components, and account for lease components and associated non-lease components together as a single lease component, for all classes of underlying assets.

***Impairment of long-lived assets*:** We evaluate utility plant and other long-lived assets for impairment when events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment evaluation is based on an undiscounted cash flow analysis at the lowest level to which cash flows of the long-lived assets or asset groups are largely independent of the cash flows of other assets and liabilities. We are required to recognize an impairment loss if the carrying amount of the asset exceeds the undiscounted future net cash flows associated with that asset.

The impairment loss to be recognized is the amount by which the carrying amount of the long-lived asset exceeds the asset's fair value. Depending on the asset, fair value may be determined by use of a discounted cash flow model, with assumptions consistent with a market participant's view of the exit price of the asset.

***Fair value measurement*:** Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants as of the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place in either the principal market for the asset or liability, or, in the absence of a principal market, in the most advantageous market for the asset or liability.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset according to its highest and best use, or by selling it to another market participant that would use the asset according to its highest and best use.

We use valuation techniques that are appropriate in the circumstances and for which sufficient data is available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs. All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy

based on the transparency of input to the valuation of an asset or liability as of the measurement date.

The three input levels of the fair value hierarchy are as follows:

- Level 1 - inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.
- Level 2 - inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability either directly or indirectly, for substantially the full term of the contract.
- Level 3 - one or more inputs to the valuation methodology are unobservable or cannot be corroborated with market data.

Categorization within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. Certain investments are not categorized within the fair value hierarchy. These investments are measured based on the fair value of the underlying investments but may not be readily redeemable at that fair value.

***Cash and cash equivalents*:** Cash and cash equivalents include cash, bank accounts, and other highly liquid short-term investments. We consider all highly liquid investments with a maturity date of three months or less when acquired to be cash equivalents and include those investments in “Cash and cash equivalents.” We classify book overdrafts representing outstanding checks in excess of funds on deposit as “Accounts payable and accrued liabilities” on our balance sheets. We report changes in book overdrafts in the operating activities section of our statements of cash flows.

Concentration of risk: We maintain our cash and cash equivalents in accounts with major financial institutions in the form of demand deposits and money market accounts. Deposits in these financial institutions may exceed the amount of federal deposit insurance provided on such deposits.

***Statements of cash flows*:** Supplemental disclosure of cash flow information is as follows:

		2025		2024
(Thousands)				
Cash paid (refunded) during the years ended December 31:				
Interest, net of amounts capitalized	$	4,957	$	3,611
Income taxes paid (refunded), net	$	1,799	$	(1,199)

Of the income taxes paid (refunded), substantially all were paid to (refunded by) AGR under the tax sharing agreement. Interest capitalized was $0.2 million in 2025 and $0.3 million in 2024, respectively. Accrued liabilities for utility plant additions were $8.6 million at December 31, 2025 and $7.5 million at December 31, 2024.

***Trade receivables and unbilled revenue, net of allowance for credit losses*:** We record trade receivables at amounts billed to customers and we record unbilled revenues based on an estimate of energy delivered or services provided to customers. The estimates for unbilled revenues are determined based on various assumptions, including current month energy load requirements, billing rates by customer class and delivery loss factors. Changes in those assumptions could significantly affect the estimated amounts of unbilled revenues.

The allowance for credit losses is our best estimate of the amount of probable credit losses in our existing accounts receivable, determined based on experience for each service region. Each month we review our allowance for credit losses and past due accounts by age. When we believe that a receivable will not be recovered, we charge off the account balance against the allowance. Changes in assumptions about input factors and customer receivables, which are inherently uncertain and susceptible to change from period to period, could significantly affect the allowance for credit losses estimates.

Trade receivables at December 31 include unbilled revenues of $8.6 million for 2025 and $8.7 million for 2024, and are shown net of an allowance for credit losses at December 31 of $2.3 million for 2025 and $2.4 million for 2024. Trade receivables do not bear interest, although late fees may be assessed. Credit loss expense was $1.3 million in 2025 and $1.4 million in 2024.

We establish our allowance for credit losses, including for unbilled revenue (also referred to as contract assets), by using both historical average loss percentages to project future losses, and by establishing a specific allowance for known credit issues or for specific items not considered in the historical average calculation. We also consider whether we need to adjust historical loss rates to reflect the effects of current conditions and forecasted changes considering various economic indicators (e.g., Gross Domestic Product, Personal Income, Consumer Price Index, Unemployment Rate) over the contractual life of the trade receivables. We write off amounts when we have exhausted reasonable collection efforts.

***Debentures, bonds and bank borrowings*:** We record bonds, debentures and bank borrowings as a liability equal to the proceeds of the borrowings. We treat the difference between the proceeds and the face amount of the issued liability as discount or premium and accrete the amounts as interest expense or income over the life of the instrument. We defer incremental costs associated with the issuance of the debt instruments and amortize them over the same period as debt discount or premium. We present bonds, debentures and bank borrowings net of unamortized discount, premium and debt issuance costs on our balance sheets.

Gas in storage: We own natural gas that is stored in third-party owned underground storage facilities, which we record as inventory. We price injections of inventory into storage at the market purchase cost at the time of injection, and price withdrawals of working gas from storage at the weighted-average cost in storage. We continuously monitor the weighted-average cost of gas value to ensure it remains at the lower of cost and net realizable value. We report inventories to support gas operations on our balance sheets within “Fuel and natural gas in storage.”

Materials and supplies: Materials and supplies inventories are used for construction of new facilities and repairs of existing facilities. These inventories are carried and withdrawn at the lower of cost and net realizable value and reported on our balance sheets within “Materials and supplies.” We combine inventory items for the statement of cash flow presentation purposes.

Government grants: We record government grants as a reduction to the related utility plant to be recovered through rate base, in accordance with the prescribed FERC accounting.

In accounting for government grants related to operating and maintenance costs, we recognize amounts receivable as an offset to expenses in the statements of income in the period in which we incur the expenses.

There were no government grants recorded as of December 31, 2025 and 2024.

Deferred income: Apart from government grants, we occasionally receive revenues from transactions in advance of the resulting performance obligations arising from the transaction. It is our policy to defer such revenues on our balance sheets and amortize them to earnings when revenue recognition criteria are met.

Accrued removal obligations**:** We meet the requirements concerning accounting for regulated operations and recognize a regulatory liability for the difference between removal costs collected in rates and actual costs incurred. We classify those amounts as accrued removal obligations.

Environmental remediation liability**:** In recording our liabilities for environmental remediation costs the amount of liability for a site is the best estimate, when determinable; otherwise it is based on the minimum liability or the lower end of the range when there is a range of estimated losses. We record our environmental liabilities on an undiscounted basis.

Post-employment and other employee benefits**:** We sponsor defined benefit pension plans that cover the majority of our employees. We also provide health care and life insurance benefits through various postretirement plans for eligible retirees.

We evaluate our actuarial assumptions on an annual basis and consider changes based on market conditions and other factors. All of our qualified defined benefit plans are funded in amounts calculated by independent actuaries, based on actuarial assumptions proposed by management.

We account for defined benefit pension or other postretirement plans, recognizing an asset or liability for the overfunded or underfunded plan status. For a pension plan, the asset or liability is the difference between the fair value of the plan's assets and the projected benefit obligation. For any other postretirement benefit plan, the asset or liability is the difference between the fair value of the plan's assets and the accumulated postretirement benefit obligation. We generally reflect all unrecognized prior service costs and credits and unrecognized actuarial gains and losses as regulatory assets rather than in OCI, as management believes it is probable that such items will be recoverable through the ratemaking process. Certain non-qualified plan expenses are not recoverable through the ratemaking process and we present the unrecognized prior service costs and credits and unrecognized actuarial gains and losses in accumulated other comprehensive loss. If a plan meets settlement or curtailment accounting criteria, we recognize a regulatory asset or liability if these costs are probable of recovery from ratepayers.We use a December 31st measurement date for our benefits plans.

We amortize prior service costs for both the pension and other postretirement benefits plans on a straight-line basis over the average remaining service period of employees active on the date of the amendment. Effective March 31, 2022, the amortization period for prior service cost changes for the Berkshire Non-Union Plan was updated from average remaining service to future expected lifetime as the plan was frozen, or predominantly frozen, to future accruals. We amortize unrecognized actuarial gains and losses in excess of 10% of the greater of PBO or market-related value of assets (MRVA) related to the pension and other postretirement benefits plans on straight line basis over future working lifetime. Effective March 31, 2022, the amortization period for the Berkshire Non-Union Plan was updated from future working lifetime to future expected lifetime as the plan was frozen, or predominantly frozen, to future accruals. Our policy is to calculate the expected return on plan assets using the market-related value of assets. We determine that value by recognizing the difference between actual returns and expected returns over a five-year period.

***Income taxes*:** In August 2022, the Inflation Reduction Act of 2022 ("IRA") was signed into law in the United States. The IRA created a new corporate alternative minimum tax (“CAMT”) of 15% on adjusted financial statement income and an excise tax of 1% on the value of certain stock repurchases. The CAMT and other various applicable provisions of the IRA are effective for the Company for periods beginning after December 31, 2022. The impact of CAMT will depend on our facts in each year, as well as on anticipated guidance from the U.S. Department of Treasury.

AGR, the parent company of Networks, files a consolidated federal income tax return and various state income tax returns, some of which are unitary as required or permitted, including all of the activities of its subsidiaries. Each subsidiary company is treated as a member of the consolidated group and determines its current and deferred taxes based on the separate return with benefits for loss method. As a member, Berkshire settles its current tax liability or benefit each year directly with AGR pursuant to a tax allocation agreement between AGR and its members.

The aggregate amount of the related party income tax payable balance due to AGR is $1.0 million and $2.1 million at December 31, 2025 and 2024, respectively.

We use the asset and liability method of accounting for income taxes. Deferred tax assets and liabilities reflect the expected future tax consequences, based on enacted tax laws, of temporary differences between the tax basis of assets and liabilities and their financial reporting amounts. In accordance with U.S. GAAP for regulated industries, we have established regulatory assets for the net revenue requirements to be recovered from customers for the related future tax expense associated with certain of these temporary differences. We defer the investment tax credits when earned and amortize them over the estimated lives of the related assets. We also recognize the income tax consequences of intra-entity transfers of assets other than inventory when the transfer occurs. We had no intra-entity transfers of assets other than inventory during the years ended December 31, 2025 and 2024.

Deferred tax assets and liabilities are measured at the expected tax rate for the period in which the asset or liability will be realized or settled, based on legislation enacted as of the balance sheet date. We charge or credit changes in deferred income tax assets and liabilities that are associated with components of OCI directly to OCI. Significant judgment is required in determining income tax provisions and evaluating tax positions. Our tax positions are evaluated under a more-likely-than-not recognition threshold before they are recognized for financial reporting purposes. We record valuation allowances to reduce deferred tax assets when it is not more likely than not that we will realize all or a portion of a tax benefit. Deferred tax assets and liabilities are netted and classified as non-current in our balance sheets.

We record the excess of state franchise tax computed as the higher of a tax based on income or a tax based on capital in “Taxes other than income taxes” and “Taxes accrued” in our financial statements.

Positions taken or expected to be taken on tax returns, including the decision to exclude certain income or transactions from a return, are recognized in the financial statements when it is more likely than not the tax position can be sustained based solely on the technical merits of the position. The amount of a tax return position that is not recognized in the financial statements is disclosed as an unrecognized tax benefit. Changes in assumptions on tax benefits may also impact interest expense or interest income and may result in the recognition of tax penalties. Interest and penalties related to unrecognized tax benefits are recorded within “Interest expense, net of capitalization” and “Other Income” and “Other Deductions” in the statements of income.

Uncertain tax positions have been classified as non-current unless expected to be paid within one year. Our policy is to recognize interest and penalties on uncertain tax positions as a component of interest expense in the statements of income.

Our income tax expense, deferred tax assets and liabilities, and liabilities for unrecognized tax benefits reflect management's best assessment of estimated current and future taxes to be paid. Significant judgments and estimates are required in determining the consolidated income tax components of the financial statements.

Adoption of New Accounting Pronouncements

Although we are not a public business entity, we adopt new accounting standards based on public business entity guidance aside from the effective dates in certain situations where we may follow the effective dates for private entities.

There have been no new accounting pronouncements adopted as of and for the year ended December 31, 2025 that are expected to have a material impact on Berkshire's financial statements.

Accounting Pronouncements Issued But Not Yet Adopted

The following are new accounting pronouncements not yet adopted that we have evaluated or are evaluating to determine their effect on our financial statements.

(a) Simplified credit loss guidance

In July 2025, FASB issued guidance to simplify applying ASC 326, Financial instruments – Credit losses, to current accounts receivable and contract assets arising from transactions accounted for under ASC 606, Revenue from contracts with customers, including those assets acquired in a business combination or recognized through the consolidation of a variable interest entity that is not a business if those assets arose from transactions that the acquiree or variable interest entity accounted for under ASC 606. The update introduces (1) a practical expedient allowing entities to assume current conditions remain unchanged over the remaining life of these assets, and (2) an accounting policy election for non-public entities, permitting consideration of post– balance sheet cash collections when estimating expected credit losses, provided the practical expedient is also elected. The amendment is effective for all entities in interim and annual periods for fiscal years beginning after December 15, 2025. We do not expect the new guidance to have a material impact on our results of operations, financial position and cash flows.

(b) Accounting for internal-use software costs

In September 2025 FASB issued guidance to modernize internal-use software guidance to eliminate the old stage-based capitalization model and to introduce a probable-to-complete threshold, requiring management authorization, funding commitment, and a probable expectation of completion before capitalization begins. It provides enhanced guidance and examples for applying this threshold, including factors for assessing significant development uncertainty such as novel features or ongoing revisions to performance requirements. Existing rules for external-use software, types of costs eligible for capitalization, and the point at which capitalization ceases remain unchanged. The amendment is effective for all entities in interim and annual periods for fiscal years beginning after December 15, 2027. We do not expect the new guidance to have a material impact on our results of operations, financial position and cash flows.

(c) Accounting for government grants

In December 2025, FASB issued amendments to provide comprehensive guidance on recognizing, measuring, and presenting government grants under ASC 832, Accounting for government grants by business entities, which previously only addressed disclosures. The amendment responds to the lack of explicit U.S. GAAP guidance that led to diverse practices and reliance on other GAAP or International Financial Reporting Standards (IFRS) by analogy. It classifies grants into asset-related and income-related categories, offering two approaches for asset-related grants: the cost accumulation approach (reducing the asset's carrying amount) and the deferred income approach (recognizing income systematically over the asset's useful life). Income-related grants, such as operating expense reimbursements, are recognized over the period the related costs occur, while grants for past costs or immediate support are recognized when the probable threshold is met. The amendment also includes guidance for business combinations, specifying when deferred income should or should not be recognized by the acquirer. The amendment is effective for public entities in fiscal years beginning after December 15, 2028, and for others after December 15, 2029, with transition options including modified prospective, modified retrospective, or full retrospective approaches. We do not expect the new guidance to have a material impact on our results of operations, financial position and cash flows.

***Use of estimates and assumptions*:** The preparation of our financial statements in conformity with U.S. GAAP requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting periods. Significant estimates and assumptions are used for, but not limited to: (1) allowance for credit losses and unbilled revenues; (2) asset impairments; (3) depreciable lives of assets; (4) income tax valuation allowances; (5) uncertain tax positions; (6) reserves for professional, workers' compensation, and comprehensive general insurance liability risks; (7) contingency and litigation reserves; (8) earnings sharing mechanism (ESM); (9) environmental remediation liabilities; (10) pension and other postretirement employee benefits (OPEB); (11) fair value measurements and (12) AROs. Future events and their effects cannot be predicted with certainty; accordingly, our accounting estimates require the exercise of judgment. The accounting estimates used in the preparation of our financial statements will change as new events occur, as more experience is acquired, as additional information is obtained, and as our operating environment changes. We evaluate and update our assumptions and estimates on an ongoing basis and may employ outside specialists to assist in our evaluations, as considered necessary. Actual results could differ from those estimates.

Union collective bargaining agreements: Approximately 73% of our employees are covered by collective bargaining agreements. We have 14% of the collective bargaining agreements expiring during 2026.

Note 2. Industry Regulation

Rates

Utilities are entitled by Massachusetts statute to charge rates that are sufficient to allow them an opportunity to cover their reasonable operating and capital costs, to attract needed capital and to maintain their financial integrity, while also protecting relevant public interests.

On June 24, 2022, Berkshire filed a Settlement Agreement with the Massachusetts Attorney General's Office (AGO) for DPU approval. The Settlement Agreement was approved in its entirety by the DPU on October 27, 2022, and new rates went into effect January 1, 2023. Berkshire continues to charge the 2023 rates which include an approved 9.7% ROE and a 54% equity ratio. Berkshire has agreed not to request new distribution rates to be in effect prior to November 1, 2025.

On November 14, 2025, Berkshire filed a five-year Application for a Rate Amendment with the DPU in docket No. 25-170. In this case, the Company is requesting a revenue requirement of $69.9 million, an increase of $21.3 million over the currently authorized amount to recover costs already incurred but not in current distribution rates, and future plant additions and company expenditures over the multi-year rate plan, including; $36.6 million in Gas System Enhancement Plan (GSEP) projects, more than $55 million in distribution system projects, six full-time equivalent employees, a vacuum truck to support core operations across damage prevention, maintenance and regulation, and a technical training center to train and develop a world-class skilled labor organization. The Company is seeking an authorized Return on Equity (ROE) of 10.35% with a debt-to-equity ratio of 46% debt and 54% equity.

The current schedule for the case is still being decided by the DPU with input from the Company and the MA Office of the Attorney General, although statutorily the DPU has ten months to fully adjudicate an Application for Rate Amendment. The Company cannot predict the outcome of this matter.

Based on existing tracking mechanisms in place for gas and other costs, discussions with the DPU, and precedence set by other utility companies, Berkshire believes that regulatory assets are recoverable and regulatory liabilities are fairly stated. Additionally, Berkshire has a purchased gas adjustment clause approved by the DPU which enables the reasonably incurred cost of gas purchases to be passed through to customers. This clause allows Berkshire to recover changes in the market price of purchased natural gas, substantially eliminating exposure to natural gas price risk.

Gas Supply Arrangements

Berkshire satisfies its natural gas supply requirements through purchases from various producer/suppliers, withdrawals from natural gas storage capacity contracts and winter peaking supplies and resources. Berkshire operates diverse portfolios of gas supply, firm transportation, gas storage and peaking resources. Actual reasonable gas costs incurred by Berkshire are passed through to customers through state regulated purchased gas adjustment mechanisms subject to regulatory review.

Berkshire purchases the majority of the natural gas supply at market prices under seasonal, monthly or mid-term supply contracts and the remainder is acquired on the spot market. Berkshire diversifies its sources of supply by amount purchased and by location while primarily acquiring gas in the Appalachia region.

Berkshire acquires firm transportation capacity on interstate pipelines under long-term contracts and utilizes that capacity to transport both natural gas supply purchased and natural gas withdrawn from storage to the local distribution system. Tennessee Gas Pipeline interconnects with Berkshire's distribution system upstream of the city gates. The prices and terms and conditions of the firm transportation capacity long-term contracts are regulated by the FERC. The actual reasonable cost of such contracts is passed through to customers through state regulated purchased gas adjustment mechanisms.

Berkshire acquires firm underground natural gas storage capacity using long-term contracts and fills the storage facilities with gas in the summer months for subsequent withdrawal in the winter months. The storage facilities are located in Pennsylvania, New York and West Virginia.

Winter peaking resources are primarily attached to the local distribution system and are owned by Berkshire. Berkshire owns or has rights to the natural gas stored in its Liquefied Natural Gas (LNG) facility that is directly attached to its distribution system. Berkshire also owns or has rights to the propane stored in its on-system propane facilities, which are also directly connected to its distribution system.

Note 3. Regulatory Assets and Liabilities

Pursuant to the requirements concerning accounting for regulated operations we capitalize, as regulatory assets, incurred and accrued costs that are probable of recovery in future natural gas rates. We base our assessment of whether recovery is probable on the existence of regulatory orders that allow for recovery of certain costs over a specific period, or allow for reconciliation or deferral of certain costs. When costs are not treated in a specific order we use regulatory precedent to determine if recovery is probable. We also record, as regulatory liabilities, obligations to refund previously collected revenue or to spend revenue collected from customers on future costs. Of the total regulatory assets net of regulatory liabilities, approximately $13.6 million represents the offset of accrued liabilities for which funds have not been expended. The remainder is either included in rate base or accruing carrying costs.

Details of regulatory assets and regulatory liabilities are shown in the tables below. They result from various regulatory orders that allow for the deferral and/or reconciliation of specific costs. Regulatory assets and regulatory liabilities are classified as current when recovery or refund in the coming year is allowed or required through a specific order or when the rates related to a specific regulatory asset or regulatory liability are subject to automatic annual adjustment.

Regulatory assets at December 31, 2025 and 2024 consisted of:

December 31,		2025		2024
(Thousands)				
Deferred purchased gas	$	1,356	$	3,033
Energy efficiency programs		10,071		8,769
Environmental remediation costs		3,229		3,751
Pension and other postretirement benefits		12,305		12,440
Recoverable bad debt		920		930
Revenue decoupling mechanism		—		2,401
Unfunded future income taxes		398		340
Other		2,333		2,768
Total regulatory assets		**30,612**		**34,432**
Less: current portion		14,552		17,787
Total non-current regulatory assets	**$**	**16,060**	**$**	**16,645**

Deferred purchase gas costs balances at the end of the rate year are normally recorded / returned in the next year.

Energy efficiency programs represent all expenditures for a twelve month period as contained in the Company's Energy Efficiency (EE) budgets as defined and approved by the Department,

including, but not limited to, Energy Efficiency Program Costs, Reconciliation Adjustments, Energy Efficiency Lost Margins, Energy Efficiency Performance Incentives, Working Capital and Interest. At the end of each twelve-month period, the Company will include the Reconciliation Adjustment associated with over- or under-recoveries of allowable EE Expenditures billed over the prior twelve-month period. Pursuant to the Department's approved Energy Efficiency Guidelines, estimated lost margins and performance incentives approved in the Company's Plan may be collected during the term of the Plan and shall be reconciled at the end of the term in the Company's Term Report.

Environmental remediation costs include spending that has occurred and is eligible for future recovery in customer rates. Environmental costs are currently recovered over a seven-year period through an annual surcharge. It also includes the anticipated future rate recovery of costs that are recorded as environmental liabilities since these will be recovered when incurred. Because no funds have yet been expended for the regulatory asset related to future spending, it does not accrue carrying costs and is not included within rate base.

Pension and other postretirement benefits represent the actuarial losses on the pension and other postretirement plans that will be reflected in customer rates when they are amortized and recognized in future pension expenses. Because no funds have yet been expended for this regulatory asset, it does not accrue carrying costs and is not included within the rate base.

Recoverable bad debt represents the portion of uncollectible expense attributable to gas costs.

Revenue decoupling mechanism represents the mechanism established to disassociate the utility's profits from its delivery/commodity sales.

Unfunded future income taxes represent unrecovered federal and state income taxes primarily resulting from regulatory flow through accounting treatment. The income tax benefits or charges for certain plant related timing differences, such as removal costs, are immediately flowed through to, or collected from, customers. This amount is being amortized as the amounts related to temporary differences that give rise to the deferrals are recovered in rates.

Other includes items such as gas system enhancement.

Regulatory liabilities at December 31, 2025 and 2024 consisted of:

December 31,		2025		2024
(Thousands)				
Asset removal obligations	$	40,437	$	40,484
Pension and other postretirement benefits		1,187		1,892
Revenue decoupling mechanism		825		—
Tax Act – remeasurement		10,706		10,879
Other		836		1,196
Total regulatory liabilities		**53,991**		**54,451**
Less: current portion		2,291		2,306
Total non-current regulatory liabilities	**$**	**51,700**	**$**	**52,145**

Asset removal obligations represent the differences between asset removal costs recorded and amounts collected in rates for those costs. The amortization period is dependent upon the asset removal costs of underlying assets and the life of the utility plant.

Tax Act - remeasurement represents the impact from remeasurement of deferred income tax balances as a result of the Tax Act enacted by the U.S. federal government on December 22, 2017. Reductions in accumulated deferred income tax balances due to the reduction in the corporate income tax rates from 35% to 21% under the provisions of the Tax Act will result in amounts previously collected from utility customers for these deferred taxes to be refundable to such customers, generally through reductions in future rates.

Other includes items such as residential assistance programs.

Note 4. Revenue

We recognize revenue when we have satisfied our obligations under the terms of a contract with a customer, which generally occurs when the control of promised goods or services transfers to the customer. We measure revenue as the amount of consideration we expect to receive in exchange for providing those goods or services. Contracts with customers may include multiple performance obligations. For such contracts, we allocate revenue to each performance obligation based on its relative standalone selling price. We generally determine standalone selling prices based on the prices charged to customers. Certain revenues are not within the scope of ASC 606, such as revenues from leasing, derivatives, other revenues that are not from contracts with customers and other contractual rights or obligations, and we account for such revenues in accordance with the applicable accounting standards. We exclude from revenue amounts collected on behalf of third parties, including any such taxes collected from customers and remitted to governmental authorities. We do not have any material significant payment terms because we receive payment at or shortly after the point of sale.

The following describes the principal activities from which we generate revenue.

Berkshire derives revenue primarily from tariff-based sales of natural gas delivered to customers. For such revenues, Berkshire recognize revenues in an amount derived from the commodities delivered to customers. Another major source of revenue is wholesale sales of natural gas.

Tariff-based sales are subject to DPU approval, which determines prices and other terms of service through the ratemaking process. Certain customers have the option to obtain the natural gas directly from Berkshire or from another supplier. For customers that receive their natural gas from another supplier, Berkshire acts as an agent and delivers the natural gas for that supplier. Revenue in those cases is only for providing the service of delivery of the natural gas. Berkshire calculates revenue earned but not yet billed based on the number of days not billed in the month, the estimated amount of energy delivered during those days and the estimated average price per customer class for that month. Differences between actual and estimated unbilled revenue are immaterial.

The performance obligation in all arrangements is satisfied over time because the customer simultaneously receives and consumes the benefits as Berkshire delivers or sells the natural gas. Berkshire records revenue for all of those sales based upon the regulatory-approved tariff and the volume delivered, which corresponds to the amount that Berkshire has a right to invoice. There are no material initial incremental costs of obtaining a contract in any of the arrangements. Berkshire does not adjust the promised consideration for the effects of a significant financing component if it expects, at contract inception, that the time between the delivery of promised goods or service and customer payment will be one year or less. Berkshire does not have any material significant payment terms because it receives payment at or shortly after the point of sale.

Berkshire also records revenue from an Alternative Revenue Program (ARP), which is not ASC 606 revenue. Such programs represent contracts between the utilities and their regulators. Berkshire ARPs include revenue decoupling mechanisms, other ratemaking mechanisms, annual revenue requirement reconciliations, and other demand side management programs.

Berkshire also has various other sources of revenue including billing, collection, other administrative charges, sundry billings, rent of utility property, and miscellaneous revenue. They classify such revenues as other ASC 606 revenues to the extent they are not related to revenue generating activities from leasing, or ARPs.

Revenues disaggregated by major source for the years ended December 31, 2025 and 2024 are as follows:

Years Ended December 31,	2025	2024
(Thousands)		
Regulated operations – natural gas	$ 100,841	$ 90,779
Other (a)	1,257	1,303
Revenue from contracts with customers	**102,098**	**92,082**
Alternative revenue programs	1,025	860
Other revenue	—	(279)
Total operating revenues	**$ 103,123**	**$ 92,663**

(a) Primarily includes certain intra-month trading activities, billing, collection, and administrative charges, sundry billings, and other miscellaneous revenue.

Note 5. Goodwill

We do not amortize goodwill, but perform our annual impairment assessment testing at least annually as described in Note 1, in the fourth quarter, as of October 1. Our qualitative assessment involves evaluating key events and circumstances that could affect the fair value of our company, as well as other factors. Events and circumstances evaluated include macroeconomic conditions, industry, regulatory and market considerations, cost factors and their effect on earnings and cash flows, overall financial performance as compared with projected results and actual results of relevant prior periods, other relevant entity-specific events, and events affecting Berkshire.

Our quantitative impairment testing includes various assumptions, primarily the discount rate, and forecasted cash flows. We use a discount rate that is developed using market participant assumptions, which consider the risk and nature of our cash flows and the rates of return market participants would require in order to invest their capital in Berkshire. We test the reasonableness of the conclusions of our quantitative impairment testing using a range of discount rates and a range of assumptions for long-term cash flows.

We had no impairment of goodwill in 2025 and 2024 as a result of our qualitative impairment testing. There were no events or circumstances subsequent to our annual impairment assessment for 2025 or 2024 that required us to update the assessment.

The carrying amount of goodwill, which resulted from the purchase of Berkshire by UIL Holdings in 2010, was $51.9 million at both December 31, 2025 and 2024, with no accumulated impairment losses and no changes during 2025 and 2024.

Note 6. Income Taxes

Current and deferred taxes charged to expense for the years ended December 31, 2025 and 2024 consisted of:

Years Ended December 31,		2025		2024
(Thousands)				
Current				
Federal	$	(1,061)	$	1,322
State		1,366		(1,889)
Current taxes charged to expense (benefit)		**305**		**(567)**
Deferred				
Federal		2,444		(1,174)
State		(678)		1,987
Deferred taxes charged to expense		**1,766**		**813**
Total Income Tax Expense	**$**	**2,071**	**$**	**246**

The differences between tax expense per the statements of income and tax expense at the 21% statutory federal tax rate for the years ended December 31, 2025 and 2024, respectively, consisted of:

Years Ended December 31,		2025		2024
(Thousands)				
Tax expense at federal statutory rate	$	1,717	$	182
Excess ADIT amortization		(125)		(132)
State tax expense, net of federal benefit		544		77
Other, net		(65)		119
Total Income Tax Expense	**$**	**2,071**	**$**	**246**

Income tax expense for the year ended December 31, 2025 was $0.4 million higher than it would have been at the statutory federal income tax rate of 21% due predominately to state income taxes, partially offset by excess Accumulated Deferred Income Tax (ADIT) amortization. This resulted in an effective tax rate of 25.3%. Income tax expense for the year ended December 31, 2024 was $0.1 million higher than it would have been at the statutory federal income tax rate of 21% due predominately to state income taxes, partially offset by excess ADIT amortization. This resulted in an effective tax rate of 28.3%.

Deferred tax assets and liabilities as of December 31, 2025 and 2024 consisted of:

December 31,	2025	2024
(Thousands)		
Non-current Deferred Income Tax Liabilities (Assets)		
Property related	$ 42,652	$ 38,325
2017 Tax Act measurement	(2,925)	(2,972)
Federal and state tax credits	(2,151)	(2,151)
Federal and state net operating loss	(6,915)	(5,180)
Pension and other postretirement benefits	308	(84)
Gas supply charges	622	942
Other	4,259	4,904
Total Non-current Deferred Income Tax Liabilities	**$ 35,850**	**$ 33,784**
Deferred tax assets	11,991	10,387
Deferred tax liabilities	47,841	44,171
Net Accumulated Deferred Income Tax Liabilities	**$ 35,850**	**$ 33,784**

Berkshire has federal net operating losses of $4.6 million and $4.3 million for the years ended December 31, 2025 and 2024, respectively. Berkshire has net state net operating losses of $2.3 million and $0.9 million for the years ended December 31, 2025 and 2024, respectively.

There were no additional accruals for interest and penalties on tax reserves as of December 31, 2025 and 2024.

Note 7. Long-term Debt

Long-term debt as of December 31, 2025 and 2024 consisted of:

December 31,		2025		2024	
(Thousands)	Maturity Dates	Balances	Interest Rates	Balances	Interest Rates
Senior unsecured notes	2029-2050	$ 105,000	3.68%-5.66%	$ 105,000	3.68%-5.66%
Unamortized debt issuance cost and discount		(618)		(623)	
Total Debt		**104,382**		**104,377**	
Less: debt due within one year, included in current liabilities		—		—	
Total Non-current Debt		**$ 104,382**		**$ 104,377**	

On November 20, 2024, Berkshire issued $45 million of unsecured notes maturing in 2035 at an interest rate of 5.66%.

Long-term debt, including sinking fund obligations, due over the next five years consist of:

2026	2027	2028	2029	2030	Total
(Thousands)					
$ —	$ —	$ —	$ 20,000	$ —	$ 20,000

We have no financial debt covenant requirements related to our long-term debt at December 31, 2025 and 2024.

Note 8. Bank Loans and Other Borrowings

Berkshire had $3.9 million notes payable outstanding balance as of December 31, 2025 and no notes payable outstanding as of December 31, 2024, respectively. Berkshire funds short-term liquidity needs through an agreement among Avangrid's regulated utility subsidiaries (the Virtual Money Pool Agreement), a bi-lateral intercompany credit agreement with Avangrid (the Bi-Lateral Intercompany Facility), and a bank provided credit facility to which Berkshire is a party (the AGR Credit Facility), each of which are described below.

The Virtual Money Pool Agreement is an agreement among the investment grade-rated, regulated utility subsidiaries of Avangrid under which the parties to this agreement may lend to or borrow from each other. This Agreement allows Avangrid to optimize cash resources within the regulated utility companies which are prohibited by regulation from lending to unregulated affiliates. The interest rate on transactions under this agreement is the A2/P2 non-financial 30-day commercial paper rate published by the Federal Reserve. Berkshire has a lending/ borrowing limit of $15 million under this agreement. Berkshire had $3.9 million debt outstanding balance under this agreement as of December 31, 2025 and no debt outstanding as of December 31, 2024, respectively.

The Bi-Lateral Intercompany Facility provides for borrowing of up to $50 million from Avangrid at the A2/P2 non-financial 30-day commercial paper rate published by the Federal Reserve. Berkshire had no outstanding balance under this agreement as of both of December 31, 2025 and 2024.

On December 22, 2025, the utilities (New York State Electric and Gas Corporation ("NYSEG"), Rochester Gas and Electric Corporation ("RG&E"), Central Maine Power Company ("CMP"), The United Illuminating Company ("UI"), Connecticut Natural Gas Corporation ("CNG"), The Southern Connecticut Gas Company ("SCG") and The Berkshire Gas Company ("BGC")) executed a new credit facility with an aggregate limit of $1,500 million and a termination date of December 23, 2030. Under the terms of the revolving credit facility, each borrower has a maximum borrowing entitlement, or sublimit, which can be periodically adjusted to address specific short-term capital funding needs, subject to the maximum limit contained in the agreement. NYSEG has a maximum sublimit of $1,000 million, RG&E has $500 million, CMP has $375 million, UI has a maximum sublimit of $150 million, SCG has a maximum sublimit of $75 million, and CNG and BCG have maximum sublimits of $50 million. The new facility has set minimum sublimits of $600 million for NYSEG, $250 million for RG&E, $150 million for CMP, $25 million for UI, CNG, SCG, and BGC. The facility fees range from 5 to 25 basis points. BGC had not borrowed under this agreement as of both December 31, 2025 and 2024.

In the AGR Credit Facility we covenant not to permit, without the consent of the lender, our ratio of total indebtedness to total capitalization to exceed 0.65 to 1.00 at any time. For purposes of calculating the maximum ratio of indebtedness to total capitalization, the facility excludes from net worth the balance of accumulated other comprehensive loss as it appears on the balance sheet. The facility contains various other covenants, including a restriction on the amount of secured indebtedness we may maintain. Continued un-remedied failure to comply with those covenants for five business days after written notice of such failure from the lender constitutes an event of default and would result in acceleration of maturity. Our ratio of indebtedness to total capitalization pursuant to the revolving credit facility was 0.38 to 1.00 at December 31, 2025. We are not in default as of December 31, 2025.

Note 9. Leases

We have operating leases for land rights. As of December 31, 2025 and 2024, we had no finance leases. Certain of our lease agreements include rental payments adjusted periodically

for inflation or are based on other periodic input measures. Our leases do not contain any material residual value guarantees or material restrictive covenants. Our leases have remaining lease terms of 1 year to 12 years, some of which may include options to terminate the leases within one year. We consider extension or termination options in the lease term if it is reasonably certain we will exercise the option.

The components of lease cost and other information related to leases were as follows:

For the Years Ended December 31,	2025	2024
(Thousands)		
Lease cost		
Operating lease cost	$ 10	$ 10
Short-term lease cost	3	42
Total lease cost	**$ 13**	**$ 52**

Balance sheet and other information for the years ended December 31, 2025 and 2024 was as follows:

As of December 31,	2025	2024
(Thousands, except lease term and discount rate)		
Operating Leases		
Operating lease right-of-use assets	$ 85	$ 92
Operating lease liabilities, current	8	7
Operating lease liabilities, long-term	78	85
Total operating lease liabilities	$ 86	$ 92
Weighted-average Remaining Lease Term (years):		
Operating leases	9.96	10.95
Weighted-average Discount Rate:		
Operating leases	2.96 %	2.95 %

Supplemental cash flows information related to leases was as follows:

For the Years Ended December 31,	2025	2024
(Thousands)		
Cash paid for amounts included in the measurement of lease liabilities:		
Operating cash flows from operating leases	$ 9	$ 9

As of December 31, 2025, maturities of lease liabilities were as follows:

	Operating Leases
(Thousands)	
Years Ending December 31,	
2026	$ 9
2027	10
2028	10
2029	10
2030	11
Thereafter	50
Total lease payments	**100**
Less: imputed interest	(14)
Total	**$ 86**

Most of our leases do not provide an implicit rate in the lease; thus we use our incremental borrowing rate based on the information available at the commencement date in determining the present value of lease payments.

Note 10. Environmental Liability

From time to time environmental laws, regulations and compliance programs may require changes in our operations and facilities and may increase the cost of natural gas service.

Manufactured gas plants

We own or have previously owned properties where Manufactured Gas Plants (MGPs) had historically operated. MGP operations have led to contamination of soil and groundwater which require investigation and/or remediation in accordance with state (Massachusetts Department of Environmental Protection) and/or federal environmental regulations. We have or had an ownership interest in one of such properties contaminated as a result of MGP-related activities. Under the existing regulations, the cleanup of such sites requires state and at times, federal, regulators' involvement and approval before cleanup can commence. In certain cases, such contamination has been evaluated, characterized and remediated. In other cases, the sites have been evaluated and characterized, but not yet fully remediated and have on-going monitoring. In the past, we have received approval for the recovery of MGP-related remediation expenses from customers through rates and will seek recovery in rates for ongoing MGP-related investigation, remediation and monitoring expenses for the MGP sites.

The current estimate for costs related to investigation, remediation and/or monitoring of one active site is approximately $0.2 million for which the company recorded a liability and offsetting regulatory asset for such expenses as of December 31, 2025. Historically, we have received approval from the DPU for recovery of environmental expenses in its customer rates.

One property which the Company formerly owned on East Street (the East Street Site) in Pittsfield, Massachusetts, is a former MGP site. The East Street Site is part of a larger site known as the GE–Pittsfield/Housatonic River Site. The company sold the East Street Site to the General Electric Company (GE) in the 1970s and was named a potentially responsible party for the site by the EPA in 1990.

In December 2002, the company reached a settlement with GE which provides, among other things, a framework for us and GE to allocate various monitoring and remediation costs at the East Street Site. As of December 31, 2025, we have accrued approximately $1.3 million and

established a regulatory asset for these and future costs incurred by GE in responding to releases of hazardous substances at the East Street Site. Historically, we have received approval from the DPU for recovery of remediation expenses in its customer rates.

Our environmental liabilities are recorded on an undiscounted basis and are expected to be paid through the year 2029.

Note 11. Fair Value of Financial Instruments and Fair Value Measurements

The estimated fair value of debt amounted to $101 million as December 31, 2025 and $97 million as of December 31, 2024. The estimated fair value was determined, in most cases, by discounting the future cash flows at market interest rates. The interest rate curve used to make these calculations takes into account the risks associated with the natural gas industry and the credit ratings of the borrowers in each case. The fair value hierarchy for the fair value of debt is considered as Level 2.

Assets and liabilities measured at fair value on a recurring basis

The financial instruments measured at fair value as of December 31, 2025 and 2024 consisted of:

Description	Level 1	Level 2	Level 3	Total
(Thousands)				
2025				
Assets				
Non-current investments	$ 2,304	$ —	$ —	$ 2,304
Total	**$ 2,304**	**$ —**	**$ —**	**$ 2,304**
2024				
Assets				
Non-current investments	$ 2,197	$ —	$ —	$ 2,197
Total	**$ 2,197**	**$ —**	**$ —**	**$ 2,197**

We had no transfers to or from Level 1 and 2 during the year ended December 31, 2025. Our policy is to recognize transfers in and transfers out as of the actual date of the event or change in circumstances that causes a transfer, if any.

Valuation techniques: We measure the fair value of our non-current investments available for sale using quoted market prices in active markets for identical assets and include the measurements in Level 1. The investments which are Rabbi Trusts for deferred compensation plans primarily consist of money market funds.

Note 12. Post-retirement and Similar Obligations

We have multiple qualified pension plans covering eligible union and management employees and retirees. The union plans are all closed to new hires, and the non-union plans were closed as of December 31, 2017. The qualified pension plans are traditional defined benefit plans or cash balance plans for those hired on or after specified dates.

Berkshire non-union employees are eligible to participate in UIL Holdings Corporation 401(k) Employee Stock Ownership Plan, and union employees are eligible to participate in the

Berkshire Gas Company Union 401(k) Plan. Employees may defer a portion of their compensation and invest in various investment alternatives. Matching contributions are made in the form of cash which is subsequently invested in various investment alternatives offered to employees. The matching expense totaled approximately $1.4 million in 2025 and $1.2 million in 2024.

We also have plans providing other postretirement benefits for eligible employees and retirees. The plans were closed to newly-hired Berkshire union employees by end of March 2011. These benefits consist primarily of health care, prescription drug and life insurance benefits for retired employees and their dependents. For Medicare eligible non-union retirees, we provide a subsidy through an HRA for retirees to purchase coverage on the individual market. Medicare eligible union retirees have the option of receiving a subsidy through an HRA or paying contributions and participating in company-sponsored retiree health plans.

Non-Qualified Retirement Benefit Plans

We also sponsor various unfunded pension plans for certain current employees, former employees and former directors. The total liability for these plans, which is included in other non-current liabilities on our balance sheets, was $1.0 million at both December 31, 2025 and 2024.

Qualified Retirement Benefit Plans

Obligations and funded status as of December 31, 2025 and 2024 consisted of:

	Pension Benefits		Postretirement Benefits	
As of December 31,	**2025**	**2024**	**2025**	**2024**
(Thousands)				
Change in benefit obligation				
Benefit obligation at January 1	$ 33,446	$ 37,435	$ 2,061	$ 2,195
Service cost	—	86	24	25
Interest cost	1,716	1,712	101	97
Curtailments	—	(407)	—	—
Actuarial loss (gain)	1,428	(2,114)	148	(140)
Benefits paid	(3,113)	(3,266)	(93)	(116)
Benefit obligation at December 31	**$ 33,477**	**$ 33,446**	**$ 2,241**	**$ 2,061**
Change in plan assets				
Fair value of plan assets at January 1	25,695	26,683	—	—
Actual return on plan assets	3,078	617	—	—
Employer contributions	961	1,661	93	116
Benefits paid	(3,113)	(3,266)	(93)	(116)
Fair value of plan assets at December 31	**$ 26,621**	**$ 25,695**	**$ —**	**$ —**
Funded status	**$ (6,856)**	**$ (7,751)**	**$ (2,241)**	**$ (2,061)**

During 2025, the pension benefit obligation had an actuarial loss of $1.4 million primarily due to $1.1 million loss from decreases in discount rates. There were no significant gains or losses relating to the postretirement benefit obligations in 2025.

During 2024, the pension benefit obligation had an actuarial gain of $2.1 million primarily due to $2.3 million gain from increases in discount rates. In 2024, the pension benefit obligation had a

reduction of $0.4 million from curtailments. There were no significant gains or losses relating to the postretirement benefit obligations in 2024.

Amounts recognized in the balance sheet as of December 31, 2025 and 2024 consisted of:

	Pension Benefits		Postretirement Benefits	
December 31,	**2025**	**2024**	**2025**	**2024**
(Thousands)				
Other current liabilities	$ —	$ —	$ (220)	$ (220)
Pension and other postretirement benefits	(6,856)	(7,751)	(2,021)	(1,841)
Total	**$ (6,856)**	**$ (7,751)**	**$ (2,241)**	**$ (2,061)**

We have determined that we are allowed to defer as regulatory assets or regulatory liabilities items that would otherwise be recorded in accumulated other comprehensive income pursuant to the accounting requirements concerning defined benefit pension and other postretirement plans. Amounts recognized as regulatory assets or regulatory liabilities consist of:

	Pension Benefits		Postretirement Benefits	
December 31,	**2025**	**2024**	**2025**	**2024**
(Thousands)				
Net loss (gain)	$ 2,308	$ 2,601	$ (556)	$ (782)

Our accumulated benefit obligation for all qualified defined benefit pension plans was $33.5 million at December 31, 2025 and $33.4 million at December 31, 2024.

The projected benefit obligation and the accumulated benefit obligation exceeded the fair value of pension plan assets for all of our qualified plans as of both December 31, 2025 and 2024. The following table shows the aggregate projected and accumulated benefit obligations and the fair value of plan assets of our plans as of December 31, 2025 and 2024.

December 31,	**2025**	**2024**
(Thousands)		
Projected benefit obligation	$ 33,477	$ 33,446
Accumulated benefit obligation	$ 33,477	$ 33,446
Fair value of plan assets	$ 26,621	$ 25,695

The postretirement benefits obligation for all qualified plans exceeded the fair value of plan assets as of December 31, 2025 and 2024.

Components of net periodic benefit cost and other changes in plan assets and benefit obligations recognized in income and regulatory assets and liabilities for the years ended December 31, 2025 and 2024 consisted of:

Years Ended December 31,	Pension Benefits 2025	Pension Benefits 2024	Postretirement Benefits 2025	Postretirement Benefits 2024
(Thousands)				
Net periodic benefit cost				
Service cost	$ —	$ 86	$ 24	$ 25
Interest cost	1,716	1,712	101	97
Expected return on plan assets	(1,451)	(1,648)	—	—
Amortization of actuarial loss (gain)	93	165	(78)	(71)
Net periodic benefit cost	**$ 358**	**$ 315**	**$ 47**	**$ 51**
Other changes in plan assets and benefit obligations recognized in regulatory assets and regulatory liabilities				
Net (gain) loss	$ (200)	$ (1,082)	$ 148	$ (140)
Amortization of actuarial (loss) gain	(93)	(165)	78	71
Curtailment charge	—	(407)	—	—
Total recognized in regulatory assets and regulatory liabilities	**(293)**	**(1,654)**	**226**	**(69)**
Total recognized in net periodic benefit cost and regulatory assets and regulatory liabilities	**$ 65**	**$ (1,339)**	**$ 273**	**$ (18)**

We include the service component of net periodic benefit cost in other operating expenses and the non-service component in other income and deductions. The net periodic benefit cost for postretirement benefits represents the amount expensed for providing health care benefits to retirees and their eligible dependents.

The weighted-average assumptions used to determine benefit obligations as of December 31, 2025 and 2024 consisted of:

As of December 31,	Pension Benefits 2025	Pension Benefits 2024	Postretirement Benefits 2025	Postretirement Benefits 2024
Discount rate	5.05%	5.41%	4.78%	5.19%
Rate of compensation increase	N/A	N/A	N/A	N/A
Interest crediting rate	3.00%	3.00%	N/A	N/A

The discount rate is the rate at which the benefit obligations could presently be effectively settled. We determined the discount rate by developing a yield curve derived from a portfolio of high grade non-callable bonds with above median yields that closely matches the duration of the expected cash flows of our benefit obligations.

The weighted-average assumptions used to determine net periodic benefit cost for the years ended December 31, 2025 and 2024 consisted of:

As of December 31,	Pension Benefits 2025	Pension Benefits 2024	Postretirement Benefits 2025	Postretirement Benefits 2024
Discount rate	5.41%	4.69%/5.10%	5.19%	4.66%
Expected long-term return on plan assets	7.00%	7.50%/7.50%	N/A	N/A
Rate of compensation increase	N/A	2.50% for Union / N/A	N/A	N/A

We developed our expected long-term rate of return on plan assets assumption based on a review of long-term historical returns for the major asset classes, the target asset allocations and the effect of rebalancing of plan assets discussed below. That analysis considered current capital market conditions and projected conditions. Our policy is to calculate the expected return on plan assets using the market related value of assets. We amortize unrecognized actuarial gains and losses in excess of 10% of the greater of PBO or MRVA related to the pension and other postretirement benefits plans on straight line basis over future working lifetime. Effective March 31, 2022, the amortization period for the Berkshire Non-Union Plan was updated from future working lifetime to future expected lifetime as the plan was frozen, or predominantly frozen, to future accruals.

Assumed health care cost trend rates used to determine benefit obligations as of December 31, 2025 and 2024 consisted of:

As of December 31,	2025	2024
Health care cost trend rate (pre 65/post 65)	8.40% / 10.10%	8.90% / 10.60%
Rate to which cost trend rate is assumed to decline (the ultimate trend rate)	4.50% / 4.50%	4.50% / 4.50%
Year that the rate reaches the ultimate trend rate	2039 / 2039	2039 / 2039

***Contributions*:** In accordance with our funding policy, we make annual contributions of not less than the minimum required by applicable regulations. We expect to contribute $2.0 million to our pension and $0.2 million to our other postretirement benefit plans during 2026.

***Estimated future benefit payments*:** Our expected benefit payments and expected Medicare Prescription Drug, Improvement and Modernization Act of 2003 (Medicare Act) subsidy receipts, which reflect expected future service, as appropriate, are:

	Pension Benefits	Postretirement Benefits	Medicare Act Subsidy Receipts
(Thousands)			
2026	$ 3,640	$ 218	$ —
2027	$ 2,892	$ 207	$ —
2028	$ 2,806	$ 218	$ —
2029	$ 2,808	$ 202	$ —
2030	$ 2,666	$ 197	$ —
2031 - 2035	$ 12,368	$ 918	$ —

Plan assets: Our pension benefits plan assets are held in a master trust providing for a single trustee/custodian, a uniform investment manager lineup, and an efficient, cost-effective means of allocating expenses and investment performance to each plan under the master trust. Our primary investment objective is to ensure that current and future benefit obligations are adequately funded and with volatility commensurate with our tolerance for risk. Preservation of capital and achievement of sufficient total return to fund accrued and future benefits obligations are of highest concern. Our primary means for achieving capital preservation is through diversification of the trust's investments while avoiding significant concentrations of risk in any one area of the securities markets. Within each asset group, further diversification is achieved through utilizing multiple asset managers and systematic allocation to various asset classes; providing broad exposure to different segments of the equity, fixed-income and alternative investment markets.

The asset allocation policy is the most important consideration in achieving our objective of superior investment returns while minimizing risk. We have established a target asset allocation policy within allowable ranges for our pension benefits plan assets within broad categories of asset classes made up of Return-Seeking and Liability-Hedging investments. We have targets of 15%-70% for Return-Seeking assets and 30%-85% for Liability-Hedging assets. Return-Seeking investments generally consist of domestic, international, global, and emerging market equities invested in companies across all market capitalization ranges. Return-Seeking assets also include investments in real estate, global asset allocation strategies and hedge funds. Liability-Hedging investments generally consist of long-term corporate bonds, annuity contracts, long-term treasury STRIPS, and opportunistic fixed income investments. Systematic rebalancing within the target ranges increases the probability that the annualized return on the investments will be enhanced, while realizing lower overall risk, should any asset categories drift outside their specified ranges.

The fair values of pension benefits plan assets, by asset category, as of December 31, 2025, consisted of:

		Fair Value Measurements at December 31, Using		
Asset Category	**Total**	**Level 1**	**Level 2**	**Level 3**
(Thousands)

Valuation techniques: We value our pension benefits plan assets as follows:

- Cash and cash equivalents - Level 1: at cost, plus accrued interest, which approximates fair value. Level 2: proprietary cash associated with other investments, based on yields currently available on comparable securities of issuers with similar credit ratings.
- U.S. government securities, common stocks and registered investment companies - at the closing price reported in the active market in which the security is traded.
- Corporate bonds - based on yields currently available on comparable securities of issuers with similar credit ratings.
- Preferred stocks - at the closing price reported in the active market in which the individual investment is traded.
- Equity commingled funds – the fair value is primarily derived from the quoted prices in active markets of the underlying securities. Because the fund shares are offered to a limited group of investors, they are not considered to be traded in an active market.
- Other investments, principally annuity and fixed income - Level 1: at the closing price reported in the active market in which the individual investment is traded. Level 2: based on yields currently available on comparable securities of issuers with similar credit ratings. Level 3: when quoted prices are not available for identical or similar instruments, under a discounted cash flows approach that maximizes observable inputs such as current yields of similar instruments but includes adjustments for certain risks that may not be observable such as credit and liquidity risks.
- Other investments measured at net asset value (NAV) – alternative investments, such as private equity and real estate oriented investments, partnership/joint ventures and hedge funds are valued using the NAV as a practical expedient.

Pension plan equity securities did not include Iberdrola common stock as of both December 31, 2025 and 2024.

Note 13. Other Income and Other Deductions

Other income and deductions for the years ended December 31, 2025 and 2024, consisted of:

Years Ended December 31,	2025	2024
(Thousands)		
Allowance for funds used during construction	$ 352	$ —
Carrying costs on regulatory assets	1,548	1,211
Interest and dividend income	496	30
Miscellaneous	(11)	(34)
Total other income	**$ 2,385**	**$ 1,207**
Pension non-service components	(358)	(42)
Miscellaneous	(125)	(579)
Total other deductions	**$ (483)**	**$ (621)**

Note 14. Related Party Transactions

Certain Networks subsidiaries borrow from AGR, the parent of Networks, through intercompany revolving credit agreements, including Berkshire. For Berkshire the intercompany revolving credit agreements provide access to supplemental liquidity. See Note 8 for further detail on the credit facility with AGR.

Avangrid Service Company provides administrative and management services to Networks operating utilities, including Berkshire, pursuant to service agreements. The cost of those services is allocated in accordance with methodologies set forth in the service agreements. The cost allocation methodologies vary depending on the type of service provided. Management believes such allocations are reasonable. The charge for operating services provided to Berkshire by AGR and its affiliates was approximately $5.8 million in 2025 and $9.5 million in 2024. Cost for services includes amounts capitalized in utility plant, which was approximately $1.4 million in 2025 and $1.1 million in 2024. The remainder was primarily recorded as operations and maintenance expense. The charge for services provided by Berkshire to AGR and its affiliates was $0.9 million in 2025 and $0.5 million in 2024. All charges for services are at cost. All of the charges associated with services provided are recorded as revenues to offset other operating expenses on the financial statements.

The balances in accounts payable to affiliates of $1.1 million at December 31, 2025 and $5.5 million at December 31, 2024 are mostly payable to UIL Holdings and Avangrid Service Company. The balance in accounts receivable from affiliates of $1.4 million at December 31, 2025 is mostly receivable from CNG and SCG. The balance in accounts receivable from affiliates of $0.1 million at December 31, 2024 is mostly receivable from UIL Holdings and SCG.

There were no notes receivable from affiliates at December 31, 2025 and $15.0 million notes receivable from SCG at December 31, 2024. Notes receivable from affiliates relate to the Virtual Money Pool Agreement as discussed in Note 8 of these financial statements.

Note 15. Subsequent Events

The company has performed a review of subsequent events through March 27, 2026, which is the date these financial statements were available to be issued.

Independent Auditors' Report

The Stockholder and Board of Directors
Connecticut Natural Gas Corporation:

Opinion

We have audited the financial statements of Connecticut Natural Gas Corporation (the Company), which comprise the balance sheets as of December 31, 2025 and 2024, and the related statements of income, comprehensive income. changes in common stock equity, and cash flows for the years then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2025 and 2024, and the results of its operations and its cash flows for the years then ended in accordance with U.S. generally accepted accounting principles.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with U.S. generally accepted accounting principles, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

KPMG LLP, a Delaware limited liability partnership, and its subsidiaries are part of the KPMG global organization of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

Note 1. Summary of Significant Accounting Policies, New Accounting Pronouncements and Use of Estimates

Background and nature of operations: Connecticut Natural Gas Corporation (CNG) engages in natural gas transportation, distribution and sales operations in Connecticut serving approximately 189,000 customers as of December 31, 2025, in service areas totaling approximately 724 square miles. CNG is regulated by the Connecticut Public Utilities Regulatory Authority (PURA).

CNG is the principal operating utility of CTG Resources, Inc. (CTG), a wholly-owned subsidiary of UIL Holdings Corporation (UIL Holdings). CTG is a holding company whose sole business is ownership of its operating regulated gas utility. UIL Holdings, whose primary business is ownership of its operating regulated utility businesses, is a wholly-owned subsidiary of Avangrid Networks, Inc. (Networks), which is a wholly-owned subsidiary of Avangrid, Inc. (AGR), which is a wholly-owned subsidiary of Iberdrola, S.A. (Iberdrola), a corporation organized under the laws of the Kingdom of Spain.

Agreement and Plan of Merger: On May 17, 2024, AGR entered into an Agreement and Plan of Merger (the Merger Agreement) with Iberdrola and Arizona Merger Sub, Inc (Merger Sub). As a result of the consummation of the Merger on December 23, 2024 (closing date), Merger Sub merged with and into Avangrid (the Merger), with Avangrid continuing as the surviving corporation and a wholly-owned subsidiary of Iberdrola. On the closing date, each share of common stock issued and outstanding immediately prior to the closing date (other than common stock owned by the Merger, Merger Sub or any other direct or indirect wholly owned Subsidiary of the Merger, and in each case not held on behalf of the third parties (collectively, the Excluded Shares)) was converted into a right to receive $35.75 per share of common stock in cash, without interest.

On the closing date, (i) all shares of common stock ceased to be outstanding, were cancelled and ceased to exist and (ii) each Excluded Share ceased to be outstanding and was cancelled without payment of any consideration and ceased to exist. As a result of the consummation of the Merger on December 23, 2024, Iberdrola became the direct owner of 100 shares of common stock of Avangrid which represents the only outstanding capital of the Company. On the closing date, the New York Stock Exchange (NYSE) filed with the Securities and Exchange Commission (the SEC) a notification of removal from listing on Form 25 in order to delist the common stock from the NYSE and deregister the common stock under Section 12(b) of the Securities Exchange Act of 1934, as amended (the Exchange Act). Following the effectiveness of the Form 25, on January 2, 2025, Avangrid filed with the SEC a Form 15 requesting the termination of registration of the common stock under Section 12(g) of the Exchange Act and the suspension of reporting obligations under Section 13 and 15(d) of the Exchange Act with respect to the common stock.

Basis of presentation: The accompanying financial statements have been prepared in accordance with generally accepted accounting principles in the United States (U.S. GAAP). The accounting records of CNG are also maintained in accordance with the uniform system of accounts prescribed by the Federal Energy Regulatory Commission (FERC).

Significant Accounting Policies: We consider the following policies to be the most significant in understanding the judgments that are involved in preparing our financial statements:

***Revenue recognition*:** We recognize revenues when we transfer control of promised goods or services to our customers in an amount that reflects the consideration we expect to be entitled to in exchange for those goods or services. Refer to Note 4 for further details.

Regulatory accounting: We account for our regulated operations in accordance with the authoritative guidance applicable to entities with regulated operations that meet the following criteria: (i) rates are established or approved by an independent, third-party regulator; (ii) rates are designed to recover the entity's specific costs of providing the regulated services or products and; (iii) there is a reasonable expectation that rates are set at levels that will recover the entity's costs and can be collected from customers. Regulatory assets primarily represent incurred costs that have been deferred because of their probable future recovery from customers through regulated rates. Regulatory liabilities represent: (i) the excess recovery of costs or accrued credits that have been deferred because it is probable such amounts will be returned to customers through future regulated rates; or (ii) billings in advance of expenditures for approved regulatory programs.

We amortize regulatory assets and liabilities and recognize the related expense or revenue in our statements of income consistent with the recovery or refund included in customer rates. We believe it is probable that our currently recorded regulatory assets and liabilities will be recovered or settled in future rates.

***Goodwill*:** Goodwill represents future economic benefits arising from other assets acquired in a business combination that are not individually identified and separately recognized. Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred, the fair value of any noncontrolling interest and the acquisition date fair value of any previously held equity interest in the acquiree over the fair value of the net identifiable assets acquired and liabilities assumed.

Goodwill is not amortized, but is subject to an assessment for impairment performed in the fourth quarter or more frequently if events occur or circumstances change that would more likely than not reduce the fair value of the reporting unit to which goodwill is assigned below its carrying amount. A reporting unit is an operating segment or one level below an operating segment and is the level at which we test goodwill for impairment.

In assessing goodwill for impairment, we have the option to first perform a qualitative assessment to determine whether a quantitative assessment is necessary. If we determine, based on qualitative factors, that the fair value of the reporting unit is more likely than not greater than the carrying amount, no further testing is required. If we bypass the qualitative assessment, or perform the qualitative assessment but determine it is more likely than not that its fair value is less than its carrying amount, we perform a quantitative test to compare the fair value of the reporting unit to its carrying amount, including goodwill. If the carrying amount of the reporting unit exceeds its fair value, we record an impairment loss as a reduction to goodwill and a charge to operating expenses, but the loss recognized would not exceed the total amount of goodwill allocated to the reporting unit.

Utility plant: We account for utility plant at historical cost. In cases where we are required to dismantle installations or to recondition the site on which they are located, we record the estimated cost of removal or reconditioning as an asset retirement obligation (ARO) and add an equal amount to the carrying amount of the asset.

Development and construction of our various facilities are carried out in stages. We expense project costs during early stage development activities. Once we achieve certain development milestones and it is probable that we can obtain future economic benefits from a project, we capitalize salaries and wages for persons directly involved in the project, and engineering, permits, licenses, wind measurement and insurance costs. We periodically review development projects in construction for any indications of impairment.

We transfer assets from “Construction work in progress” to “Utility plant” when they are available for service.

We determine depreciation expense for utility plant in service using the straight-line method, based on the average service lives of groups of depreciable property, which include estimated cost of removal. Consistent with FERC accounting requirements, we charge the original cost of utility plant retired or otherwise disposed of to accumulated depreciation. Our composite rates for depreciation were 2.8% and 3.7% of average depreciable property for 2025 and 2024. We amortize our capitalized software cost using the straight line method, based on useful lives of 3 to 10 years. Depreciation expense was $38.1 million in 2025 and $48.3 million in 2024. Amortization of capitalized software was $2.9 million in both 2025 and 2024.

We charge repairs and minor replacements to operating expenses, and capitalize renewals and betterments, including certain indirect costs.

Allowance for funds used during construction (AFUDC) is a non-cash item that represents the allowed cost of capital, including a return on equity (ROE), used to finance construction projects. We record the portion of AFUDC attributable to borrowed funds as a reduction of interest expense and record the remainder as other income. AFUDC rates are determined in accordance with applicable FERC guidelines for each regulated utility using an annual rate that is compounded semiannually.

Our balances of major classes of utility plant and associated useful lives are shown below as of December 31:

Utility Plant	Estimated useful life range (years)	2025	2024
(Thousands)			
Gas distribution plant	5-75	$ 1,230,911	$ 1,181,534
Software	3-10	52,382	47,173
Land		1,618	1,618
Building and improvements	35-50	41,378	40,717
Other plant	45-90	68,285	68,285
Total Utility Plant in Service		**1,394,574**	**1,339,327**
Total accumulated depreciation		(472,429)	(448,552)
Total Net Utility Plant in Service		**922,145**	**890,775**
Construction work in progress		23,533	25,424
Total Utility Plant		**$ 945,678**	**$ 916,199**

Leases: We determine if an arrangement is a lease at inception. We classify a lease as a finance lease if it meets any one of specified criteria that in essence transfers ownership of the underlying asset to us by the end of the lease term. If a lease does not meet any of those criteria, we classify it as an operating lease. On our balance sheets, we include, for operating leases: "Operating lease right-of-use (ROU) assets" and "Operating lease liabilities (current and non-current)"; and for finance leases: finance lease ROU assets in "Other assets" and liabilities in "Other current liabilities" and "Other liabilities."

ROU assets represent our right to use an underlying asset for the lease term and lease liabilities represent our obligation to make lease payments arising from the lease. We recognize lease ROU assets and liabilities at commencement of an arrangement based on the present value of lease payments over the lease term. We use the incremental borrowing rate based on information available at the lease commencement date to determine the present value of future payments,

except when the rate implicit in the lease is determinable. A lease ROU asset also includes any lease payments made at or before commencement date, minus any lease incentives received, and includes initial direct costs incurred. We do not record leases with an initial term of 12 months or less on the balance sheet for all classes of underlying assets, and we recognize lease expense for those leases on a straight-line basis over the lease term. We include variable lease payments that depend on an index or a rate in the ROU asset and lease liability measurement based on the index or rate at the commencement date, or upon a modification. We do not include variable lease payments that do not depend on an index or a rate in the ROU asset and lease liability measurement. A lease term includes an option to extend or terminate the lease when it is reasonably certain that we will exercise that option. We recognize lease (rent) expense for operating lease payments on a straight-line basis over the lease term, or we recognize the amount eligible for recovery under our rate plan, such as actual amounts paid. We amortize finance lease ROU assets on a straight-line basis over the lease term and recognize interest expense based on the outstanding lease liability.

We have lease agreements with lease and non-lease components, and account for lease components and associated non-lease components together as a single lease component, for all classes of underlying assets.

Impairment of long-lived assets: We evaluate utility plant and other long-lived assets for impairment when events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment evaluation is based on an undiscounted cash flow analysis at the lowest level to which cash flows of the long-lived assets or asset groups are largely independent of the cash flows of other assets and liabilities. We are required to recognize an impairment loss if the carrying amount of the asset exceeds the undiscounted future net cash flows associated with that asset.

The impairment loss to be recognized is the amount by which the carrying amount of the long-lived asset exceeds the asset’s fair value. Depending on the asset, fair value may be determined by use of a discounted cash flow model, with assumptions consistent with a market participant's view of the exit price of the asset.

Fair value measurement: Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants as of the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place in either the principal market for the asset or liability, or, in the absence of a principal market, in the most advantageous market for the asset or liability.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. A fair value measurement of a non-financial asset takes into account a market participant’s ability to generate economic benefits by using the asset according to its highest and best use, or by selling it to another market participant that would use the asset according to its highest and best use.

We use valuation techniques that are appropriate in the circumstances and for which sufficient data is available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs. All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy based on the transparency of input to the valuation of an asset or liability as of the measurement date.

The three input levels of the fair value hierarchy are as follows:

- Level 1 - inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.
- Level 2 - inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability either directly or indirectly, for substantially the full term of the contract.
- Level 3 - one or more inputs to the valuation methodology are unobservable or cannot be corroborated with market data.

Categorization within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. Certain investments are not categorized within the fair value hierarchy. These investments are measured based on the fair value of the underlying investments but may not be readily redeemable at that fair value.

Cash and cash equivalents: Cash and cash equivalents include cash, bank accounts, and other highly liquid short-term investments. We consider all highly liquid investments with a maturity date of three months or less when acquired to be cash equivalents and include those investments in "Cash and cash equivalents." We classify book overdrafts representing outstanding checks in excess of funds on deposit as "Accounts payable and accrued liabilities" on our balance sheets. We report changes in book overdrafts in the operating activities section of the statements of cash flows.

Concentration of risk: We maintain our cash and cash equivalents in accounts with major financial institutions in the form of demand deposits and money market accounts. Deposits in these financial institutions may exceed the amount of federal deposit insurance provided on such deposits.

Statements of cash flows: Supplemental disclosure of cash flow information is as follows:

		2025		2024
(Thousands)				
Cash paid during the year ended December 31:				
Interest, net of amounts capitalized	$	12,301	$	12,170
Income taxes paid, net	$	9,800	$	673

Of the income taxes paid, substantially all was paid to AGR under the tax sharing agreement. Interest capitalized was $0.4 million in 2025 and $0.3 million in 2024. Accrued liabilities for utility plant additions were $9.7 million and $11.5 million as of December 31, 2025 and 2024, respectively.

***Trade receivables and unbilled revenues, net of allowance for credit losses*:** We record trade receivables at amounts billed to customers and we record unbilled revenues based on an estimate of energy delivered or services provided to customers. The estimates for unbilled revenues are determined based on various assumptions, including current month energy load requirements, billing rates by customer class and delivery loss factors. Changes in those assumptions could significantly affect the estimated amounts of unbilled revenues.

The allowance for credit losses is our best estimate of the amount of probable credit losses in our existing trade receivables, determined based on experience. Each month we review our allowance for credit losses and past due accounts by age. When we believe that a receivable will not be recovered, we charge off the account balance against the allowance. Changes in assumptions about input factors and customer receivables, which are inherently uncertain and

susceptible to change from period to period, could significantly affect the allowance for credit losses estimates.

Trade receivables at December 31 include unbilled revenues of $45.5 million for 2025 and $35.8 million for 2024, and are shown net of an allowance for credit losses at December 31 of $3.6 million for 2025 and $5.9 million for 2024. Trade receivables do not bear interest, although late fees may be assessed. Credit loss expense was $4.1 million in 2025 and $6.8 million in 2024.

We establish our allowance for credit losses, including for unbilled revenue (also referred to as contract assets), by using both historical average loss percentages to project future losses, and by establishing a specific allowance for known credit issues or for specific items not considered in the historical average calculation. We also consider whether we need to adjust historical loss rates to reflect the effects of current conditions and forecasted changes considering various economic indicators (e.g., Gross Domestic Product, Personal Income, Consumer Price Index, Unemployment Rate) over the contractual life of the trade receivables. We write off amounts when we have exhausted reasonable collection efforts.

Debentures, bonds and bank borrowings: We record bonds, debentures and bank borrowings as a liability equal to the proceeds of the borrowings. We treat the difference between the proceeds and the face amount of the issued liability as discount or premium and accrete the amounts as interest expense or income over the life of the instrument. We defer incremental costs associated with the issuance of the debt instruments and amortize them over the same period as debt discount or premium. We present bonds, debentures and bank borrowings net of unamortized discount, premium and debt issuance costs on our balance sheets.

Gas in storage: Natural gas in storage is stored in both self-owned and third-party owned underground storage facilities. This gas is recorded as inventory. Injections of inventory into storage are priced at the market purchase cost at the time of injection, and withdrawals of working gas from storage are priced at the weighted-average cost in storage. We continuously monitor the weighted-average cost of gas value to ensure it remains at the lower of cost and net realizable value.

Materials and supplies: Materials and supplies inventories are used for construction of new facilities and repairs of existing facilities. These inventories are carried and withdrawn at the lower of cost and net realizable value and reported on the balance sheets within “Materials and supplies.” We combine inventory items for the statement of cash flows presentation purposes.

Government grants**:** We record government grants as a reduction to the related utility plant to be recovered through rate base, in accordance with the prescribed FERC accounting.

In accounting for government grants related to operating and maintenance costs, we recognize amounts receivable as an offset to expenses in the statements of income in which we incur the expenses.

There were no government grants recorded as of December 31, 2025 and 2024.

Deferred income: Apart from government grants, we occasionally receive payments from transactions in advance of the resulting performance obligations arising from the transaction. It is our policy to defer such payments on our balance sheets and amortize them into earnings when revenue recognition criteria are met.

Asset retirement obligations**:** We record the fair value of the liability for an asset retirement obligation (ARO) and a conditional ARO in the period in which it is incurred, capitalizing the cost

by increasing the carrying amount of the related long-lived asset. The ARO is associated with our long-lived assets and primarily consists of obligations related to removal or retirement of asbestos, polychlorinated biphenyl contaminated equipment, gas pipeline and cast iron gas main. We adjust the liability periodically to reflect revisions to either the timing or amount of the original estimated undiscounted cash flows over time. We accrete the liability to its present value each period and depreciate the capitalized cost over the useful life of the related asset. Upon settlement we will either settle the obligation at its recorded amount or incur a gain or a loss. We defer any timing differences between rate recovery and depreciation expense and accretion as either a regulatory asset or a regulatory liability.

The term conditional ARO refers to an entity's legal obligation to perform an asset retirement activity in which the timing or method of settlement are conditional on a future event that may or may not be within the entity's control. If an entity has sufficient information to reasonably estimate the fair value of the liability for a conditional ARO, it must recognize that liability at the time the liability is incurred.

The following table reconciles the beginning and ending aggregate carrying amount of the ARO, including our conditional ARO, which is recorded in Other Non-current Liabilities for the years ended December 31, 2025 and 2024.

Years Ended December 31,		2025		2024
(Thousands)				
ARO, beginning of year	$	5,981	$	6,140
Liabilities settled during the year		—		(475)
Accretion expenses		—		316
ARO, end of year	**$**	**5,981**	**$**	**5,981**

We have AROs for which we have not recognized a liability because the fair value cannot be reasonably estimated due to indeterminate settlement dates, including the removal of property upon termination of an easement, right-of-way or franchise.

Accrued removal obligations: We meet the requirements concerning accounting for regulated operations and recognize a regulatory liability for the difference between removal costs collected in rates and actual costs incurred. We classify those amounts as accrued removal obligations.

***Environmental remediation liability*:** In recording our liabilities for environmental remediation costs the amount of liability for a site is the best estimate, when determinable; otherwise it is based on the minimum liability or the lower end of the range when there is a range of estimated losses. We record our environmental liabilities on an undiscounted basis.

Post-employment and other employee benefits: We sponsor defined benefit pension plans that cover the majority of our employees. We also provide health care and life insurance benefits through various postretirement plans for eligible retirees.

We evaluate our actuarial assumptions on an annual basis and consider changes based on market conditions and other factors. All of our qualified defined benefit plans are funded in amounts calculated by independent actuaries, based on actuarial assumptions proposed by management.

We account for defined benefit pension or other postretirement plans, recognizing an asset or liability for the overfunded or underfunded plan status. For a pension plan, the asset or liability is

the difference between the fair value of the plan's assets and the projected benefit obligation. For any other postretirement benefit plan, the asset or liability is the difference between the fair value of the plan's assets and the accumulated postretirement benefit obligation. We generally reflect all unrecognized prior service costs and credits and unrecognized actuarial gains and losses as regulatory assets rather than in OCI, as management believes it is probable that such items will be recoverable through the ratemaking process. Certain nonqualified plan expenses are not recoverable through the ratemaking process and we present the unrecognized prior service costs and credits and unrecognized actuarial gains and losses in accumulated other comprehensive loss. If a plan meets settlement or curtailment accounting criteria, we recognize a regulatory asset or liability if these costs are probable of recovery from ratepayers. We use a December 31st measurement date for our benefits plans.

We amortize prior service costs for both the pension and other postretirement benefits plans on a straight-line basis over the average remaining service period of employees active on the date of the amendment. Effective March 31, 2022, the amortization period for prior service cost changes for the CNG Pension Plan was updated from average remaining service to future expected lifetime as the plan was frozen, or predominantly frozen, to future accruals. Effective April 1, 2022, the amortization period for prior service cost changes for CNG Pension Plan B was updated from average remaining service to future expected lifetime as the plan was frozen to future accruals. Effective December 10, 2022, the amortization period for prior service cost changes for the CNG Retirement Plan was updated from average remaining service to future expected lifetime as the plan was frozen to future accruals. We amortize unrecognized actuarial gains and losses related to the pension and other postretirement benefits plans in excess of 10% of the greater of periodic benefit obligation or market-related value of assets on a straight-line basis over future working lifetime. Effective March 31, 2022, the amortization period for the CNG Pension Plan was updated from future working lifetime to future expected lifetime as the plan was frozen, or predominantly frozen, to future accruals. Effective April 1, 2022, the amortization period for CNG Pension Plan B was updated from future working lifetime to future expected lifetime as the plan was frozen to future accruals. Effective December 10, 2022, the amortization period for the CNG Retirement Plan was updated from future working lifetime to future expected lifetime as the plan was frozen to future accruals. Our policy is to calculate the expected return on plan assets using the market-related value of assets. We determine that value by recognizing the difference between actual returns and expected returns over a five-year period.

Income taxes: In August 2022, the Inflation Reduction Act of 2022 ("IRA") was signed into law in the United States. The IRA created a new corporate alternative minimum tax ("CAMT") of 15% on adjusted financial statement income and an excise tax of 1% on the value of certain stock repurchases. The CAMT and other various applicable provisions of the IRA are effective for the Company for periods beginning after December 31, 2022. The impact of CAMT will depend on our facts in each year, as well as on anticipated guidance from the U.S. Department of Treasury.

AGR, the parent company of Networks, files a consolidated federal income tax return and various state income tax returns, some of which are unitary as required or permitted, including all of the activities of its subsidiaries. Each subsidiary company is treated as a member of the consolidated group and determines its current and deferred taxes based on the separate return with benefits for loss method. As a member, CNG settles its current tax liability or benefit each year directly with AGR pursuant to a tax allocation agreement between AGR and its members.

The aggregate amount of the related party income tax payable balance due to AGR was $3.7 million and $9.9 million at December 31, 2025 and 2024, respectively.

We use the asset and liability method of accounting for income taxes. Deferred tax assets and liabilities reflect the expected future tax consequences, based on enacted tax laws, of temporary

differences between the tax basis of assets and liabilities and their financial reporting amounts. In accordance with U.S. GAAP for regulated industries, we have established regulatory assets and liabilities for the net revenue requirements to be recovered from or refunded to customers for the related future tax expense or benefit associated with certain of these temporary differences. We defer investment tax credits when earned and amortize them over the estimated lives of the related assets. We also recognize the income tax consequences of intra-entity transfers of assets other than inventory when the transfer occurs.

Deferred tax assets and liabilities are measured at the expected tax rate for the period in which the asset or liability will be realized or settled, based on legislation enacted as of the balance sheet date. We charge or credit changes in deferred income tax assets and liabilities that are associated with components of OCI directly to OCI. Significant judgment is required in determining income tax provisions and evaluating tax positions. Our tax positions are evaluated under a more-likely-than-not recognition threshold before they are recognized for financial reporting purposes. We record valuation allowances to reduce deferred tax assets when it is more likely than not that we will not realize all or a portion of a tax benefit. Deferred tax assets and liabilities are netted and classified as non-current on our balance sheets. We had no intra-entity transfers of assets other than inventory during the years ended December 31, 2025 and 2024.

We record the excess of state franchise tax computed as the higher of a tax based on income or a tax based on capital in "Taxes other than income taxes" and "Taxes accrued" in our financial statements.

Positions taken or expected to be taken on tax returns, including the decision to exclude certain income or transactions from a return, are recognized in the financial statements when it is more likely than not the tax position can be sustained based solely on the technical merits of the position. The amount of a tax return position that is not recognized in the financial statements is disclosed as an unrecognized tax benefit. Changes in assumptions on tax benefits may also impact interest expense or interest income and may result in the recognition of tax penalties. Interest and penalties related to unrecognized tax benefits are recorded within “Interest expense, net of capitalization” and “Other income” and “Other deductions” in our statements of income.

Uncertain tax positions have been classified as non-current unless expected to be paid within one year. Our policy is to recognize interest and penalties on uncertain tax positions as a component of interest expense in the statements of income.

Our income tax expense, deferred tax assets and liabilities, and liabilities for unrecognized tax benefits reflect management’s best assessment of estimated current and future taxes to be paid. Significant judgments and estimates are required in determining the income tax components of the financial statements.

Adoption of New Accounting Pronouncements

Although we are not a public business entity, we adopt new accounting standards based on public business entity guidance aside from the effective dates in certain situations where we may follow the effective dates for private entities.

There have been no new accounting pronouncements adopted as of and for the year ended December 31, 2025 that are expected to have a material impact on CNG’s financial statements.

Accounting Pronouncements Issued But Not Yet Adopted

The following are new accounting pronouncements not yet adopted that we have evaluated or are evaluating to determine their effect on CNG's financial statements.

(a) Simplified credit loss guidance

In July 2025, FASB issued guidance to simplify applying ASC 326, Financial instruments – Credit losses, to current accounts receivable and contract assets arising from transactions accounted for under ASC 606, Revenue from contracts with customers, including those assets acquired in a business combination or recognized through the consolidation of a variable interest entity that is not a business if those assets arose from transactions that the acquiree or variable interest entity accounted for under ASC 606. The update introduces (1) a practical expedient allowing entities to assume current conditions remain unchanged over the remaining life of these assets, and (2) an accounting policy election for non-public entities, permitting consideration of post–balance sheet cash collections when estimating expected credit losses, provided the practical expedient is also elected. The amendment is effective for all entities in interim and annual periods for fiscal years beginning after December 15, 2025. We do not expect the new guidance to have a material impact on our results of operations, financial position and cash flows.

(b) Accounting for internal-use software costs

In September 2025 FASB issued guidance to modernize internal-use software guidance to eliminate the old stage-based capitalization model and to introduce a probable-to-complete threshold, requiring management authorization, funding commitment, and a probable expectation of completion before capitalization begins. It provides enhanced guidance and examples for applying this threshold, including factors for assessing significant development uncertainty such as novel features or ongoing revisions to performance requirements. Existing rules for external-use software, types of costs eligible for capitalization, and the point at which capitalization ceases remain unchanged. The amendment is effective for all entities in interim and annual periods for fiscal years beginning after December 15, 2027. We do not expect the new guidance to have a material impact on our results of operations, financial position and cash flows.

(c) Accounting for government grants

In December 2025, FASB issued amendments to provide comprehensive guidance on recognizing, measuring, and presenting government grants under ASC 832, Accounting for government grants by business entities, which previously only addressed disclosures. The amendment responds to the lack of explicit U.S. GAAP guidance that led to diverse practices and reliance on other GAAP or International Financial Reporting Standards (IFRS) by analogy. It classifies grants into asset-related and income-related categories, offering two approaches for asset-related grants: the cost accumulation approach (reducing the asset's carrying amount) and the deferred income approach (recognizing income systematically over the asset's useful life). Income-related grants, such as operating expense reimbursements, are recognized over the period the related costs occur, while grants for past costs or immediate support are recognized when the probable threshold is met. The amendment also includes guidance for business combinations, specifying when deferred income should or should not be recognized by the acquirer. The amendment is effective for public entities in fiscal years beginning after December 15, 2028, and for others after December 15, 2029, with transition options including modified prospective, modified retrospective, or full retrospective approaches. We do not expect the new guidance to have a material impact on our results of operations, financial position and cash flows.

***Use of estimates and assumptions*:** The preparation of our financial statements in conformity with U.S. GAAP requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting periods. Significant estimates and assumptions are used for, but not limited to: (1) allowance for credit losses and unbilled revenues; (2) asset impairments; (3) depreciable lives of assets; (4) income tax valuation allowances; (5) uncertain tax positions; (6) reserves for professional, workers' compensation, and comprehensive general insurance liability risks; (7) contingency and litigation reserves; (8) earnings sharing mechanism (ESM); (9) environmental remediation liabilities; (10) pension and other postretirement employee benefits (OPEB); (11) fair value measurements and (12) AROs. Future events and their effects cannot be predicted with certainty; accordingly, our accounting estimates require the exercise of judgment. The accounting estimates used in the preparation of our financial statements will change as new events occur, as more experience is acquired, as additional information is obtained, and as our operating environment changes. We evaluate and update our assumptions and estimates on an ongoing basis and may employ outside specialists to assist in our evaluations, as considered necessary. Actual results could differ from those estimates.

Union collective bargaining agreements: Approximately 75% of our employees are covered by a collective bargaining agreement. We have 91% of the collective bargaining agreements expiring during 2026.

Note 2. Industry Regulation

Rates

Utilities are entitled by Connecticut statute to charge rates that are sufficient to allow them an opportunity to cover their reasonable operating and capital costs, to attract needed capital and to maintain their financial integrity, while also protecting relevant public interests.

Additionally, CNG has a purchased gas adjustment clause, approved by PURA, which enables reasonably incurred cost of gas purchases to be passed through to customers. This clause allows CNG to recover costs associated with changes in the market price of purchased natural gas, substantially eliminating exposure to natural gas price risk.

On November 3, 2023, CNG filed a distribution revenue requirement case proposing a one-year rate plan commencing November 1, 2024 through October 31, 2025. The filing was based on a test year ending December 31, 2023. CNG requested that PURA approve new distribution rates to recover an increase in revenue requirements of approximately $19.8 million. CNG's Rate Plan also included several measures to moderate the impact of the proposed rate update for all customers, including, the adoption of a low-income discount rate and seeks to maintain its current revenue decoupling and earning sharing mechanisms.

On November 19, 2024, PURA released a final Decision, which decreased CNG's rates by $24.5 million. The Decision approved an allowed ROE of 9.15% and an equity ratio of 53%. The Decision maintained CNG's distribution management program, but instituted a cap of $26 million. The Decision also established a low-income discount rate along with revenue decoupling and earning sharing mechanisms. On December 19, 2024, CNG filed an appeal of the Decision in the Connecticut Superior Court. On November 19, 2025, the Connecticut Superior Court for the Judicial District of New Britain remanded the final Decisions to PURA for entirely new rate proceedings and ordered PURA to consider the underlying rate applications anew, as if newly filed. PURA has opened two new dockets in response to the remand, Dockets 25-11-13 and

25-11-14, and PURA has started a process to respond to the remand order. We cannot predict the outcome of this matter.

Gas Supply Arrangements

CNG satisfies its natural gas supply requirements through purchases from various producer/suppliers, withdrawals from natural gas storage capacity contracts and winter peaking supplies and resources. CNG operates diverse portfolios of gas supply, firm transportation capacity, gas storage and peaking resources. Actual reasonable gas costs incurred by CNG are passed through to customers through state regulated purchased gas adjustment mechanisms, subject to regulatory review.

CNG purchases the majority of our natural gas supply at market prices under seasonal, monthly or mid-term supply contracts and the remainder is acquired on the spot market. CNG diversifies its sources of supply by amount purchased and location and primarily acquires gas at various locations in the US Gulf of Mexico region, in the Appalachia region and in Canada.

CNG acquires firm transportation capacity on interstate pipelines under long-term contracts and utilizes that capacity to transport both natural gas supply purchased and natural gas withdrawn from storage to the local distribution system. Tennessee Gas Pipeline and Algonquin Gas Transmission interconnect with CNG's distribution system and the other pipelines provide indirect services upstream of the city gates. The prices and terms and conditions of the long-term contracts for firm transportation capacity are regulated by the FERC. The actual reasonable cost of such contracts is passed through to customers through state regulated purchased gas adjustment mechanisms.

CNG acquires firm underground natural gas storage capacity using long-term contracts and fills the storage facilities with gas in the summer months for subsequent withdrawal in the winter months. The storage facilities are located in Pennsylvania, New York, West Virginia and Ontario, Canada.

CNG owns 100% of the Liquefied Natural Gas (LNG) stored in an LNG facility which is directly attached to its distribution system. CNG uses the LNG capacity as a winter peaking resource.

Minimum Equity Requirements for Regulated Subsidiaries

Pursuant to an agreement with PURA, CNG is restricted from paying dividends if paying such dividend would result in a common equity ratio lower than 300 basis points below the equity percentage used to set rates in the most recent distribution rate proceeding as measured using a trailing 13-month average calculated as of the most recent quarter end. In addition, CNG is prohibited from paying dividends to its parent if the utility's credit rating, as rated by any of the three major credit rating agencies, falls below investment grade, or if the utility's credit rating, as determined by two of the three major credit rating agencies, falls to the lowest investment grade and there is a negative watch or review downgrade notice.

Note 3. Regulatory Assets and Liabilities

Pursuant to the requirements concerning accounting for regulated operations we capitalize, as regulatory assets, incurred and accrued costs that are probable of recovery in future regulated rates. We base our assessment of whether recovery is probable on the existence of regulatory orders that allow for recovery of certain costs over a specific period, or allow for reconciliation or

deferral of certain costs. When costs are not treated in a specific order we use regulatory precedent to determine if recovery is probable. We also record, as regulatory liabilities, obligations to refund previously collected revenue or to spend revenue collected from customers on future costs. Of the total regulatory assets net of regulatory liabilities, approximately $73.9 million represents the offset of accrued liabilities for which funds have not been expended. The remainder is either included in rate base or accruing carrying costs.

Details of other regulatory assets and other regulatory liabilities are shown in the tables below. They result from various regulatory orders that allow for the deferral and/or reconciliation of specific costs. Regulatory assets and regulatory liabilities are classified as current when recovery or refund in the coming year is allowed or required through a specific order or when the rates related to a specific regulatory asset or regulatory liability are subject to automatic annual adjustment.

Regulatory assets at December 31, 2025 and 2024 consisted of:

As of December 31, (Thousands)	2025	2024
Deferred purchased gas	$ 8,239	$ 8,563
Distribution integrity management program	11,168	13,169
Hardship programs	11,740	3,197
Pension and other postretirement benefit plan	61,919	60,121
Revenue decoupling mechanism	12,330	29,882
System expansion reconciliation	1,891	8,333
Unfunded future income taxes	12,651	11,624
Other	6,905	5,022
Total regulatory assets	**126,843**	**139,911**
Less: current portion	33,851	60,170
Total non-current regulatory assets	**$ 92,992**	**$ 79,741**

Deferred purchased gas represents the difference between actual gas costs and gas costs collected in rates. Balances at the end of the rate year are normally recorded/returned in the following year.

Distribution integrity management program (DIMP) represents deferred expenses related to pipeline replacement for cast iron and bare steel mains and services. Balances at the end of each rate year are normally received/returned in the next year.

Hardship programs represent customer accounts deferred for recovery to the extent they exceed the amount in rates. A portion of this balance is amortized through current rates, the remaining portion will be refunded in future periods through future rate cases.

Pension and other postretirement benefit plan represents the actuarial losses on the pension and other postretirement plans that will be reflected in customer rates when they are amortized and recognized in future pension expenses. Because no funds have yet been expended for this regulatory asset, it does not accrue carrying costs and is not included within the rate base.

Revenue decoupling mechanism represents the mechanism established to disassociate the utility's profits from its delivery/commodity sales.

System expansion reconciliation represents expenses not covered by system expansion rates related to expanding the natural gas system and converting customers to natural gas.

Unfunded future income taxes represent unrecovered federal and state income taxes primarily resulting from regulatory flow through accounting treatment. The income tax benefits or charges for certain plant related timing differences, such as removal costs, are immediately flowed through to, or collected from, customers. This amount is being amortized as the amounts related to temporary differences that give rise to the deferrals are recovered in rates.

Other includes items such as rate case costs and Environmental Defense Fund legal fees.

Regulatory liabilities at December 31, 2025 and 2024 consisted of:

As of December 31,	2025	2024
(Thousands)		
Asset removal costs	$ 287,227	$ 282,088
Asset retirement obligation	10,642	10,642
Non-firm margin sharing credits	11,358	16,682
Rate credits	2,500	3,750
Tax reform	12,167	12,519
Other	7,052	2,831
Total regulatory liabilities	**330,946**	**328,512**
Less: current portion	13,732	9,528
Total non-current regulatory liabilities	**$ 317,214**	**$ 318,984**

Asset removal costs represent the differences between asset removal costs incurred and amounts collected in rates for those costs. The amortization period is dependent upon the asset removal costs of underlying assets and the life of the utility plant.

Asset retirement obligation represents the fair value of the liability for an asset retirement which we are legally committed to remove.

Non-firm margin sharing credits represents the portion of interruptible and off-system sales revenue set aside to fund gas expansion projects. This balance is amortized through current rates.

Rate credits resulted from the acquisition of UIL by Iberdrola. This is being used to moderate increases in rates.

Tax reform represents the impact from re-measurement of deferred income tax balances as a result of the Tax Act enacted by the U.S. federal government on December 22, 2017. Reductions in accumulated deferred income tax balances due to the reduction in the corporate income tax rates from 35% to 21% under the provisions of the Tax Act will result in amounts previously collected from utility customers for these deferred taxes to be refundable to such customers, generally through reductions in future rates. A portion of this balance is amortized through current rates; the remaining portion will be refunded in future periods through future rate cases.

Other includes items such as energy efficiency programs and Geographic Information System (GIS) data conversion.

Note 4. Revenue

We recognize revenue when we have satisfied our obligations under the terms of a contract with a customer, which generally occurs when the control of promised goods or services transfers to the customer. We measure revenue as the amount of consideration we expect to receive in exchange for providing those goods or services. Contracts with customers may include multiple performance obligations. For such contracts, we allocate revenue to each performance obligation based on its relative standalone selling price. We generally determine standalone selling prices based on the prices charged to customers. Certain revenues are not within the scope of ASC 606, such as revenues from leasing, derivatives, other revenues that are not from contracts with customers and other contractual rights or obligations, and we account for such revenues in accordance with the applicable accounting standards. We exclude from revenue amounts collected on behalf of third parties, including any such taxes collected from customers and remitted to governmental authorities. We do not have any material significant payment terms because we receive payment at or shortly after the point of sale.

The following describes the principal activities from which we generate revenue.

CNG derives its revenue primarily from tariff-based sales of natural gas delivered to customers. For such revenues, we recognize revenues in an amount derived from the commodities delivered to customers. Another major source of revenue is wholesale sales of natural gas.

Tariff-based sales are subject to PURA approval, which determines prices and other terms of service through the ratemaking process. Certain customers have the option to obtain the natural gas directly from CNG or from another supplier. For customers that receive their natural gas from another supplier, CNG acts as an agent and delivers the natural gas for that supplier. Revenue in those cases is only for providing the service of delivery of the natural gas.

The performance obligation in all arrangements is satisfied over time because the customer simultaneously receives and consumes the benefits as CNG delivers or sells the natural gas.

CNG also records revenue from an Alternative Revenue Program (ARP), which is not ASC 606 revenue. Such programs represent contracts between the utilities and their regulators. CNG ARPs include revenue decoupling mechanisms, other ratemaking mechanisms, annual revenue requirement reconciliations, and other demand side management programs.

CNG also has various other sources of revenue including billing, collection, other administrative charges, sundry billings, rent of utility property, and miscellaneous revenue. It classifies such revenues as other ASC 606 revenues to the extent they are not related to revenue generating activities from leasing or ARPs.

Revenues disaggregated by major source for the year ended December 31, 2025 and 2024 are as follows:

Years Ended December 31,	2025	2024
(Thousands)		
Regulated operations – natural gas	$ 430,800	$ 396,624
Other (a)	2,041	2,240
Revenue from contracts with customers	**432,841**	**398,864**
Alternative revenue programs	16,722	21,510
Other revenue	1,939	(386)
Total operating revenues	**$ 451,502**	**$ 419,988**

(a) Primarily includes certain intra-month trading activities, billing, collection, and administrative charges, sundry billings, and other miscellaneous revenue.

Note 5. Goodwill

We do not amortize goodwill, but perform our annual impairment assessment testing at least annually as described in Note 1, in the fourth quarter, as of October 1. Our qualitative assessment involves evaluating key events and circumstances that could affect the fair value of our company, as well as other factors. Events and circumstances evaluated include macroeconomic conditions, industry, regulatory and market considerations, cost factors and their effect on earnings and cash flows, overall financial performance as compared with projected results and actual results of relevant prior periods, other relevant entity-specific events, and events affecting CNG.

Our quantitative impairment testing includes various assumptions, primarily the discount rate, and forecasted cash flows. We use a discount rate that is developed using market participant assumptions, which consider the risk and nature of our cash flows and the rates of return market participants would require in order to invest their capital in CNG. We test the reasonableness of the conclusions of our quantitative impairment testing using a range of discount rates and a range of assumptions for long-term cash flows.

We had no impairment of goodwill in 2025 and 2024 as a result of our qualitative impairment testing. There were no events or circumstances subsequent to our annual impairment assessment for 2025 or 2024 that required us to update the assessment.

The carrying amount of goodwill, which resulted from the purchase of CNG by UIL Holdings in 2010, was $79.3 million at both December 31, 2025 and 2024, with no accumulated impairment losses and no changes during 2025 and 2024.

Note 6. Income Taxes

Current and deferred taxes charged to expense for the years ended December 31, 2025 and 2024 consisted of:

Years Ended December 31,	2025	2024
(Thousands)		
Current		
Federal	$ 2,613	$ 8,268
State	947	(344)
Current taxes charged to expense	**3,560**	**7,924**
Deferred		
Federal	1,621	289
State	1,726	2,650
Deferred taxes charged to expense	**3,347**	**2,939**
Total Income Tax Expense	**$ 6,907**	**$ 10,863**

The differences between tax expense per the statements of income and tax expense at the 21% statutory federal tax rate for the years ended December 31, 2025 and 2024 consisted of:

Years Ended December 31,	2025	2024
(Thousands)		
Tax expense at federal statutory rate	$ 5,625	$ 9,281
State taxes, net of federal income tax	2,112	1,821
Other, net	(830)	(239)
Total Income Tax Expense	**$ 6,907**	**$ 10,863**

Income tax expense for the year ended December 31, 2025 was $1.3 million higher than it would have been at the statutory federal income tax rate of 21% due predominately to state income taxes, which are partially offset by tax benefits from Excess Accumulated Deferred Income Tax (ADIT) amortization and AFUDC flow through adjustments. This resulted in an effective tax rate of 25.8%. Income tax expense for the year ended December 31, 2024 was $1.6 million higher than it would have been at the statutory federal income tax rate of 21% due predominately to state income taxes, which were partially offset by tax benefits from Excess ADIT amortization and AFUDC flow through adjustments. This resulted in an effective tax rate of 24.6%.

Deferred tax assets and liabilities as of December 31, 2025 and 2024 consisted of:

December 31,	2025	2024
(Thousands)		
Non-current Deferred Income Tax Liabilities (Assets)		
CT credit carryforward	$ (14,189)	$ (13,872)
Valuation allowance - state credits	6,978	5,590
Deferred tax liability on 2017 Tax Act remeasurement	(3,276)	(3,371)
Property related	56,456	55,018
Unfunded future income taxes	3,342	3,040
Goodwill	7,134	6,665
Pension (net)	4,434	1,675
Other	4,377	5,799
Total Non-current Deferred Income Tax Liabilities	**$ 65,256**	**$ 60,544**
Deferred tax assets	$ 17,465	$ 17,243
Deferred tax liabilities	82,721	77,787
Net Accumulated Deferred Income Tax Liabilities	**$ 65,256**	**$ 60,544**

As of December 31, 2025, CNG had a state net credit carry forward of $14.2 million and a net state net operating loss carry forward of $1.7 million. As of December 31, 2024, CNG had a state net credit carry forward of $13.9 million and a net state net operating loss carry forward of $1.9 million. CNG's state tax credit carry forwards began to expire for the 2024 tax year.

Valuation allowances are recorded to reduce deferred tax assets when it is more likely than not that all or a portion of a tax benefit will not be realized. At December 31, 2025, CNG has recorded a valuation allowance of $7.0 million against its CT tax credits. The company also recorded a regulatory asset of $7.7 million to recover the associated tax expense of the valuation allowance against the state credits whose tax benefits were previously shared with customers. Additionally, CNG recorded a regulatory liability of $0.4 million related to the net tax benefit of the 2025 deferred state credits. As of December 31, 2024, CNG had recorded a valuation allowance on its state credit carryforwards of $5.6 million. The company also recorded a regulatory asset of $6.5 million to recover the associated tax expense of the valuation allowance against the state credits whose tax benefits were previously shared with customers.

Uncertain tax positions are classified as non-current unless expected to be paid within one year. We net our liability for uncertain tax positions against all same jurisdiction deferred tax assets, net operating losses and tax credit carryforwards. Our policy is to recognize interest and penalties on uncertain tax positions as a component of interest expense in the statements of income. As of December 31, 2025 and 2024, CNG did not have any gross income tax reserves for uncertain tax positions.

Unrecognized income tax benefits represent income tax positions taken on income tax returns but not yet recognized in the financial statements. The accounting guidance for uncertainty in income taxes provides that the financial effects of a tax position shall initially be recognized in the financial statements when it is more likely than not based on the technical merits that the position will be sustained upon examination, assuming the position will be audited and the taxing authority has full knowledge of all relevant information. CNG had no unrecognized income tax benefits as of December 31, 2025 or 2024.

There were no additional accruals for interest and penalties on tax reserves as of December 31, 2025 or 2024.

Note 7. Non-current Debt

Long-term debt as of December 31, 2025 and 2024 consisted of:

As of December 31,		2025		2024	
(Thousands, except interest rates)	Maturity Dates	Balances	Interest Rates	Balances	Interest Rates
Senior unsecured debt	2028-2049	$ 265,000	2.02%-6.66%	$ 245,000	2.02%-6.66%
Unamortized debt issuance costs and discount		(866)		(915)	
Total Debt		**264,134**		**244,085**	
Less: debt due within one year, included in current liabilities		—		—	
Total Non-current Debt		**$ 264,134**		**$ 244,085**	

On July 31, 2025, CNG issued $20 million aggregate principal amount of Senior Series unsecured debt maturing in 2036 at an interest rate of 5.57%.

Long-term debt, including sinking fund obligations, due over the next five years consist of:

2026	2027	2028	2029	2030	Total
(Thousands)					
$ —	$ —	$ 25,000	$ —	$ 30,000	$ 55,000

We have no debt covenant requirements related to the maintenance of financial ratios in our long-term debt agreements at December 31, 2025 and 2024.

Note 8. Bank Loans and Other Borrowings

CNG had $3.7 million of notes payable outstanding at December 31, 2025 and no notes payable outstanding at December 31, 2024. CNG funds short-term liquidity needs through an agreement among Avangrid's regulated utility subsidiaries (the "Virtual Money Pool Agreement"), a bi-lateral intercompany credit agreement with Avangrid (the "Bi-Lateral Intercompany Facility") and a bank provided credit facility to which CNG is a party (the "AGR Credit Facility"), each of which are described below.

The Virtual Money Pool Agreement is an agreement among the investment grade-rated, regulated utility subsidiaries of Avangrid under which the parties to this agreement may lend to or borrow from each other. This Agreement allows Avangrid to optimize cash resources within the regulated utility companies which are prohibited by regulation from lending to unregulated affiliates. The interest rate on transactions under this agreement is the A2/P2 non-financial 30-day commercial paper rate published by the Federal Reserve. CNG has a lending/borrowing limit of $100 million under this agreement. CNG had $3.7 million outstanding under this agreement at December 31, 2025 and no outstanding debt under this agreement at December 31, 2024.

The Bi-Lateral Intercompany Facility provides for borrowing of up to $250 million from Avangrid at the A2/P2 non-financial 30-day commercial paper rate published by the Federal Reserve. CNG had no debt outstanding under this agreement at December 31, 2025 and 2024.

On December 22, 2025, the utilities (New York State Electric and Gas Corporation ("NYSEG"), Rochester Gas and Electric Corporation ("RG&E"), Central Maine Power Company ("CMP"), The United Illuminating Company ("UI"), Connecticut Natural Gas Corporation ("CNG"), The Southern Connecticut Gas Company ("SCG") and The Berkshire Gas Company ("BGC")) executed a new credit facility with an aggregate limit of $1,500 million and a termination date of December 23, 2030. Under the terms of the revolving credit facility, each borrower has a maximum borrowing entitlement, or sublimit, which can be periodically adjusted to address specific short-term capital funding needs, subject to the maximum limit contained in the agreement. NYSEG has a maximum sublimit of $1,000 million, RG&E has $500 million, CMP has $375 million, UI has a maximum sublimit of $150 million, SCG has a maximum sublimit of $75 million, and CNG and BCG have maximum sublimits of $50 million. The new facility has set minimum sublimits of $600 million for NYSEG, $250 million for RG&E, $150 million for CMP, $25 million for UI, CNG, SCG, and BGC. The facility fees range from 5 to 25 basis points CNG had not borrowed under this agreement as of both December 31, 2025 and 2024.

In the AGR Credit Facility we covenant not to permit, without the consent of the lender, our ratio of total indebtedness to total capitalization to exceed 0.65 to 1.00 at any time. For purposes of calculating the maximum ratio of indebtedness to total capitalization, the facility excludes from net worth the balance of accumulated other comprehensive loss as it appears on the balance sheet. The facility contains various other covenants, including a restriction on the amount of secured indebtedness we may maintain. Continued un-remedied failure to comply with those covenants for

five business days after written notice of such failure from the lender constitutes an event of default and would result in acceleration of maturity. Our ratio of indebtedness to total capitalization pursuant to the revolving credit facility was 0.36 to 1.00 at December 31, 2025. We are not in default as of December 31, 2025.

Note 9. Redeemable Preferred Stock

At December 31, 2025 and 2024, our redeemable preferred stock was:

Series	Par Value per Share	Redemption Price per Share	Shares Authorized and Outstanding(1)	Amount (Thousands) 2025	2024
CNG, 8% Non-callable	$ 3.125	$ —	108,492	$ 340	$ 340
Total				**$ 340**	**$ 340**

(1) At December 31, 2025 CNG had 884,315 shares of $3.125 par value preferred stock authorized.

Note 10. Leases

We have operating leases for land, office buildings, facilities, and certain equipment. CNG does not have any finance leases. Certain of our lease agreements include rental payments adjusted periodically for inflation or are based on other periodic input measures. Our leases do not contain any material residual value guarantees or material restrictive covenants. Our leases have remaining lease terms of 1 year to 7 years, some of which may include options to extend the leases for up to 10 years, and some of which may include options to terminate the leases within one year. We consider extension or termination options in the lease term if it is reasonably certain we will exercise the option.

The components of lease cost and other information related to leases were as follows:

For the Years Ended December 31, (Thousands)	2025	2024
Lease cost		
Operating lease cost	$ 569	$ 1,133
Short-term lease cost	37	64
Variable lease cost	5	25
Total lease cost	**$ 611**	**$ 1,222**

Balance sheet and other information for the years ended December 31, 2025 and 2024 was as follows:

As of December 31,		2025		2024
(Thousands, except lease term and discount rate)				
Operating Leases				
Operating lease right-of-use assets	$	2,866	$	2,882
Operating lease liabilities, current		550		508
Operating lease liabilities, long-term		2,632		2,653
Total operating lease liabilities	**$**	**3,182**	**$**	**3,161**
Weighted-average Remaining Lease Term (years)				
Operating leases		5.93		6.60
Weighted-average Discount Rate				
Operating leases		4.82 %		4.89 %

For the years ended December 31, 2025 and 2024, supplemental cash flow information related to leases was as follows:

For the Years Ended December 31,		2025		2024
(Thousands)				
Cash paid for amounts included in the measurement of lease liabilities:				
Operating cash flows from operating leases	$	532	$	503
Right-of-use assets obtained in exchange for lease obligations:				
Operating leases	$	457	$	726

As of December 31, 2025, maturities of lease liabilities were as follows:

	Operating Leases
(Thousands)	
Year ending December 31,	
2026	$ 603
2027	608
2028	612
2029	461
2030	466
Thereafter	927
Total lease payments	**3,677**
Less: imputed interest	(495)
Total	**$ 3,182**

Most of our leases do not provide an implicit rate in the lease; thus we use our incremental borrowing rate based on the information available at the commencement date in determining the present value of lease payments.

Note 11. Environmental Liability

From time to time environmental laws, regulations and compliance programs may require changes in our operations and facilities and may increase the cost of natural gas service.

Site Decontamination, Demolition and Remediation Costs

CNG owns or has previously owned properties where Manufactured Gas Plants (MGPs) had historically operated. MGP operations have led to contamination of soil and groundwater with petroleum hydrocarbons, benzene and metals, among other things, at these properties, the regulation and cleanup of which is regulated by the Federal Resource Conservation and Recovery Act as well as other federal and state statutes and regulations. CNG has or had an ownership interest in one or more such properties contaminated as a result of MGP-related activities. Under the existing regulations, the cleanup of such sites requires state and at times, federal, regulators' involvement and approval before cleanup can commence. In certain cases, such contamination has been evaluated, characterized and remediated. In other cases, the sites have been evaluated and characterized, but not yet remediated. Finally, at some of these sites, the scope of the contamination has not yet been fully characterized; no liability was recorded in respect of these sites as of December 31, 2025 and no amount of loss, if any, can be reasonably estimated at this time. In the past, CNG has received approval for the recovery of MGP-related remediation expenses from customers through rates and will seek recovery in rates for ongoing MGP-related remediation expenses for all of their MGP sites.

CNG owns a property located on Columbus Boulevard in Hartford which is a former MGP site. Costs associated with the remediation of the site could be significant and will be subject to a review by PURA as to whether these costs are recoverable in rates. As of December 31, 2025, CNG has determined that remediation of the property in Hartford is not probable and therefore no amounts have been reserved.

Note 12. Fair Value of Financial Instruments and Fair Value Measurements

The estimated fair value of debt amounted to $267 million and $237 million as of December 31, 2025 and 2024, respectively. The estimated fair value was determined, in most cases, by discounting the future cash flows at market interest rates. The interest rate curve used to make these calculations takes into account the risks associated with the natural gas industry and the credit ratings of the borrowers in each case. The fair value hierarchy for the fair value of debt is considered as Level 2.

Assets and liabilities measured at fair value on a recurring basis

The financial instruments measured at fair value as of December 31, 2025 and 2024 consist of:

Description	Total	Fair Value Measurements at December 31, Using (Level 1)	(Level 2)	(Level 3)
(Thousands)				
2025				
Assets				
Noncurrent investments	$ 636	$ 636	$ —	$ —
Total	**$ 636**	**$ 636**	**$ —**	**$ —**
2024				
Assets				
Noncurrent investments	$ 683	$ 683	$ —	$ —
Total	**$ 683**	**$ 683**	**$ —**	**$ —**

We had no transfers to or from Level 1 and 2 during the years ended December 31, 2025 and 2024. Our policy is to recognize transfers in and transfers out as of the actual date of the event or change in circumstances that causes a transfer, if any.

Valuation techniques: We measure the fair value of our non-current investments available for sale using quoted market prices in active markets for identical assets and include the measurements in Level 1. The investments primarily consist of money market funds.

Note 13. Post-Retirement and Similar Obligations

CNG has multiple qualified pension plans covering eligible union and management employees and retirees. The union plans are all closed to new hires, and the non-union plans were closed as of December 31, 2017. The plans are traditional defined benefit plans or cash balance plans depending on date of hire and are closed to new employees hired on or after specified dates. Employees not participating in a defined benefit plan are eligible to receive an enhanced or core 401(k) Company matching contribution.

CNG non-union employees are eligible to participate in the UIL Holdings Corporation 401(k) Employee Stock Ownership Plan and union employees are eligible to participate in the Connecticut Natural Gas Corporation Union Employee 401(k) Plan. Employees may defer a portion of the compensation and invest in various investment alternatives. Matching contributions are made in the form of cash which is subsequently invested in various investment alternatives offered to employees. The matching expenses under the Plan for the Company totaled approximately $5.2 million for 2025 and $3.3 million for 2024.

CNG also has plans providing other postretirement benefits for eligible employees and retirees. The plans were closed to newly-hired CNG union employees by end of March 2011. These benefits consist primarily of health care, prescription drug and life insurance benefits for retired employees and their dependents. For Medicare eligible non-union retirees, CNG provides a subsidy through an HRA for retirees to purchase coverage on the individual market. Medicare eligible union retirees have the option of receiving a subsidy through an HRA or paying contributions and participating in company-sponsored retiree health plans.

Non-Qualified Retirement Benefit Plans

We also sponsor various unfunded non-qualified pension plans for certain current employees, former employees and former directors. The total liability for these plans, which is included in

Other current and Other non-current liabilities on our balance sheets, was $1.0 million at December 31, 2025 and 2024.

Qualified Retirement Benefit Plans

Obligations and funded status as of December 31, 2025 and 2024 consisted of:

	Pension Benefits		Postretirement Benefits	
As of December 31,	**2025**	**2024**	**2025**	**2024**
(Thousands)				
Change in benefit obligation				
Benefit obligation as of January 1,	**$ 193,237**	**$ 210,074**	**$ 19,324**	**$ 20,198**
Service cost	—	—	62	84
Interest cost	10,134	9,608	931	908
Actuarial (gain) loss	13,361	(11,695)	1,169	1,058
Amendments	—	—	(1,190)	—
Curtailments/Settlements	(10,987)	—	—	—
Benefits paid	(13,374)	(14,750)	(2,561)	(2,924)
Benefit obligation as of December 31,	**$ 192,371**	**$ 193,237**	**$ 17,735**	**$ 19,324**
Change in plan assets				
Fair value of plan assets at January 1,	**$ 150,523**	**$ 155,681**	**$ 11,347**	**$ 11,778**
Actual return on plan assets	18,820	4,135	765	269
Employer contributions	12,961	5,457	714	2,224
Curtailments/settlements	(10,987)	—	—	—
Benefits paid	(13,374)	(14,750)	(2,561)	(2,924)
Fair value of plan assets at December 31,	**$ 157,943**	**$ 150,523**	**$ 10,265**	**$ 11,347**
Funded status at December 31,	**$ (34,428)**	**$ (42,714)**	**$ (7,470)**	**$ (7,977)**

During 2025, the pension benefit obligation had an actuarial loss of $13.4 million, primarily due to $7.9 million loss from a decrease in the discount rate. In 2025, the pension benefit obligation had a reduction of $11.0 million from settlements. The settlements were lump sum payments made within the pension plan guidelines at the discretion of the plan participants who opted to retire. During 2025, the postretirement benefit obligation had an actuarial loss of $1.2 million. This loss was primarily driven by $0.6 million loss from decrease in the discount rates and $0.7 million loss from changes in demographic assumptions. During 2025, the postretirement benefit obligation had a reduction of $1.2 million due to plan amendments. The amendments were driven by a Company decision to reduce postretirement benefit accruals for non-union employees.

During 2024, the pension benefit obligation had an actuarial gain of $11.7 million, primarily due to $14.8 million gain from increase in discount rates. During 2024, the postretirement benefit obligation had an actuarial loss of $1.1 million.This loss was primarily driven by $1.3 million loss from assumption changes in health care trend rates offset by $1.4 million gain from increase in discount rates.

Amounts recognized as of December 31, 2025 and 2024 consisted of:

	Pension Benefits		Postretirement Benefits	
As of December 31,	**2025**	**2024**	**2025**	**2024**
(Thousands)				
Non-current liabilities	$ (34,428)	$ (42,714)	$ (7,470)	$ (7,977)

We have determined that we are allowed to defer as regulatory assets or regulatory liabilities items that would otherwise be recorded in accumulated other comprehensive income pursuant to the accounting requirements concerning defined benefit pension and other postretirement plans.

Amounts recognized as regulatory assets or regulatory liabilities for the years ended December 31, 2025 and 2024 consisted of:

	Pension Benefits		Postretirement Benefits	
Years Ended December 31,	**2025**	**2024**	**2025**	**2024**
(Thousands)				
Net loss	$ 14,472	$ 11,595	$ 5,615	$ 5,442
Prior service cost	$ —	$ —	$ (1,127)	$ —

Our accumulated benefit obligation (ABO) for all qualified defined benefit pension plans was $192.4 million and $193.2 million as of December 31, 2025 and 2024. Our postretirement benefits were partially funded at December 31, 2025 and 2024.

The projected benefit obligation (PBO) and ABO exceeded the fair value of pension plan assets for our qualified plans as of December 31, 2025 and 2024. The following table shows the aggregate projected and accumulated benefit obligations and the fair value of plan assets for the relevant periods.

As of December 31,	**2025**	**2024**
(Thousands)		
Projected benefit obligation	$ 192,371	$ 193,237
Accumulated benefit obligation	$ 192,371	$ 193,237
Fair value of plan assets	$ 157,943	$ 150,523

As of December 31, 2025 and 2024, the accumulated postretirement benefits obligation for all the qualified plans exceeded the fair value of plan assets.

Components of net periodic benefit cost and other changes in plan assets and benefit obligations recognized in income and regulatory assets and liabilities for the years ended December 31, 2025 and 2024 consisted of:

	Pension Benefits		Postretirement Benefits	
For the years ended December 31,	**2025**	**2024**	**2025**	**2024**
(Thousands)				
Net Periodic Benefit Cost:				
Service cost	$ —	$ —	$ 62	$ 84
Interest cost	10,134	9,608	931	908
Expected return on plan assets	(9,355)	(10,513)	(307)	(414)
Amortization of prior service cost	—	—	(62)	—
Settlement charge	827	—	—	—
Amortization of net loss	193	712	538	471
Net Periodic Benefit Cost	**$ 1,799**	**$ (193)**	**$ 1,162**	**$ 1,049**

Other changes in plan assets and benefit obligations recognized in regulatory assets and regulatory liabilities:				
Net (gain) loss	$ 3,897	$ (5,316)	$ 711	$ 1,204
Settlements	(827)	—	—	—
Amortization of net loss	(193)	(712)	(538)	(471)
Prior service credit/(cost)	—	—	(1,189)	—
Amortization of prior service cost	—	—	62	—
Total Other Changes	**2,877**	**(6,028)**	**(954)**	**733**
Total Recognized	**$ 4,676**	**$ (6,221)**	**$ 208**	**$ 1,782**

We include the net periodic benefit cost in other operating expenses for the service component and other deductions for the non-service component. The net periodic benefit cost for postretirement benefits represents the amount expensed for providing health care benefits to retirees and their eligible dependents.

The weighted-average assumptions used to determine benefit obligations as of December 31, 2025 and 2024 consisted of:

	Pension Benefits		Postretirement Benefits	
	2025	**2024**	**2025**	**2024**
Discount rate	5.05%	5.49%	5.05%	5.41%
Rate of compensation increase	N/A	N/A	N/A	N/A
Interest crediting rate	3.57%	3.57%	N/A	N/A

The discount rate is the rate at which the benefit obligations could presently be effectively settled. We determined the discount rates by developing yield curves derived from a portfolio of high grade non-callable bonds with yields that closely match the duration of the expected cash flows of our benefit obligations.

The weighted-average assumptions used to determine net periodic benefit cost for the years ended December 31, 2025 and 2024 consisted of:

	Pension Benefits		Postretirement Benefits	
Years Ended December 31,	**2025**	**2024**	**2025**	**2024**
Discount rate	5.49 %	4.75 %	5.41%/5.14%	4.69 %
Expected long-term return on plan assets	7.00 %	7.50 %	2.90 %	4.10 %
Rate of compensation increase (Union/Non-Union)	N/A	N/A	N/A	N/A

CNG utilizes an alternative method to amortize prior service costs and unrecognized gains and losses. Prior service costs for both the pension and other postretirement benefits plans are amortized on a straight-line basis over the average remaining service period of participants expected to receive benefits.

We developed our expected long-term rate of return on plan assets assumption based on a review of long-term historical returns for the major asset classes, the target asset allocations, and the effect of rebalancing of plan assets discussed below. Our analysis considered current capital market conditions and projected conditions. Our policy is to calculate the expected return on plan assets using the market related value of assets. We amortize unrecognized actuarial gains and

losses related to the pension and other postretirement benefits plans in excess of 10% of the greater of periodic benefit obligation or market-related value of assets on a straight-line basis over future expected lifetime.

Assumed health care cost trend rates used to determine benefit obligations as of December 31, 2025 and 2024 consisted of:

As of December 31,	2025	2024
Health care cost trend rate assumed for next year	8.40% / 10.10%	8.90% / 10.60%
Rate to which cost trend rate is assumed to decline (ultimate trend rate)	4.50% / 4.50%	4.50% / 4.50%
Year that the rate reaches the ultimate trend rate	2039 / 2039	2039 / 2039

Contributions

We make annual contributions in accordance with our funding policy of not less than the minimum amounts as required by applicable regulations. We expect to contribute $5.5 million to our pension plans during 2026. We expect to contribute $1.0 million to our other postretirement benefit plans during 2026.

Estimated future benefit payments

Expected benefit payments and Medicare Prescription Drug, Improvement and Modernization Act of 2003 (Medicare Act) subsidy receipts reflecting expected future service as of December 31, 2025 consisted of:

(Thousands)	Pension Benefits	Postretirement Benefits	Medicare Act Subsidy Receipts
2026	$ 17,022	$ 1,522	$ 102
2027	$ 16,264	$ 1,450	$ 106
2028	$ 16,797	$ 1,421	$ 108
2029	$ 16,477	$ 1,370	$ 112
2030	$ 16,269	$ 1,338	$ 118
2031-2035	$ 75,564	$ 6,531	$ 331

Plan assets

Our pension benefits plan assets are held in a master trust providing for a single trustee/ custodian, a uniform investment manager lineup, and an efficient, cost-effective means of allocating expenses and investment performance to each plan under the master trust. Our primary investment objective is to ensure that current and future benefit obligations are adequately funded and with volatility commensurate with our tolerance for risk. Preservation of capital and achievement of sufficient total return to fund accrued and future benefits obligations are of highest concern. Our primary means for achieving capital preservation is through diversification of the trust's investments while avoiding significant concentrations of risk in any one area of the securities markets. Within each asset group, further diversification is achieved through utilizing multiple asset managers and systematic allocation to various asset classes and providing broad exposure to different segments of the equity, fixed income and alternative investment markets.

The asset allocation policy is the most important consideration in achieving our objective of superior investment returns while minimizing risk. We have established a target asset allocation

policy within allowable ranges for our pension benefits plan assets within broad categories of asset classes made up of Return-Seeking and Liability-Hedging investments. We currently have target allocations ranging from 15%-70% for Return-Seeking assets and 30%-85% for Liability-Hedging assets. Return-Seeking assets include investments in domestic, international and emerging equity, real estate, global asset allocation strategies and hedge funds. Liability-Hedging investments generally consist of long-term corporate bonds, annuity contracts, long-term treasury STRIPS and opportunistic fixed income investments. Systematic rebalancing within the target ranges increases the probability that the annualized return on the investments will be enhanced, while realizing lower overall risk, should any asset categories drift outside their specified ranges.

The fair values of pension benefits plan assets, by asset category, as of December 31, 2025, consisted of:

As of December 31, 2025		**Fair Value Measurements**		
(Thousands)	**Total**	**Level 1**	**Level 2**	**Level 3**

	$ 119,560	**$ 38,648**	**$ 80,912**	**$ —**
Other investments measured at net asset value	30,963			
Total	**$ 150,523**			

Valuation Techniques

We value our pension benefits plan assets as follows:

- Cash and cash equivalents - Level 1: at cost, plus accrued interest, which approximates fair value. Level 2: proprietary cash associated with other investments, based on yields currently available on comparable securities of issuers with similar credit ratings.
- U.S. government securities - at the closing price reported in the active market in which the security is traded.
- Common stocks - at the closing price reported in the active market in which the individual investment is traded.
- Corporate bonds - based on yields currently available on comparable securities of issuers with similar credit ratings.
- Preferred stocks - at the closing price reported in the active market in which the individual investment is traded.
- Common collective trusts/Registered investment companies - Level 1: at the closing price reported in the active market in which the individual investment is traded. Level 2: the fair value is primarily derived from the quoted prices in active markets of the underlying securities. Because the fund shares are offered to a limited group of investors, they are not considered to be traded in an active market.
- Other investments, principally annuity and fixed income - based on yields currently available on comparable securities of issuers with similar credit ratings.
- Other investments measured at net asset value (NAV) - fund shares offered to a limited group of investors and alternative investments, such as private equity and real estate oriented investments, partnership/joint ventures and hedge funds are valued using the NAV as a practical expedient.

Our postretirement benefits plan assets are held with trustees in multiple voluntary employees' beneficiary association (VEBA) and 401(h) arrangements and are invested among and within various asset classes to achieve sufficient diversification in accordance with our risk tolerance. This is achieved for our postretirement benefits plan assets through the utilization of multiple institutional mutual and money market funds, providing exposure to different segments of the fixed income, equity and short-term cash markets. Approximately 23% of the postretirement benefits plan assets are invested in VEBA and 401(h) arrangements that are not subject to income taxes with the remainder being invested in arrangements subject to income taxes.

We have established a target asset allocation policy within allowable ranges for postretirement benefits plan assets of 49%-69% for equity securities and 31%-51% for fixed income investments. Equity investments are diversified across U.S. and non-U.S. stocks, investment styles, and market capitalization ranges. Fixed income investments are primarily invested in U.S. bonds and may also include some non-U.S. bonds. We primarily minimize the risk of large losses through diversification but also through monitoring and managing other aspects of risk through quarterly investment portfolio reviews. Systematic rebalancing within target ranges increases the probability of increasing the projected expected return, while mitigating risk, should any asset categories drift outside their specified ranges.

The fair values of other postretirement benefits plan assets, by asset category, as of December 31, 2025, consisted of:

As of December 31, 2025		Fair Value Measurements		
(Thousands)	Total	Level 1	Level 2	Level 3

Total other deductions	**$**	**(4,590)**	**$**	**(699)**

Note 15. Related Party Transactions

Certain Networks subsidiaries, including CNG, borrow from AGR, the parent of Networks, through intercompany revolving credit agreements. For CNG, the intercompany revolving credit agreements provide access to supplemental liquidity. See Note 8 for further detail on the credit facility with AGR.

Avangrid Service Company provides administrative and management services to Networks operating utilities, including CNG, pursuant to service agreements. The cost of those services is allocated in accordance with methodologies set forth in the service agreements. The cost allocation methodologies vary depending on the type of service provided. Management believes such allocations are reasonable. The charge for operating services provided to CNG by AGR and its affiliates was approximately $31.5 million and $26.2 million for the years ended December 31, 2025 and 2024, respectively. Cost for services includes amounts capitalized in utility plant, which was approximately $2.4 million in 2025 and $1.5 million in 2024. The remainder was primarily recorded as operations and maintenance expense. The charge for services provided by CNG to AGR and its subsidiaries were approximately $5.0 million for 2025 and $7.0 million for 2024. All charges for services are at cost. All of the charges associated with services provided are recorded as revenues to offset other operating expenses on the financial statements.

The balance in accounts payable to affiliates of $21.9 million at December 31, 2025 and $20.7 million at December 31, 2024 is mostly payable to UIL Holdings Corporation. The balance in accounts receivable from affiliates of $0.3 million at December 31, 2025 and $0.5 million at December 31, 2024 is mostly receivable from SCG.

There were no notes receivable from affiliates at December 31, 2025 and $21.4 million notes receivable from CMP at December 31, 2024. Notes receivable from affiliates relate to the Virtual Money Pool Agreement as discussed in Note 8 of these financial statements.

Note 16. Subsequent Events

The company has performed a review of subsequent events through March 27, 2026, which is the date these financial statements were available to be issued.

Independent Auditors' Report

The Stockholder and Board of Directors
The Southern Connecticut Gas Company:

Opinion

We have audited the consolidated financial statements of The Southern Connecticut Gas Company and its subsidiaries (the Company), which comprise the consolidated balance sheets as of December 31, 2025 and 2024, and the related consolidated statements of income, comprehensive income, changes in common stock equity, and cash flows for the years then ended, and the related notes to the consolidated financial statements.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2025 and 2024, and the results of its operations and its cash flows for the years then ended in accordance with U.S. generally accepted accounting principles.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are required to be independent of the Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with U.S. generally accepted accounting principles, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for one year after the date that the consolidated financial statements are available to be issued.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the consolidated financial statements.

KPMG LLP, a Delaware limited liability partnership, and its subsidiaries are part of the KPMG global organization of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the consolidated financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

Notes to Consolidated Financial Statements

Note 1. Summary of Significant Accounting Policies, New Accounting Pronouncements and Use of Estimates

Background and nature of operations: The Southern Connecticut Gas Company (SCG, the company, we, our, us) engages in natural gas transportation, distribution and sales operations in Connecticut serving approximately 210,000 customers as of December 31, 2025, in its service territory of approximately 555 square miles. SCG is regulated by the Connecticut Public Utilities Regulatory Authority (PURA).

SCG is the principal operating utility of Connecticut Energy Corporation (CEC), a wholly-owned subsidiary of UIL Holdings Corporation (UIL Holdings). CEC is a holding company whose sole business is ownership of its operating regulated gas utility. UIL Holdings, whose primary business is ownership of its operating regulated utility businesses, is a wholly-owned subsidiary of Avangrid Networks, Inc. (Networks), which is a wholly-owned subsidiary of Avangrid, Inc. (AGR), which is a wholly-owned subsidiary of Iberdrola, S.A. (Iberdrola), a corporation organized under the laws of the Kingdom of Spain.

Agreement and Plan of Merger: On May 17, 2024, AGR entered into an Agreement and Plan of Merger (the Merger Agreement) with Iberdrola and Arizona Merger Sub, Inc (Merger Sub). As a result of the consummation of the Merger on December 23, 2024 (closing date), Merger Sub merged with and into Avangrid (the Merger), with Avangrid continuing as the surviving corporation and a wholly-owned subsidiary of Iberdrola. On the closing date, each share of common stock issued and outstanding immediately prior to the closing date (other than common stock owned by the Merger, Merger Sub or any other direct or indirect wholly owned Subsidiary of the Merger, and in each case not held on behalf of the third parties (collectively, the Excluded Shares)) was converted into a right to receive $35.75 per share of common stock in cash, without interest.

On the closing date, (i) all shares of common stock ceased to be outstanding, were cancelled and ceased to exist and (ii) each Excluded Share ceased to be outstanding and was cancelled without payment of any consideration and ceased to exist. As a result of the consummation of the Merger on December 23, 2024, Iberdrola became the direct owner of 100 shares of common stock of Avangrid which represents the only outstanding capital of the Company. On the closing date, the New York Stock Exchange (NYSE) filed with the Securities and Exchange Commission (the SEC) a notification of removal from listing on Form 25 in order to delist the common stock from the NYSE and deregister the common stock under Section 12(b) of the Securities Exchange Act of 1934, as amended (the Exchange Act). Following the effectiveness of the Form 25, on January 2, 2025, Avangrid filed with the SEC a Form 15 requesting the termination of registration of the common stock under Section 12(g) of the Exchange Act and the suspension of reporting obligations under Section 13 and 15(d) of the Exchange Act with respect to the common stock.

Variable Interest Entities: CNE Peaking LLC (CNE) and Total Peaking Services LLC (TPS), both wholly-owned subsidiaries of United Resources, Inc. (URI), which is a wholly-owned subsidiary of UIL Holdings, owned a 14.6 million gallon liquefied natural gas (LNG) storage tank operated by SCG and located on property owned by SCG in Milford, Connecticut, and certain equipment, materials and supplies used in or useful for the operation of the storage tank. The assets earned a rate of return equal to SCG's allowed rate of return. CNE and TPS had been identified as Variable Interest Entities (VIEs). SCG had been determined to be the primary beneficiary as SCG has the power to direct significant activities at CNE and TPS with SCG operating the storage tank and all of the revenues at CNE and TPS being derived from SCG. As a result, CNE and TPS had been consolidated into the financial statements of SCG, which include loss of $0.8 million and income of $3.8 million as of and for the years ended December 31, 2025 and 2024, respectively. Intercompany operating revenues and natural gas purchased expenses and intercompany

receivables and payables have been eliminated upon consolidation. The equity interests in CNE and TPS held by URI are reflected as a noncontrolling interest in the accompanying consolidated balance sheets and consolidated statement of changes in common stock equity as of and for the year ended December 31, 2024. On December 1, 2024, the sole member of CNE and TPS, authorized the sale of the LNG facility and gas inventory to SCG, which were accounted for by SCG at historical carrying value as transactions between entities under common control, and no gain or loss was recognized. As of June 30, 2025 CNE and TPS have been dissolved and the outstanding non-controlling interest of $43 million was settled against the notes receivable from affiliates as a non-cash transaction.

***Basis of presentation*:** The accompanying consolidated financial statements have been prepared in accordance with generally accepted accounting principles in the United States (U.S. GAAP) and are prepared on a consolidated basis, and therefore include the accounts of SCG and all SCG VIEs where SCG has identified that it is the primary beneficiary. All intercompany transactions and accounts have been eliminated in consolidation in all periods presented. The accounting records of SCG are also maintained in accordance with the uniform system of accounts prescribed by the Federal Energy Regulatory Commission (FERC).

Significant Accounting Policies: We consider the following policies to be the most significant in understanding the judgments that are involved in preparing our consolidated financial statements:

***Principles of consolidation*:** We consolidate the entities in which we have a controlling financial interest, after the elimination of intercompany transactions. We account for investments in common stock where we have the ability to exercise significant influence, but not control, using the equity method of accounting.

***Revenue recognition*:** We recognize revenues when we transfer control of promised goods or services to our customers in an amount that reflects the consideration we expect to be entitled to in exchange for those goods or services. Refer to Note 4 for further details.

***Regulatory accounting*:** We account for our regulated operations in accordance with the authoritative guidance applicable to entities with regulated operations that meet the following criteria: (i) rates are established or approved by an independent, third-party regulator; (ii) rates are designed to recover the entity's specific costs of providing the regulated services or products and; (iii) there is a reasonable expectation that rates are set at levels that will recover the entity's costs and can be collected from customers. Regulatory assets primarily represent incurred costs that have been deferred because of their probable future recovery from customers through regulated rates. Regulatory liabilities represent: (i) the excess recovery of costs or accrued credits that have been deferred because it is probable such amounts will be returned to customers through future regulated rates; or (ii) billings in advance of expenditures for approved regulatory programs.

We amortize regulatory assets and liabilities and recognize the related expense or revenue in our consolidated statements of income consistent with the recovery or refund included in customer rates. We believe it is probable that our currently recorded regulatory assets and liabilities will be recovered or settled in future rates.

Noncontrolling interest: The noncontrolling interest represents the portion of our net income (loss), comprehensive income (loss) and net assets that is not allocable to us and is calculated based on our ownership percentage.

***Goodwill*:** Goodwill represents future economic benefits arising from other assets acquired in a business combination that are not individually identified and separately recognized. Goodwill is

initially measured at cost, being the excess of the aggregate of the consideration transferred, the fair value of any noncontrolling interest and the acquisition date fair value of any previously held equity interest in the acquiree over the fair value of the net identifiable assets acquired and liabilities assumed.

Goodwill is not amortized, but is subject to an assessment for impairment performed in the fourth quarter or more frequently if events occur or circumstances change that would more likely than not reduce the fair value of the reporting unit to which goodwill is assigned below its carrying amount. A reporting unit is an operating segment or one level below an operating segment and is the level at which we test goodwill for impairment.

In assessing goodwill for impairment, we have the option to first perform a qualitative assessment to determine whether a quantitative assessment is necessary. If we determine, based on qualitative factors, that the fair value of the reporting unit is more likely than not greater than the carrying amount, no further testing is required. If we bypass the qualitative assessment, or perform the qualitative assessment but determine it is more likely than not that its fair value is less than its carrying amount, we perform a quantitative test to compare the fair value of the reporting unit to its carrying amount, including goodwill. If the carrying amount of the reporting unit exceeds its fair value, we record an impairment loss as a reduction to goodwill and a charge to operating expenses, but the loss recognized would not exceed the total amount of goodwill allocated to the reporting unit.

***Utility plant*:** We account for utility plant at historical cost. In cases where we are required to dismantle installations or to recondition the site on which they are located, we record the estimated cost of removal or reconditioning as an asset retirement obligation (ARO) and add an equal amount to the carrying amount of the asset.

Development and construction of our various facilities are carried out in stages. We expense project costs during early stage development activities. Once we achieve certain development milestones and it is probable that we can obtain future economic benefits from a project, we capitalize salaries and wages for persons directly involved in the project, and engineering, permits, licenses, wind measurement and insurance costs. We periodically review development projects in construction for any indications of impairment.

We transfer assets from “Construction work in progress” to “Utility plant” when they are available for service.

We determine depreciation expense for utility plant in service using the straight-line method, based on the average service lives of groups of depreciable property, which include estimated cost of removal. Consistent with FERC accounting requirements, we charge the original cost of utility plant retired or otherwise disposed of to accumulated depreciation. Our composite rates for depreciation were 2.7% of average depreciable property for 2025 and 2.8% of average depreciable property for 2024. We amortize our capitalized software cost using the straight line method, based on useful lives of 3 to 10 years. Depreciation expense was $41.1 million in 2025 and $42.1 million in 2024. Amortization of capitalized software was $3.6 million in 2025 and $4.0 million in 2024.

We charge repairs and minor replacements to operating expenses, and capitalize renewals and betterments, including certain indirect costs.

Allowance for funds used during construction (AFUDC) is a non-cash item that represents the allowed cost of capital, including a return on equity (ROE), used to finance construction projects.

We record the portion of AFUDC attributable to borrowed funds as a reduction of interest expense and record the remainder as other income. AFUDC rates are determined in accordance with applicable FERC guidelines for each regulated utility using an annual rate that is compounded semiannually.

Our balances of major classes of utility plant and associated useful lives are shown below as of December 31:

Utility Plant	Estimated useful life range (years)	2025	2024
(Thousands)			
Gas distribution plant	6-78	$ 1,447,725	$ 1,381,997
Software	3-10	67,303	61,535
Land	N/A	7,663	7,663
Building and improvements	40-50	43,311	43,314
Other plant	25-39	50,429	49,987
Total Utility Plant in Service		**1,616,431**	**1,544,496**
Total accumulated depreciation		(450,187)	(433,337)
Total Net Utility Plant in Service		**1,166,244**	**1,111,159**
Construction work in progress		25,930	28,015
Total Utility Plant		**$ 1,192,174**	**$ 1,139,174**

Leases: We determine if an arrangement is a lease at inception. We classify a lease as a finance lease if it meets any one of specified criteria that in essence transfers ownership of the underlying asset to us by the end of the lease term. If a lease does not meet any of those criteria, we classify it as an operating lease. On our consolidated balance sheets, we include, for operating leases: "Operating lease right-of-use (ROU) assets" and "Operating lease liabilities (current and non-current)"; and for finance leases: finance lease ROU assets in "Other assets" and liabilities in "Other current liabilities" and "Other liabilities."

ROU assets represent our right to use an underlying asset for the lease term and lease liabilities represent our obligation to make lease payments arising from the lease. We recognize lease ROU assets and liabilities at commencement of an arrangement based on the present value of lease payments over the lease term. We use the incremental borrowing rate based on information available at the lease commencement date to determine the present value of future payments, except when the rate implicit in the lease is determinable. A lease ROU asset also includes any lease payments made at or before commencement date, minus any lease incentives received, and includes initial direct costs incurred. We do not record leases with an initial term of 12 months or less on the consolidated balance sheet for all classes of underlying assets, and we recognize lease expense for those leases on a straight-line basis over the lease term. We include variable lease payments that depend on an index or a rate in the ROU asset and lease liability measurement based on the index or rate at the commencement date, or upon a modification. We do not include variable lease payments that do not depend on an index or a rate in the ROU asset and lease liability measurement. A lease term includes an option to extend or terminate the lease when it is reasonably certain that we will exercise that option. We recognize lease (rent) expense for operating lease payments on a straight-line basis over the lease term, or we recognize the amount eligible for recovery under our rate plan, such as actual amounts paid. We amortize finance lease ROU assets on a straight-line basis over the lease term and recognize interest expense based on the outstanding lease liability.

We have lease agreements with lease and non-lease components, and account for lease components and associated non-lease components together as a single lease component, for all classes of underlying assets.

Impairment of long-lived assets: We evaluate utility plant and other long-lived assets for impairment when events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment evaluation is based on an undiscounted cash flow analysis at the lowest level to which cash flows of the long-lived assets or asset groups are largely independent of the cash flows of other assets and liabilities. We are required to recognize an impairment loss if the carrying amount of the asset exceeds the undiscounted future net cash flows associated with that asset.

The impairment loss to be recognized is the amount by which the carrying amount of the long-lived asset exceeds the asset's fair value. Depending on the asset, fair value may be determined by use of a discounted cash flow model, with assumptions consistent with a market participant's view of the exit price of the asset.

***Fair value measurement*:** Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants as of the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place in either the principal market for the asset or liability, or, in the absence of a principal market, in the most advantageous market for the asset or liability.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset according to its highest and best use, or by selling it to another market participant that would use the asset according to its highest and best use.

We use valuation techniques that are appropriate in the circumstances and for which sufficient data is available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs. All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorized within the fair value hierarchy based on the transparency of input to the valuation of an asset or liability as of the measurement date.

The three input levels of the fair value hierarchy are as follows:

- Level 1 - inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.
- Level 2 - inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability either directly or indirectly, for substantially the full term of the contract.
- Level 3 - one or more inputs to the valuation methodology are unobservable or cannot be corroborated with market data.

Categorization within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. Certain investments are not categorized within the fair value hierarchy. These investments are measured based on the fair value of the underlying investments but may not be readily redeemable at that fair value.

***Cash and cash equivalents*:** Cash and cash equivalents include cash, bank accounts, and other highly liquid short-term investments. We consider all highly liquid investments with a maturity date of three months or less when acquired to be cash equivalents and include those investments in "Cash and cash equivalents." We classify book overdrafts representing outstanding checks in excess of funds on deposit as "Accounts payable and accrued liabilities" on our consolidated balance sheets. We report changes in book overdrafts in the operating activities section of the consolidated statements of cash flows.

Concentration of risk: We maintain our cash and cash equivalents in accounts with major financial institutions in the form of demand deposits and money market accounts. Deposits in these financial institutions may exceed the amount of federal deposit insurance provided on such deposits.

Consolidated statements of cash flows: Supplemental disclosure of cash flow information is as follows:

		2025		2024
(Thousands)				
Cash paid (refunded) during the years ended December 31:				
Interest, net of amounts capitalized	$	20,676	$	17,394
Income taxes paid (refunded), net	$	3,017	$	(371)

Of the income taxes paid (refunded), substantially all was paid to (refunded by) AGR under the tax sharing agreement. Interest capitalized was $1.2 million in 2025 and $0.9 million in 2024. Accrued liabilities for utility plant additions were $21.9 million and $18.4 million as of December 31, 2025 and 2024, respectively.

***Trade receivables and unbilled revenues, net of allowance for credit losses*:** We record trade receivables at amounts billed to customers and we record unbilled revenues based on an estimate of energy delivered or services provided to customers. The estimates for unbilled revenues are determined based on various assumptions, including current month energy load requirements, billing rates by customer class and delivery loss factors. Changes in those assumptions could significantly affect the estimated amounts of unbilled revenues.

The allowance for credit losses is our best estimate of the amount of probable credit losses in our existing trade receivables, determined based on experience. Each month we review our allowance for credit losses and past due accounts by age. When we believe that a receivable will not be recovered, we charge off the account balance against the allowance. Changes in assumptions about input factors and customer receivables, which are inherently uncertain and susceptible to change from period to period, could significantly affect the allowance for credit losses estimates.

Trade receivables at December 31 include unbilled revenues of $36.6 million for 2025 and $30.0 million for 2024, and are shown net of an allowance for credit losses at December 31 of $3.8 million for 2025 and $6.8 million for 2024. Trade receivable do not bear interest, although late fees may be assessed. Credit loss expense was $2.1 million in 2025 and $3.8 million in 2024.

We establish our allowance for credit losses, including for unbilled revenue (also referred to as contract assets), by using both historical average loss percentages to project future losses, and by establishing a specific allowance for known credit issues or for specific items not considered in the historical average calculation. We also consider whether we need to adjust historical loss

rates to reflect the effects of current conditions and forecasted changes considering various economic indicators (e.g., Gross Domestic Product, Personal Income, Consumer Price Index, Unemployment Rate) over the contractual life of the trade receivables. We write off amounts when we have exhausted reasonable collection efforts.

Debentures, bonds and bank borrowings: We record bonds, debentures and bank borrowings as a liability equal to the proceeds of the borrowings. We treat the difference between the proceeds and the face amount of the issued liability as discount or premium and accrete the amounts as interest expense or income over the life of the instrument. We defer incremental costs associated with the issuance of the debt instruments and amortize them over the same period as debt discount or premium. We present bonds, debentures and bank borrowings net of unamortized discount, premium and debt issuance costs on our consolidated balance sheets.

Gas in storage*:* We own natural gas that is stored in both self-owned and third-party owned underground storage facilities, which we record as inventory. We price injections of inventory into storage at the market purchase cost at the time of injection, and price withdrawals of working gas from storage at the weighted-average cost in storage. We continuously monitor the weighted-average cost of gas value to ensure it remains at the lower of cost and net realizable value. We report inventories to support gas operations on our consolidated balance sheets within “Gas in storage.”

Materials and supplies: Materials and supplies inventories are used for construction of new facilities and repairs of existing facilities. These inventories are carried and withdrawn at the lower of cost and net realizable value and reported on the consolidated balance sheets within “Materials and supplies.” We combine inventory items for the consolidated statement of cash flows presentation purposes.

Government grants: We record government grants as a reduction to the related utility plant to be recovered through rate base, in accordance with the prescribed FERC accounting.

In accounting for government grants related to operating and maintenance costs, we recognize amounts receivable as an offset to expenses in the consolidated statements of income in the period in which we incur the expenses.

There were no government grants recorded as of December 31, 2025 and 2024.

Deferred income: Apart from government grants, we occasionally receive payments from transactions in advance of the resulting performance obligations arising from the transaction. It is our policy to defer such payments on our consolidated balance sheets and amortize them into earnings when revenue recognition criteria are met.

Asset retirement obligations**:** We record the fair value of the liability for an asset retirement obligation (ARO) and a conditional ARO in the period in which it is incurred, capitalizing the cost by increasing the carrying amount of the related long-lived asset. The ARO is associated with our long-lived assets and primarily consists of obligations related to removal or retirement of: asbestos, polychlorinated biphenyl-contaminated equipment, gas pipeline and cast iron gas mains. We adjust the liability periodically to reflect revisions to either the timing or amount of the original estimated undiscounted cash flows over time. We accrete the liability to its present value each period and depreciate the capitalized cost over the useful life of the related asset. Upon settlement we will either settle the obligation at its recorded amount or incur a gain or a loss.

We defer any timing differences between rate recovery and depreciation expense and accretion as either a regulatory asset or a regulatory liability.

The term conditional ARO refers to an entity's legal obligation to perform an asset retirement activity in which the timing or method of settlement are conditional on a future event that may or may not be within the entity's control. If an entity has sufficient information to reasonably estimate the fair value of the liability for a conditional ARO, it must recognize that liability at the time the liability is incurred.

The following table reconciles the beginning and ending aggregate carrying amount of the ARO for the years ended December 31, 2025 and 2024.

Years Ended December 31,		2025		2024
(Thousands)				
ARO, beginning of year	$	13,020	$	12,907
Liabilities settled during the year		—		(549)
Accretion expense		—		662
ARO, end of year	**$**	**13,020**	**$**	**13,020**

We have AROs for which we have not recognized a liability because the fair value cannot be reasonably estimated due to indeterminate settlement dates, including: the removal of property upon termination of an easement, right-of-way or franchise; and costs for abandonment of certain types of gas mains.

***Accrued removal obligations*:** We meet the requirements concerning accounting for regulated operations and recognize a regulatory liability for the difference between removal costs collected in rates and actual costs incurred. We classify those amounts as accrued removal obligations.

***Environmental remediation liability*:** In recording our liabilities for environmental remediation costs the amount of liability for a site is the best estimate, when determinable; otherwise it is based on the minimum liability or the lower end of the range when there is a range of estimated losses. We record our environmental liabilities on an undiscounted basis.

Post-employment and other employee benefits: We sponsor defined benefit pension plans that cover the majority of our employees. We also provide health care and life insurance benefits through various postretirement plans for eligible retirees.

We evaluate our actuarial assumptions on an annual basis and consider changes based on market conditions and other factors. All of our qualified defined benefit plans are funded in amounts calculated by independent actuaries, based on actuarial assumptions proposed by management.

We account for defined benefit pension or other postretirement plans, recognizing an asset or liability for the overfunded or underfunded plan status. For a pension plan, the asset or liability is the difference between the fair value of the plan’s assets and the projected benefit obligation (PBO). For any other postretirement benefit plan, the asset or liability is the difference between the fair value of the plan’s assets and the accumulated postretirement benefit obligation. We generally reflect all unrecognized prior service costs and credits and unrecognized actuarial gains and losses as regulatory assets rather than in OCI, as management believes it is probable that such items will be recoverable through the ratemaking process. Certain non-qualified plan expenses are not recoverable through the ratemaking process and we present the unrecognized

prior service costs and credits and unrecognized actuarial gains and losses in accumulated other comprehensive loss. If a plan meets settlement or curtailment accounting criteria, we recognize a regulatory asset or liability if these costs are probable of recovery from ratepayers. We use a December 31st measurement date for our benefits plans.

We amortize prior service costs for both the pension and other postretirement benefits plans on a straight-line basis over the average remaining service period of employees active on the date of the amendment. Effective March 31, 2022, the amortization period for prior service cost changes for the SCG Salaried Plan was updated from average remaining service to future expected lifetime as the plan was frozen, or predominantly frozen, to future accruals. We amortize unrecognized actuarial gains and losses in excess of 10% of the greater of PBO or market-related value of assets (MRVA) related to the pension and other postretirement benefits plans on straight line basis over future working lifetime. Effective March 31, 2022, the amortization period for the SCG Salaried Plan was updated from future working lifetime to future expected lifetime as the plan was frozen, or predominantly frozen, to future accruals. Our policy is to calculate the expected return on plan assets using the market-related value of assets. We determine that value by recognizing the difference between actual returns and expected returns over a five-year period.

***Income taxes*:** In August 2022, the Inflation Reduction Act of 2022 ("IRA") was signed into law in the United States. The IRA created a new corporate alternative minimum tax (“CAMT”) of 15% on adjusted financial statement income and an excise tax of 1% on the value of certain stock repurchases. The CAMT and other various applicable provisions of the IRS are effective for the Company for periods beginning after December 31, 2022. The impact of CAMT will depend on our facts in each year, as well as on anticipated guidance from the U.S. Department of Treasury.

AGR, the parent company of Networks, files a consolidated federal income tax return and various state income tax returns, some of which are unitary as required or permitted, including all of the activities of its subsidiaries. Each subsidiary company is treated as a member of the consolidated group and determines its current and deferred taxes based on the separate return with benefits for loss method. As a member, SCG settles its current tax liability or benefit each year directly with AGR pursuant to a tax allocation agreement between AGR and its members.

The aggregate amount of the related party income tax payable to AGR is $0.6 million and $3.3 million at December 31, 2025 and 2024, respectively.

We use the asset and liability method of accounting for income taxes. Deferred tax assets and liabilities reflect the expected future tax consequences, based on enacted tax laws, of temporary differences between the tax basis of assets and liabilities and their financial reporting amounts. In accordance with U.S. GAAP for regulated industries, we have established regulatory assets and liabilities for the net revenue requirements to be recovered from or refunded to customers for the related future tax expense or benefit associated with certain of these temporary differences. We defer investment tax credits when earned and amortize them over the estimated lives of the related assets. We also recognize the income tax consequences of intra-entity transfers of assets other than inventory when the transfer occurs. We had no intra-entity transfers of assets other than inventory during the years ended December 31, 2025 and 2024.

Deferred tax assets and liabilities are measured at the expected tax rate for the period in which the asset or liability will be realized or settled, based on legislation enacted as of the consolidated balance sheet date. We charge or credit changes in deferred income tax assets and liabilities that are associated with components of OCI directly to OCI. Significant judgment is required in determining income tax provisions and evaluating tax positions. Our tax positions are evaluated under a more-likely-than-not recognition threshold before they are recognized for financial

reporting purposes. We record valuation allowances to reduce deferred tax assets when it is more likely than not that we will not realize all or a portion of a tax benefit. We consider the effect of the alternative minimum tax system in determining the need for a valuation allowance for deferred taxes. Deferred tax assets and liabilities are netted and classified as non-current on our consolidated balance sheets.

We record the excess of state franchise tax computed as the higher of a tax based on income or a tax based on capital in “Taxes other than income taxes” and “Taxes accrued” in our consolidated financial statements.

Positions taken or expected to be taken on tax returns, including the decision to exclude certain income or transactions from a return, are recognized in the consolidated financial statements when it is more likely than not the tax position can be sustained based solely on the technical merits of the position. The amount of a tax return position that is not recognized in the consolidated financial statements is disclosed as an unrecognized tax benefit. Changes in assumptions on tax benefits may also impact interest expense or interest income and may result in the recognition of tax penalties. Interest and penalties related to unrecognized tax benefits are recorded within “Interest expense, net of capitalization” and “Other Income” and “Other Deductions” in our consolidated statements of income.

Uncertain tax positions have been classified as non-current unless expected to be paid within one year. Our policy is to recognize interest and penalties on uncertain tax positions as a component of interest expense in the consolidated statements of income.

Our income tax expense, deferred tax assets and liabilities, and liabilities for unrecognized tax benefits reflect management’s best assessment of estimated current and future taxes to be paid. Significant judgments and estimates are required in determining the consolidated income tax components of the consolidated financial statements.

Adoption of New Accounting Pronouncements

Although we are not a public business entity, we adopt new accounting standards based on public business entity guidance aside from the effective dates in certain situations where we may follow the effective dates for private entities.

There have been no new accounting pronouncements adopted as of and for the year ended December 31, 2025 that are expected to have a material impact on SCG’s consolidated financial statements.

Accounting Pronouncements Issued But Not Yet Adopted

The following are new accounting pronouncements not yet adopted that we have evaluated or are evaluating to determine their effect on SCG's consolidated financial statements.

(a) Simplified credit loss guidance

In July 2025, FASB issued guidance to simplify applying ASC 326, Financial instruments – Credit losses, to current accounts receivable and contract assets arising from transactions accounted for under ASC 606, Revenue from contracts with customers, including those assets acquired in a business combination or recognized through the consolidation of a variable interest entity that is not a business if those assets arose from transactions that the acquiree or variable interest entity

accounted for under ASC 606. The update introduces (1) a practical expedient allowing entities to assume current conditions remain unchanged over the remaining life of these assets, and (2) an accounting policy election for non-public entities, permitting consideration of post–balance sheet cash collections when estimating expected credit losses, provided the practical expedient is also elected. The amendment is effective for all entities in interim and annual periods for fiscal years beginning after December 15, 2025. We do not expect the new guidance to have a material impact on our consolidated results of operations, financial position and cash flows.

(b) Accounting for internal-use software costs

In September 2025 FASB issued guidance to modernize internal-use software guidance to eliminate the old stage-based capitalization model and to introduce a probable-to-complete threshold, requiring management authorization, funding commitment, and a probable expectation of completion before capitalization begins. It provides enhanced guidance and examples for applying this threshold, including factors for assessing significant development uncertainty such as novel features or ongoing revisions to performance requirements. Existing rules for external-use software, types of costs eligible for capitalization, and the point at which capitalization ceases remain unchanged. The amendment is effective for all entities in interim and annual periods for fiscal years beginning after December 15, 2027. We do not expect the new guidance to have a material impact on our consolidated results of operations, financial position and cash flows.

(c) Accounting for government grants

In December 2025, FASB issued amendments to provide comprehensive guidance on recognizing, measuring, and presenting government grants under ASC 832, Accounting for government grants by business entities, which previously only addressed disclosures. The amendment responds to the lack of explicit U.S. GAAP guidance that led to diverse practices and reliance on other GAAP or International Financial Reporting Standards (IFRS) by analogy. It classifies grants into asset-related and income-related categories, offering two approaches for asset-related grants: the cost accumulation approach (reducing the asset's carrying amount) and the deferred income approach (recognizing income systematically over the asset's useful life). Income-related grants, such as operating expense reimbursements, are recognized over the period the related costs occur, while grants for past costs or immediate support are recognized when the probable threshold is met. The amendment also includes guidance for business combinations, specifying when deferred income should or should not be recognized by the acquirer. The amendment is effective for public entities in fiscal years beginning after December 15, 2028, and for others after December 15, 2029, with transition options including modified prospective, modified retrospective, or full retrospective approaches. We do not expect the new guidance to have a material impact on our consolidated results of operations, financial position and cash flows.

Use of estimates and assumptions: The preparation of our consolidated financial statements in conformity with U.S. GAAP requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the consolidated financial statements, and the reported amounts of revenues and expenses during the reporting periods. Significant estimates and assumptions are used for, but not limited to: (1) allowance for credit losses and unbilled revenues; (2) asset impairments; (3) investments in equity instruments; (4) depreciable lives of assets; (5) income tax valuation allowances; (6) uncertain tax positions; (7) reserves for professional, workers' compensation, and comprehensive general insurance liability risks; (8) contingency and litigation reserves; (9) earnings sharing mechanism (ESM); (10) environmental remediation liabilities; (11) pension and other postretirement employee benefits (OPEB); (12) fair value measurements; (13) AROs,

and (14) noncontrolling interest balances. Future events and their effects cannot be predicted with certainty; accordingly, our accounting estimates require the exercise of judgment. The accounting estimates used in the preparation of our consolidated financial statements will change as new events occur, as more experience is acquired, as additional information is obtained, and as our operating environment changes. We evaluate and update our assumptions and estimates on an ongoing basis and may employ outside specialists to assist in our evaluations, as considered necessary. Actual results could differ from those estimates.

Union collective bargaining agreements: Approximately 69% of our employees are covered by collective bargaining agreements.We have 100% of the collective bargaining agreements expiring during 2026.

Note 2. Industry Regulation

Rates

Utilities are entitled by Connecticut statute to charge rates that are sufficient to allow them an opportunity to cover their reasonable operating and capital costs, to attract needed capital and to maintain their financial integrity, while also protecting relevant public interests.

Additionally, SCG has a purchased gas adjustment clause, approved by PURA, which enables reasonably incurred cost of gas purchases to be passed through to customers. This clause allows utilities to recover costs associated with changes in the market price of purchased natural gas, substantially eliminating exposure to natural gas price risk.

On November 3, 2023, SCG filed a distribution revenue requirement case proposing a one-year rate plan commencing November 1, 2024 through October 31, 2025. The filing was based on a test year ending December 31, 2022. SCG requested approval of new distribution rates to recover an increase in revenue requirements of approximately $40.6 million. SCG's Rate Plan also included several measures to moderate the impact of the proposed rate update for all customers, including, the adoption of a low-income discount rate and seeks to maintain its current revenue decoupling and earning sharing mechanisms.

On November 19, 2024, PURA released a final Decision, which decreased SCG's rates by $10.7 million. The Decision approved an allowed ROE of 9.15% and an equity ratio of 53%. The Decision maintained SCG's distribution management program, but instituted a cap of $57.7 million. The Decision also established a a low-income discount rate along with revenue decoupling and earning sharing mechanisms. On December 19, 2024, SCG filed an appeal of the Decision in the Connecticut Superior Court. On November 19, 2025, the Connecticut Superior Court for the Judicial District of New Britain remanded the final Decisions to PURA for entirely new rate proceedings and ordered PURA to consider the underlying rate applications anew, as if newly filed. PURA has opened two new dockets in response to the remand, Dockets 25-11-13 and 25-11-14, and PURA has started a process to respond to the remand order. We cannot predict the outcome of this matter.

Gas Supply Arrangements

SCG satisfies its natural gas supply requirements through purchases from various producer/ suppliers, withdrawals from natural gas storage capacity contracts and winter peaking supplies and resources. SCG operates diverse portfolios of gas supply, firm transportation capacity, gas storage and peaking resources. Actual reasonable gas costs incurred by SCG are passed through

to customers through state regulated purchased gas adjustment mechanisms subject to regulatory review.

SCG purchases the majority of their natural gas supply at market prices under seasonal, monthly or mid-term supply contracts and the remainder is acquired on the spot market. SCG diversifies its sources of supply by amount purchased and location. SCG primarily acquires gas at various locations in the US Gulf of Mexico region, in the Appalachia region and in Canada.

SCG acquires firm transportation capacity on interstate pipelines under long-term contracts and utilizes that capacity to transport both natural gas supply purchased and natural gas withdrawn from storage to the local distribution system. Tennessee Gas Pipeline, Algonquin Gas Transmission and Iroquois Gas Transmission interconnect with SCG's distribution system and the other pipelines provide indirect services upstream of the city gates. The prices and terms and conditions of the firm transportation capacity long-term contracts for firm transportation capacity are regulated by the FERC. The actual reasonable cost of such contracts is passed through to customers through state regulated purchased gas adjustment mechanisms.

SCG acquires firm underground natural gas storage capacity using long-term contracts and fills the storage facilities with gas in the summer for subsequent withdrawal in the winter months. The storage facilities are located in Pennsylvania, New York, West Virginia and Ontario, Canada.

SCG owns 100% of the Liquefied Natural Gas (LNG) stored in an LNG facility which is directly attached to its distribution system. SCG uses the LNG capacity as a winter peaking resource.

Minimum Equity Requirements for Regulated Subsidiaries

Pursuant to an agreement with PURA, SCG is restricted from paying dividends if paying such dividend would result in a common equity ratio lower than 300 basis points below the equity percentage used to set rates in the most recent distribution rate proceeding as measured using a trailing 13-month average calculated as of the most recent quarter end. In addition, SCG is prohibited from paying dividends to their parent if the utility's credit rating, as rated by any of the three major credit rating agencies, falls below investment grade, or if the utility's credit rating, as determined by two of the three major credit rating agencies, falls to the lowest investment grade and there is a negative watch or review downgrade notice.

Note 3. Regulatory Assets and Liabilities

Pursuant to the requirements concerning accounting for regulated operations we capitalize, as regulatory assets, incurred and accrued costs that are probable of recovery in future natural gas rates. We base our assessment of whether recovery is probable on the existence of regulatory orders that allow for recovery of certain costs over a specific period, or allow for reconciliation or deferral of certain costs. When costs are not treated in a specific order we use regulatory precedent to determine if recovery is probable.

We also record, as regulatory liabilities, obligations to refund previously collected revenue or to spend revenue collected from customers on future costs. Of the total regulatory assets net of regulatory liabilities, approximately $124.4 million represents the offset of accrued liabilities for which funds have not been expended. The remainder is either included in rate base or accruing carrying costs.

Details of other regulatory assets and other regulatory liabilities are shown in the tables below. They result from various regulatory orders that allow for the deferral and/or reconciliation of

specific costs. Regulatory assets and regulatory liabilities are classified as current when recovery or refund in the coming year is allowed or required through a specific order or when the rates related to a specific regulatory asset or regulatory liability are subject to automatic annual adjustment.

Regulatory assets at December 31, 2025 and 2024 consisted of:

December 31,	2025	2024
(Thousands)		
Asset retirement obligation	$ 4,224	$ 4,224
Debt premium	1,765	2,332
Deferred purchased gas	6,431	7,924
Distribution integrity management program	21,556	28,068
Environmental remediation costs	68,839	69,710
Pension and other postretirement benefits	48,877	53,016
Revenue decoupling mechanism	11,496	14,954
System expansion	2,865	11,197
Unfunded future income taxes	22,552	25,728
Other	17,229	7,877
Total regulatory assets	**205,834**	**225,030**
Less: current portion	45,080	64,898
Total non-current regulatory assets	**$ 160,754**	**$ 160,132**

Asset retirement obligations represent the differences in timing of the recognition of costs associated with our AROs and the collection of such amounts through rates. This amount is being amortized at the related depreciation and accretion amounts of the underlying liability.

Debt premium represents the regulatory asset recorded to offset the fair value adjustment to the regulatory component of the non-current debt of UIL at the acquisition date. This amount is being amortized to interest expense over the remaining term of the outstanding debt instruments.

Deferred purchased gas costs represents the difference between actual gas costs and gas costs collected in rates. Balances at the end of the rate year are normally recorded/returned in the next year.

Distribution integrity management program (DIMP) represents deferred expenses related to pipeline replacement for cast iron and bare steel mains and services. Balances at the end of each rate year are normally received/returned in the next year.

Environmental remediation costs include spending that has occurred and is eligible for future return/recovery in customer rates. Environmental costs are currently recovered through a reserve mechanism whereby projected spending is included in rates with any variance recorded as a regulatory asset or a regulatory liability. A portion of this balance is amortized through current rates, the remaining portion will be refunded in future periods through future rate cases. It also includes the anticipated future rate recovery of costs that are recorded as environmental liabilities since these will be recovered when incurred. Because no funds have yet been expended for the regulatory asset related to future spending, it does not accrue carrying costs and is not included within rate base.

Pension and other postretirement benefits represent the actuarial losses on the pension and other postretirement plans that will be reflected in customer rates when they are amortized and recognized in future pension expenses. Because no funds have yet been expended for this regulatory asset, it does not accrue carrying costs and is not included within the rate base.

Revenue decoupling mechanism represents the mechanism established to disassociate the utility's profits from its delivery/commodity sales.

System expansion represents expenses not covered by system expansion rates related to expanding the natural gas system and converting customers to natural gas.

Unfunded future income taxes represent unrecovered federal and state income taxes primarily resulting from regulatory flow through accounting treatment. The income tax benefits or charges for certain plant related timing differences, such as removal costs, are immediately flowed through to, or collected from, customers. This amount is being amortized as the amounts related to temporary differences that give rise to the deferrals are recovered in rates.

Other includes items such as low income programs and COVID-19 deferrals.

Regulatory liabilities at December 31, 2025 and 2024 consisted of:

December 31,	2025	2024
(Thousands)		
Asset removal obligation	$ 120,757	$ 123,753
Non-firm margin sharing credits	11,517	16,930
Pension and other postretirement benefits	5,526	5,438
Rate credits	1,500	2,250
Tax reform	65,225	89,030
Unfunded future income taxes	5,471	8,312
Other	5,410	5,136
Total regulatory liabilities	**215,406**	**250,849**
Less: current portion	38,524	37,636
Total non-current regulatory liabilities	**$ 176,882**	**$ 213,213**

Asset removal obligations represent the differences between asset removal costs recorded and amounts collected in rates for those costs. The amortization period is dependent upon the asset removal costs of underlying assets and the life of the utility plant.

Non-firm margin sharing credits represents the portion of interruptible and off-system sales revenue set aside to fund gas expansion projects. This balance is amortized through current rates.

Pension and other postretirement benefits represent the actuarial gains on pension and other postretirement plans that will be reflected in customer rates when they are amortized and recognized in future expenses. Because no funds have yet been received for this, a regulatory liability is not reflected within rate base. They also represent the difference between actual expense for pension and other postretirement benefits and the amount provided for in rates.

Rate credits resulted from the acquisition of UIL by Iberdrola. This is being used to moderate increases in rates.

Tax reform represents the impact from remeasurement of deferred income tax balances as a result of the Tax Act enacted by the U.S. federal government on December 22, 2017. Reductions in accumulated deferred income tax balances due to the reduction in the corporate income tax rates from 35% to 21% under the provisions of the Tax Act will result in amounts previously collected from utility customers for these deferred taxes to be refundable to such customers, generally through reductions in future rates. A portion of this balance is amortized through current rates; the remaining portion will be refunded in future periods through future rate cases.

Other includes items such as Geographical information system (GIS) data conversion and energy efficiency programs.

Note 4. Revenue

We recognize revenue when we have satisfied our obligations under the terms of a contract with a customer, which generally occurs when the control of promised goods or services transfers to the customer. We measure revenue as the amount of consideration we expect to receive in exchange for providing those goods or services. Contracts with customers may include multiple performance obligations. For such contracts, we allocate revenue to each performance obligation based on its relative standalone selling price. We generally determine standalone selling prices based on the prices charged to customers. Certain revenues are not within the scope of ASC 606, such as revenues from leasing, derivatives, other revenues that are not from contracts with customers and other contractual rights or obligations, and we account for such revenues in accordance with the applicable accounting standards. We exclude from revenue amounts collected on behalf of third parties, including any such taxes collected from customers and remitted to governmental authorities. We do not have any material significant payment terms because we receive payment at or shortly after the point of sale.

The following describes the principal activities from which we generate revenue.

SCG derives its revenue primarily from tariff-based sales of natural gas service to customers in Connecticut with no defined contractual term. For such revenues, we recognize revenues in an amount derived from the commodities delivered to customers. Another major source of revenue is wholesale sales of natural gas.

Tariff-based sales are subject to PURA approval, which determine prices and other terms of service through the ratemaking process. Certain customers have the option to obtain the natural gas commodity directly from the utility or from another supplier. For customers that receive their commodity from another supplier, the utility acts as an agent and delivers the natural gas provided by that supplier. Revenue in those cases is only for providing the service of delivery of the commodity.

Wholesale sales of natural gas are generally short-term based on market prices through contracts with the specific customer.

The performance obligation in all arrangements is satisfied over time because the customer simultaneously receives and consumes the benefits as SCG delivers or sells the natural gas.

SCG records revenue from Alternative Revenue Programs (ARPs), which is not ASC 606 revenue. This program, a revenue decoupling mechanism (RDM), represent a contract between the utilities and their regulators.

SCG also has various other sources of revenue including billing, collection, other administrative charges, sundry billings, rent of utility property, and miscellaneous revenue. It classifies such revenues as other ASC 606 revenues to the extent they are not related to revenue generating activities from leasing, ARPs, or other activities.

Revenues disaggregated by major source for the years ended December 31, 2025 and 2024 are as follows:

Years Ended December 31,	2025	2024
(Thousands)		
Regulated operations – natural gas	$ 470,705	$ 400,156
Other(a)	2,080	2,031
Revenue from contracts with customers	**472,785**	**402,187**
Alternative revenue programs	15,911	12,018
Other revenue	3,737	2,117
Total operating revenues	**$ 492,433**	**$ 416,322**

(a) Primarily includes certain intra-month trading activities, billing, collection, and administrative charges, sundry billings, and other miscellaneous revenue.

Note 5. Goodwill

We do not amortize goodwill, but perform our annual impairment assessment testing at least annually as described in Note 1, in the fourth quarter, as of October 1. Our qualitative assessment involves evaluating key events and circumstances that could affect the fair value of our company, as well as other factors. Events and circumstances evaluated include macroeconomic conditions, industry, regulatory and market considerations, cost factors and their effect on earnings and cash flows, overall financial performance as compared with projected results and actual results of relevant prior periods, other relevant entity-specific events, and events affecting SCG.

Our quantitative impairment testing includes various assumptions, primarily the discount rate, and forecasted cash flows. We use a discount rate that is developed using market participant assumptions, which consider the risk and nature of our cash flows and the rates of return market participants would require in order to invest their capital in SCG. We test the reasonableness of the conclusions of our quantitative impairment testing using a range of discount rates and a range of assumptions for long-term cash flows.

We had no impairment of goodwill in 2025 and 2024 as a result of our qualitative impairment testing. There were no events or circumstances subsequent to our annual impairment assessment for 2025 or 2024 that required us to update the assessment.

The carrying amount of goodwill was $134.9 million at both December 31, 2025 and 2024, with no accumulated impairment losses and no changes during 2025 and 2024.

Note 6. Income Taxes

Current and deferred taxes charged to expense (benefit) for the years ended December 31, 2025 and 2024 consisted of:

Years Ended December 31,		2025		2024
(Thousands)				
Current				
Federal	$	1,384	$	(3,861)
State		(1,261)		(1,078)
Current taxes charged to expense (benefit)		**123**		**(4,939)**
Deferred				
Federal		10,524		10,664
State		2,715		445
Deferred taxes charged to expense		**13,239**		**11,109**
Total Income Tax Expense	**$**	**13,362**	**$**	**6,170**

The differences between tax expense per the consolidated statements of income and tax expense at the 21% statutory federal tax rate for the years ended December 31, 2025 and 2024, respectively, consisted of:

Years Ended December 31,		2025		2024
(Thousands)				
Tax expense at statutory rate	$	10,549	$	7,483
State tax expense, net of federal income tax benefit		1,149		(500)
Variable interest entity		217		(1,033)
Other, net		1,447		220
Total Income Tax Expense	**$**	**13,362**	**$**	**6,170**

Income tax expense for the year ended December 31, 2025 was $2.8 million higher than it would have been at the statutory federal income tax rate of 21% due predominately to state income taxes and variable interest entity adjustments. This resulted in an effective tax rate of 26.6%. Income tax expense for the year ended December 31, 2024 was $1.3 million lower than it would have been at the statutory federal income tax rate of 21% due predominately to state income taxes and variable interest entity adjustments. This resulted in an effective tax rate of 17.3%.

Deferred tax assets and liabilities as of December 31, 2025 and 2024 consisted of:

December 31, (Thousands)	2025	2024
Non-current Deferred Income Tax Liabilities (Assets)		
Property related	$ 142,181	$ 152,513
Unfunded future income taxes	4,607	4,610
Valuation allowance - state credits	14,293	15,440
Federal and state tax credits	(16,403)	(15,651)
Goodwill	27,151	25,361
2017 Tax Act remeasurement	(17,562)	(23,971)
Federal and state NOL's	(37,007)	(51,121)
Post-retirement benefits, net	4,067	3,178
Other	13,099	13,529
Total Non-current Deferred Income Tax Liabilities	**$ 134,426**	**$ 123,888**
Deferred tax assets	$ 70,972	$ 90,743
Deferred tax liabilities	205,398	214,631
Net Accumulated Deferred Income Tax Liabilities	**$ 134,426**	**$ 123,888**

SCG has federal net operating losses of $25.5 million, net state net operating losses of $11.5 million and net state credit carryforward of $16.4 million for the year ended December 31, 2025. SCG had federal net operating losses of $36.0 million, net state net operating losses of $15.0 million and net state credit carryforward of $15.7 million for the year ended December 31, 2024.

Valuation allowances are recorded to reduce deferred tax assets when it is more likely than not that all or a portion of a tax benefit will not be realized. As of December 31, 2025, SCG had recorded a valuation allowance on its state tax credit carryforwards of $14.3 million. The company has also recorded a regulatory asset of $21.7 million to recover the associated tax expense of the valuation allowance against the state credits, whose tax benefits were previously shared with customers. Additionally, SCG recorded a regulatory liability of $0.4 million related to the net tax benefit of the 2025 deferred state credits. As of December 31, 2024, SCG had recorded a valuation allowance on its state credit carryforwards of $15.4 million. The company has also recorded a regulatory asset of $24.5 million to recover the associated tax expense of the valuation allowance against the state credits, whose tax benefits were previously shared with customers.

Uncertain tax positions are classified as non-current unless expected to be paid within one year. Our policy is to recognize interest and penalties on uncertain tax positions as a component of interest expense in the consolidated statements of income. As of December 31, 2025 and 2024, SCG did not have any gross income tax reserves for uncertain tax positions.

There were no additional accruals for interest and penalties on tax reserves as of December 31, 2025 and 2024.

Note 7. Long-term Debt

Long-term debt as of December 31, 2025 and 2024 consisted of:

As of December 31,		2025		2024	
(Thousands, except interest rates)	Maturity Dates	Balances	Interest Rates	Balances	Interest Rates
First mortgage bonds (a)	2026-2049	$ 459,000	1.87% - 7.95%	$ 394,000	1.87% - 7.95%
Unamortized debt issuance premium, net		108		380	
Total Debt		**459,108**		**394,380**	
Less: debt due within one year, included in current liabilities		15,046		25,196	
Total Non-current Debt		**$ 444,062**		**$ 369,184**	

(a) The first mortgages bonds are secured by a first mortgage lien on substantially all of SCG's properties.

On July 31, 2025, SCG issued $90 million of first mortgage private bonds maturing in 2036 at an interest rate of 5.52%.

On August 15, 2024, SCG issued $30 million of first mortgage private bonds maturing in 2039 at an interest rate of 5.62%.

Long-term debt, including sinking fund obligations, due over the next five years consist of:

2026	2027	2028	2029	2030	Total
(Thousands)					
$ 15,046	$ —	$ 14,000	$ —	$ 50,000	$ 79,046

Under various long-term debt agreements, SCG is required to maintain a ratio of indebtedness to capital not to exceed 200% and to limit aggregate dividends paid pursuant specific indenture requirements. As of December 31, 2025 and 2024, SCG was in compliance with long-term debt covenants.

Note 8. Bank Loans and Other Borrowings

SCG had no notes payable balances as of December 31, 2025 and $67.6 million notes payable as of December 31, 2024, respectively. SCG funds short-term liquidity needs through an agreement among Avangrid's regulated utility subsidiaries (the Virtual Money Pool Agreement), a bi-lateral intercompany credit agreement with Avangrid (the Bi-Lateral Intercompany Facility) and a bank provided credit facility to which SCG is a party (the AGR Credit Facility), each of which are described below.

The Virtual Money Pool Agreement is an agreement among the investment grade-rated, regulated utility subsidiaries of Avangrid under which the parties to this agreement may lend to or borrow from each other. This Agreement allows Avangrid to optimize cash resources within the regulated utility companies which are prohibited by regulation from lending to unregulated affiliates. The interest rate on transactions under this agreement is the A2/P2 non-financial 30-day commercial paper rate published by the Federal Reserve. SCG has a lending/borrowing limit of $100 million under this agreement. SCG had no debt outstanding under this agreement at December 31, 2025 and $53.7 million outstanding under this agreement as of December 31, 2024.

The Bi-Lateral Intercompany Facility provides for borrowing of up to $250 million from Avangrid at the A2/P2 non-financial 30-day commercial paper rate published by the Federal Reserve. SCG had no debt outstanding under this agreement at December 31, 2025 and $13.9 million outstanding under this agreement at December 31, 2024.

On December 22, 2025, the utilities (New York State Electric and Gas Corporation (“NYSEG”), Rochester Gas and Electric Corporation (“RG&E”), Central Maine Power Company (“CMP”), The United Illuminating Company (“UI”), Connecticut Natural Gas Corporation (“CNG”), The Southern Connecticut Gas Company (“SCG”) and The Berkshire Gas Company (“BGC”)) executed a new credit facility with an aggregate limit of $1,500 million and a termination date of December 23, 2030. Under the terms of the revolving credit facility, each borrower has a maximum borrowing entitlement, or sublimit, which can be periodically adjusted to address specific short-term capital funding needs, subject to the maximum limit contained in the agreement. NYSEG has a maximum sublimit of $1,000 million, RG&E has $500 million, CMP has $375 million, UI has a maximum sublimit of $150 million, SCG has a maximum sublimit of $75 million, and CNG and BCG have maximum sublimits of $50 million. The new facility has set minimum sublimits of $600 million for NYSEG, $250 million for RG&E, $150 million for CMP, $25 million for UI, CNG, SCG, and BGC. The facility fees range from 5 to 25 basis points. SCG had no outstanding balance as of December 31, 2025 and 2024.

In the AGR Credit Facility we covenant not to permit, without the consent of the lenders, our ratio of total indebtedness to total capitalization to exceed 0.65 to 1.00 at any time. For purposes of calculating the maximum ratio of indebtedness to total capitalization, the facility excludes from net worth the balance of accumulated other comprehensive loss as it appears on the consolidated balance sheet. The facility contains various other covenants, including a restriction on the amount of secured indebtedness we may maintain. Continued un-remedied failure to comply with those covenants beyond any applicable cure period, constitutes an event of default, and events of default could result in termination or reduction of lenders’ commitments or acceleration of amounts owed under the facility. Our ratio of indebtedness to total capitalization pursuant to the revolving credit facility was 0.41 to 1.00 at December 31, 2025. We are not in default as of December 31, 2025.

Note 9. Preferred Stock

At December 31, 2025, SCG had 200,000 shares of $100 par value preferred stock and 1,600,000 shares of $2 par value preferred stock authorized but unissued.

Note 10. Leases

We have operating leases for office buildings, facilities, vehicles and certain equipment. As of December 31, 2025 and 2024, we had no finance leases. Certain of our lease agreements include rental payments adjusted periodically for inflation or are based on other periodic input measures. Our leases do not contain any material residual value guarantees or material restrictive covenants. Our leases have remaining lease terms of 1 to 48 years, some of which may include options to extend the leases for up to 20 years, and some of which may include options to terminate the leases within one year. We consider extension or termination options in the lease term if it is reasonably certain we will exercise the option.

The components of lease cost and other information related to leases were as follows:

Years Ended December 31,		2025		2024
(Thousands)				
Lease cost				
Operating lease cost	$	1,270	$	1,195
Short-term lease cost		72		38
Variable lease cost		975		795
Total lease cost	**$**	**2,317**	**$**	**2,028**

Consolidated balance sheet and other information for the years ended December 31, 2025 and 2024 was as follows:

As of December 31,		2025		2024
(Thousands, except lease term and discount rate)				
Operating Leases				
Operating lease right of use assets	$	9,435	$	10,440
Operating lease liabilities, current		1,055		990
Operating lease liabilities, long-term		9,778		10,664
Total operating lease liabilities	$	10,833	$	11,654
Weighted-average Remaining Lease Term (years):				
Operating leases		7.58		8.46
Weighted-average Discount Rate:				
Operating leases		4.73 %		4.45 %

Supplemental consolidated cash flows information related to leases was as follows:

Years Ended December 31,		2025		2024
(Thousands)				
Cash paid for amounts included in the measurement of lease liabilities:				
Operating cash flows from operating leases	$	1,426	$	1,377
Right-of-use assets obtained in exchange for lease obligations:				
Operating leases	$	45	$	352

Maturities of lease liabilities were as follows:

(Thousands)	Operating
Years Ended December 31,	
2026	$ 1,451
2027	2,076
2028	1,449
2029	1,493
2030	1,538
Thereafter	4,908
Total lease payments	**12,915**
Less: imputed interest	(2,082)
Total	**$ 10,833**

Most of our leases do not provide an implicit rate in the lease, thus we use our incremental borrowing rate based on the information available at the commencement date in determining the present value of lease payments.

Note 11. Environmental Liability

In complying with existing environmental statutes and regulations and further developments in areas of environmental concern, including legislation and studies in the fields of water quality, hazardous waste handling and disposal, toxic substances, climate change and electric and magnetic fields, we may incur substantial capital expenditures for equipment modifications and additions, monitoring equipment and recording devices, as well as additional operating expenses. The total amount of these expenditures is not now determinable. Significant environmental issues known to SCG at this time are described below.

Site Decontamination, Demolition and Remediation Costs

SCG owns or has previously owned properties where Manufactured Gas Plants (MGPs) had historically operated. MGP operations have led to contamination of soil and groundwater which require investigation and/or remediation in accordance with state and/or federal environmental regulations (i.e. CT Department of Energy and Environmental Protection's Federal Resource Conservation and Recovery Act). SCG has or had an ownership interest in one or more such properties contaminated as a result of MGP-related activities. Under the existing regulations, the cleanup of such sites requires state and at times, federal regulators' involvement and approval before cleanup can commence. In certain cases, such contamination has been evaluated, characterized and remediated. In other cases, the sites have been evaluated and characterized, but not yet remediated. Finally, at some of these sites, the scope of the contamination has not yet been fully characterized; no liability was recorded in respect of these sites as of December 31, 2025 and no amount of loss, if any, can be reasonably estimated at this time. In the past, SCG has received approval for the recovery of MGP-related remediation expenses from customers through rates and will seek recovery in rates for ongoing MGP-related remediation expenses for all of their MGP sites.

SCG owns properties on Housatonic Avenue and Pine Street in Bridgeport, and on Chapel Street in New Haven, which are former MGP sites. Costs associated with the remediation of the sites could be significant and will be subject to a review by PURA as to whether these costs are

recoverable in rates. As of December 31, 2025 and 2024, SCG reserved $51.2 million and $51.8 million, respectively, related to the property located in New Haven which was offset by a regulatory asset. Additionally, as of December 31, 2025 and 2024, SCG reserved $11.0 million and $11.5 million, respectively, related to the property located on Pine Street in Bridgeport. As of December 31, 2025 and 2024, SCG has determined that remediation of the property on Housatonic Avenue in Bridgeport is not estimable at this time and therefore not reserved.

Our environmental liability accruals are recorded on an undiscounted basis and are expected to be paid through the year 2050.

Note 12. Fair Value of Financial Instruments and Fair Value Measurements

The estimated fair value of debt amounted to $458 million and $376 million as of December 31, 2025 and 2024, respectively. The estimated fair value was determined, in most cases, by discounting the future cash flows at market interest rates. The interest rate curve used to make these calculations takes into account the risks associated with the natural gas industry and the credit ratings of the borrowers in each case. The fair value hierarchy for the fair value of debt is considered as Level 2.

Assets and liabilities measured at fair value on a recurring basis

The financial instruments measured at fair value as of December 31, 2025 and 2024 consisted of:

Description	(Level 1)	(Level 2)	(Level 3)	Total
(Thousands)				
As of December 31, 2025				
Assets				
Non-current investments	$ 12,364	$ —	$ —	$ 12,364
Total	**$ 12,364**	**$ —**	**$ —**	**$ 12,364**
As of December 31, 2024				
Assets				
Non-current investments	$ 11,360	$ —	$ —	$ 11,360
Total	**$ 11,360**	**$ —**	**$ —**	**$ 11,360**

We had no transfers to or from Level 1 and 2 during the years ended December 31, 2025 and 2024. Our policy is to recognize transfers in and transfers out as of the actual date of the event or change in circumstances that causes a transfer, if any.

Valuation techniques: We measure the fair value of our non-current investments available for sale using quoted market prices in active markets for identical assets and include the measurements in Level 1. The investments which are Rabbi Trusts for deferred compensation plans primarily consist of money market funds.

Note 13. Post-retirement and Similar Obligations

SCG has multiple qualified pension plans covering eligible union and management employees and retirees. The plans are traditional defined benefit plans or cash balance plans depending on date of hire and are closed to new employees hired on or after specified dates. Employees not participating in a defined benefit plan are eligible to receive an enhanced or core 401(k) Company

matching contribution. On March 31, 2022, the Board approved to freeze the SCG non-union plan, with an effective date of June 30, 2022.

SCG employees are eligible to participate in the UIL Holdings Corporation 401(k) Employee Stock Ownership Plan. Employees may defer a portion of the compensation and invest in various investment alternatives. Matching contributions are made in the form of cash which is subsequently invested in various investment alternatives offered to employees. The matching expense totaled approximately $4.1 million for 2025 and $3.6 million for 2024.

SCG has plans providing other postretirement benefits for eligible employees and retirees. The plans were closed to newly-hired non-union employees at the end of 1995 and to newly-hired union employees by the end of March 2010. These benefits consist primarily of health care, prescription drug and life insurance benefits for retired employees and their dependents. For Medicare eligible non-union retirees, SCG provides a subsidy through an HRA for retirees to purchase coverage on the individual market. Medicare eligible union retirees have the option of receiving a subsidy through an HRA or paying contributions and participating in company-sponsored retiree health plans.

Non-Qualified Retirement Benefit Plans

We also sponsor various unfunded non-qualified pension plans for certain current employees, former employees and former directors. The total liability for these plans, which is included in Other non-current liabilities on our consolidated balance sheets, was $4.0 million and $4.4 million at December 31, 2025 and 2024, respectively.

Qualified Retirement Benefit Plans

Obligations and funded status as of December 31, 2025 and 2024 consisted of:

	Pension Benefits		Postretirement Benefits	
As of December 31,	**2025**	**2024**	**2025**	**2024**
(Thousands)				
Change in benefit obligation				
Benefit obligation at January 1	$ 114,260	$ 127,093	$ 14,315	$ 16,721
Service cost	—	—	21	27
Interest cost	5,767	5,619	604	742
Amendments	—	—	(3,765)	—
Actuarial (gain) loss	4,377	(7,720)	1,150	(1,321)
Benefits paid	(9,693)	(10,732)	(1,832)	(1,854)
Benefit obligation at December 31	**$ 114,711**	**$ 114,260**	**$ 10,493**	**$ 14,315**
Change in plan assets				
Fair value of plan assets at January 1	$ 89,398	$ 92,320	$ 2,759	$ 3,372
Actual return on plan assets	10,768	2,952	293	163
Employer & plan participants' contributions	2,633	4,858	441	1,079
Benefits paid	(9,693)	(10,732)	(1,832)	(1,854)
Fair value of plan assets at December 31	**$ 93,106**	**$ 89,398**	**$ 1,661**	**$ 2,760**
Funded status	**$ (21,605)**	**$ (24,862)**	**$ (8,832)**	**$ (11,555)**

During 2025, the pension benefit obligation had an actuarial loss of $4.4 million. This loss was primarily driven by a $3.9 million loss from decrease in discount rates. During 2025, the

postretirement benefit obligation had an actuarial loss of $1.2 million. This loss was primarily driven by $0.4 million loss from decrease in discount rates and $0.8 million loss from changes in demographic assumptions. During 2025, the postretirement benefit obligation had a reduction of $3.8 million due to plan amendments. The amendments were driven by a Company decision to reduce postretirement benefit accruals for non-union employees.

During 2024, the pension benefit obligation had an actuarial gain of $7.7 million. This gain was primarily driven by a $6.9 million gain from increase in discount rates. During 2024, the postretirement benefit obligation had an actuarial gain of $1.3 million. This gain was primarily driven by $0.8 million gain from increase in discount rates.

Amounts recognized in the consolidated balance sheet as of December 31, 2025 and 2024 consisted of:

	Pension Benefits		Postretirement Benefits	
As of December 31,	**2025**	**2024**	**2025**	**2024**
(Thousands)				
Noncurrent liabilities	$ (21,605)	$ (24,862)	$ (8,832)	$ (11,555)

We have determined that we are allowed to defer as regulatory assets or regulatory liabilities items that would otherwise be recorded in accumulated other comprehensive income pursuant to the accounting requirements concerning defined benefit pension and other postretirement plans.

Amounts recognized as regulatory assets or regulatory liabilities consist of:

	Pension Benefits		Postretirement Benefits	
As of December 31,	**2025**	**2024**	**2025**	**2024**
(Thousands)				
Net actuarial loss	$ 13,179	$ 15,190	$ 1,039	$ 52
Prior service cost	$ 1,508	$ 1,610	$ (3,585)	$ —

Our accumulated benefit obligation for all qualified defined benefit pension plans was $114.7 million and $114.3 million as of December 31, 2025 and 2024, respectively. SCG's postretirement benefits were partially funded as of December 31, 2025 and 2024.

The projected benefit obligation and the accumulated benefit obligation exceeded the fair value of pension plan assets for our qualified plans as of December 31, 2025 and 2024. The following table shows the aggregate projected and accumulated benefit obligations and the fair value of plan assets as of December 31, 2025 and 2024.

As of December 31,	**2025**	**2024**
(Thousands)		
Projected benefit obligation	$ 114,711	$ 114,260
Accumulated benefit obligation	$ 114,711	$ 114,260
Fair value of plan assets	$ 93,106	$ 89,398

The postretirement benefits obligation for all the qualified plans exceeded the fair value of plan assets as of December 31, 2025 and 2024.

Components of net periodic benefit cost and other amounts recognized in regulatory assets and regulatory liabilities for the years ended December 31, 2025 and 2024 consisted of:

	Pension Benefits		Postretirement Benefits	
Years Ended December 31,	**2025**	**2024**	**2025**	**2024**
(Thousands)				
Net periodic benefit cost				
Service cost	$ —	$ —	$ 21	$ 27
Interest cost	5,767	5,619	604	742
Expected return on plan assets	(5,327)	(6,032)	(157)	(195)
Amortization of prior service cost	102	102	(180)	396
Amortization of actuarial loss (gain)	948	1,497	26	183
Net periodic benefit cost	**$ 1,490**	**$ 1,186**	**$ 314**	**$ 1,153**
Other changes in plan assets and benefit obligations recognized in regulatory assets and regulatory liabilities				
Current year prior service costs	$ —	$ —	$ (3,765)	$ —
Amortization of prior service cost	(102)	(102)	180	(396)
Current year actuarial loss (gain)	(1,063)	(4,640)	1,013	(1,289)
Amortization of actuarial (loss) gain	(948)	(1,497)	(26)	(183)
Total recognized in regulatory assets and regulatory liabilities	**$ (2,113)**	**$ (6,239)**	**$ (2,598)**	**$ (1,868)**
Total recognized in net periodic benefit cost and regulatory assets and regulatory liabilities	**$ (623)**	**$ (5,053)**	**$ (2,284)**	**$ (715)**

We include the net periodic benefit cost in other operating expenses for the service component and other deductions for the non-service component. The net periodic benefit cost for postretirement benefits represents the amount expensed for providing health care benefits to retirees and their eligible dependents.

The weighted-average assumptions used to determine benefit obligations as of December 31, 2025 and 2024 consisted of:

	Pension Benefits		Postretirement Benefits	
As of December 31,	**2025**	**2024**	**2025**	**2024**
Discount rate	4.92 %	5.33 %	4.78 %	5.33 %
Rate of compensation increase	N/A	N/A	N/A	N/A
Interest crediting rate	3.31 %	3.30 %	N/A	N/A

The discount rate is the rate at which the benefit obligations could presently be effectively settled. We determined the discount rate developing a yield curve derived from a portfolio of high grade non-callable bonds with yields that closely matches the duration of the expected cash flows of our benefit obligations.

The weighted-average assumptions used to determine net periodic benefit cost for the years ended December 31, 2025 and 2024 consisted of:

	Pension Benefits		Postretirement Benefits	
Years Ended December 31,	**2025**	**2024**	**2025**	**2024**
Discount rate	5.33 %	4.65 %	5.33%/5.00%	4.65 %
Expected long-term return on plan assets	7.00 %	7.50 %	7.00 %	7.50 %
Rate of compensation increase	N/A	N/A	N/A	N/A

SCG utilizes an alternative method to amortize prior service costs and unrecognized gains and losses. Prior service costs for both the pension and other postretirement benefits plans are amortized on a straight-line basis over the average remaining service period of participants expected to receive benefits.

We developed our expected long-term rate of return on plan assets assumption based on a review of long-term historical returns for the major asset classes, the target asset allocations and the effect of rebalancing of plan assets discussed below. That analysis considered current capital market conditions and projected conditions. Our policy is to calculate the expected return on plan assets using the market related value of assets. We amortize unrecognized actuarial gains and losses in excess of 10% of the greater of PBO or MRVA related to the pension and other postretirement benefits plans on straight line basis over future working lifetime. Effective March 31, 2022, the amortization period for the SCG Salaried Plan was updated from future working lifetime to future expected lifetime as the plan was frozen, or predominantly frozen, to future accruals. For other postretirement benefits, there is no such allowance for a variance in capturing the amortization of unrecognized gains and losses.

Assumed health care cost trend rates to determine benefit obligations as of December 31, 2025 and 2024 consisted of:

As of December 31,	**2025**	**2024**
Health care cost trend rate (pre 65/post 65)	8.40% / 10.10%	8.90% / 10.60%
Rate to which cost trend rate is assumed to decline (the ultimate trend rate)	4.50 %	4.50 %
Year that the rate reaches the ultimate trend rate	2039 / 2039	2039 / 2039

Contributions: In accordance with our funding policy, we make annual contributions of not less than the minimum required by applicable regulations. We expect to contribute $6.1 million to our pension benefits plan in 2026. We expect to contribute $0.5 million to our postretirement benefits plan in 2026.

Estimated future benefit payments: Our expected benefit payments and expected Medicare Prescription Drug, Improvement and Modernization Act of 2003 (Medicare Act) subsidy receipts, which reflect expected future service, as appropriate, are:

(Thousands)	Pension Benefits	Postretirement Benefits	Medicare Act Subsidy Receipts
2026	$ 12,554	$ 1,111	$ 62
2027	$ 10,561	$ 1,033	$ 65
2028	$ 10,877	$ 943	$ 66
2029	$ 10,327	$ 931	$ —
2030	$ 9,988	$ 882	$ —
2031-2035	$ 43,446	$ 3,776	$ —

***Plan assets*:** Our pension benefits plan assets are held in a master trust providing for a single trustee/custodian, a uniform investment manager lineup, and an efficient, cost-effective means of allocating expenses and investment performance to each plan under the master trust. Our primary investment objective is to ensure that current and future benefit obligations are adequately funded and with volatility commensurate with our tolerance for risk. Preservation of capital and achievement of sufficient total return to fund accrued and future benefits obligations are of highest concern. Our primary means for achieving capital preservation is through diversification of the trust's investments while avoiding significant concentrations of risk in any one area of the securities markets. Within each asset group, further diversification is achieved through utilizing multiple asset managers and systematic allocation to various asset classes and providing broad exposure to different segments of the equity, fixed-income and alternative investment markets.

The asset allocation policy is the most important consideration in achieving our objective of superior investment returns while minimizing risk. We have established a target asset allocation policy within allowable ranges for our pension benefits plan assets within broad categories of asset classes made up of Return-Seeking and Liability-Hedging investments. We have targets of 15%-70% for Return-Seeking assets and 30%-85% for Liability-Hedging assets. Return-Seeking investments generally consist of domestic, international, global, and emerging market equities invested in companies across all market capitalization ranges. Return-Seeking assets also include investments in real estate, global asset allocation strategies and hedge funds. Liability-Hedging investments generally consist of long-term corporate bonds, annuity contracts, long-term treasury STRIPS, and opportunistic fixed income investments. Systematic rebalancing within the target ranges increases the probability that the annualized return on the investments will be enhanced, while realizing lower overall risk, should any asset categories drift outside their specified ranges.

The fair values of pension benefits plan assets as of December 31, 2025, by asset category, consisted of:

		Fair Value Measurements		
Asset Category	**Total**	**(Level 1)**	**(Level 2)**	**(Level 3)**
(Thousands)				
As of December 31, 2025				
Cash and cash equivalents	$ 3,587	$ —	$ 3,587	$ —
U.S. government securities	14,383	14,383	—	—
Common stocks	3,878	3,878	—	—

Other, principally annuity, fixed income	76	—	76	—
	$ 71,087	**$ 23,676**	**$ 47,411**	**$ —**
Other investments measured at net asset value	18,311			
Total	**$ 89,398**			

Valuation Techniques

We value our pension benefits plan assets as follows:

- Cash and cash equivalents - Level 1: at cost, plus accrued interest, which approximates fair value. Level 2: proprietary cash associated with other investments, based on yields currently available on comparable securities of issuers with similar credit ratings.
- U.S. government securities - at the closing price reported in the active market in which the security is traded.
- Common stocks - at the closing price reported in the active market in which the individual investment is traded.
- Corporate bonds - based on yields currently available on comparable securities of issuers with similar credit ratings.
- Registered investment companies - at the closing price reported in the active market in which the individual investment is traded.

- Common collective trusts – the fair value is primarily derived from the quoted prices in active markets of the underlying securities. Because the fund shares are offered to a limited group of investors, they are not considered to be traded in an active market.
- Other investments, principally annuity and fixed income - based on yields currently available on comparable securities of issuers with similar credit ratings.
- Other investments measured at net asset value (NAV) – fund shares offered to a limited group of investors and alternative investments, such as private equity and real estate oriented investments, partnership/joint ventures and hedge funds are valued using the NAV as a practical expedient.

Our postretirement benefits plan assets are held with trustees in multiple voluntary employees' beneficiary association (VEBA) and 401(h) arrangements and are invested among and within various asset classes to achieve sufficient diversification in accordance with our risk tolerance. This is achieved for our postretirement benefits plan assets through the utilization of multiple institutional mutual and money market funds, providing exposure to different segments of the fixed income, equity and short-term cash markets. The postretirement benefits plan assets are invested in VEBA and 401(h) arrangements that are not subject to income taxes.

We have established a target asset allocation policy within allowable ranges for postretirement benefits plan assets of 49% - 69% for equity securities, 31%- 51% for fixed income. Equity investments are diversified across U.S. and non-U.S. stocks, investment styles, and market capitalization ranges. Fixed income investments are primarily invested in U.S. bonds and may also include some non-U.S. bonds. Other asset classes, including alternative investments, are used to enhance long-term returns while improving portfolio diversification. We primarily minimize the risk of large losses through diversification but also through monitoring and managing other aspects of risk through quarterly investment portfolio reviews. Systematic rebalancing within target ranges increases the probability that the annualized return on investments will be enhanced, while realizing lower overall risk, should any asset categories drift outside their specified ranges.

The fair value of other postretirement benefits plan assets, by asset category, as of December 31, 2025 consisted of:

		Fair Value Measurements		
Asset Category	**Total**	**(Level 1)**	**(Level 2)**	**(Level 3)**

Valuation Techniques

We value our postretirement benefits plan assets as follows:

- Cash and cash equivalents - Level 1: at cost, plus accrued interest, which approximates fair value. Level 2: proprietary cash associated with other investments, based on yields currently available on comparable securities of issuers with similar credit ratings.
- U.S. government securities - at the closing price reported in the active market in which the security is traded.
- Corporate bonds - based on yields currently available on comparable securities of issuers with similar credit ratings.
- Common stocks - at the closing price reported in the active market in which the individual investment is traded.
- Registered investment companies - at the closing price reported in the active market in which the individual investment is traded.
- Common collective trusts – the fair value is primarily derived from the quoted prices in active markets of the underlying securities. Because the fund shares are offered to a limited group of investors, they are not considered to be traded in an active market.
- Other investments, principally annuity and fixed income - based on yields currently available on comparable securities of issuers with similar credit ratings.
- Other investments measured at net asset value (NAV) – fund shares offered to a limited group of investors and alternative investments, such as private equity and real estate oriented investments, partnership/joint ventures and hedge funds are valued using the NAV as a practical expedient.

Pension and postretirement benefit plan equity securities did not include any Iberdrola common stock as of both December 31, 2025 and 2024.

Note 14. Other Income and Other Deductions

Other income and deductions for the years ended December 31, 2025 and 2024, consisted of:

Years Ended December 31,	2025	2024
(Thousands)		
Interest and dividend income	$ —	$ 317
Carrying costs on regulatory assets	2,788	4,880
Allowance for funds used during construction	—	883
Miscellaneous	13	93
Total other income	**$ 2,801**	**$ 6,173**
Pension non-service components	$ (1,494)	$ (1,511)
Miscellaneous	(1,061)	(3,646)
Total other deductions	**$ (2,555)**	**$ (5,157)**

Note 15. Related Party Transactions

Certain Networks subsidiaries, including SCG, borrow from AGR, the parent of Networks, through intercompany revolving credit agreements. For SCG, the intercompany revolving credit agreements provide access to supplemental liquidity. See Note 8 for further detail on the credit facility with AGR.

Avangrid Service Company provides administrative and management services to Networks operating utilities, including SCG, pursuant to service agreements. The cost of those services is allocated in accordance with methodologies set forth in the service agreements. The cost allocation methodologies vary depending on the type of service provided. Management believes such allocations are reasonable. The charge for operating and capital services provided to SCG by AGR and its affiliates was approximately $25.9 million and $27.8 million for the years ended December 31, 2025 and 2024, respectively. Cost for services includes amounts capitalized in utility plant, which was approximately $2.7 million for 2025 and $1.5 million for 2024. The remainder was primarily recorded as operations and maintenance expense. The charge for services provided by SCG to AGR and its subsidiaries was approximately $7.2 million for 2025 and $8.8 million for 2024. All charges for services are at cost. All of the charges associated with services provided are recorded as revenues to offset other operating expenses on the financial statements.

The balance in accounts payable to affiliates of $23.8 million at December 31, 2025 and $23.1 million at December 31, 2024, respectively, is mostly payable to UIL Holdings. The balance in accounts receivable from affiliates of $1.5 million at December 31, 2025 is mostly receivable from CNG and the balance in accounts receivable from affiliates of $1.2 million at December 31, 2024 is mostly receivable from UI.

There was no balance in notes receivable from affiliates at December 31, 2025. The balance in notes receivable from affiliates of $41.4 million at December 31, 2024, is receivable from Avangrid. Notes receivable from affiliates relate to the Virtual Money Pool Agreement as discussed in Note 8 of these consolidated financial statements.

Note 16. Subsequent Events

The company has performed a review of subsequent events through March 30, 2026, which is the date these consolidated financial statements were available to be issued.

Independent Auditors' Report

Shareholder and Board of Directors
Central Maine Power Company:

Opinion

We have audited the consolidated financial statements of Central Maine Power Company and its subsidiaries (the Company), which comprise the consolidated balance sheets as of December 31, 2025 and 2024, and the related consolidated statements of income, comprehensive income, changes in equity, and cash flows for the years then ended, and the related notes to the consolidated financial statements.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2025 and 2024, and the results of its operations and its cash flows for the years then ended in accordance with U.S. generally accepted accounting principles.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are required to be independent of the Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with U.S. generally accepted accounting principles, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for one year after the date that the consolidated financial statements are available to be issued.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the consolidated financial statements.

KPMG LLP, a Delaware limited liability partnership, and its subsidiaries are part of the KPMG global organization of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the consolidated financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

Note 1. Summary of Significant Accounting Policies, New Accounting Pronouncements and Use of Estimates

Background and nature of operations: Central Maine Power Company and subsidiaries (CMP, the company, we, our, us) conduct regulated electricity transmission and distribution operations in Maine serving approximately 678,800 customers as of December 31, 2025, in a service territory of approximately 11,000 square miles with a population of approximately one million people. The service territory is located in the southern and central areas of Maine and contains most of Maine's industrial and commercial centers, including the city of Portland and the Lewiston-Auburn, Augusta-Waterville, Saco-Biddeford and Bath-Brunswick areas. We operate under the authority of the Maine Public Utilities Commission (MPUC) and are also subject to regulation by the Federal Energy Regulatory Commission (FERC).

CMP consists of the following subsidiaries: Maine Electric Power Company, Inc. (MEPCO) is a 78.3% owned subsidiary of CMP with the remaining 21.7% owned by Versant Power (Versant). Versant is wholly-owned by ENMAX Corp. Chester SVC Partnership (the Partnership or Chester) is a general partnership between NORVARCO, a wholly-owned subsidiary of CMP, which owns 50% interest in the Partnership and Bangor Var Co., Inc., a wholly-owned subsidiary of Versant, which owns the remaining 50% interest organized on October 9, 1990, under the Maine Uniform Partnership Act.

CMP is the principal operating utility of CMP Group, Inc. (CMP Group), a wholly-owned subsidiary of Avangrid Networks, Inc. (Networks), which is a wholly-owned subsidiary of Avangrid, Inc. (AGR), which is a wholly-owned subsidiary of Iberdrola, S.A. (Iberdrola), a corporation organized under the laws of the Kingdom of Spain.

Agreement and Plan of Merger: On May 17, 2024, AGR entered into an Agreement and Plan of Merger (the Merger Agreement) with Iberdrola and Arizona Merger Sub, Inc (Merger Sub). As a result of the consummation of the Merger on December 23, 2024 (closing date), Merger Sub merged with and into Avangrid (the Merger), with Avangrid continuing as the surviving corporation and a wholly-owned subsidiary of Iberdrola. On the closing date, each share of common stock issued and outstanding immediately prior to the closing date (other than common stock owned by the Merger, Merger Sub or any other direct or indirect wholly owned Subsidiary of the Merger, and in each case not held on behalf of the third parties (collectively, the Excluded Shares)) was converted into a right to receive $35.75 per share of common stock in cash, without interest.

On the closing date, (i) all shares of common stock ceased to be outstanding, were cancelled and ceased to exist and (ii) each Excluded Share ceased to be outstanding and was cancelled without payment of any consideration and ceased to exist. As a result of the consummation of the Merger on December 23, 2024, Iberdrola became the direct owner of 100 shares of common stock of Avangrid which represents the only outstanding capital of the Company. On the closing date, the New York Stock Exchange (NYSE) filed with the Securities and Exchange Commission (the SEC) a notification of removal from listing on Form 25 in order to delist the common stock from the NYSE and deregister the common stock under Section 12(b) of the Securities Exchange Act of 1934, as amended (the Exchange Act). Following the effectiveness of the Form 25, on January 2, 2025, Avangrid filed with the SEC a Form 15 requesting the termination of registration of the common stock under Section 12(g) of the Exchange Act and the suspension of reporting obligations under Section 13 and 15(d) of the Exchange Act with respect to the common stock.

Basis of presentation: The accompanying consolidated financial statements have been prepared in accordance with generally accepted accounting principles in the United States (U.S.

GAAP) and are presented on a consolidated basis, and therefore include the accounts of CMP and its consolidated subsidiaries, MEPCO and NORVARCO, and Chester. All intercompany transactions and accounts have been eliminated in consolidation in all periods presented.

Significant Accounting Policies: We consider the following policies to be the most significant in understanding the judgments that are involved in preparing our consolidated financial statements:

Principles of consolidation**:** We consolidate the entities in which we have a controlling financial interest, after the elimination of intercompany transactions. We account for investments in common stock where we have the ability to exercise significant influence, but not control, using the equity method of accounting.

Revenue recognition**:** We recognize revenues when we transfer control of promised goods or services to our customers in an amount that reflects the consideration we expect to be entitled to in exchange for those goods or services. Refer to Note 4 for further details.

Regulatory accounting: We account for our regulated operations in accordance with the authoritative guidance applicable to entities with regulated operations that meet the following criteria: (i) rates are established or approved by an independent, third-party regulator; (ii) rates are designed to recover the entity's specific costs of providing the regulated services or products and; (iii) there is a reasonable expectation that rates are set at levels that will recover the entity's costs and can be collected from customers. Regulatory assets primarily represent incurred costs that have been deferred because of their probable future recovery from customers through regulated rates. Regulatory liabilities represent: (i) the excess recovery of costs or accrued credits that have been deferred because it is probable such amounts will be returned to customers through future regulated rates; or (ii) billings in advance of expenditures for approved regulatory programs.

We amortize regulatory assets and liabilities and recognize the related expense or revenue in our consolidated statements of income consistent with the recovery or refund included in customer rates. We believe it is probable that our currently recorded regulatory assets and liabilities will be recovered or settled in future rates.

Noncontrolling interest: The noncontrolling interest represents the portion of our net income (loss), comprehensive income (loss) and net assets that is not allocable to us and is calculated based on our ownership percentage.

Goodwill**:** Goodwill represents future economic benefits arising from other assets acquired in a business combination that are not individually identified and separately recognized. Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred, the fair value of any noncontrolling interest and the acquisition date fair value of any previously held equity interest in the acquiree over the fair value of the net identifiable assets acquired and liabilities assumed.

Goodwill is not amortized, but is subject to an assessment for impairment performed in the fourth quarter or more frequently if events occur or circumstances change that would more likely than not reduce the fair value of the reporting unit to which goodwill is assigned below its carrying amount. A reporting unit is an operating segment or one level below an operating segment and is the level at which we test goodwill for impairment.

In assessing goodwill for impairment, we have the option to first perform a qualitative assessment to determine whether a quantitative assessment is necessary. If we determine, based on qualitative factors, that the fair value of the reporting unit is more likely than not greater than the carrying amount, no further testing is required. If we bypass the qualitative assessment, or

perform the qualitative assessment but determine it is more likely than not that its fair value is less than its carrying amount, we perform a quantitative test to compare the fair value of the reporting unit to its carrying amount, including goodwill. If the carrying amount of the reporting unit exceeds its fair value, we record an impairment loss as a reduction to goodwill and a charge to operating expenses, but the loss recognized would not exceed the total amount of goodwill allocated to the reporting unit.

Utility plant: We account for utility plant at historical cost. In cases where we are required to dismantle installations or to recondition the site on which they are located, we record the estimated cost of removal or reconditioning as an asset retirement obligation (ARO) and add an equal amount to the carrying amount of the asset.

Development and construction of our various facilities are carried out in stages. We expense project costs during early stage development activities. Once we achieve certain development milestones and it is probable that we can obtain future economic benefits from a project, we capitalize salaries and wages for persons directly involved in the project, and engineering, permits, licenses, wind measurement and insurance costs. We periodically review development projects in construction for any indications of impairment.

We transfer assets from “Construction work in progress” to “Utility plant” when they are available for service.

We determine depreciation expense for utility plant in service using the straight-line method, based on the average service lives of groups of depreciable property, which include estimated cost of removal. Consistent with FERC accounting requirements, we charge the original cost of utility plant retired or otherwise disposed of to accumulated depreciation. Our composite rates for depreciation were 2.2% of average depreciable property for 2025 and 2.3% of average depreciable property for 2024. We amortize our capitalized software cost, which is included in other plant, using the straight line method, based on useful lives of 5-15 years. Capitalized software costs were approximately $221.3 million as of December 31, 2025, and $199.5 million as of December 31, 2024. Depreciation expense was $135.0 million in 2025 and $126.5 million in 2024. Amortization of capitalized software was $12.8 million in 2025 and $11.5 million in 2024, respectively.

We charge repairs and minor replacements to operating expenses, and capitalize renewals and betterments, including certain indirect costs.

Allowance for funds used during construction (AFUDC) is a non-cash item that represents the allowed cost of capital, including a return on equity (ROE), used to finance construction projects. We record the portion of AFUDC attributable to borrowed funds as a reduction of interest expense and record the remainder as other income. AFUDC rates are determined in accordance with applicable FERC guidelines for each regulated utility using an annual rate that is compounded semiannually.

Our balances of major classes of utility plant and associated useful lives are shown below as of December 31:

Utility Plant	Estimated useful life range (years)	2025	2024
(Thousands)			
Electric			
Transmission	4-70	$ 3,223,293	$ 3,007,765
Distribution	5-75	2,306,553	2,131,727
Vehicles	4-10	101,362	84,505
Other	4-50	654,119	593,313
Total Utility Plant in Service		**6,285,327**	**5,817,310**
Total accumulated depreciation		(1,795,728)	(1,701,598)
Total Net Utility Plant in Service		**4,489,599**	**4,115,712**
Construction work in progress		377,596	350,737
Total Utility Plant		**$ 4,867,195**	**$ 4,466,449**

Leases: We determine if an arrangement is a lease at inception. We classify a lease as a finance lease if it meets any one of specified criteria that in essence transfers ownership of the underlying asset to us by the end of the lease term. If a lease does not meet any of those criteria, we classify it as an operating lease. On our consolidated balance sheets, we include, for operating leases: "Operating lease right-of-use (ROU) assets" and "Operating lease liabilities (current and non-current)"; and for finance leases: finance lease ROU assets in "Other assets" and liabilities in "Other current liabilities" and "Other liabilities."

ROU assets represent our right to use an underlying asset for the lease term and lease liabilities represent our obligation to make lease payments arising from the lease. We recognize lease ROU assets and liabilities at commencement of an arrangement based on the present value of lease payments over the lease term. We use the incremental borrowing rate based on information available at the lease commencement date to determine the present value of future payments, except when the rate implicit in the lease is determinable. A lease ROU asset also includes any lease payments made at or before commencement date, minus any lease incentives received, and includes initial direct costs incurred. We do not record leases with an initial term of 12 months or less on the balance sheet for all classes of underlying assets, and we recognize lease expense for those leases on a straight-line basis over the lease term. We include variable lease payments that depend on an index or a rate in the ROU asset and lease liability measurement based on the index or rate at the commencement date, or upon a modification. We do not include variable lease payments that do not depend on an index or a rate in the ROU asset and lease liability measurement. A lease term includes an option to extend or terminate the lease when it is reasonably certain that we will exercise that option. We recognize lease (rent) expense for operating lease payments on a straight-line basis over the lease term, or we recognize the amount eligible for recovery under our rate plan, such as actual amounts paid. We amortize finance lease ROU assets on a straight-line basis over the lease term and recognize interest expense based on the outstanding lease liability.

We have lease agreements with lease and non-lease components, and account for lease components and associated non-lease components together as a single lease component, for all classes of underlying assets.

Impairment of long-lived assets: We evaluate utility plant and other long-lived assets for impairment when events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment evaluation is based on an undiscounted cash flow analysis at the

lowest level to which cash flows of the long-lived assets or asset groups are largely independent of the cash flows of other assets and liabilities. We are required to recognize an impairment loss if the carrying amount of the asset exceeds the undiscounted future net cash flows associated with that asset.

The impairment loss to be recognized is the amount by which the carrying amount of the long-lived asset exceeds the asset's fair value. Depending on the asset, fair value may be determined by use of a discounted cash flow model, with assumptions consistent with a market participant's view of the exit price of the asset.

Fair value measurement: Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants as of the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place in either the principal market for the asset or liability, or, in the absence of a principal market, in the most advantageous market for the asset or liability.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset according to its highest and best use, or by selling it to another market participant that would use the asset according to its highest and best use.

We use valuation techniques that are appropriate in the circumstances and for which sufficient data is available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs. All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorized within the fair value hierarchy based on the transparency of input to the valuation of an asset or liability as of the measurement date.

The three input levels of the fair value hierarchy are as follows:

- Level 1 - inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.
- Level 2 - inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability either directly or indirectly, for substantially the full term of the contract.
- Level 3 - one or more inputs to the valuation methodology are unobservable or cannot be corroborated with market data.

Categorization within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. Certain investments are not categorized within the fair value hierarchy. These investments are measured based on the fair value of the underlying investments but may not be readily redeemable at that fair value.

Derivatives and hedge accounting: Derivatives are recognized on our consolidated balance sheets at their fair value. To be a derivative under the accounting standards for derivatives and hedging, an agreement would need to have a notional and an underlying, require little or no initial net investment and could be net settled. We recognize changes in the fair value of a derivative contract in earnings unless specific hedge accounting criteria are met.

Derivatives that qualify and are designated for hedge accounting are classified as cash flow hedges. We report the gain or loss on the derivative instrument as a component of Other Comprehensive Income (OCI) and later reclassify amounts into earnings when the underlying transaction occurs, which we present in the same income statement line item as the earnings effect of the hedged item. If the amounts in OCI are probable of recovery in the ratemaking process, then the OCI is reclassified as a regulatory asset or liability. For all designated and qualifying hedges, we maintain formal documentation of the hedge and effectiveness testing in accordance with the accounting standards for derivatives and hedging. If we determine that the derivative is no longer highly effective as a hedge, we will discontinue hedge accounting prospectively. For cash flow hedges of forecasted transactions, we estimate the future cash flows of the forecasted transactions and evaluate the probability of the occurrence and timing of such transactions. If we determine it is probable that the forecasted transaction will not occur, we immediately recognize in earnings hedge gains and losses previously recorded in OCI.

Changes in conditions or the occurrence of unforeseen events could require discontinuance of the hedge accounting or could affect the timing of the reclassification of gains or losses on cash flow hedges from OCI into earnings.

Cash and cash equivalents: Cash and cash equivalents include cash, bank accounts, and other highly liquid short-term investments. We consider all highly liquid investments with a maturity date of three months or less when acquired to be cash equivalents and include those investments in “Cash and cash equivalents.” We classify book overdrafts representing outstanding checks in excess of funds on deposit as “Accounts payable and accrued liabilities” on our consolidated balance sheets. We report changes in book overdrafts in the operating activities section of the consolidated statements of cash flows.

Concentration of risk: We maintain our cash and cash equivalents in accounts with major financial institutions in the form of demand deposits and money market accounts. Deposits in these financial institutions may exceed the amount of federal deposit insurance provided on such deposits.

Consolidated statements of cash flows: Supplemental disclosure of cash flow information is as follows:

(Thousands)	2025	2024
Cash paid (refunded) during the year ended December 31:		
Interest, net of amounts capitalized	$ 68,477	$ 60,243
Income taxes paid (refunded), net	$ 27,836	$ (11,742)

Of the income taxes paid, $23.3 million was paid by AGR under the tax sharing agreement, and $4.5 million was paid to the IRS. Interest capitalized was $7.8 million in 2025 and $7.8 million in 2024. Accrued liabilities for utility plant additions were $143.4 million and $111.6 million as of December 31, 2025 and 2024, respectively.

***Trade receivables and unbilled revenues, net of allowance for credit losses*:** We record trade receivables at amounts billed to customers and we record unbilled revenues based on an estimate of energy delivered or services provided to customers. The estimates for unbilled revenues are determined based on various assumptions, including current month energy load requirements, billing rates by customer class and delivery loss factors. Changes in those assumptions could significantly affect the estimated amounts of unbilled revenues.

The allowance for credit losses is our best estimate of the amount of probable credit losses in our existing trade receivables, determined based on experience. Each month we review our allowance for credit losses and past due accounts by age. When we believe that a receivable will not be recovered, we charge off the account balance against the allowance. Changes in assumptions about input factors and customer receivables, which are inherently uncertain and susceptible to change from period to period, could significantly affect the allowance for credit losses estimates.

Trade receivables at December 31 include unbilled revenues of $62.8 million for 2025 and $52.0 million for 2024, and are shown net of an allowance for credit losses at December 31 of $15.9 million for 2025 and $15.1 million for 2024. Trade receivables do not bear interest, although late fees may be assessed. Credit loss expense was $10.1 million in 2025 and $7.6 million in 2024.

Trade receivables include amounts due under deferred payment arrangements (DPAs). When a residential customer becomes delinquent in making payments, the MPUC requires us to allow the customer to enter into a DPA to settle the account balance. A DPA allows the account balance to be paid in installments over an extended period without interest, which generally exceeds one year, by negotiating mutually acceptable payment terms. Generally, we must continue to serve a customer who cannot pay an account balance in full if the customer: (i) pays a reasonable portion of the balance; (ii) agrees to pay the balance in installments; and (iii) agrees to pay future bills within 30 days until the DPA is paid in full. Failure to make payments on a DPA results in the full amount of a receivable under a DPA being due. These accounts are part of the regular operating cycle and we classify them as short term.

We establish our allowance for credit losses, including for unbilled revenue (also referred to as contract assets), by using both historical average loss percentages to project future losses, and by establishing a specific allowance for known credit issues or for specific items not considered in the historical average calculation. We consider whether we need to adjust historical loss rates to reflect the effects of current conditions and forecasted changes considering various economic indicators (e.g., Gross Domestic Product, Personal Income, Consumer Price Index, Unemployment Rate) over the contractual life of the trade receivables. We write off amounts when we have exhausted reasonable collection efforts. The allowance for credit losses for DPAs at December 31 was $6.3 million for 2025 and $5.8 million for 2024. DPA receivable balances at December 31 were $17.3 million for 2025 and $18.2 million for 2024.

Debentures, bonds and bank borrowings: We record bonds, debentures and bank borrowings as a liability equal to the proceeds of the borrowings. We treat the difference between the proceeds and the face amount of the issued liability as discount or premium and accrete the amounts as interest expense or income over the life of the instrument. We defer incremental costs associated with the issuance of the debt instruments and amortize them over the same period as debt discount or premium. We present bonds, debentures and bank borrowings net of unamortized discount, premium and debt issuance costs on our consolidated balance sheets.

Inventory: Inventory comprises materials and supplies that we use for construction of new facilities and repairs of existing facilities. These inventories are carried and withdrawn at the lower of cost and net realizable value and reported on the consolidated balance sheets within “Materials and supplies.”

Government grants**:** We record government grants as a reduction to the related utility plant to be recovered through rate base, in accordance with the prescribed FERC accounting.

In accounting for government grants related to operating and maintenance costs, we recognize amounts receivable as an offset to expenses in the consolidated statements of income in the period in which we incur the expenses.

The changes in government grants recorded as a reduction to the related utility plant as of December 31, 2025 and 2024 consisted of:

(Thousands)	Government grants	Total
As of December 31, 2023	**$ 26,663**	**$ 26,663**
Recognized in income	(4,004)	(4,004)
As of December 31, 2024	**22,659**	**22,659**
Disposals	(65)	(65)
Recognized in income	(3,941)	(3,941)
As of December 31, 2025	**$ 18,653**	**$ 18,653**

We are required to comply with certain terms and conditions applicable to each grant and, if a disqualifying event should occur as specified in the grant's terms and conditions, we are required to repay the grant funds to the government. We believe we are in compliance with each grant's terms and conditions as of December 31, 2025 and 2024.

***Asset retirement obligations*:** We record the fair value of the liability for an asset retirement obligation (ARO) and a conditional ARO in the period in which it is incurred, capitalizing the cost by increasing the carrying amount of the related long-lived asset. The ARO is associated with our long-lived assets and primarily consists of obligations related to removal of asbestos in buildings. We adjust the liability periodically to reflect revisions to either the timing or amount of the original estimated undiscounted cash flows over time. We accrete the liability to its present value each period and depreciate the capitalized cost over the useful life of the related asset. Upon settlement we will either settle the obligation at its recorded amount or incur a gain or a loss. We defer any timing differences between rate recovery and depreciation expense and accretion as either a regulatory asset or a regulatory liability.

The term conditional ARO refers to an entity’s legal obligation to perform an asset retirement activity in which the timing or method of settlement are conditional on a future event that may or may not be within the entity's control. If an entity has sufficient information to reasonably estimate the fair value of the liability for a conditional ARO, it must recognize that liability at the time the liability is incurred.

The carrying amount of ARO, including our conditional ARO, totaled $1.0 million at both December 31, 2025 and 2024 and is recorded in Other Non-current Liabilities on our consolidated balance sheets. There were no changes in ARO balances, including conditional ARO, for the years ended December 31, 2025 and 2024.

We have AROs for which we have not recognized a liability because the fair value cannot be reasonably estimated due to indeterminate settlement dates, including the removal of property upon termination of an easement, right-of-way or franchise.

Accrued removal obligations: We meet the requirements concerning accounting for regulated operations and recognize a regulatory liability for the difference between removal costs collected in rates and actual costs incurred. We classify those amounts as accrued removal obligations.

***Environmental remediation liability*:** In recording our liabilities for environmental remediation costs the amount of liability for a site is the best estimate, when determinable; otherwise it is based on the minimum liability or the lower end of the range when there is a range of estimated losses. We record our environmental liabilities on an undiscounted basis.

Post-employment and other employee benefits: We sponsor defined benefit pension plans that cover the majority of our employees. We also provide health care and life insurance benefits through various postretirement plans for eligible retirees.

We evaluate our actuarial assumptions on an annual basis and consider changes based on market conditions and other factors. All of our qualified defined benefit plans are funded in amounts calculated by independent actuaries, based on actuarial assumptions proposed by management.

We account for defined benefit pension or other postretirement plans, recognizing an asset or liability for the overfunded or underfunded plan status. For a pension plan, the asset or liability is the difference between the fair value of the plan's assets and the projected benefit obligation. For any other postretirement benefit plan, the asset or liability is the difference between the fair value of the plan's assets and the accumulated postretirement benefit obligation. We generally reflect all unrecognized prior service costs and credits and unrecognized actuarial gains and losses as regulatory assets rather than in OCI, as management believes it is probable that such items will be recoverable through the ratemaking process. Certain nonqualified plan expenses are not recoverable through the ratemaking process and we present the unrecognized prior service costs and credits and unrecognized actuarial gains and losses in accumulated other comprehensive loss. If a plan meets settlement or curtailment accounting criteria, we recognize a regulatory asset or liability if these costs are probable of recovery from ratepayers. We use a December 31st measurement date for our benefits plans.

We amortize prior service costs for both the pension and other postretirement benefits plans on a straight-line basis over the average remaining service period of participants expected to receive benefits. We amortize unrecognized actuarial gains and losses related to the pension and other postretirement benefits plans in excess of 10% of the greater of periodic benefit obligation or market-related value of assets over average remaining service. Our policy is to calculate the expected return on plan assets using the market related value of assets. We determine that value by recognizing the difference between actual returns and expected returns over a five-year period.

Income taxes: In August 2022, the Inflation Reduction Act of 2022 ("IRA") was signed into law in the United States. The IRA created a new corporate alternative minimum tax ("CAMT") of 15% on adjusted financial statement income and an excise tax of 1% on the value of certain stock repurchases. The CAMT and other various applicable provisions of the IRA are effective for the Company for periods beginning after December 31, 2022. The impact of CAMT will depend on our facts in each year, as well as on anticipated guidance from the U.S. Department of Treasury.

AGR, the parent company of Networks, files a consolidated federal income tax return and various state income tax returns, some of which are unitary as required or permitted, including all of the activities of its subsidiaries. Each subsidiary company is treated as a member of the consolidated group and determines its current and deferred taxes based on the separate return with benefits for loss method. As a member, CMP settles its current tax liability or benefit each year directly with AGR pursuant to a tax allocation agreement between AGR and its members.

The aggregate amount of the related party income tax receivable balance due from AGR at December 31, 2025 was $4.5 million. The aggregate amount of the related party income tax payable balance due to AGR at December 31, 2024 was $13.8 million.

We use the asset and liability method of accounting for income taxes. Deferred tax assets and liabilities reflect the expected future tax consequences, based on enacted tax laws, of temporary differences between the tax basis of assets and liabilities and their financial reporting amounts. In accordance with U.S. GAAP for regulated industries, we have established regulatory assets and liabilities for the net revenue requirements to be recovered from or refunded to customers for the related future tax expense or benefit associated with certain of these temporary differences. We defer investment tax credits when earned and amortize them over the estimated lives of the related assets. We also recognize the income tax consequences of intra-entity transfers of assets other than inventory when the transfer occurs. We had no intra-entity transfers of assets other than inventory during the years ended December 31, 2025 and 2024.

Deferred tax assets and liabilities are measured at the expected tax rate for the period in which the asset or liability will be realized or settled, based on legislation enacted as of the balance sheet date. We charge or credit changes in deferred income tax assets and liabilities that are associated with components of OCI directly to OCI. Significant judgment is required in determining income tax provisions and evaluating tax positions. Our tax positions are evaluated under a more-likely-than-not recognition threshold before they are recognized for financial reporting purposes. We record valuation allowances to reduce deferred tax assets when it is more likely than not that we will not realize all or a portion of a tax benefit. We consider the effect of the alternative minimum tax system in determining the need for a valuation allowance for deferred taxes. Deferred tax assets and liabilities are netted and classified as non-current on our consolidated balance sheets.

We record the excess of state franchise tax computed as the higher of a tax based on income or a tax based on capital in "Taxes other than income taxes" and "Taxes accrued" in our consolidated financial statements.

Positions taken or expected to be taken on tax returns, including the decision to exclude certain income or transactions from a return, are recognized in the financial statements when it is more likely than not the tax position can be sustained based solely on the technical merits of the position. The amount of a tax return position that is not recognized in the financial statements is disclosed as an unrecognized tax benefit. Changes in assumptions on tax benefits may also impact interest expense or interest income and may result in the recognition of tax penalties. Interest and penalties related to unrecognized tax benefits are recorded within “Interest expense, net of capitalization” and “Other income” and “Other deductions” in our consolidated statements of income.

Uncertain tax positions have been classified as non-current unless expected to be paid within one year. Our policy is to recognize interest and penalties on uncertain tax positions as a component of interest expense in the consolidated statements of income.

Our income tax expense, deferred tax assets and liabilities, and liabilities for unrecognized tax benefits reflect management’s best assessment of estimated current and future taxes to be paid. Significant judgments and estimates are required in determining the consolidated income tax components of the financial statements.

Adoption of New Accounting Pronouncements

Although we are not a public business entity, we adopt new accounting standards based on public business entity guidance aside from the effective dates in certain situations where we may follow the effective dates for private entities.

There have been no new accounting pronouncements adopted as of and for the year ended December 31, 2025 that are expected to have a material impact on CMP's consolidated financial statements.

Accounting Pronouncements Issued But Not Yet Adopted

The following are new accounting pronouncements not yet adopted that we have evaluated or are evaluating to determine their effect on our consolidated financial statements.

(a) Simplified credit loss guidance

In July 2025, FASB issued guidance to simplify applying ASC 326, Financial instruments – Credit losses, to current accounts receivable and contract assets arising from transactions accounted for under ASC 606, Revenue from contracts with customers, including those assets acquired in a business combination or recognized through the consolidation of a variable interest entity that is not a business if those assets arose from transactions that the acquiree or variable interest entity accounted for under ASC 606. The update introduces (1) a practical expedient allowing entities to assume current conditions remain unchanged over the remaining life of these assets, and (2) an accounting policy election for non-public entities, permitting consideration of post– balance sheet cash collections when estimating expected credit losses, provided the practical expedient is also elected. The amendment is effective for all entities in interim and annual periods for fiscal years beginning after December 15, 2025. We do not expect the new guidance to have a material impact on our consolidated results of operations, financial position and cash flows.

(b) Accounting for internal-use software costs

In September 2025 FASB issued guidance to modernize internal-use software guidance to eliminate the old stage-based capitalization model and to introduce a probable-to-complete threshold, requiring management authorization, funding commitment, and a probable expectation of completion before capitalization begins. It provides enhanced guidance and examples for applying this threshold, including factors for assessing significant development uncertainty such as novel features or ongoing revisions to performance requirements. Existing rules for external-use software, types of costs eligible for capitalization, and the point at which capitalization ceases remain unchanged. The amendment is effective for all entities in interim and annual periods for fiscal years beginning after December 15, 2027. We do not expect the new guidance to have a material impact on our consolidated results of operations, financial position and cash flows.

(c) Hedge accounting improvements

In November 2025, the FASB issued guidance, which provides refinements to hedge documentation and easing of certain operational requirements. The amendments primarily affect cash flow hedges, with targeted changes to fair value and net investment hedges. They (1) allow hedging a clearly related variable price component of a forecasted nonfinancial transaction, (2) permit grouping forecasted transactions with similar risk exposure, and (3) introduce a model for cash flow hedging "choose-your-rate" debt that lets borrowers change documented indexes or tenors without automatically ending hedge accounting. The amendment is effective for interim and annual reporting periods in fiscal years beginning after December 15, 2026, for public business

entities, and after December 15, 2027, to all other entities. We are evaluating to determine the effect of this amendment on our hedge accounting programs and overall consolidated financial statements.

(d) Accounting for government grants

In December 2025, FASB issued amendments to provide comprehensive guidance on recognizing, measuring, and presenting government grants under ASC 832, Accounting for government grants by business entities, which previously only addressed disclosures. The amendment responds to the lack of explicit U.S. GAAP guidance that led to diverse practices and reliance on other GAAP or International Financial Reporting Standards (IFRS) by analogy. It classifies grants into asset-related and income-related categories, offering two approaches for asset-related grants: the cost accumulation approach (reducing the asset's carrying amount) and the deferred income approach (recognizing income systematically over the asset's useful life). Income-related grants, such as operating expense reimbursements, are recognized over the period the related costs occur, while grants for past costs or immediate support are recognized when the probable threshold is met. The amendment also includes guidance for business combinations, specifying when deferred income should or should not be recognized by the acquirer. The amendment is effective for public entities in fiscal years beginning after December 15, 2028, and for others after December 15, 2029, with transition options including modified prospective, modified retrospective, or full retrospective approaches. We do not expect the new guidance to have a material impact on our consolidated results of operations, financial position and cash flows as our current accounting policies on recognizing, measuring and presenting government grants are consistent with the issued amendments.

***Use of estimates and assumptions*:** The preparation of our consolidated financial statements in conformity with U.S. GAAP requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the consolidated financial statements, and the reported amounts of revenues and expenses during the reporting periods. Significant estimates and assumptions are used for, but not limited to: (1) allowance for credit losses and unbilled revenues; (2) asset impairments, including goodwill; (3) depreciable lives of assets; (4) income tax valuation allowances; (5) uncertain tax positions; (6) reserves for professional, workers' compensation, and comprehensive general insurance liability risks; (7) contingency and litigation reserves; (8) fair value measurements; (9) environmental remediation liabilities; (10) AROs; (11) pension and other postretirement employee benefits (OPEB); and (12) noncontrolling interest balances. Future events and their effects cannot be predicted with certainty; accordingly, our accounting estimates require the exercise of judgment. The accounting estimates used in the preparation of our consolidated financial statements will change as new events occur, as more experience is acquired, as additional information is obtained, and as our operating environment changes. We evaluate and update our assumptions and estimates on an ongoing basis and may employ outside specialists to assist in our evaluations, as considered necessary. Actual results could differ from those estimates.

Union collective bargaining agreements: Approximately 58% of our employees are covered by a collective bargaining agreement. There are no collective bargaining agreements that will expire within the coming year.

Note 2. Industry Regulation

Our revenues are regulated, being based on tariffs established in accordance with administrative procedures set by the various regulatory bodies. Distribution rates are established by the Maine Public Utilities Commission and transmission rates are established by the Federal Energy Regulatory Commission. The tariffs are applied based on the cost of providing service.

Electricity Distribution

The Maine distribution rate stipulation and the FERC Transmission Return on Equity (ROE) case are some of the most important specific regulatory processes that currently affect CMP.

The revenues of CMP are regulated, being based on tariffs established in accordance with administrative procedures set by the various regulatory bodies. The tariffs applied to regulated activities in the U.S. are approved by the regulatory commissions and are based on the cost of providing service. The revenues of each regulated utility are set to be sufficient to cover all its operating costs, including finance costs, and the costs of equity, the last of which reflect our capital ratio and a reasonable ROE. Generally, tariff reviews cover various years and provide for a reasonable ROE and full reconciliation of exceptional costs as identified in CMP's rate plan.

Energy costs that are set on the New England wholesale markets are passed on to consumers by Competitive Energy Providers, licensed by the MPUC. Under Maine Law, transmission and distribution utilities are prohibited from providing retail energy supply. Default retail supply is provided by Standard Offer Providers periodically selected by the MPUC through a competitive procurement process.

Transmission - FERC ROE and Other FERC Matters

CMP’s transmission rates are determined by a tariff regulated by the FERC and administered by ISO New England, Inc. (ISO-NE). Transmission rates are set annually pursuant to a FERC authorized formula that allows for recovery of direct and allocated transmission operating and maintenance expenses, and for a return of and on investment in assets.

On September 30, 2011, the Massachusetts Attorney General, Massachusetts Department of Public Utilities, Connecticut Public Utilities Regulatory Authority, New Hampshire Public Utilities Commission, Rhode Island Division of Public Utilities and Carriers, Vermont Department of Public Service, numerous New England consumer advocate agencies and transmission tariff customers collectively filed a joint complaint with the FERC, pursuant to sections 206 and 306 of the Federal Power Act, against several New England Transmission Owners (NETOs) claiming that the approved base ROE of 11.14% used by NETOs in calculating formula rates for transmission service under the ISO-New England Open Access Transmission Tariff (OATT) was not just and reasonable and seeking a reduction of the base ROE with refunds to customers for the 15-month refund periods beginning October 1, 2011 (Complaint I). Subsequent complaints were filed for 15-month refund periods beginning December 27, 2012 (Complaint II), July 31, 2014 (Complaint III) and April 29, 2016 (Complaint IV).

On October 16, 2014, the FERC issued its final decision in Complaint I, setting the base ROE at 10.57% and a maximum total ROE of 11.74% (base plus incentive ROEs) for the October 2011 - December 2012 period as well as prospectively from October 16, 2014. On March 3, 2015, the FERC upheld its decision and further clarified that the 11.74% ROE cap will be applied on a project specific basis and not on a transmission owner's total transmission return. Complaints II and III were consolidated and the administrative law judge issued an initial decision on March 22, 2016. The initial decision determined that, (1) for the fifteen month refund period in Complaint II, the base ROE should be 9.59% and that the ROE Cap (base ROE plus incentive ROEs) should be 10.42% and (2) for the fifteen month refund period in Complaint III and prospectively, the base ROE should be 10.90% and that the ROE Cap should be 12.19%. The initial decision in Complaints II and III is the administrative law judge’s recommendation to the FERC Commissioners.

CMP reserved for refunds for Complaints I, II and III consistent with the FERC's March 3, 2015 decision in Complaint I. Refunds were provided to customers for Complaint I. The CMP total reserve associated with Complaints II and III is $35.4 million as of December 31, 2025, which has not changed since December 31, 2024, except for the accrual of carrying costs. If adopted as final by the FERC, the impact of the initial decision by the FERC administrative law judge would be an additional aggregate reserve for Complaints II and III of $12.8 million, which is based upon currently available information for these proceedings.

Following various intermediate hearings, orders and appellate decisions, on October 16, 2018, the FERC issued an order directing briefs and proposing a new methodology to calculate the NETOs ROE that is contained in NETOs' transmission formula rate on file at the FERC (the October 2018 Order). Pursuant to the October 2018 Order, the NETOs filed initial briefs on the proposed methodology in all four Complaints on January 11, 2019, and replied to the initial briefs on March 8, 2019.

On November 21, 2019, the FERC issued rulings on two complaints challenging the base return on equity for Midcontinent Independent System Operator (MISO) transmission owners. These rulings established a new zone of reasonableness based on equal weighting of the DCF and capital-asset pricing model for establishing the base return on equity. This approach resulted in a base return on equity of 9.88% as the midpoint of the zone of reasonableness. Various parties requested rehearing on this decision, which was granted. On May 21, 2020, the FERC issued a ruling, which, among other things, adjusted the methodology to determine the MISO transmission owners' ROE, resulting in an increase in ROE from 9.88% to 10.02% by utilizing the risk premium model, or RPM, in addition to the DCF model and capital-asset pricing model under both prongs of Section 206 of the FPA, and calculated the zone of reasonableness into equal thirds rather than employing the quartile approach. Parties to these orders affecting the MISO transmission owners' base ROE petitioned for their review at the D.C. Circuit Court of Appeals in January 2021. The NETO's submitted an amici curia brief in support of the MISO transmission owners on March 17, 2021. On August 9, 2022, the D.C. Circuit Court vacated FERC's orders and remanded the matter back to FERC. The D.C. Circuit Court held that FERC failed to offer a reasoned explanation for its decision to reintroduce the RPM after initially, and forcefully, rejecting it and that because the FERC adopted that significant portion of its model in an arbitrary and capricious fashion, the new ROE produced by that model cannot stand. On October 17, 2024, FERC issued its order on remand in the MISO ROE complaint proceedings. In this order, FERC reduced the MISO transmission owners' base ROE to 9.98% by eliminating the risk premium model from the ROE calculation, consistent with the DC Circuit's remand, and affirmed the refunds ordered in Opinion 569 (which were not addressed on appeal by the DC Circuit). On November 13, 2024, the NETOs submitted a supplemental brief into the NETO ROE case. The supplemental brief primarily addresses distinctions between the MISO transmission owners' and the NETOs' ROE cases. On March 25, 2025, FERC issued an order on rehearing in the MISO ROE complaint proceeding that sustained the same result as the October 17, 2024 order.

MISO transmission owners affected by the October 17, 2024 order petitioned for review of the ordered refunds at the D.C. Circuit Court of Appeals in February 2025. The NETO's submitted an amici curia brief in support of the MISO transmission owners on August 21, 2025.

On March 19, 2026, the FERC issued its decision on the four Complaints. For Complaint I, FERC set the base ROE at 9.57% and a maximum total ROE of 12.09% (base plus incentive ROEs) for the October 2011 - December 2012 period as well as prospectively from October 16, 2014. The calculation method adopted uses only the DCF and capital-asset pricing models and does not adopt the use of the expected earnings and risk premium models. FERC dismissed Complaints II, III and IV. The company is reviewing the decision, including matters related to effective dates, potential rehearing or appeal. No determination has been made as to the ultimate impact, if any,

on the company's consolidated financial position, results of operations, or cash flows. We cannot predict the outcome of this proceeding.

On April 15, 2021, the FERC issued a supplemental Notice of Proposed Rulemaking (Supplemental NOPR) that proposes to eliminate the 50 basis-point ROE incentive for utilities who join Regional Transmission Organizations after three years of membership. The NETOs submitted initial comments in opposition to the Supplemental NOPR on June 25, 2021 and reply comments on July 26, 2021. If the elimination of the 50 basis-point ROE incentive adder becomes final, we estimate we would have an approximately $1 million reduction in earnings per year. We cannot predict the outcome of this proceeding.

CMP Distribution Rate Stipulation and New Renewable Source Generation

On August 11, 2022, CMP filed a three year rate plan, with adjustments to the distribution revenue requirement in each year. On June 6, 2023, the MPUC approved a Stipulation resolving all issues in the case providing for a 9.35% ROE, 50% equity ratio, and 50% earnings sharing for annual earnings in excess of 100 basis points of CMP’s allowed ROE. The Stipulation also provides for a two year forward looking rate plan with increases to occur in four equal levelized amounts every six months beginning on July 1, 2023. An increase occurred on January 1, 2024, July 1, 2024 and January 1, 2025. The amount of each increase was $16.75 million. These revenue increases include amounts for operations and maintenance but are primarily driven by increases in capital investment forecast by CMP to occur during the period covered by the Stipulation. The Stipulation also implements a service quality indicator incentive mechanism. The incentive is provided by a negative revenue adjustment mechanism that would impose a maximum of $8.8 million per year for a failure to meet specified service quality indicator targets.

CMP filed a distribution rate case on September 16, 2025. CMP proposes a five-year rate plan, which includes a multi-year capital investment plan to fund investments needed to improve reliability and resiliency as well as the customer experience. CMP also requests a significant expansion of its electric operations workforce, which will allow CMP to cost-effectively implement the proposed capital investment plan and reduce the Company’s reliance on external storm contractors. CMP’s filing estimates a revenue change in the range of $180 to $190 million in the first year of the rate plan followed by increases in the range of $55 to $65 million in the second year, $45 to $55 million in the third year, $60 to $70 million in the fourth year, and $65 to $75 million in the fifth year. On November 18, 2025, the MPUC unanimously voted to dismiss the Company’s rate case and on November 20, 2025, the Company filed a Notice of Dismissal. On November 21, 2025, numerous Parties filed in opposition to this Notice; on November 24, 2025, the MPUC closed the Docket.

On February 17, 2026, the Company filed a notice of intent to file a Rate Case on or around April 18, 2026. This will be a one-year rate plan with a rate year of May 1, 2027 - April 30, 2028. In the notice, the Company advised it will ask for approximately $70 million in temporary rates to be effective on July 1, 2026. In addition to filing its notice of intent, the Company also filed its Annual Compliance Filing on February 17 which shows approximately $109 million reduction to customer rates effective July 1, 2026, which will more than offset the temporary rate request allowing customers to still experience a rate decrease.

Pursuant to Maine law, the MPUC is authorized to conduct periodic requests for proposals seeking long-term supplies of energy, capacity or Renewable Energy Certificates (RECs) from qualifying resources. The MPUC is further authorized to order Maine transmission and distribution utilities to enter into contracts with sellers selected from the MPUC’s competitive solicitation process. Pursuant to a MPUC Order dated October 8, 2009, CMP entered into a 20-year agreement with Evergreen Wind Power III, LLC, on March 31, 2010, to purchase 80% of the

capacity and energy from Evergreen's 60 Megawatt (MW) Rollins wind farm. Pursuant to a MPUC Order dated August 27, 2013, CMP entered into a 20-year fixed rate agreement with Athens Energy, LLC (formerly Maine Wood Pellets), a 7.1 MW wood-fired biomass cogeneration facility. Pursuant to a MPUC Order dated September 22, 2016, CMP entered into a 20-year fixed rate agreement with Georges River Energy, a 7.5 MW wood-fired biomass cogeneration facility. Pursuant to a MPUC Order dated August 3, 2017, CMP entered into a 20-year fixed rate agreement with Pittsfield Solar, 9.9 MW photovoltaic facility. Pursuant to a MPUC Order dated December 18, 2017, CMP entered into a 20-year agreement with Dirigo Solar, LLC on September 10, 2018, to purchase capacity and energy from seven Dirigo solar facilities throughout CMP's service territory. Five of the seven facilities have achieved commercial operation totaling 33.37 MW. The other two projects terminated prior to achieving Commercial Operation. Pursuant to a MPUC Order dated November 6, 2019, CMP entered into a 20-year agreement with New England Aqua Ventus (formerly Maine Aqua Ventus I GP LLC) to purchase capacity and energy from an off-shore wind farm under development near Monhegan Island, Maine. This project has not achieved commercial operation. Pursuant to Maine law, the MPUC conducted two competitive solicitation processes to procure, in the aggregate, an amount of energy or RECs from Class 1A resources that is equal to 14% of retail electricity sales in the State during calendar year 2018, or 1.715 million MWh. Of that 14% total, the MPUC must acquire at least 7%, but not more than 10%. Through contracts approved in December 2020 (Tranche 1), CMP was ordered to execute 13 contracts, of which eight have been terminated. Of the five contracts remaining, two have achieved commercial operation totaling 43.5 MW. The three that have not achieved commercial operation total 50.5 MW. In October 2021, CMP executed contracts with six additional facilities (Tranche 2), of which three have since terminated. Of the three contracts remaining, one has achieved commercial operation with 132 MW. The two that have not achieved commercial operation total 95 MW. Each of the Tranche 1 and Tranche 2 contracts are for 20-year terms. In accordance with MPUC orders, CMP either sells the purchased energy, or in one case the RECs, from these facilities in the ISO New England markets, through periodic auctions of the purchased output to wholesale buyers in the New England regional market, or through a sale to a third party for the RECs. Under Maine law, CMP is assured recovery of any differences between power purchase costs and achieved market revenues through a reconcilable component of its retail distribution rates. Although the MPUC has conducted multiple requests for proposals under Maine law, and has tentatively accepted long-term proposals from other sellers, these selections have not yet resulted in additional currently effective contracts with CMP. In accordance with Commission Orders, on December 8, 2025 CMP signed an Agreement for the Transfer of Environmental Attributes with H.Q. Energy Services (U.S.) Inc. ("HQ"), for the transfer of RECs from HQ to CMP. Under the Agreement, HQ will transfer 500,000 RECs to CMP annually for a duration of 20 years.

Minimum Equity Requirements for Regulated Subsidiaries

CMP is subject to a minimum equity ratio requirement that is tied to the capital structure assumed in establishing revenue requirements. Pursuant to these requirements CMP must maintain a minimum equity ratio equal to the ratio in its currently effective rate plan or decision measured using a trailing 13-month average. On a monthly basis CMP must maintain a minimum equity ratio of no less than 300 basis points below the equity ratio used to set rates. The minimum equity ratio requirement has the effect of limiting the amount of dividends that may be paid and may, under certain circumstances, require that the parent contribute equity capital. CMP is prohibited by regulation from lending to unregulated affiliates. CMP has also agreed to minimum equity ratio requirements in certain short-term borrowing agreements. These requirements are lower than the regulatory requirements. We are in compliance with these requirements.

Note 3. Regulatory Assets and Liabilities

Pursuant to the requirements concerning accounting for regulated operations we capitalize, as regulatory assets, incurred and accrued costs that are probable of recovery in future electric rates. We base our assessment of whether recovery is probable on the existence of regulatory orders that allow for recovery of certain costs over a specific period or allow for reconciliation or deferral of certain costs. When costs are not treated in a specific order we use regulatory precedent to determine if recovery is probable. We also record, as regulatory liabilities, obligations to refund previously collected revenue or to spend revenue collected from customers on future costs. Of the total regulatory assets net of regulatory liabilities, approximately $303.6 million represents the offset of accrued liabilities for which funds have not been expended. The remainder is either included in rate base or accruing carrying costs.

Details of other regulatory assets and other regulatory liabilities are shown in the tables below. They result from various regulatory orders that allow for the deferral and/or reconciliation of specific costs. Regulatory assets and regulatory liabilities are classified as current when recovery or refund in the coming year is allowed or required through a specific order or when the rates related to a specific regulatory asset or regulatory liability are subject to automatic annual adjustment.

Regulatory assets at December 31, 2025 and 2024 consisted of:

As of December 31,	2025	2024
(Thousands)		
Asset retirement obligation	$ 965	$ 965
Deferred meter replacement costs	15,049	17,067
Energy efficiency programs	5,694	3,306
Environmental remediation costs	897	—
Federal tax depreciation normalization adjustment	11,779	12,215
Non-bypassable charges (stranded costs)	68,727	86,324
Pension and other post retirement benefits	85,568	98,313
Pension and other post retirement benefits cost deferrals	10,430	11,018
Revenue decoupling mechanism	4,995	4,467
Storm costs	219,466	363,014
Transmission revenue reconciliation mechanism	85,043	68,911
Unamortized losses on reacquired debt	—	26
Unfunded future income taxes	283,296	244,849
Other	2,928	7,553
Total regulatory assets	**794,837**	**918,028**
Less: current portion	271,895	278,267
Total non-current regulatory assets	**$ 522,942**	**$ 639,761**

Asset retirement obligations represent the differences in timing of the recognition of costs associated with our AROs and the collection of such amounts through rates. This amount is being amortized at the related depreciation and accretion amounts of the underlying liability.

Deferred meter replacement costs represent the deferral of the net book value of retired meters which were replaced by advanced metering infrastructure meters. This amount is being amortized at the related existing depreciation amounts.

Energy efficiency programs represent the difference between revenue billed to customers through an energy efficiency charge and the costs of our energy efficiency programs as approved by the state authorities.

Environmental remediation costs include spending that has occurred and is eligible for future recovery in customer rates. The amortization period will be established in future proceedings and will depend upon the timing of spending for the remediation costs.

Federal tax depreciation normalization adjustment represents the deferral of the normalization of change impacts in book lives and the pass back of theoretical reserves associated with Power Tax deferred income tax.

Non-bypassable charges (stranded costs) represents costs that resulted from government-mandated long term Purchased Power Agreement (PPA) contracts between CMP and power producers at prices above current market rates which must be resold to the market at the current going rate. These costs and assets became stranded as CMP was prohibited from owning power and was therefore forced to sell the power back at the market rate, significantly lower than the PPA price. The monthly stranded cost over/under expense compared to revenue is recorded to be recovered in future years.

Pension and other postretirement benefits represent the actuarial losses on the pension and other postretirement plans that will be reflected in customer rates when they are amortized and recognized in future pension expenses. Because no funds have yet been expended for this regulatory asset, it does not accrue carrying costs and is not included within the rate base.

Pension and other postretirement benefits cost deferrals represent the distribution related portion of lump-sum pension settlement expense to be amortized in future rates.

Revenue decoupling mechanism represents the mechanism established to disassociate the utility's profits from its delivery/commodity sales.

Storm costs are allowed in rates based on an estimate of the routine costs of service restoration. CMP is also allowed to defer unusually high levels of service restoration costs resulting from major storms when they meet certain criteria for severity and duration. CMP’s total deferral, including carrying costs, was $219.5 million at December 31, 2025 and $363.0 million at December 31, 2024.

Transmission revenue reconciliation mechanism reflects any differences in actual costs in the rate year from those used to set rates. The ATU (Annual Transmission True Up) portion is recovered over the subsequent January to December period. When the ATU is known we record it as a regulatory asset (regulatory liability), with an offset to revenues, and amortize it over the twelve-month period as the related revenues are collected (refunded).

Unamortized losses on reacquired debt represent deferred losses on debt reacquisitions that will be recovered over the remaining original amortization period of the reacquired debt.

Unfunded future income taxes represent unrecovered federal and state income taxes primarily resulting from regulatory flow through accounting treatment. The income tax benefits or charges for certain plant related timing differences, such as removal costs, are immediately flowed through to, or collected from, customers. This amount is being amortized as the amounts related to temporary differences that give rise to the deferrals are recovered in rates.

Other includes various items subject to reconciliation such as CRM&B (Billing System Costs), OPA Assessment for Non-Wire Alternatives, 100 BP Recovery, Rate Case Expenses, Electric Lifeline Program (ELP), Revenue Levelization and Arrears Forgiveness.

Regulatory liabilities at December 31, 2025 and 2024 consisted of:

As of December 31, (Thousands)	2025	2024
Accrued removal obligations	$ 8,523	$ 17,184
Environmental remediation costs	—	962
Pension and other post retirement benefits	14,097	—
Rate refund - FERC ROE proceeding	35,356	32,757
Tax Act - remeasurement	233,924	231,180
Transmission revenue reconciliation mechanism	6,378	5,990
Other	19,269	2,160
Total regulatory liabilities	**317,547**	**290,233**
Less: current portion	2,167	10,054
Total non-current regulatory liabilities	**$ 315,380**	**$ 280,179**

Accrued removal obligations represent the differences between asset removal costs incurred and amounts collected in rates for those costs. The amortization period is dependent upon the asset removal costs of underlying assets and the life of the utility plant.

Pension and other postretirement benefit plans represent the actuarial gains on the pension and other postretirement plans that will be reflected in customer rates when they are amortized and recognized in future pension expenses.

Rate refund - FERC ROE proceedings: see Note 2.

Tax Act – remeasurement represents the impact from re-measurement of deferred income tax balances as a result of the Tax Act enacted by the U.S. federal government on December 22, 2017. Reductions in accumulated deferred income tax balances due to the reduction in the corporate income tax rates from 35% to 21% under the provisions of the Tax Act will result in amounts previously collected from utility customers for these deferred taxes to be refundable to such customers, generally through reductions in future rates.

Transmission revenue reconciliation mechanism reflects any differences in actual costs in the rate year from those used to set rates. The ATU is recovered over the subsequent January to December period. When the ATU is known we record it as a regulatory asset (regulatory liability), with an offset to revenues, and amortize it over the twelve-month period as the related revenues are collected (refunded).

Other includes various items subject to reconciliation such as ELP, Vegetation Management and Tax Basis Repairs.

Note 4. Revenue

We recognize revenue when we have satisfied our obligations under the terms of a contract with a customer, which generally occurs when the control of promised goods or services transfers to the customer. We measure revenue as the amount of consideration we expect to receive in exchange for providing those goods or services. Contracts with customers may include multiple performance obligations. For such contracts, we allocate revenue to each performance obligation based on its relative standalone selling price. We generally determine standalone selling prices based on the prices charged to customers. Certain revenues are not within the scope of ASC 606, such as revenues from leasing, derivatives, other revenues that are not from contracts with customers and other contractual rights or obligations, and we account for such revenues in accordance with the applicable accounting standards. We exclude from revenue amounts collected on behalf of third

parties, including any such taxes collected from customers and remitted to governmental authorities. We do not have any material significant payment terms because we receive payment at or shortly after the point of sale.

The following describes the principal activities from which we generate revenue.

CMP derives its revenue primarily from tariff-based sales of electricity service to customers in the Maine area with no defined contractual term. For such revenues, we recognize revenues in an amount derived from the commodities delivered to customers. Other major sources of revenue are electricity transmission and wholesale sales of electricity.

Tariff-based sales are subject to the corresponding state regulatory authorities, which determine prices and other terms of service through the ratemaking process. Maine state law prohibits the utility from providing the electricity commodity to customers. For customers that receive their commodity from another supplier, the utility acts as an agent and delivers the electricity provided by that supplier. Revenue in those cases is only for providing the service of delivery of the commodity.

Transmission revenue results from others' use of the utility's transmission system to transmit electricity and is subject to FERC regulation, which establishes the prices and other terms of service. Long-term wholesale sales of electricity are based on individual bilateral contracts.

The performance obligation in all arrangements is satisfied over time because the customer simultaneously receives and consumes the benefits as CMP delivers or sells the electricity or provides the transmission service.

CMP records revenue from Alternative Revenue Programs (ARPs), which is not ASC 606 revenue. Such programs represent contracts between the utilities and their regulators. CMP ARPs include revenue decoupling mechanisms, other ratemaking mechanisms, annual revenue requirement reconciliations, and other demand side management programs.

CMP also has various other sources of revenue including billing, collection, other administrative charges, sundry billings, rent of utility property, and miscellaneous revenue. It classifies such revenues as other ASC 606 revenues to the extent they are not related to revenue generating activities from leasing, ARPs, or other activities.

Revenues disaggregated by major source for the years ended December 31, 2025 and 2024 are as follows:

Years Ended December 31,	2025	2024
(Thousands)		
Regulated operations – electricity	$ 1,373,319	$ 1,165,913
Other (a)	21,188	36,871
Revenue from contracts with customers	**1,394,507**	**1,202,784**
Leasing revenue	1,595	1,583
Alternative revenue programs	56,517	51,375
Other revenue	24,747	19,130
Total operating revenues	**$ 1,477,366**	**$ 1,274,872**

(a) Primarily includes certain intra-month trading activities, billing, collection, administrative charges, sundry billings, and other miscellaneous revenue.

Note 5. Goodwill

We do not amortize goodwill, but perform our annual impairment assessment testing at least annually as described in Note 1, in the fourth quarter, as of October 1. Our qualitative assessment involves evaluating key events and circumstances that could affect the fair value of our company, as well as other factors. Events and circumstances evaluated include macroeconomic conditions, industry, regulatory and market considerations, cost factors and their effect on earnings and cash flows, overall financial performance as compared with projected results and actual results of relevant prior periods, other relevant entity-specific events, and events affecting CMP.

Our quantitative impairment testing includes various assumptions, primarily the discount rate, and forecasted cash flows. We use a discount rate that is developed using market participant assumptions, which consider the risk and nature of our cash flows and the rates of return market participants would require in order to invest their capital in CMP. We test the reasonableness of the conclusions of our quantitative impairment testing using a range of discount rates and a range of assumptions for long-term cash flows.

We had no impairment of goodwill in 2025 and 2024 as a result of our qualitative impairment testing. There were no events or circumstances subsequent to our annual impairment assessment for 2025 or 2024 that required us to update the assessment.

The carrying amount of goodwill was $324.9 million at both December 31, 2025 and 2024, with no accumulated impairment losses and no changes during 2025 and 2024.

Note 6. Income Taxes

Current and deferred taxes charged to expense (benefit) for the years ended December 31, 2025 and 2024 consisted of:

Years Ended December 31,	2025	2024
(Thousands)		
Current		
Federal	$ 3,609	$ 7,211
State	5,837	(1,605)
Current taxes charged to expense	**9,446**	**5,606**
Deferred		
Federal	41,329	(301)
State	21,939	26,791
Deferred taxes charged to expense	**63,268**	**26,490**
Total Income Tax Expense	**$ 72,714**	**$ 32,096**

The differences between tax expense per the consolidated statements of income and tax expense at the 21% statutory federal tax rate for the years ended December 31, 2025 and 2024 consisted of:

Years Ended December 31,	2025	2024
(Thousands)		
Tax expense at federal statutory rate	$ 50,059	$ 44,837
Property related flow through	(8,404)	(9,379)
State tax expense, net of federal benefit	21,873	19,967
Excess ADIT amortization	1,974	(10,255)
Excess ADIT remeasurement	—	(13,107)
Earnings of less than 80% owned subsidiary	6,707	—
Other, net	505	33
Total Income Tax Expense	**$ 72,714**	**$ 32,096**

Income tax expense for the year ended December 31, 2025 was $22.7 million higher than it would have been at the statutory federal income tax rate of 21% due predominately to state taxes, tax on earnings of less than 80% owned subsidiary, and excess Accumulated Deferred Income Tax (ADIT) amortization, partially offset by property related flow through. This resulted in an effective tax rate of 30.5%. Income tax expense for the year ended December 31, 2024 was $12.7 million lower than it would have been at the statutory federal income tax rate of 21% due predominately to excess ADIT amortization and property related flow through, partially offset by state taxes. This resulted in an effective tax rate of 15.0%.

In 2024, the IRS issued private letter rulings (“PLRs”) 20242002, 20242003, and 20242004 to a non-affiliate. Within these rulings the IRS held that the normalization rules do not permit a utility’s net operating loss carryforward (“NOL”) Deferred Tax Asset (related to certain depreciation differences) to be reduced by intercompany tax allocation payments. In response, CMP analyzed its federal NOLs as of 12/31/2017 and recorded an excess ADIT adjustment of $13.1 million to comply with the IRS rulings, reducing its income tax expense for the year ended December 31, 2024.

Deferred tax assets and liabilities as of December 31, 2025 and 2024 consisted of:

December 31,	2025	2024
(Thousands)		
Non-current Deferred Income Tax Liabilities (Assets)		
Property related	$ 862,366	$ 796,452
Unfunded future income taxes	68,251	63,407
Pension and other postretirement benefits	15,317	14,544
Regulatory liability due to "Tax Cuts and Jobs Act"	(65,627)	(64,844)
Federal and state tax credits	(15,605)	(15,605)
Federal and state NOL's	(25,979)	(75,670)
Storm costs	61,570	101,842
Other	32,372	30,531
Total Non-current Deferred Income Tax Liabilities	**$ 932,665**	**$ 850,657**
Deferred tax assets	$ 107,211	$ 156,119
Deferred tax liabilities	1,039,876	1,006,776
Net Accumulated Deferred Income Tax Liabilities	**$ 932,665**	**$ 850,657**

CMP had gross federal net operating losses of $58.5 million, gross Maine state net operating losses of $243.7 million and valuation allowance for Maine state net operating losses deferred tax asset of $7.7 million as of December 31, 2025. CMP had gross federal net operating losses of $259.3 million, gross Maine state net operating losses of $381.1 million and no valuation allowance for Maine state net operating losses deferred tax asset as of December 31, 2024.

Valuation allowances are recorded to reduce deferred tax assets when it is more likely than not that all or a portion of a tax benefit will not be realized.

CMP had $15.6 million of CAMT credit carryforward as of December 31, 2025 and 2024, which will be available in future periods to offset regular federal income tax that exceeds CAMT.

Uncertain tax positions have been classified as non-current unless expected to be paid within one year. In 2025 and 2024, we netted our liability for uncertain tax positions against all same jurisdiction deferred tax assets, net operating losses and tax credit carryforwards. Our policy is to recognize interest and penalties on uncertain tax positions as a component of interest expense in the consolidated statements of income.

The reconciliation of unrecognized income tax benefits for the years ended December 31, 2025 and 2024 consisted of:

Years Ended December 31,	2025	2024
(Thousands)		
Beginning Balance	$ 6,106	$ 8,989
Reduction for tax positions related to prior years	(2,036)	(2,883)
Ending Balance	**$ 4,070**	**$ 6,106**

Unrecognized income tax benefits represent income tax positions taken on income tax returns but not yet recognized in the consolidated financial statements. The accounting guidance for uncertainty in income taxes provides that the financial effects of a tax position shall initially be recognized in the financial statements when it is more likely than not based on the technical merits that the position will be sustained upon examination, assuming the position will be audited and the taxing authority has full knowledge of all relevant information.

There were no additional accruals for interest and penalties on tax reserves as of December 31, 2025 or 2024.

Note 7. Non-current Debt

Long-term debt as of December 31, 2025 and 2024 consisted of:

As of December 31,		2025		2024	
(Thousands, except interest rates)	Maturity Dates	Balances	Interest Rates	Balances	Interest Rates
First mortgage bonds (a)	2026-2052	$ 1,635,000	1.87%-6.04%	$ 1,450,000	1.87%-6.04%
Senior unsecured notes	2026-2037	125,000	5.375%-6.40%	140,000	5.375%-6.40%
Unamortized debt issuance costs and discount		(5,422)		(5,642)	
Total Debt		**1,754,578**		**1,584,358**	
Less: debt due within one year, included in current liabilities		79,412		79,373	
Total Non-current Debt		**$ 1,675,166**		**$ 1,504,985**	

(a) The first mortgage bonds are secured by a first mortgage lien on substantially all of Net Utility Plant In Service.

On December 15, 2025, CMP issued $125 million aggregate principal amount of Green First Mortgage Bonds maturing in 2035 at an interest rate of 5.10% and $125 million aggregate principal amount of Green First Mortgage Bonds maturing in 2037 at an interest rate of 5.25%.

On November 20, 2024, CMP issued $87 million aggregate principal amount of Green First Mortgage Bonds maturing in 2036 at an interest rate of 5.31% and $88 million aggregate principal amount of Green First Mortgage Bonds maturing in 2039 at an interest rate of 5.41%.

Long-term debt, including sinking fund obligations, due during the next five years consist of:

2026	2027	2028	2029	2030	Total
(Thousands)					
$ 79,412	$ —	$ 60,000	$ 55,000	$ 150,000	$ 344,412

We have no debt covenant requirements related to the maintenance of financial ratios in our long-term debt agreements at December 31, 2025 and 2024.

Note 8. Bank Loans and Other Borrowings

CMP had no notes payable balances outstanding at December 31, 2025 and $92.4 million notes payable outstanding at December 31, 2024. CMP funds short-term liquidity needs through an agreement among Avangrid's regulated utility subsidiaries (the "Virtual Money Pool Agreement"), a bi-lateral intercompany credit agreement with Avangrid (the "Bi-Lateral Intercompany Facility") and a bank provided credit facility to which CMP is a party (the "AGR Credit Facility"), each of which are described below.

The Virtual Money Pool Agreement is an agreement among the investment grade-rated, regulated utility subsidiaries of Avangrid under which the parties to this agreement may lend to or borrow from each other. This Agreement allows Avangrid to optimize cash resources within the regulated utility companies which are prohibited by regulation from lending to unregulated affiliates. The interest rate on transactions under this agreement is the A2/P2 non-financial 30-day commercial paper rate published by the Federal Reserve. CMP has a lending/borrowing limit of $100 million under this agreement. CMP had no debt outstanding under this agreement at December 31, 2025 and $92.4 million outstanding under this agreement at December 31, 2024.

The Bi-Lateral Intercompany Facility provides for borrowing of up to $500 million from Avangrid at the A2/P2 non-financial 30-day commercial paper rate published by the Federal Reserve. CMP had no debt outstanding under this agreement at both December 31, 2025 and 2024.

On December 22, 2025, the utilities (New York State Electric and Gas Corporation ("NYSEG"), Rochester Gas and Electric Corporation ("RG&E"), Central Maine Power Company ("CMP"), The United Illuminating Company ("UI"), Connecticut Natural Gas Corporation ("CNG"), The Southern Connecticut Gas Company ("SCG") and The Berkshire Gas Company ("BGC")) executed a new credit facility with an aggregate limit of $1,500 million and a termination date of December 23, 2030. Under the terms of the revolving credit facility, each borrower has a maximum borrowing entitlement, or sublimit, which can be periodically adjusted to address specific short-term capital funding needs, subject to the maximum limit contained in the agreement. NYSEG has a maximum sublimit of $1,000 million, RG&E has $500 million, CMP has $375 million, UI has a maximum sublimit of $150 million, SCG has a maximum sublimit of $75 million, and CNG and BCG have maximum sublimits of $50 million. The new facility has set minimum sublimits of $600 million for NYSEG, $250 million for RG&E, $150 million for CMP, $25 million for UI, CNG, SCG, and BGC. The facility fees range from 5 to 25 basis points. CMP had not borrowed under this agreement as of both December 31, 2025 and 2024.

In the AGR Credit Facility we covenant not to permit, without the consent of the lender, our ratio of total indebtedness to total capitalization to exceed 0.65 to 1.00 at any time. For purposes of

calculating the maximum ratio of indebtedness to total capitalization, the facility excludes from net worth the balance of accumulated other comprehensive loss as it appears on the consolidated balance sheet. The facility contains various other covenants, including a restriction on the amount of secured indebtedness we may maintain. Continued un-remedied failure to comply with those covenants for five business days after written notice of such failure from the lender constitutes an event of default and would result in acceleration of maturity. Our ratio of indebtedness to total capitalization pursuant to the revolving credit facility was 0.38 to 1.00 at December 31, 2025. We are not in default as of December 31, 2025.

Note 9. Redeemable Preferred Stock

We have redeemable preferred stock that contains a feature that could lead to potential redemption-triggering events that are not solely within our control.

At December 31, 2025 and 2024, our redeemable preferred stock was:

				Amount (Thousands)	
Series	Par Value per Share	Redemption Price per Share	Shares Authorized and Outstanding(a)	2025	2024
CMP, 6% Non-callable	$ 100	$ —	5,713	$ 571	$ 571
Total				**$ 571**	**$ 571**

(a) At December 31, 2025 and 2024, CMP had 2,300,000 shares of $100 par value preferred stock authorized but unissued.

CMP Group owns 3,792 shares of the 5,713 shares outstanding.

Note 10. Leases

We have operating leases for office buildings, facilities, vehicles and certain equipment. Our finance leases are primarily related to electric distribution, transmission and other. Certain of our lease agreements include rental payments adjusted periodically for inflation or are based on other periodic input measures. Our leases do not contain any material residual value guarantees or material restrictive covenants. Our leases have remaining lease terms of 1 year to 33 years, some of which may include options to extend the leases for up to 10 years, and some of which may include options to terminate the leases within one year. We consider extension or termination options in the lease term if it is reasonably certain we will exercise the option.

The components of lease cost and other information related to leases were as follows:

For the Years Ended December 31, (Thousands)	2025	2024
Lease cost		
Finance lease cost		
Amortization of right-of-use assets	$ 282	$ 240
Operating lease cost	1,541	1,299
Short-term lease cost	41	46
Variable lease cost	29	40
Total lease cost	**$ 1,893**	**$ 1,625**

Consolidated balance sheet and other information for the years ended December 31, 2025 and 2024 was as follows:

As of December 31,		2025		2024
(Thousands, except lease term and discount rate)				
Operating Leases				
Operating lease right-of-use assets	$	14,682	$	15,958
Operating lease liabilities, current		1,739		1,104
Operating lease liabilities, long-term		14,964		16,741
Total operating lease liabilities	$	16,703	$	17,845
Finance Leases				
Other assets	$	2,949	$	3,232
Other current liabilities		—		5
Other non-current liabilities		—		(85)
Total finance lease liabilities	$	—	$	(80)
Weighted-average Remaining Lease Term (years)				
Finance leases		—		0.33
Operating leases		14.18		14.31
Weighted-average Discount Rate				
Finance leases		— %		3.47 %
Operating leases		4.15 %		4.09 %

For the years ended December 31, 2025 and 2024, supplemental cash flow information related to leases was as follows:

For the Years Ended December 31,		2025		2024
(Thousands)				
Cash paid for amounts included in the measurement of lease liabilities:				
Operating cash flows from operating leases	$	2,303	$	1,665
Operating cash flows from finance leases	$	—	$	—
Financing cash flows from finance leases	$	(81)	$	97
Right-of-use assets obtained in exchange for lease obligations:				
Finance leases	$	—	$	—
Operating leases	$	417	$	3,150

As of December 31, 2025, maturities of lease liabilities were as follows:

(Thousands)	Finance Leases	Operating Leases
Year ending December 31,		
2026	$ —	$ 2,278
2027	—	1,748
2028	—	1,737
2029	—	1,731
2030	—	1,172
Thereafter	—	14,183
Total lease payments	**—**	**22,849**
Less: imputed interest	—	(6,146)
Total	**$ —**	**$ 16,703**

Most of our leases do not provide an implicit rate in the lease; thus we use our incremental borrowing rate based on the information available at the commencement date in determining the present value of lease payments.

Note 11. Commitments and Contingent Liabilities

Power purchase contracts including non-utility generator

We recognized expense of approximately $26.9 million for non-utility generator power in 2025 and $29.7 million in 2024 recorded for non-utility generator power in the consolidated statements of income.

Note 12. Environmental Liability

From time to time environmental laws, regulations and compliance programs may require changes in our operations and facilities and may increase the cost of electric service.

Waste sites

The Environmental Protection Agency (EPA) and various state environmental agencies, as appropriate, have notified us that we are among the potentially responsible parties that may be liable for costs incurred to remediate certain hazardous substances at five waste sites, two of which currently have on-going costs. The five sites do not include sites where coal gas was manufactured in the past, which are discussed below. With respect to the five sites, one site is included in Maine's Uncontrolled Sites Program (MUSP), one is included on the Massachusetts Non-Priority Confirmed Disposal Site list and one of the sites is also included on the National Priorities list. Any liability may be joint and several for certain of those sites. We have recorded an estimated liability of $1.4 million related to the five sites at December 31, 2025.

We have recorded an estimated liability of $0.8 million at December 31, 2025, related to three additional sites where we believe it is probable that we will incur remediation costs and/or monitoring costs as a result of being regulated under State Resource Conservation and Recovery Act (RCRA) program. We have one site subject to Maine's Waste Management Program with a recorded estimated liability of $0.2 million at December 31, 2025 and one site subject to Maine’s Hazardous Waste, Septage and Solid Waste Management Act with a recorded estimated liability of $2.6 million at December 31, 2025. It is reasonably possible the ultimate cost to remediate the sites may be significantly more than the accrued amount. Our estimate for costs to remediate the

ten total sites ranges from $4.0 million to $11.1 million as of December 31, 2025. Factors affecting the estimated remediation amount include the remedial action plan selected, the extent of site contamination and the portion attributed to us. We recorded a corresponding regulatory asset, net of insurance recoveries, because we expect to recover the net costs in rates.

Manufactured gas plants

We have a program to investigate and perform necessary remediation and/or monitoring at our three sites where coal gas was manufactured in the past. The three sites are in Maine's Voluntary Response Action Program, Brownfield Cleanup Program or MUSP.

Our estimate for costs related to investigation, remediation and/or monitoring of the sites ranges from $1.2 million to $1.3 million at December 31, 2025. The estimate could change materially based on facts and circumstances derived from site investigations, changes in required remedial action, changes in technology relating to remedial alternatives, changes due to property use and changes to current laws and regulations.

The liability to investigate and perform remediation, as necessary, at the known inactive coal gas manufacturing sites was $1.2 million at December 31, 2025. We recorded a corresponding regulatory asset because we expect to recover the net costs in rates.

Keddy Mill Superfund Site

On September 30, 2024, CMP received a special notice letter pursuant to Section 122(e) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA) from the U.S. EPA related to contamination at the Keddy Mill Superfund Site in Windham, Maine. The letter identifies ITT, LLC as an existing responsible party for the remediation activities at the site, notifies CMP that it is a potentially responsible party (PRP) with respect to the site, informs CMP of planned remediation activities, and encourages CMP to meet with ITT to reach consensus on an allocation of liability for those remediation activities. CMP has potential liability for site clean-up under CERCLA/Superfund because CMP is the successor in interest to Cumberland Securities Corporation (CSC), which purchased Keddy Mill in 1940 and sold off the site through three sales (1945, 1954, and 1955). CMP’s potential liability is premised on the presence of PCBs in soil near where transformers and substations were once located, which represents a small footprint of the overall site, and most of the PCB contamination at the site post-dates CSC’s ownership.

To date, EPA had proposed total costs of approximately $25 million – which includes $7.6 million in response costs and estimated costs of $17 million to clean up the site to EPA’s proposed standards. There is a strong argument that Keddy Mill should only be remediated to an industrial facility standard, as opposed to a more stringent (and more costly) residential standard as proposed by EPA.

On December 17, 2024, CMP had an informational meeting with counsel for ITT. ITT advised that it believes there is a third solvent PRP that should be included in the discussions, and that EPA’s Record of Decision and negotiations of an allocation of costs are premature. EPA, however, required ITT and CMP to submit a good faith offer, which was submitted on March 31, 2025. ITT and CMP met with EPA on June 17, 2025 to discuss the appropriate level of cleanup for the site. EPA and ITT/CMP have continued negotiations via letter and via in-person meetings since then, with EPA continuing to argue for the higher clean up standard. EPA’s most recent position is that any change to the clean-up standard would need to occur during litigation in a challenge to the remedy. We cannot predict the outcome of these proceedings.

Our environmental liabilities are recorded on an undiscounted basis and are expected to be paid through the year 2058.

Note 13. Accounting for Derivative Instruments and Hedging Activities

We are exposed to certain risks relating to our ongoing business operations. The primary risk we manage by using derivative instruments is commodity price risk. In accordance with the accounting requirements concerning derivative instruments and hedging activities, we recognize all derivative instruments as either assets or liabilities at fair value on our consolidated balance sheet. For financial statement presentation, we offset fair value amounts recognized for derivative instruments and fair value amounts recognized for the right to reclaim or the obligation to return cash collateral arising from derivative instruments executed with the same counterparty under a master netting arrangement.

The financial instruments we hold or issue are not for trading or speculative purposes.

The effect of hedging instruments on OCI and income for the years ended December 31, 2025 and 2024, respectively, consisted of:

Years Ended December 31,	Gain Recognized in OCI on Derivatives	Location of Gain (Loss) Reclassified From Accumulated OCI into Income	(Loss) Gain Reclassified From Accumulated OCI into Income	Total Amount per Income Statement
(Thousands)				
2025				
Interest rate contracts	$ —	Interest expense	$ (181)	$ 78,683
Total	**$ —**		**$ (181)**	
2024				
Interest rate contracts	$ —	Interest expense	$ (181)	$ 70,443
Total	**$ —**		**$ (181)**	

The amount in AOCI related to previously settled interest rate hedging contracts at December 31 is a net loss of $1.6 million for 2025 and $1.8 million for 2024. For the year ended December 31, 2025, we recorded $0.2 million in net derivative losses related to discontinued cash flow hedges. We will amortize approximately $0.2 million of discontinued cash flow hedges in 2026.

Note 14. Fair Value of Financial Instruments and Fair Value Measurements

The estimated fair value of debt amounted to $1,724 million and $1,489 million as of December 31, 2025 and 2024, respectively. The estimated fair value was determined, in most cases, by discounting the future cash flows at market interest rates. The interest rate curve used to make these calculations takes into account the risks associated with the electricity industry and the credit ratings of the borrowers in each case. The fair value hierarchy for the fair value of debt is considered as Level 2.

We had no transfers to or from Level 1 and 2 during the year ended December 31, 2025 and 2024. Our policy is to recognize transfers in and transfers out as of the actual date of the event or change in circumstances that causes a transfer, if any.

Note 15. Accumulated Other Comprehensive Loss

Accumulated Other Comprehensive Loss for the years ended December 31, 2025 and 2024 consisted of:

	Balance December 31, 2023	2024 Change	Balance December 31, 2024	2025 Change	Balance December 31, 2025
(Thousands)					
Amortization of pension cost for nonqualified plans and current year actuarial gain, net of income tax expense of $14 for 2024 and $2 for 2025	$ (1,643)	$ 36	$ (1,607)	$ 6	$ (1,601)
Unrealized gain on derivatives qualified as hedges:					
Reclassification adjustment for loss on settled cash flow treasury hedges, net of income tax expense of $51 for both 2024 and 2025		130		130	
Net unrealized gain on derivatives qualified as hedges	(1,414)	130	(1,284)	130	(1,154)
Accumulated Other Comprehensive Loss	**$ (3,057)**	**$ 166**	**$ (2,891)**	**$ 136**	**$ (2,755)**

No Accumulated Other Comprehensive Loss is attributable to the noncontrolling interest for the above periods.

Note 16. Post-Retirement and Similar Obligations

We have funded non-contributory defined benefit pension plans that cover all eligible employees. The plans provide defined benefits based on years of service and final average salary for employees hired before 2002. Most employees hired in 2002, or later based upon the plan, are covered under a cash balance plan or formula where their benefit accumulates based on a percentage of annual salary and credited interest. During 2013, we announced that we would discontinue, effective December 31, 2013, the cash balance accruals for all non-union employees covered under the cash balance plans or formula. At the same time, the plans were closed to newly-hired non-union employees. The plans had been closed to newly-hired union employees in prior years. CMP's unionized employees covered under the cash balance plans ceased to receive accruals as of December 31, 2014. Their earned balances will continue to accrue interest but will no longer be increased by a flat dollar amount or percentage of pay, as defined by the plan. Instead, they will receive a contribution to their account under their respective company’s defined contribution plan. During 2022, the Company decided to freeze pension benefit accruals and contribution credits for non-union employees and transition their retirement benefits to the 401(k) Plan. Employees not participating in a defined benefit plan are eligible to receive an enhanced or core 401(k) Company matching contribution, depending on whether they are union or non-union employees, respectively.

The company maintains a 401(k) Savings and Retirement Plan (the Plan) for all eligible employees as defined in the Plan agreement. Participants in the Plan may contribute a percentage of their compensation and the company may match a predetermined percentage of the participant contributions. Expenses under the Plan for the Company totaled approximately $15.7 million for 2025 and $10.8 million for 2024.

We also have other postretirement health care benefit plans covering substantially all of our employees. The health care plans are contributory with participants' contributions adjusted annually.

Non-Qualified Retirement Benefit Plans

We also sponsor various unfunded non-qualified pension plans for certain current employees, former employees and former directors. The total liability for these plans, which is included in Other non-current liabilities on our consolidated balance sheets, was $1.1 million at both December 31, 2025 and 2024.

Qualified Retirement Benefit Plans

Obligations and funded status as of December 31, 2025 and 2024 consisted of:

	Pension Benefits		Postretirement Benefits	
As of December 31,	**2025**	**2024**	**2025**	**2024**
(Thousands)				
Change in benefit obligation				
Benefit obligation as of January 1,	**$ 258,925**	**$ 286,951**	**$ 63,369**	**$ 68,088**
Service cost	1,081	1,884	199	299
Interest cost	13,337	13,025	2,167	3,037
Amendments	—	—	(29,803)	—
Curtailments/Settlements	(5,122)	—	—	—
Actuarial (gain) loss	5,696	(20,782)	6,079	(302)
Benefits paid	(23,459)	(22,153)	(8,089)	(7,753)
Benefit obligation as of December 31,	**$ 250,458**	**$ 258,925**	**$ 33,922**	**$ 63,369**
Change in plan assets				
Fair value of plan assets at January 1,	**$ 242,070**	**$ 264,412**	**$ 7,343**	**$ 13,032**
Actual return on plan assets	23,483	(189)	614	1,180
Employer contributions	—	—	838	884
Benefits paid	(23,459)	(22,153)	(8,089)	(7,753)
Fair value of plan assets at December 31,	**$ 242,094**	**$ 242,070**	**$ 706**	**$ 7,343**
Funded status at December 31,	**$ (8,364)**	**$ (16,855)**	**$ (33,216)**	**$ (56,026)**

During 2025, the pension obligation had an actuarial loss of $5.7 million. This loss was primarily driven by $7.3 million loss from decrease in discount rates. During 2025, the pension benefit obligation had a reduction of $5.1 million from curtailments. The curtailments were driven by a Company decision to freeze pension benefit accruals for union employees. During 2025, the postretirement benefit obligation had an actuarial loss of $6.1 million. This loss was primarily driven by $1.4 million loss from decrease in discount rates and $4.7 million loss from changes in demographic assumptions. During 2025, the postretirement benefit obligation had a reduction of $29.8 million due to plan amendments. The amendments were driven by a Company decision to reduce postretirement benefit accruals for union and non-union employees.

During 2024, the pension obligation had an actuarial gain of $20.8 million primarily driven by $20.8 million gain from increase in discount rates. During 2024, the postretirement benefit obligation had an actuarial gain of $0.3 million primarily driven by $3.9 million gain from increase in discount rates and $0.1 million gain from changes in demographic assumptions offset by $3.7 million loss from assumption changes in health care trend rates.

Amounts recognized in the consolidated balance sheets as of December 31, 2025 and 2024 consisted of:

	Pension Benefits		Postretirement Benefits	
As of December 31,	2025	2024	2025	2024
(Thousands)				
Non-current liabilities	$ (8,364)	$ (16,855)	$ (33,216)	$ (56,026)

We have determined that we are allowed to defer as regulatory assets or regulatory liabilities items that would otherwise be recorded in accumulated other comprehensive income pursuant to the accounting requirements concerning defined benefit pension and other postretirement plans.

Amounts recognized as regulatory assets or regulatory liabilities for the years ended December 31, 2025 and 2024 consisted of:

	Pension Benefits		Postretirement Benefits	
Years Ended December 31,	2025	2024	2025	2024
(Thousands)				
Net loss	$ 85,568	$ 92,343	$ 11,521	$ 5,970
Prior service credit	$ —	$ —	$ (25,618)	$ —

Our accumulated benefit obligation (ABO) for all qualified defined benefit pension plans was $250.5 million and $253.3 million as of December 31, 2025 and 2024, respectively. Our postretirement benefits were partially funded at December 31, 2025 and 2024.

The projected benefit obligation (PBO) and ABO exceeded the fair value of pension plan assets for our qualified plans as of December 31, 2025 and 2024. The following table shows the aggregate projected and accumulated benefit obligations and the fair value of plan assets for the relevant periods.

As of December 31,	2025	2024
(Thousands)		
Projected benefit obligation	$ 250,458	$ 258,925
Accumulated benefit obligation	$ 250,458	$ 253,345
Fair value of plan assets	$ 242,094	$ 242,070

As of December 31, 2025 and 2024, the accumulated postretirement benefits obligation for all the qualified plans exceeded the fair value of plan assets.

Components of net periodic benefit cost and other changes in plan assets and benefit obligations recognized in income and regulatory assets and liabilities for the years ended December 31, 2025 and 2024 consisted of:

Years Ended December 31, (Thousands)	Pension Benefits 2025	Pension Benefits 2024	Postretirement Benefits 2025	Postretirement Benefits 2024
Net Periodic Benefit Cost:				
Service cost	$ 1,081	$ 1,884	$ 199	$ 299
Interest cost	13,337	13,025	2,167	3,037
Expected return on plan assets	(16,871)	(20,018)	(297)	(624)
Amortization of prior service benefit	—	—	(4,184)	—
Amortization of net loss	737	797	210	2
Net Periodic Benefit Cost	**$ (1,716)**	**$ (4,312)**	**$ (1,905)**	**$ 2,714**
Other changes in plan assets and benefit obligations recognized in regulatory assets and regulatory liabilities:				
Net loss (gain)	$ (917)	$ (575)	$ 5,762	$ (858)
Amortization of net loss	(737)	(797)	(210)	(2)
Curtailments	(5,122)	—	—	—
Prior service (credit)/cost	—	—	(29,802)	—
Amortization of prior service benefit	—	—	4,184	—
Total Other Changes	**$ (6,776)**	**$ (1,372)**	**$ (20,066)**	**$ (860)**
Total Recognized	**$ (8,492)**	**$ (5,684)**	**$ (21,971)**	**$ 1,854**

We include the net periodic benefit cost in other operating expenses for the service component and other deductions for the non-service component. The net periodic benefit cost for postretirement benefits represents the amount expensed for providing health care benefits to retirees and their eligible dependents.

The weighted-average assumptions used to determine benefit obligations as of December 31, 2025 and 2024 consisted of:

As of December 31,	Pension Benefits 2025	Pension Benefits 2024	Postretirement Benefits 2025	Postretirement Benefits 2024
Discount rate	5.19%	5.49%	4.78%	5.33%
Rate of compensation increase	N/A	3.00% for Union	3.00% - 4.50%	3.00% for Union
Interest crediting rate	3.62%	3.63%	N/A	N/A

The discount rate is the rate at which the benefit obligations could presently be effectively settled. We determined the discount rates by developing yield curves derived from a portfolio of high grade non-callable bonds with yields that closely match the duration of the expected cash flows of our benefit obligations.

The weighted-average assumptions used to determine net periodic benefit cost for the years ended December 31, 2025 and 2024 consisted of:

	Pension Benefits		Postretirement Benefits	
Years Ended December 31,	2025	2024	2025	2024
Discount rate	5.49% / 5.60%	4.75 %	5.33%/5.32%/ 5.00%	4.65 %
Expected long-term return on plan assets	6.75 %	7.25 %	6.20 %	6.60 %
Rate of compensation increase	3.00% for Union	3.00% for Union	3.00% for Union	3.00% for Union

We developed our expected long-term rate of return on plan assets assumption based on a review of long-term historical returns for the major asset classes, the target asset allocations, and the effect of rebalancing of plan assets discussed below. Our analysis considered current capital market conditions and projected conditions. Our policy is to calculate the expected return on plan assets using the market related value of assets. We amortize unrecognized actuarial gains and losses using the standard amortization methodology under which amounts in excess of 10% of the greater of the projected benefit obligation or market related value are amortized over the plan participants' average remaining service to retirement.

Assumed health care cost trend rates used to determine benefit obligations as of December 31, 2025 and 2024 consisted of:

As of December 31,	2025	2024
Health care cost trend rate assumed for next year	8.40% / 10.10%	8.90% / 10.60%
Rate to which cost trend rate is assumed to decline (ultimate trend rate)	4.50% / 4.50%	4.50% / 4.50%
Year that the rate reaches the ultimate trend rate	2039 / 2039	2039 / 2039

Contributions

We make annual contributions in accordance with our funding policy of not less than the minimum amounts as required by applicable regulations. We expect to contribute $1.2 million to our pension plans and $3.2 million to our other postretirement plans during 2026.

Estimated future benefit payments

Expected benefit payments and Medicare Prescription Drug, Improvement and Modernization Act of 2003 (Medicare Act) subsidy receipts reflecting expected future service as of December 31, 2025 consisted of:

	Pension Benefits	Postretirement Benefits	Medicare Act Subsidy Receipts
(Thousands)			
2026	$ 24,672	$ 3,975	$ 3
2027	$ 23,672	$ 3,566	$ 2
2028	$ 22,704	$ 3,229	$ 2
2029	$ 22,023	$ 2,983	$ 2
2030	$ 21,580	$ 2,748	$ 2
2031 - 2035	$ 95,793	$ 12,026	$ 6

Plan assets

Our pension benefits plan assets are held in a master trust providing for a single trustee/ custodian, a uniform investment manager lineup, and an efficient, cost-effective means of

allocating expenses and investment performance to each plan under the master trust. Our primary investment objective is to ensure that current and future benefit obligations are adequately funded and with volatility commensurate with our tolerance for risk. Preservation of capital and achievement of sufficient total return to fund accrued and future benefits obligations are of highest concern. Our primary means for achieving capital preservation is through diversification of the trust's investments while avoiding significant concentrations of risk in any one area of the securities markets. Within each asset group, further diversification is achieved through utilizing multiple asset managers and systematic allocation to various asset classes and providing broad exposure to different segments of the equity, fixed income and alternative investment markets.

The asset allocation policy is the most important consideration in achieving our objective of superior investment returns while minimizing risk. We have established a target asset allocation policy within allowable ranges for our pension benefits plan assets within broad categories of asset classes made up of Return-Seeking and Liability-Hedging investments. We currently have target allocations ranging from 15%-70% for Return-Seeking assets and 30%-85% for Liability-Hedging assets. Return-Seeking assets include investments in domestic, international and emerging equity, real estate, global asset allocation strategies and hedge funds. Liability-Hedging investments generally consist of long-term corporate bonds, annuity contracts, long-term treasury STRIPS and opportunistic fixed income investments. Systematic rebalancing within the target ranges increases the probability that the annualized return on the investments will be enhanced, while realizing lower overall risk, should any asset categories drift outside their specified ranges.

The fair values of pension benefits plan assets, by asset category, as of December 31, 2025, consisted of:

As of December 31, 2025		**Fair Value Measurements**		
(Thousands)	**Total**	**Level 1**	**Level 2**	**Level 3**

Other investments measured at net asset value	30,467			
Total	**$ 242,070**			

Valuation Techniques

We value our pension benefits plan assets as follows:

- Cash and cash equivalents - Level 1: at cost, plus accrued interest, which approximates fair value. Level 2: proprietary cash associated with other investments, based on yields currently available on comparable securities of issuers with similar credit ratings.
- U.S. government securities - at the closing price reported in the active market in which the security is traded.
- Common stocks - at the closing price reported in the active market in which the individual investment is traded.
- Corporate bonds - based on yields currently available on comparable securities of issuers with similar credit ratings.
- Preferred stocks - at the closing price reported in the active market in which the individual investment is traded.
- Common collective trusts/Registered investment companies - Level 1: at the closing price reported in the active market in which the individual investment is traded. Level 2: the fair value is primarily derived from the quoted prices in active markets of the underlying securities. Because the fund shares are offered to a limited group of investors, they are not considered to be traded in an active market.
- Other investments, principally annuity and fixed income - based on yields currently available on comparable securities of issuers with similar credit ratings.
- Other investments measured at net asset value (NAV) - fund shares offered to a limited group of investors and alternative investments, such as private equity and real estate oriented investments, partnership/joint ventures and hedge funds are valued using the NAV as a practical expedient.

Our postretirement benefits plan assets are held with trustees in multiple voluntary employees' beneficiary association (VEBA) and 401(h) arrangements and are invested among and within various asset classes to achieve sufficient diversification in accordance with our risk tolerance. This is achieved for our postretirement benefits plan assets through the utilization of multiple institutional mutual and money market funds, providing exposure to different segments of the fixed income, equity and short-term cash markets. Substantially all of the postretirement benefits plan assets are invested in VEBA and 401(h) arrangements that are not subject to income taxes with the remainder being invested in arrangements subject to income taxes.

We have established a target asset allocation policy within allowable ranges for postretirement benefits plan assets of 49%-69% for equity securities and 31%-51% for fixed income investments. Equity investments are diversified across U.S. and non-U.S. stocks, investment styles, and market capitalization ranges. Fixed income investments are primarily invested in U.S. bonds and may also include some non-U.S. bonds. We primarily minimize the risk of large losses through diversification but also through monitoring and managing other aspects of risk through quarterly investment portfolio reviews. Systematic rebalancing within target ranges increases the probability of increasing the projected expected return, while mitigating risk, should any asset categories drift outside their specified ranges.

The fair values of other postretirement benefits plan assets, by asset category, as of December 31, 2025, consisted of:

As of December 31, 2025		Fair Value Measurements

Miscellaneous	(4,167)	(3,736)
Total other income (deductions), net	**$ 570**	**$ 11**

Note 18. Related Party Transactions

Certain Networks subsidiaries, including CMP, borrow from AGR, the parent of Networks, through intercompany revolving credit agreements. For CMP, the intercompany revolving credit agreements provide access to supplemental liquidity. See Note 8 for further detail on the credit facility with AGR.

AGR, through its affiliates, provides administrative and management services to Networks operating utilities, including CMP, pursuant to service agreements. The cost of those services is allocated in accordance with methodologies set forth in the service agreements. The cost allocation methodologies vary depending on the type of service provided. Management believes such allocations are reasonable. The charge for operating and capital services provided to CMP by AGR and its affiliates was $53.8 million and $57.4 million for 2025 and 2024, respectively. Cost for services includes amounts capitalized in utility plant, which was approximately $11.3 million in 2025 and $9.9 million in 2024. The remainder was primarily recorded as operations and maintenance expense. The charges for services provided by CMP to AGR and its subsidiaries were approximately $15.7 million for 2025 and $8.7 million for 2024. All charges for services are at cost. All of the charges associated with services provided are recorded as revenues to offset other operating expenses on the financial statements.

The balance in accounts payable to affiliates of $52.7 million at December 31, 2025 and the balance of $39.6 million at December 31, 2024 is mostly payable to Avangrid Service Company.

The balance in accounts receivable from affiliates of $8.9 million at December 31, 2025 and the balance of $25.5 million at December 31, 2024 is mostly receivable from NECEC.

Notes receivable from affiliates of $0.03 million outstanding at December 31, 2025 and $0.2 million outstanding at December 31, 2024 are primarily receivable from Avangrid, Inc.

In 2018, the New England Clean Energy Connect, or NECEC, transmission project, proposed in a joint bid by CMP and Hydro-Québec, was selected by the Massachusetts electric distribution utilities and the Massachusetts Department of Energy Resources in the Commonwealth of Massachusetts' 83D clean energy Request for Proposal. The NECEC transmission project includes a 145-mile transmission line linking the electrical grids in Québec, Canada and New England.

On January 4, 2021, in connection with certain stipulation agreements (Stipulations), CMP transferred the NECEC project to NECEC Transmission LLC pursuant to the terms of a transfer agreement dated November 3, 2020.

As consideration for the transfer of the NECEC project, NECEC Transmission, LLC agreed to pay CMP the sum total of $60 million, payable in one hundred and sixty equal installments of $375,000 each, due the first business day of each January, April, July and October, to be included in CMP's NECEC Rate Relief Fund as established by the Stipulations. Similarly and in connection with the Stipulations, CMP will receive $80 million, payable in one hundred and sixty equal installments of $500,000, due the first business day of each January, April, July and October, from funding provided by H.Q. Energy Services (U.S.) Inc., an unaffiliated entity, which will be included in CMP's NECEC Rate Relief Fund. For both years ended December 31, 2025 and 2024, CMP has received $1.5 million in payments from NECEC Transmission LLC related to the Rate Relief Fund.

Note 19. Subsequent Events

The company has performed a review of subsequent events through March 26, 2026, which is the date these consolidated financial statements were available to be issued.

Independent Auditors' Report

Stockholder and The Board of Directors
New York State Electric & Gas Corporation:

Opinion

We have audited the consolidated financial statements of New York State Electric & Gas Corporation and its subsidiary (the Company), which comprise the consolidated balance sheets as of December 31, 2025 and 2024, and the related consolidated statements of income, comprehensive income, changes in common stock equity, and cash flows for the years then ended, and the related notes to the consolidated financial statements.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2025 and 2024, and the results of its operations and its cash flows for the years then ended in accordance with U.S. generally accepted accounting principles.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are required to be independent of the Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with U.S. generally accepted accounting principles, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for one year after the date that the consolidated financial statements are available to be issued.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the consolidated financial statements.

KPMG LLP, a Delaware limited liability partnership, and its subsidiaries are part of the KPMG global organization of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the consolidated financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

The accompanying notes are an integral part of our consolidated financial statements.

Notes to Consolidated Financial Statements

Note 1. Summary of Significant Accounting Policies, New Accounting Pronouncements and Use of Estimates

Background and nature of operations: New York State Electric & Gas Corporation (NYSEG, the company, we, our, us) conducts regulated electricity transmission and distribution operations and regulated natural gas transportation, storage and distribution operations in upstate New York. It also generates electricity, primarily from its several hydroelectric stations. NYSEG serves approximately 924,000 electricity and 271,000 natural gas customers as of December 31, 2025, in its service territory of approximately 20,000 square miles, which is located in the central, eastern and western parts of the state of New York and has a population of approximately 2.5 million. The larger cities in which NYSEG serves electricity and natural gas customers are Binghamton, Elmira, Auburn, Geneva, Ithaca and Lockport. We operate under the authority of the New York State Public Service Commission (NYPSC) and are also subject to regulation by the Federal Energy Regulatory Commission (FERC).

NYSEG is a subsidiary of Avangrid Networks, Inc. (Networks), which is a wholly-owned subsidiary of Avangrid, Inc. (AGR), which is a wholly-owned subsidiary of Iberdrola, S.A. (Iberdrola), a corporation organized under the laws of the Kingdom of Spain.

Agreement and Plan of Merger: On May 17, 2024, AGR entered into an Agreement and Plan of Merger (the Merger Agreement) with Iberdrola and Arizona Merger Sub, Inc (Merger Sub). As a result of the consummation of the Merger on December 23, 2024 (closing date), Merger Sub merged with and into Avangrid (the Merger), with Avangrid continuing as the surviving corporation and a wholly-owned subsidiary of Iberdrola. On the closing date, each share of common stock issued and outstanding immediately prior to the closing date (other than common stock owned by the Merger, Merger Sub or any other direct or indirect wholly owned Subsidiary of the Merger, and in each case not held on behalf of the third parties (collectively, the Excluded Shares)) was converted into a right to receive $35.75 per share of common stock in cash, without interest.

On the closing date, (i) all shares of common stock ceased to be outstanding, were cancelled and ceased to exist and (ii) each Excluded Share ceased to be outstanding and was cancelled without payment of any consideration and ceased to exist. As a result of the consummation of the Merger on December 23, 2024, Iberdrola became the direct owner of 100 shares of common stock of Avangrid which represents the only outstanding capital of the Company. On the closing date, the New York Stock Exchange (NYSE) filed with the Securities and Exchange Commission (the SEC) a notification of removal from listing on Form 25 in order to delist the common stock from the NYSE and deregister the common stock under Section 12(b) of the Securities Exchange Act of 1934, as amended (the Exchange Act). Following the effectiveness of the Form 25, on January 2, 2025, Avangrid filed with the SEC a Form 15 requesting the termination of registration of the common stock under Section 12(g) of the Exchange Act and the suspension of reporting obligations under Section 13 and 15(d) of the Exchange Act with respect to the common stock.

Basis of presentation**:** The accompanying consolidated financial statements have been prepared in accordance with generally accepted accounting principles in the United States (U.S. GAAP) and are prepared on a consolidated basis, and therefore include the accounts of NYSEG and all NYSEG VIEs where NYSEG has identified that it is the primary beneficiary. All intercompany transactions and accounts have been eliminated in consolidation in all periods presented. The accounting records of NYSEG are also maintained in accordance with the uniform system of accounts prescribed by the Federal Energy Regulatory Commission (FERC).

Significant Accounting Policies: We consider the following policies to be the most significant in understanding the judgments that are involved in preparing our consolidated financial statements:

Variable Interest Entity: NYSEG Storm Funding, LLC (NYSEGSF), is a bankruptcy remote, special purpose subsidiary wholly-owned and consolidated by NYSEG. NYSEGSF was formed in 2024 for the sole purpose of issuing storm recovery bonds to finance certain of NYSEG's unrecovered regulatory assets related to storm costs incurred in New York prior to July 1, 2024.

In February 2025, NYSEGSF issued $711 million of storm cost recovery bonds at interest rates ranging from 4.71% to 5.16% and final maturity ranging from May 1, 2031 to May 1, 2037, and used the proceeds to acquire storm recovery property from NYSEG. The storm recovery property was created by state legislation and the NYPSC Storm Recovery Cost Financing Order for the purpose of financing legacy storm costs incurred prior to July 1, 2024.

The storm recovery property acquired includes the right to impose, bill, collect and adjust a non-bypassable charge from all NYSEG customers until the bonds are paid in full and all financing costs have been recovered. The storm recovery bonds are secured by the storm recovery property and cash collections from the storm recovery charges are the sole source of funds to satisfy the debt obligation. The bondholders have no recourse to NYSEG.

NYSEGSF is considered a variable interest entity (VIE) primarily because its equity capitalization is insufficient to support its operations. NYSEG has the power to direct the significant activities of the VIE as described above and therefore NYSEG is considered the primary beneficiary.

***Principles of consolidation*:** We consolidate the entities in which we have a controlling financial interest, after the elimination of intercompany transactions. We account for investments in common stock where we have the ability to exercise significant influence, but not control, using the equity method of accounting.

***Revenue recognition*:** We recognize revenues when we transfer control of promised goods or services to our customers in an amount that reflects the consideration we expect to be entitled to in exchange for those goods or services. Refer to Note 4 for further details.

***Regulatory accounting*:** We account for our regulated operations in accordance with the authoritative guidance applicable to entities with regulated operations that meet the following criteria: (i) rates are established or approved by an independent, third-party regulator; (ii) rates are designed to recover the entity's specific costs of providing the regulated services or products and; (iii) there is a reasonable expectation that rates are set at levels that will recover the entity's costs and can be collected from customers. Regulatory assets primarily represent incurred costs that have been deferred because of their probable future recovery from customers through regulated rates. Regulatory liabilities represent: (i) the excess recovery of costs or accrued credits that have been deferred because it is probable such amounts will be returned to customers through future regulated rates; or (ii) billings in advance of expenditures for approved regulatory programs.

We amortize regulatory assets and liabilities and recognize the related expense or revenue in our consolidated statements of income consistent with the recovery or refund included in customer rates. We believe it is probable that our currently recorded regulatory assets and liabilities will be recovered or settled in future rates.

***Utility plant*:** We account for utility plant at historical cost. In cases where we are required to dismantle installations or to recondition the site on which they are located, we record the estimated cost of removal or reconditioning as an asset retirement obligation (ARO) and add an equal amount to the carrying amount of the asset.

Development and construction of our various facilities are carried out in stages. We expense project costs during early stage development activities. Once we achieve certain development milestones and it is probable that we can obtain future economic benefits from a project, we capitalize salaries and wages for persons directly involved in the project, and engineering, permits, licenses, wind measurement and insurance costs. We periodically review development projects in construction for any indications of impairment.

We transfer assets from “Construction work in progress” to “Utility plant” when they are available for service.

We determine depreciation expense for utility plant in service using the straight-line method, based on the average service lives of groups of depreciable property, which include estimated cost of removal. Consistent with FERC accounting requirements, we charge the original cost of utility plant retired or otherwise disposed of to accumulated depreciation. Our composite rate for depreciation was 2.4% of average depreciable property for both 2025 and 2024. We amortize our capitalized software cost which is included in common plant, using the straight line method, based on useful lives of 7 to 27 years. Capitalized software costs were approximately $347.3 million as of December 31, 2025 and $321.3 million as of December 31, 2024. Depreciation expense was $234.0 million in 2025 and $214.8 million in 2024. Amortization of capitalized software was $18.6 million in 2025 and $15.5 million in 2024.

We charge repairs and minor replacements to operating expenses, and capitalize renewals and betterments, including certain indirect costs.

Allowance for funds used during construction (AFUDC) is a non-cash item that represents the allowed cost of capital, including a return on equity (ROE), used to finance construction projects. We record the portion of AFUDC attributable to borrowed funds as a reduction of interest expense and record the remainder as other income. AFUDC rates are determined in accordance with applicable FERC guidelines for each regulated utility using an annual rate that is compounded semiannually.

Our balances of major classes of utility plant and associated useful lives are shown below as of December 31:

Utility Plant	Estimated useful life range (years)	2025	2024
(Thousands)			
Electric	2-80	$ 7,274,122	$ 6,647,665
Natural Gas	2-75	1,534,169	1,444,527
Common	7-70	1,351,962	1,236,134
Total Utility Plant in Service		**10,160,253**	**9,328,326**
Total accumulated depreciation		(2,669,368)	(2,552,644)
Total Net Utility Plant in Service		**7,490,885**	**6,775,682**
Construction work in progress		1,004,523	903,915
Total Utility Plant		**$ 8,495,408**	**$ 7,679,597**

Leases: We determine if an arrangement is a lease at inception. We classify a lease as a finance lease if it meets any one of specified criteria that in essence transfers ownership of the underlying asset to us by the end of the lease term. If a lease does not meet any of those criteria, we classify it as an operating lease. On our consolidated balance sheets, we include, for operating leases: "Operating lease right-of-use (ROU) assets" and "Operating lease liabilities (current and non-

current)"; and for finance leases: finance lease ROU assets in "Other assets" and liabilities in "Other current liabilities" and "Other liabilities."

ROU assets represent our right to use an underlying asset for the lease term and lease liabilities represent our obligation to make lease payments arising from the lease. We recognize lease ROU assets and liabilities at commencement of an arrangement based on the present value of lease payments over the lease term. We use the incremental borrowing rate based on information available at the lease commencement date to determine the present value of future payments, except when the rate implicit in the lease is determinable. A lease ROU asset also includes any lease payments made at or before commencement date, minus any lease incentives received, and includes initial direct costs incurred. We do not record leases with an initial term of 12 months or less on the consolidated balance sheet for all classes of underlying assets, and we recognize lease expense for those leases on a straight-line basis over the lease term. We include variable lease payments that depend on an index or a rate in the ROU asset and lease liability measurement based on the index or rate at the commencement date, or upon a modification. We do not include variable lease payments that do not depend on an index or a rate in the ROU asset and lease liability measurement. A lease term includes an option to extend or terminate the lease when it is reasonably certain that we will exercise that option. We recognize lease (rent) expense for operating lease payments on a straight-line basis over the lease term, or we recognize the amount eligible for recovery under our rate plan, such as actual amounts paid. We amortize finance lease ROU assets on a straight-line basis over the lease term and recognize interest expense based on the outstanding lease liability.

We have lease agreements with lease and non-lease components, and account for lease components and associated non-lease components together as a single lease component, for all classes of underlying assets.

Impairment of long-lived assets: We evaluate utility plant and other long-lived assets for impairment when events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment evaluation is based on an undiscounted cash flow analysis at the lowest level to which cash flows of the long-lived assets or asset groups are largely independent of the cash flows of other assets and liabilities. We are required to recognize an impairment loss if the carrying amount of the asset exceeds the undiscounted future net cash flows associated with that asset.

The impairment loss to be recognized is the amount by which the carrying amount of the long-lived asset exceeds the asset's fair value. Depending on the asset, fair value may be determined by use of a discounted cash flow model, with assumptions consistent with a market participant's view of the exit price of the asset.

***Fair value measurement*:** Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants as of the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place in either the principal market for the asset or liability, or, in the absence of a principal market, in the most advantageous market for the asset or liability.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset according to its highest and best use, or by selling it to another market participant that would use the asset according to its highest and best use.

We use valuation techniques that are appropriate in the circumstances and for which sufficient data is available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs. All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorized within the fair value hierarchy based on the transparency of input to the valuation of an asset or liability as of the measurement date.

The three input levels of the fair value hierarchy are as follows:

- Level 1 - inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.
- Level 2 - inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability either directly or indirectly, for substantially the full term of the contract.
- Level 3 - one or more inputs to the valuation methodology are unobservable or cannot be corroborated with market data.

Categorization within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. Certain investments are not categorized within the fair value hierarchy. These investments are measured based on the fair value of the underlying investments but may not be readily redeemable at that fair value.

***Derivatives and hedge accounting*:** Derivatives are recognized on our consolidated balance sheets at their fair value, except for certain electricity commodity purchases and sales contracts for both capacity and energy (physical contracts) that qualify for, and are elected under, the normal purchases and normal sales exception. To be a derivative under the accounting standards for derivatives and hedging, an agreement would need to have a notional and an underlying, require little or no initial net investment and could be net settled. We recognize changes in the fair value of a derivative contract in earnings unless specific hedge accounting criteria are met.

Derivatives that qualify and are designated for hedge accounting are classified as cash flow hedges. We report the gain or loss on the derivative instrument as a component of Other Comprehensive Income (OCI) and later reclassify amounts into earnings when the underlying transaction occurs, which we present in the same income statement line item as the earnings effect of the hedged item. If the amounts in OCI are probable of recovery in the ratemaking process, then the OCI is reclassified as a regulatory asset or liability. For all designated and qualifying hedges, we maintain formal documentation of the hedge and effectiveness testing in accordance with the accounting standards for derivatives and hedging. If we determine that the derivative is no longer highly effective as a hedge, we will discontinue hedge accounting prospectively. For cash flow hedges of forecasted transactions, we estimate the future cash flows of the forecasted transactions and evaluate the probability of the occurrence and timing of such transactions. If we determine it is probable that the forecasted transaction will not occur, we immediately recognize in earnings hedge gains and losses previously recorded in OCI.

Changes in conditions or the occurrence of unforeseen events could require discontinuance of the hedge accounting or could affect the timing of the reclassification of gains or losses on cash flow hedges from OCI into earnings. We record changes in the fair value of electric and natural gas hedge contracts to derivative assets or liabilities with an offset to regulatory assets or regulatory liabilities.

We offset fair value amounts recognized for derivative instruments and fair value amounts recognized for the right to reclaim cash collateral or the obligation to return cash collateral arising from derivative instruments executed with the same counterparty under a master netting arrangement.

***Cash and cash equivalents*:** Cash and cash equivalents include cash, bank accounts, and other highly liquid short-term investments. We consider all highly liquid investments with a maturity date of three months or less when acquired to be cash equivalents and include those investments in "Cash and cash equivalents." Restricted cash represents cash legally set aside for a specified purpose or as part of an agreement with a third party, including funds held in the storm recovery trust that are restricted and can only be used to satisfy obligations of the storm-recovery bonds. Restricted cash is included in "Other non-current assets" on our consolidated balance sheets. We classify book overdrafts representing outstanding checks in excess of funds on deposit as "Accounts payable and accrued liabilities" on our consolidated balance sheets. We report changes in book overdrafts in the operating activities section of the consolidated statements of cash flows.

Concentration of risk: We maintain our cash and cash equivalents in accounts with major financial institutions in the form of demand deposits and money market accounts. Deposits in these financial institutions may exceed the amount of federal deposit insurance provided on such deposits.

Consolidated statements of cash flows: Supplemental disclosure of cash flow information is as follows:

		2025		2024
(Thousands)				
Cash paid (refunded) during the years ended December 31:				
Interest, net of amounts capitalized	$	146,750	$	96,949
Income taxes refunded, net	$	(5,583)	$	(27,329)

Of the income taxes refunded, substantially all was refunded by AGR under the tax sharing agreement. Interest capitalized was $17.8 million in 2025 and $20.5 million in 2024. Accrued liabilities for utility plant additions were $273.3 million and $179.5 million as of December 31, 2025 and 2024, respectively.

Broker margin accounts: We maintain accounts with clearing firms that require initial margin deposits upon the establishment of new positions, primarily related to natural gas and electricity derivatives, as well as maintenance margin deposits in the event of unfavorable movements in market valuation for those positions. We show the amount reflecting those activities as broker margin accounts on our consolidated balance sheets.

***Trade receivables and unbilled revenues, net of allowance for credit losses*:** We record trade receivables at amounts billed to customers and we record unbilled revenues based on an estimate of energy delivered or services provided to customers. The estimates for unbilled revenues are determined based on various assumptions, including current month energy load requirements, billing rates by customer class and delivery loss factors. Changes in those assumptions could significantly affect the estimated amounts of unbilled revenues.

The allowance for credit losses is our best estimate of the amount of probable credit losses in our existing trade receivables, determined based on experience for each service region. Each month we review our allowance for credit losses and past due accounts by age. When we believe that a receivable will not be recovered, we charge off the account balance against the allowance.

Changes in assumptions about input factors and customer receivables, which are inherently uncertain and susceptible to change from period to period, could significantly affect the allowance for credit losses estimates.

Trade receivables at December 31 include unbilled revenues of $130.5 million for 2025 and $115.4 million for 2024, and are shown net of an allowance for credit losses at December 31 of $73.8 million for 2025 and $68.6 million for 2024. Trade receivables do not bear interest, although late fees may be assessed. Credit loss expense was $49.9 million in 2025, including $0 million of arrears forgiveness balances. Credit loss expense was $55.1 million in 2024, including $0.8 million of arrears forgiveness balances. Arrears forgiveness balances are recovered through a tariff over a three year period that began August 1, 2022 for Phase 1 and a two and a half year-period that began on March 1, 2023 for Phase 2.

Trade receivables include amounts due under deferred payment arrangements (DPAs). When a residential customer becomes delinquent in making payments, the NYPSC requires us to allow the customer to enter into a DPA to settle the account balance. A DPA allows the account balance to be paid in installments without interest over an extended period of time, which generally exceeds one year, by negotiating mutually acceptable payment terms. Generally, we must continue to serve a customer who cannot pay an account balance in full if the customer: (i) pays a reasonable portion of the balance; (ii) agrees to pay the balance in installments; and (iii) agrees to pay future bills within 30 days until the DPA is paid in full. Failure to make payments on a DPA results in the full amount of a receivable under a DPA being due. These accounts are part of the regular operating cycle and we classify them as short term.

We establish our allowance for credit losses, including for unbilled revenue (also referred to as contract assets), by using both historical average loss percentages to project future losses, and by establishing a specific allowance for known credit issues or for specific items not considered in the historical average calculation. We consider whether we need to adjust historical loss rates to reflect the effects of current conditions and forecasted changes considering various economic indicators (e.g., Gross Domestic Product, Personal Income, Consumer Price Index, Unemployment Rate) over the contractual life of the trade receivables. We write off amounts when we have exhausted reasonable collection efforts. The allowance for credit losses for DPAs at December 31 was $38.9 million for 2025 and $31.5 million for 2024. DPA receivable balances at December 31 were $58.4 million for 2025 and $52.3 million for 2024.

Debentures, bonds and bank borrowings: We record bonds, debentures and bank borrowings as a liability equal to the proceeds of the borrowings. We treat the difference between the proceeds and the face amount of the issued liability as discount or premium and accrete the amounts as interest expense or income over the life of the instrument. We defer incremental costs associated with the issuance of the debt instruments and amortize them over the same period as debt discount or premium. We present bonds, debentures and bank borrowings net of unamortized discount, premium and debt issuance costs on our consolidated balance sheets.

Inventory*:* Inventory comprises fuel and natural gas in storage and materials and supplies. We own natural gas that is stored in third-party owned underground storage facilities, which we record as inventory. We price injections of inventory into storage at the market purchase cost at the time of injection, and price withdrawals of working gas from storage at the weighted-average cost in storage. We continuously monitor the weighted-average cost of gas value to ensure it remains at the lower of cost and net realizable value. We report inventories to support gas operations on our consolidated balance sheets within “Fuel and natural gas in storage.”

We also have materials and supplies inventories that are used for construction of new facilities and repairs of existing facilities. These inventories are carried and withdrawn at the lower of cost and net realizable value and reported on the consolidated balance sheets within “Materials and supplies.” We combine inventory items for the consolidated statement of cash flows presentation purposes.

In addition, stand-alone renewable energy credits that are generated or purchased and held for sale are recorded at the lower of cost or net realizable value and are reported on our consolidated balance sheets within “Materials and supplies.”

Government grants: We record government grants as a reduction to the related utility plant to be recovered through rate base, in accordance with the prescribed FERC accounting.

In accounting for government grants related to operating and maintenance costs, we recognize amounts receivable as an offset to expenses in the consolidated statements of income in the period in which we incur the expenses.

The changes in government grants recorded as a reduction to the related utility plant as of December 31, 2025 and 2024 consisted of:

(Thousands)	Government grants	Total
As of December 31, 2023	**$ 10,492**	**$ 10,492**
Disposals	—	—
Recognized in income	(291)	(291)
As of December 31, 2024	**$ 10,201**	**$ 10,201**
Disposals	—	—
Recognized in income	(290)	(290)
As of December 31, 2025	**$ 9,911**	**$ 9,911**

We are required to comply with certain terms and conditions applicable to each grant and, if a disqualifying event should occur as specified in the grant's terms and conditions, we are required to repay the grant funds to the government. We believe we are in compliance with each grant's terms and conditions as of December 31, 2025 and 2024.

Deferred income: Apart from government grants, we occasionally receive payments from transactions in advance of the resulting performance obligations arising from the transaction. It is our policy to defer such payments on our consolidated balance sheets and amortize them into earnings when revenue recognition criteria are met.

Asset retirement obligations**:** We record the fair value of the liability for an asset retirement obligation (ARO) and a conditional ARO in the period in which it is incurred, capitalizing the cost by increasing the carrying amount of the related long-lived asset. The ARO is associated with our long-lived assets and primarily consists of obligations related to removal or retirement of: asbestos, polychlorinated biphenyl-contaminated equipment, gas pipeline and cast iron gas mains. We adjust the liability periodically to reflect revisions to either the timing or amount of the original estimated undiscounted cash flows over time. We accrete the liability to its present value each period and depreciate the capitalized cost over the useful life of the related asset. Upon settlement we will either settle the obligation at its recorded amount or incur a gain or a loss. We defer any timing differences between rate recovery and depreciation expense and accretion as either a regulatory asset or a regulatory liability.

The term conditional ARO refers to an entity's legal obligation to perform an asset retirement activity in which the timing or method of settlement are conditional on a future event that may or may not be within the entity's control. If an entity has sufficient information to reasonably estimate the fair value of the liability for a conditional ARO, it must recognize that liability at the time the liability is incurred.

The following table reconciles the beginning and ending aggregate carrying amount of the ARO for the years ended December 31, 2025 and 2024.

Years Ended December 31,		2025		2024
(Thousands)				
ARO, beginning of year	$	10,767	$	11,078
Liabilities settled during the year		(920)		(893)
Accretion expense		565		582
ARO, end of year	**$**	**10,412**	**$**	**10,767**

We have AROs for which we have not recognized a liability because the fair value cannot be reasonably estimated due to indeterminate settlement dates, including: the removal of hydroelectric dams due to structural inadequacy or for decommissioning; the removal of property upon termination of an easement, right-of-way or franchise; and costs for abandonment of certain types of gas mains.

***Accrued removal obligations*:** We meet the requirements concerning accounting for regulated operations and recognize a regulatory liability for the difference between removal costs collected in rates and actual costs incurred. We classify those amounts as accrued removal obligations.

***Environmental remediation liability*:** In recording our liabilities for environmental remediation costs the amount of liability for a site is the best estimate, when determinable; otherwise it is based on the minimum liability or the lower end of the range when there is a range of estimated losses. We record our environmental liabilities on an undiscounted basis.

Post-employment and other employee benefits: We sponsor defined benefit pension plans that cover eligible employees. We also provide health care and life insurance benefits through various postretirement plans for eligible retirees.

We evaluate our actuarial assumptions on an annual basis and consider changes based on market conditions and other factors. All of our qualified defined benefit plans are funded in amounts calculated by independent actuaries, based on actuarial assumptions proposed by management.

We account for defined benefit pension or other postretirement plans, recognizing an asset or liability for the overfunded or underfunded plan status. For a pension plan, the asset or liability is the difference between the fair value of the plan’s assets and the projected benefit obligation. For any other postretirement benefit plan, the asset or liability is the difference between the fair value of the plan’s assets and the accumulated postretirement benefit obligation. We generally reflect all unrecognized prior service costs and credits and unrecognized actuarial gains and losses as regulatory assets rather than in OCI, as management believes it is probable that such items will be recoverable through the ratemaking process. If a plan meets settlement or curtailment accounting criteria, we recognize a regulatory asset or liability if these costs are probable of recovery from ratepayers. Certain nonqualified plan expenses are not recoverable through the

ratemaking process and we present the unrecognized prior service costs and credits and unrecognized actuarial gains and losses in accumulated other comprehensive loss. We use a December 31st measurement date for our benefits plans.

We amortize prior service costs for both the pension and other postretirement benefits plans by assigning an equal amount to each future period of service of each employee active on the date of the amendment who is expected to receive benefits under the plan. Prior service cost changes resulting from union bargaining agreements are amortized on a straight-line basis over the period from first recognition to the end of the bargaining agreement. We amortize unrecognized actuarial gains and losses related to the pension and other postretirement benefits plans over 10 years from the time they are incurred as required by the NYPSC. Our policy is to calculate the expected return on plan assets using the market-related value of assets. We determine that value by recognizing the difference between actual returns and expected returns over a five-year period.

***Income taxes*:** In August 2022, the Inflation Reduction Act of 2022 ("IRA") was signed into law in the United States. The IRA created a new corporate alternative minimum tax (“CAMT”) of 15% on adjusted consolidated financial statement income and an excise tax of 1% on the value of certain stock repurchases. The CAMT and other various applicable provisions of the IRA are effective for the Company for periods beginning after December 31, 2022. The impact of CAMT will depend on our facts in each year, as well as on anticipated guidance from the U.S. Department of Treasury.

AGR, the parent company of Networks, files a consolidated federal income tax return and various state income tax returns, some of which are unitary as required or permitted, including all of the activities of its subsidiaries. Each subsidiary company is treated as a member of the consolidated group and determines its current and deferred taxes based on the separate return with benefits for loss method. As a member, NYSEG settles its current tax liability or benefit each year directly with AGR pursuant to a tax allocation agreement between AGR and its members.

The aggregate amount of the related party income tax receivable from AGR is $7.6 million at December 31, 2025. The aggregate amount of the related party income tax payable to AGR is $4.1 million at December 31, 2024.

We use the asset and liability method of accounting for income taxes. Deferred tax assets and liabilities reflect the expected future tax consequences, based on enacted tax laws, of temporary differences between the tax basis of assets and liabilities and their financial reporting amounts. In accordance with U.S. GAAP for regulated industries, we have established regulatory assets and liabilities for the net revenue requirements to be recovered from or refunded to customers for the related future tax expense or benefit associated with certain of these temporary differences. We defer investment tax credits when earned and amortize them over the estimated lives of the related assets. We also recognize the income tax consequences of intra-entity transfers of assets other than inventory when the transfer occurs. We had no intra-entity transfers of assets other than inventory during the years ended December 31, 2025 and 2024.

Deferred tax assets and liabilities are measured at the expected tax rate for the period in which the asset or liability will be realized or settled, based on legislation enacted as of the consolidated balance sheet date. We charge or credit changes in deferred income tax assets and liabilities that are associated with components of OCI directly to OCI. Significant judgment is required in determining income tax provisions and evaluating tax positions. Our tax positions are evaluated under a more-likely-than-not recognition threshold before they are recognized for financial reporting purposes. We record valuation allowances to reduce deferred tax assets when it is more likely than not that we will not realize all or a portion of a tax benefit. We consider the effect of the alternative minimum tax system in determining the need for a valuation allowance for deferred

taxes. Deferred tax assets and liabilities are netted and classified as non-current on our consolidated balance sheets.

We record the excess of state franchise tax computed as the higher of a tax based on income or a tax based on capital in “Taxes other than income taxes” and “Taxes accrued” in our consolidated financial statements.

Positions taken or expected to be taken on tax returns, including the decision to exclude certain income or transactions from a return, are recognized in the consolidated financial statements when it is more likely than not the tax position can be sustained based solely on the technical merits of the position. The amount of a tax return position that is not recognized in the consolidated financial statements is disclosed as an unrecognized tax benefit. Changes in assumptions on tax benefits may also impact interest expense or interest income and may result in the recognition of tax penalties. Interest and penalties related to unrecognized tax benefits are recorded within “Interest expense, net of capitalization” and “Other Income” and “Other Deductions” in our consolidated statements of income.

Uncertain tax positions have been classified as non-current unless expected to be paid within one year. Our policy is to recognize interest and penalties on uncertain tax positions as a component of interest expense in the consolidated statements of income.

Our income tax expense, deferred tax assets and liabilities, and liabilities for unrecognized tax benefits reflect management’s best assessment of estimated current and future taxes to be paid. Significant judgments and estimates are required in determining the consolidated income tax components of the consolidated financial statements.

Limited voting junior preferred stock: We have a class of preferred stock having one share and a par value of $1, which is issued and outstanding and has voting authority only with respect to whether NYSEG may file a voluntary bankruptcy petition.

Adoption of New Accounting Pronouncements

Although we are not a public business entity, we adopt new accounting standards based on public business entity guidance aside from the effective dates in certain situations where we may follow the effective dates for private entities.

There have been no new accounting pronouncements adopted as of and for the year ended December 31, 2025 that are expected to have a material impact on NYSEG’s consolidated financial statements.

Accounting Pronouncements Issued But Not Yet Adopted

The following are new accounting pronouncements not yet adopted that we have evaluated or are evaluating to determine their effect on our consolidated financial statements.

(a) Simplified credit loss guidance

In July 2025, FASB issued guidance to simplify applying ASC 326, Financial instruments – Credit losses, to current accounts receivable and contract assets arising from transactions accounted for under ASC 606, Revenue from contracts with customers, including those assets acquired in a business combination or recognized through the consolidation of a variable interest entity that is not a business if those assets arose from transactions that the acquiree or variable interest entity

accounted for under ASC 606. The update introduces (1) a practical expedient allowing entities to assume current conditions remain unchanged over the remaining life of these assets, and (2) an accounting policy election for non-public entities, permitting consideration of post– balance sheet cash collections when estimating expected credit losses, provided the practical expedient is also elected. The amendment is effective for all entities in interim and annual periods for fiscal years beginning after December 15, 2025. We do not expect the new guidance to have a material impact on our consolidated results of operations, financial position and cash flows.

(b) Accounting for internal-use software costs

In September 2025 FASB issued guidance to modernize internal-use software guidance to eliminate the old stage-based capitalization model and to introduce a probable-to-complete threshold, requiring management authorization, funding commitment, and a probable expectation of completion before capitalization begins. It provides enhanced guidance and examples for applying this threshold, including factors for assessing significant development uncertainty such as novel features or ongoing revisions to performance requirements. Existing rules for external-use software, types of costs eligible for capitalization, and the point at which capitalization ceases remain unchanged. The amendment is effective for all entities in interim and annual periods for fiscal years beginning after December 15, 2027. We do not expect the new guidance to have a material impact on our consolidated results of operations, financial position and cash flows.

(**c) Hedge accounting improvements**

In November 2025, the FASB issued guidance, which provides refinements to hedge documentation and easing of certain operational requirements. The amendments primarily affect cash flow hedges, with targeted changes to fair value and net investment hedges. They (1) allow hedging a clearly related variable price component of a forecasted nonfinancial transaction, (2) permit grouping forecasted transactions with similar risk exposure, and (3) introduce a model for cash flow hedging “choose-your-rate” debt that lets borrowers change documented indexes or tenors without automatically ending hedge accounting. The amendment is effective for interim and annual reporting periods in fiscal years beginning after December 15, 2026, for public business entities, and after December 15, 2027, to all other entities. We are evaluating to determine the effect of this amendment on our hedge accounting programs and overall consolidated financial statements.

(d) Accounting for government grants

In December 2025, FASB issued amendments to provide comprehensive guidance on recognizing, measuring, and presenting government grants under ASC 832, Accounting for government grants by business entities, which previously only addressed disclosures. The amendment responds to the lack of explicit U.S. GAAP guidance that led to diverse practices and reliance on other GAAP or International Financial Reporting Standards (IFRS) by analogy. It classifies grants into asset-related and income-related categories, offering two approaches for asset-related grants: the cost accumulation approach (reducing the asset’s carrying amount) and the deferred income approach (recognizing income systematically over the asset’s useful life). Income-related grants, such as operating expense reimbursements, are recognized over the period the related costs occur, while grants for past costs or immediate support are recognized when the probable threshold is met. The amendment also includes guidance for business combinations, specifying when deferred income should or should not be recognized by the acquirer. The amendment is effective for public entities in fiscal years beginning after December 15, 2028, and for others after December 15, 2029, with transition options including modified prospective, modified retrospective, or full retrospective approaches. We do not expect the new

guidance to have a material impact on our consolidated results of operations, financial position and cash flows.

Use of estimates and assumptions: The preparation of our consolidated consolidated financial statements in conformity with U.S. GAAP requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the consolidated financial statements, and the reported amounts of revenues and expenses during the reporting periods. Significant estimates and assumptions are used for, but not limited to: (1) allowance for credit losses and unbilled revenues; (2) asset impairments; (3) depreciable lives of assets; (4) income tax valuation allowances; (5) uncertain tax positions; (6) reserves for professional, workers' compensation, and comprehensive general insurance liability risks; (7) contingency and litigation reserves; (8) earnings sharing mechanism (ESM); (9) environmental remediation liabilities; (10) pension and other postretirement employee benefits (OPEB); (11) fair value measurements and (12) AROs. Future events and their effects cannot be predicted with certainty; accordingly, our accounting estimates require the exercise of judgment. The accounting estimates used in the preparation of our consolidated financial statements will change as new events occur, as more experience is acquired, as additional information is obtained, and as our operating environment changes. We evaluate and update our assumptions and estimates on an ongoing basis and may employ outside specialists to assist in our evaluations, as considered necessary. Actual results could differ from those estimates.

Union collective bargaining agreements: Approximately 65% of our employees are covered by a collective bargaining agreement. We have no agreements that will expire during 2026.

Note 2. Industry Regulation

Electricity and Natural Gas Distribution

Our revenues are regulated, being based on tariffs established in accordance with administrative procedures set by the New York State Public Service Commission (NYPSC). Tariffs applied to regulated activities are approved by the NYPSC and are based on the cost of providing service. Our revenues are set to be sufficient to cover all of our operating costs, including energy costs, finance costs, and the costs of equity, the last of which reflect our capital ratio and a reasonable return on equity (ROE).

Energy costs that are set in the New York wholesale markets are passed on to consumers. The difference between energy costs that are budgeted and those that are actually incurred is offset by applying reconciliation procedures that result in either immediate or deferred tariff adjustments. Reconciliation procedures also apply to other costs, many of which are exceptional—such as those arising from extreme weather, environmental requirements, regulatory changes, accounting changes, and programs supporting vulnerable customers. Any revenues that exceed target returns, usually the result of better-than-expected cost efficiency, are generally shared with customers, resulting in future tariff reductions.

2023 NYSEG Rate Plan

On May 26, 2022, NYSEG made an initial filing to the NYPSC requesting increases to the delivery rates for its electric business of 31.2% and for its gas business of 20.7%. This initial filing started a lengthy process guided by NYPSC regulations. The Department of Public Service Staff and other parties to the rate cases submitted testimony on September 26, 2022. On October 18, 2022, the Company submitted rebuttal testimony responding to the testimony of Department of Public

Service Staff and other parties to the proceedings. On October 19, 2022, the Company filed a notice of impending settlement negotiations. A Joint Proposal for a three-year rate plan term for electric and gas service at NYSEG commencing May 1, 2023, and continuing through April 30, 2026, was filed on June 14, 2023. The NYPSC issued an Order on October 12, 2023, approving the Joint Proposal in its entirety with one modification to acknowledge that the "make whole" period would be effective from May 1, 2023, through November 1, 2023, rather than October 1, 2023, as originally proposed in the Joint Proposal. The effective date of new tariffs was November 1, 2023, with make-whole back to May 1, 2023. An Order was issued on April 18, 2024, approving the Companies filed tariff amendments on a permanent basis. The Joint Proposal bases delivery revenues on a 9.20% ROE and 48% equity ratio; however, for the proposed earnings sharing mechanism, the equity ratio is the lower of the actual equity ratio or 50%. The approved Joint Proposal was signed in whole or in part by eight parties, and includes levelized delivery rate increases as summarized below:

	May 1, 2023		May 1, 2024		May 1, 2025	
	Rate Increase (Millions)	Delivery Rate Increase* %	Rate Increase (Millions)	Delivery Rate Increase* %	Rate Increase (Millions)	Delivery Rate Increase* %
Electric	$137.3	17.1%	$160.7	17.1%	$200.6	17.1%
Gas	$11.7	5.6%	$12.4	5.6%	$12.9	5.6%

* Based on "net base delivery" revenues, which consist of gross base delivery revenue plus Bill Issuance Payment Process (BIPP), plus Gross Revenue Tax (GRT).

The approved Joint Proposal also reflects increased energy efficiency programs and distribution vegetation management, along with investments in aging infrastructure, resiliency, continued implementation of Advanced Metering Infrastructure (AMI), and increases in the Company's workforce. The approved Joint Proposal reflects the continued recovery of deferred NYSEG Electric storm costs and continued reserve accounting for qualifying Major Storms ($31.5 million in Rate Year 1, $41.5M in Rate Year 2 and $46.5M in Rate Year 3). Incremental maintenance costs incurred to restore service in qualifying divisions will be chargeable to the Major Storm Reserve provided they meet certain thresholds for each storm event.

The approved Joint Proposal continued part of the electric reliability performance measures (and associated potential negative revenue adjustments for failing to meet established performance levels) which include the system average interruption frequency index (SAIFI) and the customer average interruption duration index (CAIDI). The approved Joint Proposal modified the Tier II SAIFI targets to make them more achievable. The Proposal also maintains certain gas safety performance measures at the Company, including those relating to the replacement of leak prone main, leak backlog management, emergency response, and damage prevention. The approved Joint Proposal established threshold performance levels for designated aspects of customer service quality, with increases to potential negative revenue adjustments. The approved Joint Proposal continues bill reduction and arrears forgiveness Low Income Programs. Certain REV-related incremental costs and fees will be included in the revenue adjustment mechanism (RAM) to the extent cost recovery is not provided for elsewhere. Under the approved Joint Proposal, NYSEG continues the RAM, which is applicable to all customers, to return or collect RAM Eligible Deferrals and Costs, including: (1) property taxes; (2) Major Storm deferral balances; (3) gas leak prone pipe replacement; (4) REV costs and fees which are not covered by other recovery mechanisms; (5) costs associated with the implementation of any Commission-ordered EV program which are not covered by any other cost recovery mechanism; and (6) Covid-related uncollectibles (Rate Years 1 and 2 only).

The Proposal provided for partial or full reconciliation of certain expenses including but not limited to: pension and other postretirement benefits; property taxes; variable rate debt and new fixed rate debt; gas research and development; environmental remediation costs; Major Storms; nuclear electric insurance limited credits; economic development; Low Income Programs, and Covid-related Uncollectible Expense. The Proposal also includes downward-only Net Plant, AMI, and Resiliency Program reconciliations. In addition, the Proposal included downward-only reconciliations for the costs of electric distribution and gas vegetation management; pipeline integrity; and other incremental maintenance programs. The Proposal provided that the Company continue the electric and gas revenue decoupling mechanisms (RDM) on a total revenue per class basis.

The Proposal provides that with few exceptions, the provisions for electric and gas service under the Proposal for Rate Year 3 (the twelve-month period ending April 30, 2026) shall continue unless and until such provisions and base delivery rates for electric or gas service are changed by subsequent order of the New York Public Service Commission. Thus, from May 1, 2026, until such time as new rates are approved by the Commission, the current rates, and terms for Rate Year 3 of the prior Proposal remain in effect.

2025 NYSEG Rate Case Filing

On June 30, 2025, New York State Electric & Gas Corporation filed rate cases with the New York Public Service Commission for its electric and gas delivery services. The electric filing (Docket No. 25-E-0375) requests an annual revenue increase of $464.4 million, representing a 35.0% increase in base delivery revenues equivalent to 18.6% increase in total revenues, based on a proposed 10.0% return on equity. The average residential customer's monthly bill is estimated to increase by $33.12. Concurrently, the gas rate case (Docket No. 25-G-0378) seeks $93.0 million in additional annual revenues, representing a 39.4% increase in gas delivery revenues or a 22.1% increase in total revenues, also at a 10.0% return on equity. The average residential customer's monthly gas bill is estimated to increase by $33.57. These revenue requests were updated on December 5, 2025, as follows: NYSEG Electric requests an annual revenue increase of $486.8 million, representing a 37.2% increase in base delivery revenues or a 19.1% increase in total revenues, and NYSEG Gas requests $84.7 million in additional annual revenues, representing a 35.8% increase in base delivery revenues or a 19.4% increase in total revenues. These requests reflect cost recovery for capital investment, major storm allowances, labor and benefits, and vegetation management in the electric case, as well as legacy cost deferrals and state policy–driven infrastructure investments.

NYSEG supplemented its one-year test-year filings with four additional data years and detailed forward-looking analyses to support a five-year rate plan settlement. This longer-term framework is designed to levelize costs over time, reduce volatility in customer bills, and enhance the Company's ability to plan and invest in future infrastructure needs. By extending the rate plan horizon, NYSEG can better address supply-chain constraints, manage long lead-time projects, and align with New York State's long-term energy and climate objectives.

The New York PSC has suspended the proposed effective dates for both filings through May 26, 2026. In July 2025 and October 2025, Administrative Law Judges issued rulings on party status and procedural schedules, followed by testimony, discovery, and evidentiary hearings between September and March 2026. A final PSC decision is anticipated on or before July 2026, with new rates potentially effective on or about June 1, 2026. We cannot predict the outcome of this matter.

Reforming the Energy Vision (REV)

New York's Reforming the Energy Vision (REV) initiative is an ongoing effort by the Public Service Commission to modernize the state's energy system and regulatory framework. The initiative aims to improve energy efficiency, expand renewable resources, and increase the use of distributed energy technologies such as storage, microgrids, and on-site generation. As part of this effort, utilities serve as Distribution System Platform providers and are required to regularly update long-term plans for operating a more distributed and dynamic grid.

REV has also driven changes to utility incentives, rate design, and compensation structures for distributed energy resources. This includes Earnings Adjustment Mechanisms, evolving approaches to rooftop and community solar compensation, improvements to billing and crediting processes, and programs designed to make clean energy more accessible, particularly for low-income customers and disadvantaged communities. The state has continued refining these programs through various orders that expand customer participation options, streamline processes, and encourage broader adoption of renewable energy.

Several related initiatives support REV's broader goals, including development of an integrated statewide energy data platform, expanded electric vehicle infrastructure and rate reforms, energy storage deployment policies, and enhancements to demand management programs. New York is also advancing a comprehensive "Grid of the Future" effort to identify the flexible resources, capabilities, and infrastructure investments needed for a more resilient, affordable, and clean energy system.

Customer Arrearages Reduction Order

New York established a multi-phase program to reduce customer utility arrears accumulated during the COVID-19 pandemic. Phase 1 provided one-time bill credits to low-income customers, funded partly by the State and partly by a temporary surcharge on all customers that concluded in 2025. Phase 2 expanded relief to additional low-income, residential, and small business customers, offering up to about $1,000 in credits for residential accounts and roughly $1,250 for small businesses, totaling approximately $18 million for NYSEG customers.

The State also provided separate funding through its 2023–2024 budget to deliver fast utility bill relief. Under this program, NYSEG distributed about $8.7 million to electric customers and $4.3 million to gas customers, resulting in modest one-time credits of about $10 for electric customers and $16 for gas customers.

Community Leadership and Climate Protection Act

Pursuant to the Community Leadership and Climate Protection Act of 2019 (CLCPA) and Accelerated Renewable Energy Growth and Community Benefit Act of 2020, the Commission has issued orders addressing investment in transmission by NYSEG to support the state achieving the CLCPA's goal of 70% renewable energy by 2030. First, on December 15, 2022, the Commission issued an Order authorizing NYSEG to continue the development of CLCPA "Phase 1" transmission projects with an estimated investment of approximately $1.27 billion through 2030. CLCPA Phase 1 transmission projects are upgrades to the NYSEG local transmission system that are being developed to satisfy reliability needs, but that also create headroom on the transmission system for the interconnection and delivery of new generation sources.

Second, on February 16, 2023, the Commission issued an Order approving the investment of approximately $2.05 billion by NYSEG through 2030 in CLCPA "Phase 2" transmission projects. Phase 2 transmission projects are upgrades to the NYSEG local transmission system that are

being developed primarily to allow for the interconnection and delivery of renewable energy in the Southern Tier, an area that the Commission has designated as an “Area of Concern” for renewable energy development because there is substantial renewable energy development interest but inadequate transmission. Unlike other transmission owned by NYSEG, the cost of CLCPA Phase 2 transmission will be recovered pursuant to a formula rate under the jurisdiction of the Federal Energy Regulatory Commission so that costs can be allocated statewide. NYSEG and other transmission-owning utilities in New York negotiated a Cost Sharing and Recovery Agreement (CSRA), which was approved by the Commission on May 12, 2022, and by FERC on August 22, 2022. Under the terms of the CSRA the cost of CLCPA Phase 2 transmission projects approved by the Commission will be recovered through the New York Independent System Operator tariff, with ROE and capital structure determined by the Commission, subject to an ROE ceiling set by FERC. The CSRA requires utilities to obtain authorization from the Commission prior to seeking recovery of 100% construction work in progress (CWIP) incentive associated with CLCPA Phase 2 projects. In an April 19, 2024 Order, the Commission granted the Company’s request for authorization to seek a 100% CWIP incentive for its CLCPA Phase 2 projects. On July 5, 2024, FERC conditionally accepted NYSEG's application for CWIP and the 100% Abandoned Plant incentive (Abandoned Plant), subject to further compliance, for projects that are subject to subsequent permitting approval by the NYPSC under Article VII of New York State’s Public Service Law, effective July 8, 2024, and denied the application for CWIP and Abandoned Plant for projects not subject to Article VII permitting approval. On August 2, 2024, NYSEG sought clarification, or in the alternative rehearing, of the July 5, 2024 Order. On October 1, 2024, FERC ruled on NYSEG’s request for clarification/rehearing. FERC confirmed that any projects that receive state siting approval orders that include the required reliability and/or congestion reduction determinations can qualify for incentives, not limited to the projects listed in the July order as Article VII projects. FERC denied clarification and rehearing to include CWIP in rate base prior to FERC’s acceptance of the state siting orders.

Proactive Planning Proceedings

In Docket 24-E-0364, the New York Public Service Commission launched a Proactive Planning Proceeding to ensure that the State’s electric grid could accommodate the rapid load growth driven by transportation and building electrification under the CLCPA, recognizing that critical capacity constraints could otherwise delay customer interconnections and derail climate goals. Pursuant to its August 15, 2024, Order Establishing Proactive Planning Proceeding, the PSC directed all Joint Utilities—including NYSEG—to identify and file “urgent upgrade projects” that must commence construction by mid-2026 to meet immediate capacity needs. On November 26, 2024, NYSEG petitioned for seven such projects, totaling $468 million, encompassing substation expansions, feeder upgrades, and targeted circuit reinforcements across its service territory to unlock near-term electrification initiatives. In its June 12, 2025, Order Addressing Urgent Upgrade Filings, the Commission approved a subset of the filings for immediate development and cost recovery, most notably authorizing NYSEG’s North Country Capacity Expansion project—a $37.1 million investment to add 30 MW of new capacity in the North Country region to support vehicle and industrial electrification—under the urgent project framework. On September 18, 2025, the Commission directed the Joint Utilities to develop two key components to support future proactive planning cycles including a Modified Proactive Planning Framework document filed on November 17, 2025, that identifies the data and sources to be considered and a Proactive Planning Study Report that assesses needs and proposes projects to be filed by September 2026. The Clean Energy Policy team is coordinating collaboration with the Joint Utilities to ensure alignment of Projects that NYSEG’s internal forecast team and the distribution planning team are working towards. Internally we expect to have some potential project proposals in the April/May timeframe.

Management Audit

On May 19, 2025, the New York State Public Service Commission released the final report of its management and operations audit of NYSEG. The audit, conducted by a third party, covered the period from 2018 through 2023, and resulted in recommendations. In response, the Company submitted an implementation plan on June 18, 2025, outlining corrective actions and timelines to address each of the audit findings. Many of the recommendations have already been implemented. Implementation plans are currently under review and pending approval by the PSC for the remaining recommendations.

Compensation Audit

On February 13, 2025, the New York State Public Service Commission initiated a focused operations audit to examine management incentive compensation programs at major investor-owned electric, gas, and water utilities. On May 15, 2025, the Commission selected Overland Consulting as the independent auditor ordering all New York utilities including NYSEG to execute a contract with Overland. The target date for the draft report is August 2026, with the final report scheduled for September 2026.

Minimum Equity Requirements for Regulated Subsidiaries

NYSEG is subject to a minimum equity ratio requirement that is tied to the capital structure assumed in establishing revenue requirements. Pursuant to these requirements, NYSEG must maintain a minimum equity ratio equal to the ratio in its currently effective rate plan or decision measured using a trailing 13-month average. On a monthly basis, NYSEG must maintain a minimum equity ratio of no less than 300 basis points below the equity ratio used to set rates. The minimum equity ratio requirement has the effect of limiting the amount of dividends that may be paid and may, under certain circumstances, require that the parent contribute equity capital. NYSEG is prohibited by regulation from lending to unregulated affiliates. NYSEG has also agreed to minimum equity ratio requirements in certain borrowing agreements. These requirements are lower than the regulatory requirements.

Note 3. Regulatory Assets and Liabilities

Pursuant to the requirements concerning accounting for regulated operations we capitalize, as regulatory assets, incurred and accrued costs that are probable of recovery in future electric and natural gas rates. We base our assessment of whether recovery is probable on the existence of regulatory orders that allow for recovery of certain costs over a specific period, or allow for reconciliation or deferral of certain costs. When costs are not treated in a specific order we use regulatory precedent to determine if recovery is probable.

We also record, as regulatory liabilities, obligations to refund previously collected revenue or to spend revenue collected from customers on future costs. Of the total regulatory assets net of regulatory liabilities, approximately $160.2 million represents the offset of accrued liabilities for which funds have not been expended. The remainder is either included in rate base or accruing carrying costs.

Details of other regulatory assets and other regulatory liabilities are shown in the tables below. They result from various regulatory orders that allow for the deferral and/or reconciliation of specific costs. Regulatory assets and regulatory liabilities are classified as current when recovery or refund in the coming year is allowed or required through a specific order or when the rates

related to a specific regulatory asset or regulatory liability are subject to automatic annual adjustment.

On October 12, 2023, the NYPSC approved the Proposal in connection with a three-year rate plan for electric and gas service at NYSEG effective May 1, 2023. Following the approval of the proposal most of these items related to NYSEG are amortized over a three-year period, except the portion of storm costs to be recovered over ten years, plant related tax items which are amortized over the life of associated plant, and unfunded deferred taxes which are amortized over forty three years. In accordance with the Schedule of Regulatory Amortizations included in the approved Joint Proposal, annual net amortization revenue for NYSEG is approximately $16.3 million for the year ended December 31, 2025.

Regulatory assets at December 31, 2025 and 2024 consisted of:

December 31, (Thousands)	2025	2024
Asset retirement obligation	$ 10,679	$ 11,014
Electric supply reconciliation	34,913	17,632
Environmental remediation costs	68,153	50,516
Energy efficiency programs	2,518	—
Federal tax depreciation normalization adjustment	68,075	71,851
Low income programs	41,629	21,298
Low income arrears forgiveness	—	9,748
Make-whole provision	9,533	37,059
Pension and other post-retirement benefits	100,646	76,952
Pension and other post-retirement benefits cost deferrals	—	12,595
Rate adjustment mechanism	15,911	17,175
Rate change levelization	26,514	72,723
Revenue decoupling mechanism	—	28,008
Sales and use tax audit deferral	5,885	7,651
Storm costs	70,757	808,286
Storm cost securitized balance	622,555	—
Unamortized loss on re-acquired debt	6,309	7,992
Uncollectible reserve	84,582	77,565
Unfunded future income taxes	41,657	28,669
Value distributed energy resource	74,575	35,553
Vegetation management	97,193	86,276
Other	150,664	105,226
Total regulatory assets	**1,532,748**	**1,583,789**
Less: current portion	275,739	269,166
Total non-current regulatory assets	**$ 1,257,009**	**$ 1,314,623**

Asset retirement obligations represent the differences in timing of the recognition of costs associated with our AROs and the collection of such amounts through rates. This amount is being amortized at the related depreciation and accretion amounts of the underlying liability.

Electric supply reconciliation represents over/under collection of costs related to electric supply in which NYSEG supplies electricity as the default service option for customers.

Environmental remediation costs include spending that has occurred and is eligible for future return/recovery in customer rates. Environmental costs are currently recovered through a reserve mechanism whereby projected spending is included in rates with any variance recorded as a regulatory asset or a regulatory liability. The amortization period will be established in future proceedings and will depend upon the timing of spending for the remediation costs. It also includes the anticipated future rate recovery of costs that are recorded as environmental liabilities since these will be recovered when incurred. Because no funds have yet been expended for the regulatory asset related to future spending, it does not accrue carrying costs and is not included within rate base.

Energy efficiency represents the costs of energy efficiency programs deferred for future recovery to the extent they exceed the amount in rates. A portion of this balance is amortized through current rates, the remaining portion will be refunded in future periods through future rate cases. Federal tax depreciation normalization adjustment represents the revenue requirement impact of the difference in the deferred income tax expense required to be recorded under the IRS normalization rules and the amount of deferred income tax expense that was included in cost of service for rate years covering 2011 forward. The recovery period is being amortized over a twenty-year period starting in 2023.

Low income programs represent deferrals related to over/under spending on Low-Income customer assistance programs.

Low income arrears forgiveness represents deferred bill credits in the state of New York based on the order issued by PSC on June 16, 2022, approving deferral of bill credits for low-income customers (Phase 1), and additional deferred bill credits for other residential and small commercial customers who did not qualify for Phase 1 based on the order issued by PSC on January 19, 2023 (Phase 2). The Phase 1 regulatory asset are recovered from all customers over three years for NYSEG through a surcharge that began August 1, 2022. The Phase 2 regulatory asset are recovered from all customers over two and a half years for NYSEG through a surcharge that began March 1, 2023.

Make-whole provision represents the regulatory asset to recover revenues that would have been received by NYSEG had Rate Year 1 rates approved in the 22-E-0317 et al. joint proposal gone into effect on the effective date of May 1, 2023. The balance is being recovered through a separately stated make-whole rate, effective November 1, 2023, over 6-30 months.

Pension and other postretirement benefits represent the actuarial losses on the pension and other postretirement plans that will be reflected in customer rates when they are amortized and recognized in future pension expenses. Because no funds have yet been expended for this regulatory asset, it does not accrue carrying costs and is not included within the rate base.

Pension and other postretirement benefits cost deferrals include the difference between actual expense for pension and other postretirement benefits and the amount provided for in rates. A portion of this balance is amortized through current rates, the remaining portion will be refunded in future periods through future rate cases.

Rate adjustment mechanism (RAM) represents a mechanism each business implements to return or collect the net balance of RAM eligible deferrals and costs. The primary driver of RAM collections is storm costs, but it also includes property taxes and REV costs and fees not covered in other recovery mechanisms.

Rate change levelization adjusts the New York delivery rate increases across the three-year plan to avoid unnecessary spikes and offsetting dips in customer rates. A portion of this balance is amortized through current rates, the remaining portion will be refunded in future periods through future rate cases.

Revenue decoupling mechanism represents the mechanism established to disassociate the utility's profits from its delivery/commodity sales.

Sales and use tax audit deferral represents sales and use tax refunds allocated to operating expenses. This balance is being amortized in current rates over a six-year period beginning in 2023.

Storm costs for NYSEG are allowed in rates based on an estimate of the routine costs of service restoration. NYSEG is also allowed to defer unusually high levels of service restoration costs resulting from major storms when they meet certain criteria for severity and duration.

Storm cost securitized balance represents the regulatory asset being recovered through Storm Cost Recovery bonds issued pursuant to the Storm Recovery Cost Financing Order issued by the NYPSC. This balance is being amortized through current rates via a separate recovery surcharge over the life of the bonds, which have a final maturity ranging from May 1, 2031 through May 1, 2037.

Unamortized losses on reacquired debt represent deferred losses on debt reacquisitions that will be recovered over the remaining original amortization period of the reacquired debt.

Uncollectible reserve includes the anticipated future rate recovery of costs that are recorded as uncollectible since those will be recovered when incurred. Because no funds have yet been expended for the regulatory asset related to future uncollectible expense, it does not accrue carrying costs and is not included within rate base. It also includes the variance between actual uncollectible expense and uncollectible expense included in rates that is eligible for future recovery in customer rates. The amortization period will be established in future proceedings.

Unfunded future income taxes represent unrecovered federal and state income taxes primarily resulting from regulatory flow through accounting treatment. The income tax benefits or charges for certain plant related timing differences, such as removal costs, are immediately flowed through to, or collected from, customers. This amount is being amortized as the amounts related to temporary differences that give rise to the deferrals are recovered in rates.

Value distributed energy resource represents a mechanism to compensate energy created by distributed energy resources like solar.

Vegetation management represents a program to address danger trees outside of the distribution right-of-way, including but not limited to, ash trees.

Other includes items such as AMI accelerated depreciation, earnings adjustment mechanism, and electric vehicle deferrals.

Regulatory liabilities at December 31, 2025 and 2024 consisted of:

December 31, (Thousands)	2025	2024
Accrued removal obligation	$ 345,406	$ 392,255
Accumulated deferred investment tax credits	9,282	9,910
Debt rate reconciliation	—	5,430
Energy efficiency programs	—	561
Hedge gains	28,291	12,495
New York 2018 winter storm settlement	24	95
Non by-passable charges	13,191	3,163
Pension and other postretirement benefits	48,108	51,248
Pension and other postretirement benefits cost deferral	13,622	8,293
Property tax	—	5,137
Service quality performance mechanism	45,525	41,809
Tax Act remeasurement	323,925	340,018
Unfunded future income taxes	157	254
Other	57,505	65,604
Total regulatory liabilities	**885,036**	**936,272**
Less: current portion	51,363	64,233
Total non-current regulatory liabilities	**$ 833,673**	**$ 872,039**

Accrued removal obligations represent the differences between asset removal costs recorded and amounts collected in rates for those costs. The amortization period is dependent upon the asset removal costs of underlying assets and the life of the utility plant.

Accumulated deferred investment tax credits represent investment tax credits related to plant investments that are deferred when earned and amortized over the estimated lives of the related assets.

Debt rate reconciliation represents the over/under collection of costs related to fixed and variable rate debt instruments identified in the rate case. Costs include interest, commissions and fees versus amounts included in rates. A portion of this balance is amortized through current rates, the remaining portion will be refunded in future periods through future rate cases. The amortization period in current rates is three years and began in 2023.

Energy efficiency represents the costs of energy efficiency programs deferred for future recovery to the extent they exceed the amount in rates. A portion of this balance is amortized through current rates, the remaining portion will be refunded in future periods through future rate cases.

Hedge gains regulatory liability represents deferred fair value gains on electric and gas hedge contracts.

New York 2018 winter storm settlement represents the settlement amount with the NYSPSC following the comprehensive investigation of New York's major utility companies' preparation and response to March 2018 storms. This balance is amortized through current rates over an amortization period of three years, beginning in 2023.

Non by-passable charges represent the non by-passable charge paid by all customers. An asset or liability is recognized resulting from differences between actual revenues and the underlying cost being recovered. This liability will be refunded to customers within the next year.

Pension and other postretirement benefits represent the actuarial gains on pension and other postretirement plans that will be reflected in customer rates when they are amortized and recognized in future expenses. Because no funds have yet been received for this a regulatory liability is not reflected within rate base.

Pension and other postretirement benefits cost deferrals include the difference between actual expense for pension and other postretirement benefits and the amount provided for in rates. A portion of this balance is amortized through current rates, the remaining portion will be refunded in future periods through future rate cases.

Property taxes represent the customer portion of the difference between actual expense for property taxes and the amount provided for in rates. The New York amount is being amortized over a five-year period following the approval of the proposal by the NYPSC.

Service quality performance mechanism represents negative revenue adjustments as well positive rate adjustments for exceeding and/or failing to meet targets for certain performance measures including the system average interruption frequency index (SAIFI) and the customer average interruption duration index (CAIDI), certain gas safety performance measures and for uncollectible/terminations/arrears measures. A portion of this balance is amortized through current rates, the remaining portion will be refunded in future periods through future rate cases.

Tax Act remeasurement represents the impact from remeasurement of deferred income tax balances as a result of the Tax Act enacted by the U.S. federal government on December 22, 2017. Reductions in accumulated deferred income tax balances due to the reduction in the corporate income tax rates from 35% to 21% under the provisions of the Tax Act will result in amounts previously collected from utility customers for these deferred taxes to be refundable to such customers, generally through reductions in future rates.

Other includes various items subject to reconciliation including Clean Energy Fund (CEF), Net Plant Reconciliation, Methane Detection Program and Direct Current Fast Charging (DCFC).

Note 4. Revenue

We recognize revenue when we have satisfied our obligations under the terms of a contract with a customer, which generally occurs when the control of promised goods or services transfers to the customer. We measure revenue as the amount of consideration we expect to receive in exchange for providing those goods or services. Contracts with customers may include multiple performance obligations. For such contracts, we allocate revenue to each performance obligation based on its relative standalone selling price. We generally determine standalone selling prices based on the prices charged to customers. Certain revenues are not within the scope of ASC 606, such as revenues from leasing, derivatives, other revenues that are not from contracts with customers and other contractual rights or obligations, and we account for such revenues in accordance with the applicable accounting standards. We exclude from revenue amounts collected on behalf of third parties, including any such taxes collected from customers and remitted to governmental authorities. We do not have any material significant payment terms because we receive payment at or shortly after the point of sale.

The following describes the principal activities from which we generate revenue.

NYSEG derives its revenue primarily from tariff-based sales of electricity and natural gas service to customers in New York with no defined contractual term. For such revenues, we recognize

revenues in an amount derived from the commodities delivered to customers. Other major sources of revenue are electricity transmission and wholesale sales of electricity and natural gas.

Tariff-based sales are subject to the corresponding state regulatory authorities, which determine prices and other terms of service through the ratemaking process. In New York, customers have the option to obtain the electricity or natural gas commodity directly from the utility or from another supplier. For customers that receive their commodity from another supplier, the utility acts as an agent and delivers the electricity or natural gas provided by that supplier. Revenue in those cases is only for providing the service of delivery of the commodity.

Transmission revenue results from others' use of the utility's transmission system to transmit electricity and is subject to FERC regulation, which establishes the prices and other terms of service. Long-term wholesale sales of electricity are based on individual bilateral contracts. Short-term wholesale sales of electricity are generally on a daily basis based on market prices and are administered by the New York Independent System Operator (NYISO) or PJM Interconnection, LLC (PJM), as applicable. Wholesale sales of natural gas are generally short-term based on market prices through contracts with the specific customer.

The performance obligation in all arrangements is satisfied over time because the customer simultaneously receives and consumes the benefits as NYSEG delivers or sells the electricity or natural gas or provides the transmission service.

NYSEG records revenue from Alternative Revenue Programs (ARPs), which is not ASC 606 revenue. Such programs represent contracts between the utilities and their regulators. The NYSEG ARPs include revenue decoupling mechanisms, other ratemaking mechanisms, annual revenue requirement reconciliations, and other demand side management programs.

NYSEG also has various other sources of revenue including billing, collection, other administrative charges, sundry billings, rent of utility property, and miscellaneous revenue. It classifies such revenues as other ASC 606 revenues to the extent they are not related to revenue generating activities from leasing, ARPs, or other activities.

We have contract liabilities for revenue from transmission congestion contract (TCC) auctions, for which we receive payment at the beginning of an auction period, and amortize ratably each month into revenue over the applicable auction period. The auction periods range from six months to two years. TCC contract liabilities totaled $24.2 million at December 31, 2025 and $8.9 million at December 31, 2024, and are presented in "Other current liabilities" on our consolidated balance sheets. We recognized $22.6 million and $20.9 million as revenue during the years ended December 31, 2025 and 2024, respectively.

We apply a practical expedient to expense as incurred costs to obtain a contract when the amortization period is one year or less. We record costs incurred to obtain a contract within operating expenses, including amortization of capitalized costs.

Revenues disaggregated by major source for the years ended December 31, 2025 and 2024 are as follows:

Years Ended December 31,	2025	2024
(Thousands)		
Regulated operations – electricity	$ 2,438,440	$ 1,966,855
Regulated operations – natural gas	384,018	318,753
Other(a)	30,519	34,999
Revenue from contracts with customers	**2,852,977**	**2,320,607**
Leasing revenue	939	1,009
Alternative revenue programs	18,589	35,336
Other revenue	20,598	16,639
Total operating revenues	**$ 2,893,103**	**$ 2,373,591**

(a) Primarily includes certain intra-month trading activities, billing, collection, and administrative charges, sundry billings, and other miscellaneous revenue.

Note 5. Income Taxes

Current and deferred taxes charged to expense for the years ended December 31, 2025 and 2024 consisted of:

Years Ended December 31,	2025	2024
(Thousands)		
Current		
Federal	$ (18,616)	$ (32,675)
State	(1,350)	(238)
Current taxes charged to benefit	**(19,966)**	**(32,913)**
Deferred		
Federal	60,117	74,933
State	20,385	20,050
Deferred taxes charged to expense	**80,502**	**94,983**
Investment tax credit adjustments	(497)	(510)
Total Income Tax Expense	**$ 60,039**	**$ 61,560**

The differences between tax expense per the consolidated statements of income and tax expense at the 21% statutory federal tax rate for the years ended December 31, 2025 and 2024, respectively, consisted of:

Years Ended December 31,	2025	2024
(Thousands)		
Tax expense at statutory rate	$ 64,718	$ 64,181
Equity AFUDC tax effects	(7,431)	(6,071)
Excess ADIT amortization	(11,995)	(11,872)
Investment tax credit amortization	(497)	(510)
State tax expense, net of federal benefit	15,038	15,651
Other, net	206	181
Total Income Tax Expense	**$ 60,039**	**$ 61,560**

Income tax expense for the year ended December 31, 2025 was $4.7 million lower than it would have been at the statutory federal income tax rate of 21% due predominately to excess Accumulated Deferred Income Tax (ADIT) amortization and AFUDC Equity tax effects, partially

offset by state taxes. This resulted in an effective tax rate of 19.5%. Income tax expense for the year ended December 31, 2024 was $2.6 million lower than it would have been at the statutory federal income tax rate of 21% due predominately to excess ADIT amortization and AFUDC Equity tax effects, partially offset by state taxes. This resulted in an effective tax rate of 20.1%.

In 2020, NYSEG began refunding previously deferred protected and unprotected Excess ADIT, established as a result of the 2017 Tax Act as part of the 2020 Joint Proposal and as determined by the NYPSC and IRS normalization rules.

Deferred tax assets and liabilities as of December 31, 2025 and 2024 consisted of:

December 31,	2025	2024
(Thousands)		
Non-current Deferred Income Tax Liabilities (Assets)		
Property related	$ 1,187,615	$ 1,062,430
Storm costs	181,932	212,100
Pension and other post-retirement benefits	(5,347)	(8,688)
Power tax deferred income tax	17,866	18,854
Regulatory liability due to "Tax Cuts and Jobs Act"	(85,013)	(89,227)
Environmental	(17,633)	(14,963)
Federal and state NOL's	(308,593)	(308,191)
Other	113,839	102,978
Total Non-current Deferred Income Tax Liabilities	**$ 1,084,666**	**$ 975,293**
Deferred tax assets	$ 416,586	$ 421,069
Deferred tax liabilities	1,501,252	1,396,362
Net Accumulated Deferred Income Tax Liabilities	**$ 1,084,666**	**$ 975,293**

NYSEG has gross federal net operating losses of $1,019.8 million and gross NY state net operating losses of $1,828.5 million for the year ended December 31, 2025. NYSEG had gross federal net operating losses of $1,051.8 million and gross NY state net operating losses of $1,685.2 million for the year ended December 31, 2024.

Uncertain tax positions have been classified as non-current unless expected to be paid within one year. Our policy is to recognize interest and penalties on uncertain tax positions as a component of interest expense in the consolidated statements of income.

The reconciliation of unrecognized income tax benefits for the years ended December 31, 2025 and 2024 consisted of:

Years Ended December 31,	2025	2024
(Thousands)		
Balance as of January 1	$ 44,832	$ 44,905
Reduction for tax positions related to prior years	(73)	(73)
Balance as of December 31	**$ 44,759**	**$ 44,832**

Unrecognized income tax benefits represent income tax positions taken on income tax returns but not yet recognized in the consolidated financial statements. The accounting guidance for uncertainty in income taxes provides that the financial effects of a tax position shall initially be recognized in the consolidated financial statements when it is more likely than not based on the

technical merits that the position will be sustained upon examination, assuming the position will be audited and the taxing authority has full knowledge of all relevant information.

There were no additional accruals for interest and penalties on tax reserves as of December 31, 2025 and 2024.

Note 6. Long-term Debt

Long-term debt as of December 31, 2025 and 2024 consisted of:

As of December 31,		2025		2024	
(Thousands, except interest rates)	Maturity Dates	Balances	Interest Rates	Balances	Interest Rates
Senior unsecured debt	2026-2052	$ 3,275,000	1.95%-5.85%	$ 2,975,000	1.95%-5.85%
Storm recovery bonds	2031-2037	668,848	4.71%-5.16%	—	—
Unsecured pollution control notes – fixed	2026-2034	441,210	1.40% - 4.00%	441,210	1.40% - 4.00%
Unamortized debt issuance costs and discount		(25,855)		(17,744)	
Total Debt		**$4,359,203**		**$3,398,466**	
Less: debt due within one year, included in current liabilities		617,851		—	
Total Non-current Debt		**$ 3,741,352**		**$ 3,398,466**	

On August 6, 2024, NYSEG issued $525 million aggregate principal amount of unsecured green public bond maturing in 2034 at an interest of 5.30%.

On February 11, 2025, NYSEG Storm Funding, LLC issued $225 million aggregate principal amount of Storm Recovery bond maturing in 2031 at an interest of 4.71%.

On February 11, 2025, NYSEG Storm Funding, LLC issued $225 million aggregate principal amount of Storm Recovery bond maturing in 2034 at an interest of 4.87%.

On February 11, 2025, NYSEG Storm Funding, LLC issued $261 million aggregate principal amount of Storm Recovery bond maturing in 2037 at an interest of 5.16%.

On August 7, 2025, NYSEG issued $300 million aggregate principal amount of unsecured green public bond maturing in 2035 at an interest of 5.05%.

Long-term debt, including sinking fund obligations, due over the next five years consist of:

2026	2027	2028	2029	2030	Total
(Thousands)					
$617,851	$34,000	$417,210	$175,000	$200,000	$1,444,061

Note 7. Bank Loans and Other Borrowings

NYSEG had $0.01 million of notes payable outstanding at December 31, 2025 and no notes payable outstanding at December 31, 2024. NYSEG funds short-term liquidity needs through an agreement among Avangrid's regulated utility subsidiaries (the Virtual Money Pool Agreement), a

bi-lateral intercompany credit agreement with Avangrid (the Bi-Lateral Intercompany Facility) and a bank provided credit facility to which NYSEG is a party (the AGR Credit Facility), each of which are described below.

The Virtual Money Pool Agreement is an agreement among the investment grade-rated, regulated utility subsidiaries of Avangrid under which the parties to this agreement may lend to or borrow from each other. This Agreement allows Avangrid to optimize cash resources within the regulated utility companies which are prohibited by regulation from lending to unregulated affiliates. The interest rate on transactions under this agreement is the A2/P2 non-financial 30-day commercial paper rate published by the Federal Reserve. NYSEG has a lending/borrowing limit of $100 million under this agreement. NYSEG had $0.01 million outstanding at December 31, 2025 and no debt outstanding under this agreement at December 31, 2024.

The Bi-Lateral Intercompany Facility provides for borrowing of up to $500 million from Avangrid at the A2/P2 non-financial 30-day commercial paper rate published by the Federal Reserve. NYSEG had no debt outstanding under this agreement at December 31, 2025 and 2024.

On December 22, 2025, the utilities (New York State Electric and Gas Corporation (“NYSEG”), Rochester Gas and Electric Corporation (“RG&E”), Central Maine Power Company (“CMP”), The United Illuminating Company (“UI”), Connecticut Natural Gas Corporation (“CNG”), The Southern Connecticut Gas Company (“SCG”) and The Berkshire Gas Company (“BGC”)) executed a new credit facility with an aggregate limit of $1,500 million and a termination date of December 23, 2030. Under the terms of the revolving credit facility, each borrower has a maximum borrowing entitlement, or sublimit, which can be periodically adjusted to address specific short-term capital funding needs, subject to the maximum limit contained in the agreement. NYSEG has a maximum sublimit of $1,000 million, RG&E has $500 million, CMP has $375 million, UI has a maximum sublimit of $150 million, SCG has a maximum sublimit of $75 million, and CNG and BCG have maximum sublimits of $50 million. The new facility has set minimum sublimits of $600 million for NYSEG, $250 million for RG&E, $150 million for CMP, $25 million for UI, CNG, SCG, and BGC. The facility fees range from 5 to 25 basis points. NYSEG had no outstanding balance as of December 31, 2025 and 2024.

In the AGR Credit Facility we covenant not to permit, without the consent of the lenders, our ratio of total indebtedness to total capitalization to exceed 0.65 to 1.00 at any time. For purposes of calculating the maximum ratio of indebtedness to total capitalization, the facility excludes from net worth the balance of accumulated other comprehensive loss as it appears on the consolidated balance sheet. The facility contains various other covenants, including a restriction on the amount of secured indebtedness we may maintain. Continued un-remedied failure to comply with those covenants beyond any applicable cure period, constitutes an event of default, and events of default could result in termination or reduction of lenders’ commitments or acceleration of amounts owed under the facility. Our ratio of indebtedness to total capitalization pursuant to the revolving credit facility was 0.52 to 1.00 at December 31, 2025. We are not in default as of December 31, 2025.

Note 8. Preferred Stock Redeemable Solely at the Option of the Company

At December 31, 2025 and 2024, NYSEG had 2,455,000 shares of $100 par value preferred stock, 10,800,000 shares of $25 par value preferred stock and 1,000,000 shares of $100 par value preference stock authorized but unissued.

Note 9. Leases

We have operating leases for office buildings, facilities, vehicles and certain equipment. Our finance leases are primarily related to electric generation, distribution, transmission and other. Certain of our lease agreements include rental payments adjusted periodically for inflation or are based on other periodic input measures. Our leases do not contain any material residual value guarantees or material restrictive covenants. Our leases have remaining lease terms of 1 to 21 years, some of which may include options to extend the leases for up to 20 years, and some of which may include options to terminate the leases within one year. We consider extension or termination options in the lease term if it is reasonably certain we will exercise the option.

The components of lease cost and other information related to leases were as follows:

Years Ended December 31,	2025	2024
(Thousands)		
Lease cost		
Finance lease cost		
Amortization of right-of-use assets	$ 3,252	$ 3,265
Interest on lease liabilities	97	111
Total finance lease cost	3,349	3,376
Operating lease cost	1,530	1,225
Short-term lease cost	724	1,154
Variable lease cost	65	18
Intercompany	(20)	(73)
Total lease cost	**$ 5,648**	**$ 5,700**

Consolidated balance sheet and other information for the years ended December 31, 2025 and 2024 was as follows:

As of December 31,		2025		2024
(Thousands, except lease term and discount rate)				
Operating Leases				
Operating lease right of use assets	$	7,100	$	7,305
Operating lease liabilities, current		1,303		1,318
Operating lease liabilities, long-term		7,096		7,167
Total operating lease liabilities	$	8,399	$	8,485
Finance Leases				
Other assets	$	21,718	$	24,971
Other current liabilities		323		244
Other non-current liabilities		1,156		1,458
Total finance lease liabilities	$	1,479	$	1,702
Weighted-average Remaining Lease Term (years):				
Finance leases		4.93		6.08
Operating leases		8.38		8.66
Weighted-average Discount Rate:				
Finance leases		5.23 %		5.33 %
Operating leases		3.89 %		3.56 %

Supplemental cash flows information related to leases was as follows:

Years Ended December 31,		2025		2024
(Thousands)				
Cash paid for amounts included in the measurement of lease liabilities:				
Operating cash flows from operating leases	$	1,525	$	1,368
Operating cash flows from finance leases	$	97	$	110
Financing cash flows from finance leases	$	224	$	224
Right-of-use assets obtained in exchange for lease obligations:				
Operating leases	$	1,156	$	381

Maturities of lease liabilities were as follows:

(Thousands)	Finance	Operating
Years Ended December 31,		
2026	$ 401	$ 1,512
2027	401	1,179
2028	401	1,357
2029	401	1,026
2030	99	1,665
Thereafter	—	3,080
Total lease payments	**1,703**	**9,819**
Less: imputed interest	(224)	(1,420)
Total	**$ 1,479**	**$ 8,399**

Most of our leases do not provide an implicit rate in the lease, thus we use our incremental borrowing rate based on the information available at the commencement date in determining the present value of lease payments.

Note 10. Commitments and Contingencies

Purchase power and natural gas contracts, including nonutility generators

NYSEG is the provider of last resort for customers. As a result, the company buys physical energy and capacity from the NYISO. In accordance with the NYPSC's February 26, 2008 Order, NYSEG is required to hedge on behalf of non-demand billed customers. The physical electric capacity purchases we make from parties other than the NYISO are to comply with the hedge requirement for electric capacity. The company enters into financial swaps to comply with the hedge requirement for physical electric energy purchases. NYSEG also makes purchases from other independent power producers and New York Power Authority (NYPA) under existing contracts or long-term supply agreements in order to comply with the company’s Public Utility Regulatory Policies Act (PURPA) purchase obligation.

NYSEG satisfies its natural gas supply requirements through purchases from various producers and suppliers, withdrawals from natural gas storage, capacity contracts and winter peaking supplies and resources. The company operates diverse portfolios of gas supply, firm transportation capacity, gas storage and peaking resources. Actual gas costs incurred by the company are passed through to customers through state regulated purchased gas adjustment mechanisms, subject to regulatory review.

The company purchases the majority of its natural gas supply at market prices under seasonal, monthly or mid-term supply contracts and the remainder is acquired on the spot market. The company acquires firm transportation capacity on interstate pipelines under long-term contracts and utilizes that capacity to transport both natural gas supply purchased and natural gas withdrawn from storage to the local distribution system. The company acquires firm underground natural gas storage capacity using long-term contracts and fills the storage facilities with gas in the summer months for subsequent withdrawal in the winter months.

We recognized expenses of approximately $102.8 million for Normal Purchase Normal Sale (NPNS) purchase power and natural gas contracts including non-utility generators in 2025 and $96.2 million in 2024.

Note 11. Environmental Liability

From time to time environmental laws, regulations and compliance programs may require changes in our operations and facilities and may increase the cost of electric and natural gas service.

Waste sites

The Environmental Protection Agency (EPA) and the New York State Department of Environmental Conservation (NYSDEC), as appropriate, have notified us that we are among the potentially responsible parties that may be liable for costs incurred to remediate certain hazardous substances at twelve waste sites, two of which currently have on-going costs. The twelve sites do not include sites where coal gas was manufactured in the past, which are discussed below. With respect to the twelve sites, nine sites are included in the New York State Registry of Inactive Hazardous Waste Disposal Sites with one site also included on the National Priorities list. Any liability may be joint and several for certain of those sites.

We have recorded a liability of $5.2 million as of December 31, 2025, related to the twelve sites. We have paid remediation costs related to the twelve sites. We have recorded an estimated liability of $0.6 million for two other sites where we believe it is probable that we may incur remediation costs and/or monitoring costs, although we have not been notified by an agency that we are among the potentially responsible parties. It is possible that the ultimate cost to remediate the sites may be significantly more than the accrued amount. Our estimate for costs to remediate these sites ranges from $5.8 million to $6.4 million as of December 31, 2025. Factors affecting the estimated remediation amount include the remedial action plan selected, the extent of site contamination and the portion attributed to us. It is anticipated that costs would be recovered in rates typical of historical Site Investigation and Remediation rate recovery.

Manufactured gas plants

We have a program to investigate and perform necessary remediation and/or monitoring at our 39 sites where coal gas was manufactured in the past. The Company has entered into orders on consent with the NYSDEC for 37 sites and into a Brownfield Cleanup Program for 1 site. Those orders require us to investigate and, where necessary, remediate 38 of our 39 sites, with the 39th site the responsibility of another potentially responsible party (PRP).

Our estimate for costs related to investigation, remediation and/or monitoring of the 38 sites ranges from $58.0 million to $135.1 million at December 31, 2025. The estimate could change materially based on facts and circumstances derived from site investigations, changes in required remedial action, changes in technology relating to remedial alternatives, changes due to property use and changes to current laws and regulations.

The liability to investigate and perform remediation and/or monitoring, as necessary, at the known inactive coal gas manufacturing sites was $61.4 million at December 31, 2025 and $51.4 million at December 31, 2024. We recorded a corresponding regulatory asset, net of insurance recoveries and the amount collected from FirstEnergy described below, because we expect to recover the net costs in rates.

Our environmental liability accruals are recorded on an undiscounted basis and are expected to be paid through the year 2057.

FirstEnergy

NYSEG sued FirstEnergy under the Comprehensive Environmental Response, Compensation, and Liability Act to recover environmental cleanup costs at sixteen former manufactured coal gas sites, which are included in the discussion above. In July 2011, the District Court issued a decision and order in NYSEG's favor. Based on past and future clean-up costs at the sixteen sites in dispute, FirstEnergy would be required to pay NYSEG approximately $60 million if the decision were upheld on appeal. On September 9, 2011, FirstEnergy paid NYSEG $30 million, representing their share of past costs of $27 million and pre-judgment interest of $3 million.

FirstEnergy appealed the decision to the Second Circuit Court of Appeals. On September 11, 2014, the Second Circuit Court of Appeals affirmed the District Court's decision in NYSEG's favor, but modified the decision for nine sites, reducing NYSEG's damages for incurred costs from $27 million to $22 million, excluding interest, and reducing FirstEnergy's allocable share of future costs at these sites. NYSEG refunded FirstEnergy the excess $5 million in November 2014.

FirstEnergy remains liable for a share of clean up expenses at nine manufactured gas plant sites. Based on current projections, FirstEnergy's share is estimated at approximately $7.2 million. This amount is being treated as a contingent asset and has not been recorded as either a receivable or a decrease to the environmental provision. Any recovery will be flowed through to NYSEG ratepayers.

Note 12. Accounting for Derivative Instruments and Hedging Activities

We are exposed to certain risks relating to our ongoing business operations. The primary risk we manage by using derivative instruments is commodity price risk. In accordance with the accounting requirements concerning derivative instruments and hedging activities, we recognize all derivative instruments as either assets or liabilities at fair value on our consolidated balance sheet.

The financial instruments we hold or issue are not for trading or speculative purposes.

Commodity price risk: Commodity price risk, due to volatility experienced in the wholesale energy markets, is a significant issue for the electric and natural gas utility industries. We manage this risk through a combination of regulatory mechanisms, such as the pass-through of the market price of electricity and natural gas to customers, and through comprehensive risk management processes. Those measures mitigate our commodity price exposure, but do not completely eliminate it. Owned electric generation and long-term supply contracts reduce our exposure to market fluctuations.

We have electricity commodity purchases and sales contracts for both capacity and energy (physical contracts) that have been designated and qualify for the normal purchases and normal sales exception in accordance with the accounting requirements concerning derivative instruments and hedging activities.

We currently have a non by-passable wires charge adjustment that allows us to pass through rates any changes in the market price of electricity. We use electricity contracts, both physical and financial, to manage fluctuations in electricity commodity prices in order to provide price stability to customers. We include the cost or benefit of those contracts in the amount expensed for electricity purchased when the related electricity is sold. We record changes in the fair value of electric hedge contracts to derivative assets and/or liabilities with an offset to regulatory assets and/or

regulatory liabilities in accordance with the requirements concerning accounting for regulated operations.

We have a purchased gas adjustment clause that allows us to recover through rates any changes in the market price of purchased natural gas, substantially eliminating our exposure to natural gas price risk. We use natural gas futures and forwards to manage fluctuations in natural gas commodity prices in order to provide price stability to customers. We include the cost or benefit of natural gas futures and forwards in the commodity cost that is passed on to customers when the related sales commitments are fulfilled. We record changes in the fair value of natural gas hedge contracts to derivative assets and/or liabilities with an offset to regulatory assets and/or regulatory liabilities in accordance with the requirements concerning accounting for regulated operations.

The amounts for electricity hedge contracts and natural gas hedge contracts recognized in regulatory liabilities and assets as of December 31, 2025 and 2024, respectively, and amounts reclassified from regulatory assets and liabilities into income for the years ended December 31, 2025 and 2024, respectively, are as follows:

	Loss or (Gain) Recognized in Regulatory Assets/ Liabilities		Location of Loss (Gain) Reclassified from Regulatory Assets/ Liabilities into Income	Loss (Gain) Reclassified From Regulatory Assets/ Liabilities Into Income	
(Thousands)					
As of			Years Ended December 31,		
December 31, 2025	Electricity	Natural Gas	2025	Electricity	Natural Gas
Regulatory assets	$ —	$ 1,458	Electricity and natural gas purchased	$ (35,998)	$ (92)
Regulatory liabilities	$ (28,291)	$ —			
December 31, 2024			2024		
Regulatory assets	$ —	$ 115	Electricity and natural gas purchased	$ 29,300	$ 3,730
Regulatory liabilities	$ (12,359)	$ (136)			

Our derivative volumes by commodity type that are expected to settle each year are:

	Electricity Contracts	Natural Gas Contracts
Year to settle	Mwhs	Dths
As of December 31, 2025		
2026	2,937,425	3,000,000
2027	1,232,875	470,000
As of December 31, 2024		
2025	3,308,950	2,730,000
2026	473,575	360,000

The offsetting of derivatives, location in the consolidated balance sheet and amounts of derivatives as of December 31, 2025 and 2024, respectively, consisted of:

December 31, 2025	Derivative Assets-current	Derivative Assets-Non-current	Derivative Liabilities-current	Derivative Liabilities-Non-current
(Thousands)				
Not designated as hedging instruments				
Derivative assets	$ 32,224	$ 12,666	$ 12,390	$ 4,209

Total derivatives as presented in the balance sheet	**$ 10,621**	**$ 1,874**	**$ —**	**$ —**

As of December 31, 2025 and 2024, the derivative assets - non-current are presented within other non-current assets of the consolidated balance sheet. The derivative liabilities - non-current are presented within other non-current liabilities of the consolidated balance sheet.

We face risks related to counterparty performance on hedging contracts due to counterparty credit default. We have developed a matrix of unsecured credit thresholds that are dependent on a counterparty's or the counterparty guarantor's applicable credit rating (normally Moody's or Standard & Poor's). When our exposure to risk for counterparty exceeds the unsecured credit threshold, the counterparty is required to post additional collateral or we will no longer transact with the counterparty until the exposure drops below the unsecured credit threshold.

We have various master netting arrangements in the form of multiple contracts with various single counterparties that are subject to contractual agreements that provide for the net settlement of all contracts through a single payment. Those arrangements reduce our exposure to a counterparty in the event of default on or termination of any one contract. For consolidated financial statement presentation, we offset fair value amounts recognized for derivative instruments and fair value amounts recognized for the right to reclaim or the obligation to return cash collateral arising from derivative instruments executed with the same counterparty under a master netting arrangement.

Certain of our derivative instruments contain provisions that require us to maintain an investment grade credit rating on our debt from each of the major credit rating agencies. If our debt were to fall below investment grade, it would be in violation of those provisions, and the counterparties to the derivative instruments could request immediate payment or demand immediate and ongoing full overnight collateralization on derivative instruments in net liability positions. The aggregate fair value of all derivative instruments with credit-risk-related contingent features that are in a liability position on December 31, 2025 is $1.5 million for which we have posted collateral.

Note 13. Fair Value of Financial Instruments and Fair Value Measurements

The estimated fair value of debt amounted to $4,290 million and $3,186 million as of December 31, 2025 and 2024, respectively. The estimated fair value was determined, in most cases, by discounting the future cash flows at market interest rates. The interest rate curve used to make these calculations takes into account the risks associated with the electricity industry and the credit ratings of the borrowers in each case. The fair value hierarchy for the fair value of debt is considered as Level 2.

Assets and liabilities measured at fair value on a recurring basis

The financial instruments measured at fair value as of December 31, 2025 and 2024 consisted of:

Description	(Level 1)	(Level 2)	(Level 3)	Netting	Total
(Thousands)					
As of December 31, 2025

We had no transfers to or from Level 1 and 2 during the years ended December 31, 2025 and 2024. Our policy is to recognize transfers in and transfers out as of the actual date of the event or change in circumstances that causes a transfer, if any.

We had restricted cash totaling $38.7 million and $0 as of December 31, 2025 and December 31, 2024 , respectively, and is included in “Other Assets” on our consolidated balance sheets held in the storm recovery trust that is restricted to be used to satisfy obligations of the storm-recovery bonds.

Valuation techniques: We measure the fair value of our non-current investments available for sale using quoted market prices in active markets for identical assets and include the measurements in Level 1. The investments which are Rabbi Trusts for deferred compensation plans primarily consist of money market funds.

We determine the fair value of our derivative assets and liabilities utilizing market approach valuation techniques:

- We enter into electric energy derivative contracts to hedge the forecasted purchases required to serve their electric load obligations. We hedge our electric load obligations using derivative contracts that are settled based upon Locational Based Marginal Pricing published by the NYISO. We hedge approximately 70% of their electric load obligations using contracts for a NYISO location where an active market exists. The forward market prices used to value the companies' open electric energy derivative contracts are based on quoted prices in active markets for identical assets or liabilities with no adjustment required and therefore we include the fair value in Level 1.
- We enter into natural gas derivative contracts to hedge the forecasted purchases required to serve our natural gas load obligations. The forward market prices used to value our open natural gas derivative contracts are exchange-based prices for the identical derivative contracts traded actively on the New York Mercantile Exchange. Because we use prices quoted in an active market, we include those fair value measurements in Level 1.

Note 14. Accumulated Other Comprehensive Loss

Accumulated other comprehensive loss for the years ended December 31, 2025 and 2024, consisted of:

	Balance, December 31, 2023	Change 2024	Balance, December 31, 2024	Change 2025	Balance, December 31, 2025
(Thousands)					
Amortization of pension cost for non-qualified plans and current year actuarial gain (loss), net of income tax benefit of ($27) for 2024 and ($79) for 2025	$ (579)	$ (108)	$ (687)	$ (212)	$ (899)
Unrealized gain (loss) on derivatives qualified as hedges:					
Reclassification adjustment for loss on settled cash flow treasury hedges, net of income tax benefit of ($0) for 2024 and ($0) for 2025		—		(10)	
Net unrealized gain (loss) on derivatives qualified as hedges	10	—	10	(10)	—
Accumulated Other Comprehensive Loss	**$ (569)**	**$ (108)**	**$ (677)**	**$ (222)**	**$ (899)**

Note 15. Post-retirement and Similar Obligations

We have funded non-contributory defined benefit pension plans that cover all eligible employees. For employees hired before 2002, the plans provide defined benefits based on years of service and final average salary. Employees hired in 2002 or later are covered under a cash balance plan or formula where their benefit accumulates based on a percentage of annual salary and credited interest. During 2013, we announced that we would stop the cash balance accruals for all non-

union employees covered under the cash balance plans effective December 31, 2013. NYSEG's unionized employees covered under the cash balance plans ceased to receive accruals as of December 31, 2015. Their earned balances would continue to accrue interest, but would no longer be increased by a percentage of earnings. In place of the pension benefit for those employees, they will receive a minimum contribution to their account under their respective company's defined contribution plan. During 2022, the Company decided to freeze pension benefit accruals and contribution credits for non-union employees and transition their retirement benefits to the 401(k) Plan. During 2024, the Company decided to freeze pension benefit accruals for union employees.

The company maintains a 401(k) Savings and Retirement Plan (the Plan) for all eligible employees as defined in the Plan agreement. Participants in the Plan may contribute a percentage of their compensation and the Company may match a predetermined percentage of the participant contributions. Expenses under the Plan for the Company totaled approximately $30.9 million for 2025 and $19.5 million for 2024.

We also have other postretirement health care benefit plans covering substantially all of our employees. The health care plans are contributory with participants' contributions adjusted annually.

Non-Qualified Retirement Benefit Plans

We also sponsor various unfunded non-qualified pension plans for certain current employees, former employees and former directors. The total liability for these plans, which is included in Other non-current liabilities on our consolidated balance sheets, was $2.1 million and $2.2 million at December 31, 2025 and 2024, respectively.

Qualified Retirement Benefit Plans

Obligations and funded status as of December 31, 2025 and 2024 consisted of:

	Pension Benefits		Postretirement Benefits	
As of December 31,	**2025**	**2024**	**2025**	**2024**
(Thousands)				
Change in benefit obligation				
Benefit obligation at January 1	$ 1,049,261	$ 1,159,963	$ 69,554	$ 94,493
Service cost	—	3,112	234	298
Interest cost	53,330	50,161	3,027	3,739
Amendments	—	—	(10,217)	(14,593)
Actuarial loss (gain)	41,693	(55,754)	2,149	(1,600)
Curtailments	—	(13,169)	—	—
Benefits paid	(98,268)	(95,052)	(6,951)	(12,783)
Benefit obligation at December 31	**$ 1,046,016**	**$ 1,049,261**	**$ 57,796**	**$ 69,554**
Change in plan assets				
Fair value of plan assets at January 1	$ 1,033,809	$ 1,114,333	$ 11,862	$ 20,238
Actual return on plan assets	94,310	14,528	61	2,931
Employer & plan participants' contributions	—	—	321	1,476
Benefits paid	(98,268)	(95,052)	(6,951)	(12,783)
Fair value of plan assets at December 31	**$ 1,029,851**	**$ 1,033,809**	**$ 5,293**	**$ 11,862**
Funded status	**$ (16,165)**	**$ (15,452)**	**$ (52,503)**	**$ (57,692)**

During 2025, the pension benefit obligation had an actuarial loss of $41.7 million. This loss was primarily driven by $35.3 million loss from decrease in discount rates. During 2025, the postretirement benefit obligation had an actuarial loss of $2.1 million. This loss was primarily driven by $2.5 million loss from decrease in discount rates. During 2025, the postretirement benefit obligation had a reduction of $10.2 million due to plan amendments. The amendments were driven by a Company decision to reduce postretirement benefit accruals for non-union employees.

During 2024, the pension benefit obligation had an actuarial gain of $55.8 million. This gain was primarily driven by $63.9 million gain from increase in discount rates. During 2024, the pension benefit obligation had a reduction of $13.2 million from curtailments. The curtailments were driven by a Company decision to freeze pension benefit accruals for union employees. During 2024, the postretirement benefit obligations had an actuarial gain of $1.6 million. This gain was primarily driven by $3.2 million gain from increase in discount rates. During 2024, the postretirement benefit obligation had a reduction of $14.6 million from plan amendments.

Amounts recognized in the consolidated balance sheet as of December 31, 2025 and 2024 consisted of:

	Pension Benefits		Postretirement Benefits	
As of December 31,	**2025**	**2024**	**2025**	**2024**
(Thousands)				
Current liabilities	$ —	$ —	$ (2,150)	$ —
Noncurrent liabilities	(16,165)	(15,452)	(50,353)	(57,692)
Total	**$ (16,165)**	**$ (15,452)**	**$ (52,503)**	**$ (57,692)**

We have determined that we are allowed to defer as regulatory assets or regulatory liabilities items that would otherwise be recorded in accumulated other comprehensive income pursuant to the accounting requirements concerning defined benefit pension and other postretirement plans.

Amounts recognized as regulatory assets or regulatory liabilities consist of:

	Pension Benefits		Postretirement Benefits	
As of December 31,	**2025**	**2024**	**2025**	**2024**
(Thousands)				
Net actuarial loss (gain)	$ 100,646	$ 76,952	$ (29,122)	$ (38,130)
Prior service credit	$ —	$ —	$ (18,986)	$ (13,118)

Our accumulated benefit obligation for all qualified defined benefit pension plans was $1,046 million and $1,049 million as of December 31, 2025 and 2024, respectively. NYSEG's postretirement benefits were partially funded as of December 31, 2025 and 2024.

The projected benefit obligation exceeded the fair value of pension plan assets for our qualified plans as of December 31, 2025 and 2024. The accumulated benefit obligation exceeded the fair value of pension plan assets as of December 31, 2025 and 2024. The following table shows the aggregate projected and accumulated benefit obligations and the fair value of plan assets as of December 31, 2025 and 2024.

As of December 31,	2025	2024
(Thousands)		
Projected benefit obligation	$ 1,046,016	$ 1,049,261
Accumulated benefit obligation	$ 1,046,016	$ 1,049,261
Fair value of plan assets	$ 1,029,851	$ 1,033,809

The postretirement benefits obligation for all the qualified plans exceeded the fair value of plan assets as of December 31, 2025 and 2024.

Components of net periodic benefit cost and other amounts recognized in regulatory assets and regulatory liabilities for the years ended December 31, 2025 and 2024 consisted of:

	Pension Benefits		Postretirement Benefits	
Years Ended December 31,	2025	2024	2025	2024
(Thousands)				
Net periodic benefit cost				
Service cost	$ —	$ 3,112	$ 234	$ 298
Interest cost	53,330	50,161	3,027	3,739
Expected return on plan assets	(68,709)	(84,615)	(542)	(950)
Amortization of prior service credit	—	—	(4,349)	(1,475)
Amortization of actuarial net (gain) loss	(7,602)	23,868	(6,377)	(2,540)
Net periodic benefit cost	**$ (22,981)**	**$ (7,474)**	**$ (8,007)**	**$ (928)**
Other changes in plan assets and benefit obligations recognized in regulatory assets and regulatory liabilities				
Current year actuarial net loss (gain)	$ 16,092	$ 14,333	$ 2,631	$ (3,582)
Amortization of actuarial net gain (loss)	7,602	(23,868)	6,377	2,540
Amortization of prior service credit	—	—	4,349	1,475
Effect of curtailments on gain	—	(13,169)	—	—
Current year prior service cost (credit)	$ —	$ —	$ (10,217)	$ (14,593)
Total recognized in regulatory assets and regulatory liabilities	**$ 23,694**	**$ (22,704)**	**$ 3,140**	**$ (14,160)**
Total recognized in net periodic benefit cost and regulatory assets and regulatory liabilities	**$ 713**	**$ (30,178)**	**$ (4,867)**	**$ (15,088)**

We include the net periodic benefit cost in other operating expenses for the service component and other deductions for the non-service component. The net periodic benefit cost for postretirement benefits represents the amount expensed for providing health care benefits to retirees and their eligible dependents.

The weighted-average assumptions used to determine benefit obligations as of December 31, 2025 and 2024 consisted of:

	Pension Benefits		Postretirement Benefits	
As of December 31,	2025	2024	2025	2024
Discount rate	4.92 %	5.33 %	4.65 %	5.26 %
Rate of compensation increase	N/A	N/A	N/A	N/A
Interest crediting rate	3.50 %	3.50 %	N/A	N/A

The discount rate is the rate at which the benefit obligations could presently be effectively settled. We determined the discount rate developing a yield curve derived from a portfolio of high grade non-callable bonds with yields that closely matches the duration of the expected cash flows of our benefit obligations.

The weighted-average assumptions used to determine net periodic benefit cost for the years ended December 31, 2025 and 2024 consisted of:

	Pension Benefits		Postretirement Benefits	
Years Ended December 31,	**2025**	**2024**	**2025**	**2024**
Discount rate	5.33%	4.65% / 4.38%	5.26% / 4.88%	4.65% / 4.35%
Expected long-term return on plan assets	6.25%	7.25%	4.60 %	4.60 %
Rate of compensation increase	N/A	2.50% Union	N/A	N/A

We developed our expected long-term rate of return on plan assets assumption based on a review of long-term historical returns for the major asset classes, the target asset allocations and the effect of rebalancing of plan assets discussed below. That analysis considered current capital market conditions and projected conditions. Our policy is to calculate the expected return on plan assets using the market related value of assets. We amortize unrecognized actuarial gains and losses over 10 years from the time they are incurred.

Assumed health care cost trend rates to determine benefit obligations as of December 31, 2025 and 2024 consisted of:

As of December 31,	**2025**	**2024**
Health care cost trend rate (pre 65/post 65)	8.40% /10.10%	8.90% /10.60%
Rate to which cost trend rate is assumed to decline (the ultimate trend rate)	4.50%	4.50%
Year that the rate reaches the ultimate trend rate	2039 / 2039	2039 / 2039

Contributions: In accordance with our funding policy, we make annual contributions of not less than the minimum required by applicable regulations. We do not expect to contribute to our pension in 2026. We expect to contribute $1.9 million to our postretirement benefit plans in 2026.

Estimated future benefit payments: Our expected benefit payments and expected Medicare Prescription Drug, Improvement and Modernization Act of 2003 (Medicare Act) subsidy receipts, which reflect expected future service, as appropriate, are:

	Pension Benefits	Postretirement Benefits	Medicare Act Subsidy Receipts
(Thousands)			
2026	$ 98,573	$ 7,442	$ —
2027	$ 94,751	$ 6,551	$ —
2028	$ 92,879	$ 5,989	$ —
2029	$ 90,471	$ 5,411	$ —
2030	$ 88,133	$ 4,850	$ —
2031-2035	$ 393,006	$ 19,888	$ —

***Plan assets*:** Our pension benefits plan assets are held in a master trust providing for a single trustee/custodian, a uniform investment manager lineup, and an efficient, cost-effective means of

allocating expenses and investment performance to each plan under the master trust. Our primary investment objective is to have diversified asset allocation policy that mitigates risk and volatility while meeting or exceeding our projected expected return to ensure that current and future benefit obligations are adequately funded. Further diversification and risk mitigation is achieved within each asset class by avoiding significant concentrations in certain markets, utilizing a combination or passive and active investment managers with unique skills and expertise, a systematic allocation to various asset classes and providing broad exposure to different segments of the equity, fixed income and alternative investment markets.

The asset allocation policy is the most important consideration in achieving our objective of superior investment returns while minimizing risk. We have established a target asset allocation policy within allowable ranges for our pension benefits plan assets within broad categories of asset classes made up of Return-Seeking and Liability-Hedging investments. We have targets of 15%-70% for Return-Seeking assets and 30%-85% for Liability-Hedging assets. Return-Seeking investments generally consist of domestic, international and emerging equity, real estate, global asset allocation strategies and hedge funds. Liability-Hedging investments generally consist of long-term corporate bonds, annuity contracts, long-term treasury STRIPS, and opportunistic fixed income investments. Systematic rebalancing within the target ranges increases the probability that the annualized return on the investments will be enhanced, while realizing lower overall risk, should any asset categories drift outside their specified ranges.

The fair values of pension benefits plan assets as of December 31, 2025, by asset category, consisted of:

		Fair Value Measurements		
Asset Category	**Total**	**(Level 1)**	**(Level 2)**	**(Level 3)**
(Thousands)				
As of December 31, 2025				
Cash and cash equivalents	$ 33,611	$ —	$ 33,611	$ —
U.S. government securities	171,795	171,795	—	—
Common stocks	14,108	14,108	—	—
Registered investment companies	35,118	35,118	—	—
Corporate bonds	424,107	—	424,107	—
Common collective trusts	229,880	—	229,880	—
Other, principally annuity, fixed income	31,918	—	31,918	—
	$ 940,537	**$ 221,021**	**$ 719,516**	**$ —**
Other investments measured at net asset value	89,314			
Total	**$ 1,029,851**			

The fair values of pension benefits plan assets as of December 31, 2024, by asset category, consisted of:

Asset Category	Total	Fair Value Measurements (Level 1)	(Level 2)	(Level 3)
(Thousands)				
As of December 31, 2024				
Cash and cash equivalents	$ 44,027	$ 841	$ 43,186	$ —
U.S. government securities	165,058	165,058	—	—
Common stocks	15,455	15,455	—	—
Registered investment companies	24,510	24,510	—	—
Corporate bonds	424,497	—	424,497	—
Common collective trusts	237,795	—	237,795	—
Other, principally annuity, fixed income	24,825	—	24,825	—
	$ 936,167	**$ 205,864**	**$ 730,303**	**$ —**
Other investments measured at net asset value	97,642			
Total	**$ 1,033,809**			

Valuation Techniques

We value our pension benefits plan assets as follows:

- Cash and cash equivalents - Level 1: at cost, plus accrued interest, which approximates fair value. Level 2: proprietary cash associated with other investments, based on yields currently available on comparable securities of issuers with similar credit ratings.
- U.S. government securities - at the closing price reported in the active market in which the security is traded.
- Common stock - at the closing price reported in the active market in which the individual investment is traded.
- Corporate bonds - based on yields currently available on comparable securities of issuers with similar credit ratings.
- Registered investment companies - at the closing price reported in the active market in which the individual investment is traded.
- Common collective trusts - the fair value is primarily derived from the quoted prices in active markets of the underlying securities. Because the fund shares are offered to a limited group of investors, they are not considered to be traded in an active market.
- Other investments, principally annuity and fixed income - based on yields currently available on comparable securities of issuers with similar credit ratings.
- Other investments measured at net asset value (NAV) - fund shares offered to a limited group of investors and alternative investments, such as private equity and real estate oriented investments, partnership/joint ventures and hedge funds are valued using the NAV as a practical expedient.

Our postretirement benefits plan assets are held with trustees in multiple voluntary employees' beneficiary association (VEBA) and 401(h) arrangements and are invested among and within various asset classes to achieve sufficient diversification in accordance with our risk tolerance. This is achieved for our postretirement benefits plan assets through the utilization of multiple institutional mutual and money market funds, providing exposure to different segments of the fixed income, equity and short-term cash markets. NYSEG's postretirement benefits plan assets are invested in a VEBA arrangement that is subject to income taxes.

We have established a target asset allocation policy within allowable ranges for postretirement benefits plan assets of 49% - 69% for equity securities and 31%- 51% for fixed income

investments. Equity investments are diversified across U.S. and non-U.S. stocks, investment styles, and market capitalization ranges. Fixed income investments are primarily invested in U.S. bonds and may also include some non-U.S. bonds. We primarily minimize the risk of large losses through diversification but also through monitoring and managing other aspects of risk through quarterly investment portfolio reviews. Systematic rebalancing within target ranges increases the probability that the annualized return on investments will be enhanced, while realizing lower overall risk, should any asset categories drift outside their specified ranges.

The fair value of other postretirement benefits plan assets, by asset category, as of December 31, 2025 consisted of:

		Fair Value Measurements		
Asset Category	**Total**	**(Level 1)**	**(Level 2)**	**(Level 3)**
(Thousands)				
As of December 31, 2025

Note 17. Related Party Transactions

Certain Networks subsidiaries, including NYSEG, borrow from AGR, the parent of Networks, through intercompany revolving credit agreements. For NYSEG, the intercompany revolving credit agreements provide access to supplemental liquidity. See Note 7 for further detail on the credit facility with AGR.

Avangrid Service Company provides administrative and management services to Networks operating utilities, including NYSEG, pursuant to service agreements. The cost of those services is allocated in accordance with methodologies set forth in the service agreements. The cost allocation methodologies vary depending on the type of service provided. Management believes such allocations are reasonable. The charge for operating and capital services provided to NYSEG by AGR and its affiliates was approximately $152.9 million for 2025 and $155.8 million for 2024. Cost for services includes amounts capitalized in utility plant, which was approximately $33.0 million in 2025 and $26.7 million in 2024. The remainder was primarily recorded as operations and maintenance expense. The charges for services provided by NYSEG to AGR and its subsidiaries were approximately $30.6 million for 2025 and $24.6 million for 2024. All charges for services are at cost. All of the charges associated with services provided are recorded as revenues to offset other operating expenses on the consolidated financial statements.

The balance in accounts payable to affiliates of $20.1 million at December 31, 2025 and $54.2 million at December 31, 2024 is mostly payable to Avangrid Service Company. The balance in accounts receivable from affiliates of $2.8 million at December 31, 2025 and $2.4 million at December 31, 2024 is from various companies.

The balance in notes receivable from affiliates of $0.1 million at December 31, 2025 and $41.3 million at December 31, 2024 is due from CMP. Notes receivable from affiliates relate to the Virtual Money Pool Agreement as discussed in Note 7 of these consolidated financial statements.

Networks holds an approximate 20% ownership interest in the regulated New York TransCo. Through New York TransCo, Networks has formed a partnership with Central Hudson Gas and Electric Corporation, Consolidated Edison, Inc., National Grid, plc and Orange and Rockland Utilities, Inc. to develop a portfolio of interconnected transmission lines and substations to fulfill the objectives of the New York energy highway initiative, which is a proposal to install up to 3,200 MW of new electric generation and transmission capacity in order to deliver more power generated from upstate New York power plants to downstate New York. In 2016 NYSEG received approximately $67 million from New York TransCo in the form of $43 million for assets constructed and transferred to the New York TransCo, $22 million in contributions in aid of construction and approximately $2 million in advanced lease payments for a 99 year lease of land and attachment

rights. We had no outstanding receivable from New York TransCo as of December 31, 2025 and 2024.

Note 18. Subsequent Events

The company has performed a review of subsequent events through March 25, 2026, which is the date these consolidated financial statements were available to be issued.

Independent Auditors' Report

Stockholder and The Board of Directors
Rochester Gas and Electric Corporation:

Opinion

We have audited the consolidated financial statements of Rochester Gas and Electric Corporation and its subsidiary (the Company), which comprise the consolidated balance sheets as of December 31, 2025 and 2024, and the related consolidated statements of income, comprehensive income, changes in common stock equity, and cash flows for the years then ended, and the related notes to the consolidated financial statements.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2025 and 2024, and the results of its operations and its cash flows for the years then ended in accordance with U.S. generally accepted accounting principles.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are required to be independent of the Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with U.S. generally accepted accounting principles, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for one year after the date that the consolidated financial statements are available to be issued.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the consolidated financial statements.

KPMG LLP, a Delaware limited liability partnership, and its subsidiaries are part of the KPMG global organization of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the consolidated financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

Note 1. Summary of Significant Accounting Policies, New Accounting Pronouncements and Use of Estimates

***Background and nature of operations*:** Rochester Gas and Electric Corporation (RG&E, the company, we, our, us), conducts regulated electricity transmission, distribution, and generation operations and regulated natural gas transportation and distribution operations in western New York. RG&E generates electricity from hydroelectric stations. RG&E serves approximately 394,500 electricity and 326,300 natural gas customers as of December 31, 2025, in its service territory of approximately 2,700 square miles. The service territory contains a substantial suburban area and a large agricultural area in parts of nine counties including and surrounding the city of Rochester, New York with a population of approximately one million people. We operate under the authority of the New York State Public Service Commission (NYPSC) and are also subject to regulation by the Federal Energy Regulatory Commission (FERC).

RG&E is a subsidiary of Avangrid Networks, Inc. (Networks), which is a wholly-owned subsidiary of Avangrid, Inc. (AGR), which is a wholly-owned subsidiary of Iberdrola, S.A. (Iberdrola), a corporation organized under the laws of the Kingdom of Spain.

Agreement and Plan of Merger: On May 17, 2024, AGR entered into an Agreement and Plan of Merger (the Merger Agreement) with Iberdrola and Arizona Merger Sub, Inc (Merger Sub). As a result of the consummation of the Merger on December 23, 2024 (closing date), Merger Sub merged with and into Avangrid (the Merger), with Avangrid continuing as the surviving corporation and a wholly-owned subsidiary of Iberdrola. On the closing date, each share of common stock issued and outstanding immediately prior to the closing date (other than common stock owned by the Merger, Merger Sub or any other direct or indirect wholly-owned Subsidiary of the Merger, and in each case not held on behalf of the third parties (collectively, the Excluded Shares)) was converted into a right to receive $35.75 per share of common stock in cash, without interest.

On the closing date, (i) all shares of common stock ceased to be outstanding, were cancelled and ceased to exist and (ii) each Excluded Share ceased to be outstanding and was cancelled without payment of any consideration and ceased to exist. As a result of the consummation of the Merger on December 23, 2024, Iberdrola became the direct owner of 100 shares of common stock of Avangrid which represents the only outstanding capital of the Company. On the closing date, the New York Stock Exchange (NYSE) filed with the Securities and Exchange Commission (the SEC) a notification of removal from listing on Form 25 in order to delist the common stock from the NYSE and deregister the common stock under Section 12(b) of the Securities Exchange Act of 1934, as amended (the Exchange Act). Following the effectiveness of the Form 25, on January 2, 2025, Avangrid filed with the SEC a Form 15 requesting the termination of registration of the common stock under Section 12(g) of the Exchange Act and the suspension of reporting obligations under Section 13 and 15(d) of the Exchange Act with respect to the common stock.

***Basis of presentation*:** The accompanying consolidated financial statements have been prepared in accordance with generally accepted accounting principles in the United States (U.S. GAAP) and are prepared on a consolidated basis, and therefore include the accounts of RG&E and all RG&E VIEs where RG&E has identified that it is the primary beneficiary. All intercompany transactions and accounts have been eliminated in consolidation in all periods presented. The accounting records of RG&E are also maintained in accordance with the uniform system of accounts prescribed by the Federal Energy Regulatory Commission (FERC).

***Significant Accounting Policies*:** We consider the following policies to be the most significant in understanding the judgments that are involved in preparing our consolidated financial statements:

Variable Interest Entity: RG&E Storm Funding, LLC (RG&ESF), is a bankruptcy remote, special purpose subsidiary wholly-owned and consolidated by RG&E. RG&ESF was formed in 2024 for the sole purpose of issuing storm recovery bonds to finance certain of RG&E's unrecovered regulatory assets related to storm costs incurred in New York prior to July 1, 2024.

In February 2025, RG&ESF issued $75 million of storm cost recovery bonds at an interest rate of 4.93% maturing on May 1, 2037, and used the proceeds to acquire storm recovery property from RG&E. The storm recovery property was created by state legislation and the NYPSC Storm Recovery Cost Financing Order for the purpose of financing legacy storm costs incurred prior to July 1, 2024.

The storm recovery property acquired includes the right to impose, bill, collect and adjust a non-bypassable charge from all RG&E customers until the bonds are paid in full and all financing costs have been recovered. The storm recovery bonds are secured by the storm recovery property and cash collections from the storm recovery charges are the sole source of funds to satisfy the debt obligation. The bondholders have no recourse to RG&E.

RG&ESF is considered a variable interest entity (VIE) primarily because its equity capitalization is insufficient to support its operations. RG&E has the power to direct the significant activities of the VIE as described above and therefore RG&E is considered the primary beneficiary.

***Principles of consolidation*:** We consolidate the entities in which we have a controlling financial interest, after the elimination of intercompany transactions. We account for investments in common stock where we have the ability to exercise significant influence, but not control, using the equity method of accounting.

***Revenue recognition*:** We recognize revenues when we transfer control of promised goods or services to our customers in an amount that reflects the consideration we expect to be entitled to in exchange for those goods or services. Refer to Note 4 for further details.

***Regulatory accounting*:** We account for our regulated operations in accordance with the authoritative guidance applicable to entities with regulated operations that meet the following criteria: (i) rates are established or approved by an independent, third-party regulator; (ii) rates are designed to recover the entity's specific costs of providing the regulated services or products and; (iii) there is a reasonable expectation that rates are set at levels that will recover the entity's costs and can be collected from customers. Regulatory assets primarily represent incurred costs that have been deferred because of their probable future recovery from customers through regulated rates. Regulatory liabilities represent: (i) the excess recovery of costs or accrued credits that have been deferred because it is probable such amounts will be returned to customers through future regulated rates; or (ii) billings in advance of expenditures for approved regulatory programs.

We amortize regulatory assets and liabilities and recognize the related expense or revenue in our consolidated statements of income consistent with the recovery or refund included in customer rates. We believe it is probable that our currently recorded regulatory assets and liabilities will be recovered or settled in future rates.

***Utility plant*:** We account for utility plant at historical cost. In cases where we are required to dismantle installations or to recondition the site on which they are located, we record the estimated cost of removal or reconditioning as an asset retirement obligation (ARO) and add an equal amount to the carrying amount of the asset.

Development and construction of our various facilities are carried out in stages. We expense project costs during early stage development activities. Once we achieve certain development milestones and it is probable that we can obtain future economic benefits from a project, we capitalize salaries and wages for persons directly involved in the project, and engineering, permits, licenses, wind measurement and insurance costs. We periodically review development projects in construction for any indications of impairment.

We transfer assets from “Construction work in progress” to “Utility plant” when they are available for service.

We determine depreciation expense for utility plant in service using the straight-line method, based on the average service lives of groups of depreciable property, which include estimated cost of removal. Consistent with FERC accounting requirements, we charge the original cost of utility plant retired or otherwise disposed of to accumulated depreciation. Our composite rates for depreciation were 2.4% of average depreciable property for 2025 and 2024. We amortize our capitalized software cost, which is included in common plant, using the straight-line method, based on useful lives of 7 to 37 years. Capitalized software costs were approximately $195.8 million as of December 31, 2025 and $182.5 million as of December 31, 2024. Depreciation expense was $140.3 million in 2025 and $133.4 million in 2024. Amortization of capitalized software was $10.4 million in 2025 and $8.5 million in 2024.

We charge repairs and minor replacements to operating expenses, and capitalize renewals and betterments, including certain indirect costs.

Allowance for funds used during construction (AFUDC) is a non-cash item that represents the allowed cost of capital, including a return on equity (ROE), used to finance construction projects. We record the portion of AFUDC attributable to borrowed funds as a reduction of interest expense and record the remainder as other income. AFUDC rates are determined in accordance with applicable FERC guidelines for each regulated utility using an annual rate that is compounded semiannually.

Our balances of major classes of utility plant and associated useful lives are shown below as of December 31:

Utility Plant	Estimated useful life range (years)	2025	2024
(Thousands)			
Electric	2-90	$ 4,025,036	$ 3,739,168
Natural Gas	7-80	1,358,780	1,284,600
Common	3-60	664,778	637,639
Utility Plant at Original Cost		**6,048,594**	**5,661,407**
Less accumulated depreciation		(1,558,883)	(1,463,927)
Net Utility Plant in Service		**4,489,711**	**4,197,480**
Construction work in progress		463,065	466,242
Total Utility Plant		**$ 4,952,776**	**$ 4,663,722**

***Leases*:** We determine if an arrangement is a lease at inception. We classify a lease as a finance lease if it meets any one of specified criteria that in essence transfers ownership of the underlying asset to us by the end of the lease term. If a lease does not meet any of those criteria, we classify it as an operating lease. On our consolidated balance sheets, we include, for operating leases: "Operating lease right-of-use (ROU) assets" and "Operating lease liabilities (current and non-current)"; and for finance leases: finance lease ROU assets in "Other assets" and liabilities in "Other current liabilities" and "Other liabilities."

ROU assets represent our right to use an underlying asset for the lease term and lease liabilities represent our obligation to make lease payments arising from the lease. We recognize lease ROU assets and liabilities at commencement of an arrangement based on the present value of lease payments over the lease term. We use the incremental borrowing rate based on information available at the lease commencement date to determine the present value of future payments, except when the rate implicit in the lease is determinable. A lease ROU asset also includes any lease payments made at or before commencement date, minus any lease incentives received, and includes initial direct costs incurred. We do not record leases with an initial term of 12 months or less on the consolidated balance sheet for all classes of underlying assets, and we recognize lease expense for those leases on a straight-line basis over the lease term. We include variable lease payments that depend on an index or a rate in the ROU asset and lease liability measurement based on the index or rate at the commencement date, or upon a modification. We do not include variable lease payments that do not depend on an index or a rate in the ROU asset and lease liability measurement. A lease term includes an option to extend or terminate the lease when it is reasonably certain that we will exercise that option. We recognize lease (rent) expense for operating lease payments on a straight-line basis over the lease term, or we recognize the amount eligible for recovery under our rate plan, such as actual amounts paid. We amortize finance lease ROU assets on a straight-line basis over the lease term and recognize interest expense based on the outstanding lease liability.

We have lease agreements with lease and non-lease components, and account for lease components and associated non-lease components together as a single lease component, for all classes of underlying assets.

***Impairment of long-lived assets*:** We evaluate utility plant and other long-lived assets for impairment when events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment evaluation is based on an undiscounted cash flow analysis at the lowest level to which cash flows of the long-lived assets or asset groups are largely independent of the cash flows of other assets and liabilities. We are required to recognize an impairment loss if the carrying amount of the asset exceeds the undiscounted future net cash flows associated with that asset.

The impairment loss to be recognized is the amount by which the carrying amount of the long-lived asset exceeds the asset's fair value. Depending on the asset, fair value may be determined by use of a discounted cash flow model, with assumptions consistent with a market participant's view of the exit price of the asset.

***Fair value measurement*:** Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants as of the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place in either the principal market for the asset or liability, or, in the absence of a principal market, in the most advantageous market for the asset or liability.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset according to its highest and best use, or by selling it to another market participant that would use the asset according to its highest and best use.

We use valuation techniques that are appropriate in the circumstances and for which sufficient data is available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs. All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorized within the fair value hierarchy based on the transparency of input to the valuation of an asset or liability as of the measurement date.

The three input levels of the fair value hierarchy are as follows:

- Level 1 - inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.
- Level 2 - inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability either directly or indirectly, for substantially the full term of the contract.
- Level 3 - one or more inputs to the valuation methodology are unobservable or cannot be corroborated with market data.

Categorization within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. Certain investments are not categorized within the fair value hierarchy. These investments are measured based on the fair value of the underlying investments but may not be readily redeemable at that fair value.

***Derivatives and hedge accounting*:** Derivatives are recognized on our consolidated balance sheets at their fair value, except for certain electricity commodity purchases and sales contracts for both capacity and energy (physical contracts) that qualify for, and are elected under, the normal purchases and normal sales exception. To be a derivative under the accounting standards for derivatives and hedging, an agreement would need to have a notional and an underlying, require little or no initial net investment and could be net settled. We recognize changes in the fair value of a derivative contract in earnings unless specific hedge accounting criteria are met.

Derivatives that qualify and are designated for hedge accounting are classified as cash flow hedges. We report the gain or loss on the derivative instrument as a component of Other Comprehensive Income (OCI) and later reclassify amounts into earnings when the underlying transaction occurs, which we present in the same income statement line item as the earnings effect of the hedged item. If the amounts in OCI are probable of recovery in the ratemaking process, then the OCI is reclassified as a regulatory asset or liability. For all designated and qualifying hedges, we maintain formal documentation of the hedge and effectiveness testing in accordance with the accounting standards for derivatives and hedging. If we determine that the derivative is no longer highly effective as a hedge, we will discontinue hedge accounting prospectively. For cash flow hedges of forecasted transactions, we estimate the future cash flows of the forecasted transactions and evaluate the probability of the occurrence and timing of such transactions. If we determine it is probable that the forecasted transaction will not occur, we immediately recognize in earnings hedge gains and losses previously recorded in OCI.

Changes in conditions or the occurrence of unforeseen events could require discontinuance of the hedge accounting or could affect the timing of the reclassification of gains or losses on cash flow hedges from OCI into earnings. We record changes in the fair value of electric and natural gas hedge contracts to derivative assets or liabilities with an offset to regulatory assets or regulatory liabilities.

We offset fair value amounts recognized for derivative instruments and fair value amounts recognized for the right to reclaim cash collateral or the obligation to return cash collateral arising from derivative instruments executed with the same counterparty under a master netting arrangement.

***Cash and cash equivalents*:** Cash and cash equivalents include cash, bank accounts, and other highly liquid short-term investments. We consider all highly liquid investments with a maturity date of three months or less when acquired to be cash equivalents and include those investments in “Cash and cash equivalents.” We classify book overdrafts representing outstanding checks in excess of funds on deposit as “Accounts payable and accrued liabilities” on our consolidated balance sheets. We report changes in book overdrafts in the operating activities section of our consolidated statements of cash flows.

Concentration of risk: We maintain our cash and cash equivalents in accounts with major financial institutions in the form of demand deposits and money market accounts. Deposits in these financial institutions may exceed the amount of federal deposit insurance provided on such deposits.

***Consolidated statements of cash flows*:** Supplemental disclosure of cash flow information is as follows:

		2025		2024
(Thousands)				
Cash paid (refunded) during the years ended December 31:				
Interest, net of amounts capitalized	$	76,096	$	67,572
Income taxes paid (refunded), net	$	7,579	$	(7,691)

Of the income taxes paid (refunded), substantially all was paid to (refunded by) AGR under the tax sharing agreement. Interest capitalized was $11.0 million in 2025 and $11.2 million in 2024. Accrued liabilities for utility plant additions were $104.2 million as of December 31, 2025 and $76.4 million as of December 31, 2024.

***Broker margin accounts*:** We maintain accounts with clearing firms that require initial margin deposits upon the establishment of new positions, primarily related to natural gas and electricity derivatives, as well as maintenance margin deposits in the event of unfavorable movements in market valuation for those positions. We show the amount reflecting those activities as broker margin accounts on our consolidated balance sheets.

***Trade receivables and unbilled revenue, net of allowance for credit losses*:** We record trade receivables at amounts billed to customers and we record unbilled revenues based on an estimate of energy delivered or services provided to customers. The estimates for unbilled revenues are determined based on various assumptions, including current month energy load requirements, billing rates by customer class and delivery loss factors. Changes in those assumptions could significantly affect the estimated amounts of unbilled revenues.

The allowance for credit losses is our best estimate of the amount of probable credit losses in our existing accounts receivable, determined based on experience for each service region. Each month we review our allowance for credit losses and past due accounts by age. When we believe that a receivable will not be recovered, we charge off the account balance against the allowance. Changes in assumptions about input factors and customer receivables, which are inherently uncertain and susceptible to change from period to period, could significantly affect the allowance for credit losses estimates.

Trade receivables at December 31 include unbilled revenues of $80.0 million for 2025 and $63.5 million for 2024, and are shown net of an allowance for credit losses at December 31 of $68.6 million for 2025 and $59.5 million for 2024. Trade receivables do not bear interest, although late fees may be assessed. Credit loss expense was $44.7 million in 2025, with no arrears forgiveness balance. Credit loss expense was $48.8 million in 2024, including $0.6 million of arrears forgiveness balances. Arrears forgiveness balances are recovered through a tariff over a five year period that began August 1, 2022 for Phase 1 and a three and a half year-period that began March 1, 2023 for Phase 2.

Trade receivables include amounts due under deferred payment arrangements (DPAs). When a residential customer becomes delinquent in making payments, the NYPSC requires us to allow the customer to enter into a DPA to settle the account balance. A DPA allows the account balance to be paid in installments over an extended period without interest, which generally exceeds one year, by negotiating mutually acceptable payment terms. Generally, we must continue to serve a customer who cannot pay an account balance in full if the customer: (i) pays a reasonable portion of the balance; (ii) agrees to pay the balance in installments; and (iii) agrees to pay future bills within 30 days until the DPA is paid in full. Failure to make payments on a DPA results in the full amount of a receivable under a DPA being due. These accounts are part of the regular operating cycle and we classify them as short-term.

We establish our allowance for credit losses, including for unbilled revenue (also referred to as contract assets), by using both historical average loss percentages to project future losses, and by establishing a specific allowance for known credit issues or for specific items not considered in the historical average calculation. We also consider whether we need to adjust historical loss rates to reflect the effects of current conditions and forecasted changes considering various economic indicators (e.g., Gross Domestic Product, Personal Income, Consumer Price Index, Unemployment Rate) over the contractual life of the trade receivables. We write off amounts when we have exhausted reasonable collection efforts. The allowance for credit losses for DPAs at December 31 was $30.9 million in 2025 and $25.3 million in 2024. DPA receivable balances at December 31 were $45.9 million in 2025 and $41.6 million in 2024.

***Debentures, bonds and bank borrowings*:** We record bonds, debentures and bank borrowings as a liability equal to the proceeds of the borrowings. We treat the difference between the proceeds and the face amount of the issued liability as discount or premium and accrete the amounts as interest expense or income over the life of the instrument. We defer incremental costs associated with the issuance of the debt instruments and amortize them over the same period as debt discount or premium. We present bonds, debentures and bank borrowings net of unamortized discount, premium and debt issuance costs on our consolidated balance sheets.

Inventory: Inventory comprises fuel and natural gas in storage and materials and supplies. We own natural gas that is stored in third-party owned underground storage facilities, which we record as inventory. We price injections of inventory into storage at the market purchase cost at the time of injection, and price withdrawals of working gas from storage at the weighted-average

cost in storage. We continuously monitor the weighted-average cost of gas value to ensure it remains at the lower of cost and net realizable value. We report inventories to support gas operations on our consolidated balance sheets within “Fuel and natural gas in storage.”

We also have materials and supplies inventories that we use for construction of new facilities and repairs of existing facilities. These inventories are carried and withdrawn at the lower of cost and net realizable value and reported on our consolidated balance sheets within “Materials and supplies.” We combine inventory items for the consolidated statement of cash flow presentation purposes.

In addition, stand-alone renewable energy credits that are generated or purchased and held for sale are recorded at the lower of cost or net realizable value and are reported on our consolidated balance sheets within “Materials and supplies.”

Government grants: We record government grants as a reduction to the related utility plant to be recovered through rate base, in accordance with the prescribed FERC accounting.

In accounting for government grants related to operating and maintenance costs, we recognize amounts receivable as an offset to expenses in the consolidated statements of income in the period in which we incur the expenses.

The changes in government grants recorded as a reduction to the related utility plant as of December 31, 2025 and 2024 consisted of:

(Thousands)	Government grants	Total
As of December 31, 2023	**$ 17,052**	**$ 17,052**
Disposals	—	—
Recognized in income	(400)	(400)
As of December 31, 2024	**16,652**	**16,652**
Disposals	—	—
Recognized in income	(401)	(401)
As of December 31, 2025	**$ 16,251**	**$ 16,251**

We are required to comply with certain terms and conditions applicable to each grant and, if a disqualifying event should occur as specified in the grant's terms and conditions, we are required to repay the grant funds to the government. We believe we are in compliance with each grant's terms and conditions as of December 31, 2025 and 2024.

Deferred income: Apart from government grants, we occasionally receive payments from transactions in advance of the resulting performance obligations arising from the transaction. It is our policy to defer such payments on our consolidated balance sheets and amortize them to earnings when revenue recognition criteria are met.

Asset retirement obligations**:** We record the fair value of the liability for an asset retirement obligation (ARO) and a conditional ARO in the period in which it is incurred, capitalizing the cost by increasing the carrying amount of the related long-lived asset. The ARO is associated with our long-lived assets and primarily consists of obligations related to removal or retirement of asbestos, polychlorinated biphenyl-contaminated equipment, gas pipeline, and cast iron gas mains. We adjust the liability periodically to reflect revisions to either the timing or amount of the original estimated undiscounted cash flows over time. We accrete the liability to its present

value each period and depreciate the capitalized cost over the useful life of the related asset. Upon settlement we will either settle the obligation at its recorded amount or incur a gain or a loss. We defer any timing differences between rate recovery and depreciation expense and accretion as either a regulatory asset or a regulatory liability.

The term conditional ARO refers to an entity's legal obligation to perform an asset retirement activity in which the timing or method of settlement are conditional on a future event that may or may not be within the entity's control. If an entity has sufficient information to reasonably estimate the fair value of the liability for a conditional ARO, it must recognize that liability at the time the liability is incurred.

The following table reconciles the beginning and ending aggregate carrying amount of the ARO, including our conditional ARO, for the years ended December 31, 2025 and 2024.

Years Ended December 31,		2025		2024
(Thousands)				
ARO, beginning of year	$	2,091	$	2,206
Liabilities settled during the year		(232)		(231)
Accretion expense		110		116
ARO, end of year	**$**	**1,969**	**$**	**2,091**

We have AROs for which we have not recognized a liability because the fair value cannot be reasonably estimated due to indeterminate settlement dates, including: the removal of hydroelectric dams due to structural inadequacy or for decommissioning; the removal of property upon termination of an easement, right-of-way or franchise; and costs for abandonment of certain types of gas mains.

***Accrued removal obligations*:** We meet the requirements concerning accounting for regulated operations and recognize a regulatory liability for the difference between removal costs collected in rates and actual costs incurred. We classify those amounts as accrued removal obligations.

***Environmental remediation liability*:** In recording our liabilities for environmental remediation costs the amount of liability for a site is the best estimate, when determinable; otherwise it is based on the minimum liability or the lower end of the range when there is a range of estimated losses. We record our environmental liabilities on an undiscounted basis.

***Post-employment and other employee benefits*:** We sponsor defined benefit pension plans that cover the majority of our employees. We also provide health care and life insurance benefits through various postretirement plans for eligible retirees.

We evaluate our actuarial assumptions on an annual basis and consider changes based on market conditions and other factors. All of our qualified defined benefit plans are funded in amounts calculated by independent actuaries, based on actuarial assumptions proposed by management.

We account for defined benefit pension or other postretirement plans, recognizing an asset or liability for the overfunded or underfunded plan status. For a pension plan, the asset or liability is the difference between the fair value of the plan's assets and the projected benefit obligation. For any other postretirement benefit plan, the asset or liability is the difference between the fair value of the plan's assets and the accumulated postretirement benefit obligation. We generally reflect all unrecognized prior service costs and credits and unrecognized actuarial gains and losses as regulatory assets rather than in OCI, as management believes it is probable that such

items will be recoverable through the ratemaking process. Certain nonqualified plan expenses are not recoverable through the ratemaking process and we present the unrecognized prior service costs and credits and unrecognized actuarial gains and losses in accumulated other comprehensive loss. If a plan meets settlement or curtailment accounting criteria, we recognize a regulatory asset or liability if these costs are probable of recovery from ratepayers. We use a December 31st measurement date for our benefits plans.

We amortize prior service costs for both the pension and other postretirement benefits plans on a straight-line basis over the average remaining service period of employees active on the date of the amendment. Prior service cost changes resulting from union bargaining agreements are amortized on a straight-line basis over the period from first recognition to the end of the bargaining agreement. We amortize unrecognized actuarial gains and losses related to the pension and other postretirement benefits plans over 10 years from the time they are incurred as required by the NYPSC. Our policy is to calculate the expected return on plan assets using the market-related value of assets. We determine that value by recognizing the difference between actual returns and expected returns over a five-year period.

***Income taxes*:** In August 2022, the Inflation Reduction Act of 2022 ("IRA") was signed into law in the United States. The IRA created a new corporate alternative minimum tax (“CAMT”) of 15% on adjusted consolidated financial statement income and an excise tax of 1% on the value of certain stock repurchases. The CAMT and other various applicable provisions of the IRA are effective for the Company for periods beginning after December 31, 2022. The impact of CAMT will depend on our facts in each year, as well as on anticipated guidance from the U.S. Department of Treasury.

AGR, the parent company of Networks, files a consolidated federal income tax return and various state income tax returns, some of which are unitary as required or permitted, including all of the activities of its subsidiaries. Each subsidiary company is treated as a member of the consolidated group and determines its current and deferred taxes based on the separate return with benefits for loss method. As a member, RG&E settles its current tax liability or benefit each year directly with AGR pursuant to a tax allocation agreement between AGR and its members.

The aggregate amount of the related party income tax receivable balance due from AGR at December 31, 2025 is $0.8 million. The aggregate amount of the related party income tax payable balance due to AGR at December 31, 2024 is $6.5 million.

We use the asset and liability method of accounting for income taxes. Deferred tax assets and liabilities reflect the expected future tax consequences, based on enacted tax laws, of temporary differences between the tax basis of assets and liabilities and their financial reporting amounts. In accordance with U.S. GAAP for regulated industries, we have established regulatory assets and liabilities for the net revenue requirements to be recovered from or refunded to customers for the related future tax expense or benefit associated with certain of these temporary differences. We defer the investment tax credits when earned and amortize them over the estimated lives of the related assets. We also recognize the income tax consequences of intra-entity transfers of assets other than inventory when the transfer occurs. We had no intra-entity transfers of assets other than inventory during the years ended December 31, 2025 and 2024.

Deferred tax assets and liabilities are measured at the expected tax rate for the period in which the asset or liability will be realized or settled, based on legislation enacted as of the consolidated balance sheet date. We charge or credit changes in deferred income tax assets and liabilities that are associated with components of OCI directly to OCI. Significant judgment is required in determining income tax provisions and evaluating tax positions. Our tax positions are

evaluated under a more-likely-than-not recognition threshold before they are recognized for financial reporting purposes. We record valuation allowances to reduce deferred tax assets when it is not more likely than not that we will realize all or a portion of a tax benefit. We consider the effect of the alternative minimum tax system in determining the need for a valuation allowance for deferred taxes. Deferred tax assets and liabilities are netted and classified as non-current in our consolidated balance sheets.

We record the excess of state franchise tax computed as the higher of a tax based on income or a tax based on capital in “Taxes other than income taxes” and “Taxes accrued” in our consolidated financial statements.

Positions taken or expected to be taken on tax returns, including the decision to exclude certain income or transactions from a return, are recognized in the consolidated financial statements when it is more likely than not the tax position can be sustained based solely on the technical merits of the position. The amount of a tax return position that is not recognized in the consolidated financial statements is disclosed as an unrecognized tax benefit. Changes in assumptions on tax benefits may also impact interest expense or interest income and may result in the recognition of tax penalties. Interest and penalties related to unrecognized tax benefits are recorded within “Interest expense, net of capitalization” and “Other Income” and “Other Deductions” in the consolidated statements of income.

Uncertain tax positions have been classified as non-current unless expected to be paid within one year. Our policy is to recognize interest and penalties on uncertain tax positions as a component of interest expense in the consolidated statements of income.

Our income tax expense, deferred tax assets and liabilities, and liabilities for unrecognized tax benefits reflect management’s best assessment of estimated current and future taxes to be paid. Significant judgments and estimates are required in determining the consolidated income tax components of the consolidated financial statements.

Limited voting junior preferred stock: We have a class of preferred stock having one share and a par value of $1, which is issued and outstanding and has voting authority only with respect to whether RG&E may file a voluntary bankruptcy petition.

Adoption of New Accounting Pronouncements

Although we are not a public business entity, we adopt new accounting standards based on public business entity guidance aside from the effective dates in certain situations where we may follow the effective dates for private entities.

There have been no new accounting pronouncements adopted as of and for the year ended December 31, 2025 that are expected to have a material impact on RG&E’s consolidated financial statements.

Accounting Pronouncements Issued But Not Yet Adopted

The following are new accounting pronouncements not yet adopted that we have evaluated or are evaluating to determine their effect on our consolidated financial statements.

(a) Simplified credit loss guidance

In July 2025, FASB issued guidance to simplify applying ASC 326, Financial instruments – Credit losses, to current accounts receivable and contract assets arising from transactions accounted for under ASC 606, Revenue from contracts with customers, including those assets acquired in a business combination or recognized through the consolidation of a variable interest entity that is not a business if those assets arose from transactions that the acquiree or variable interest entity accounted for under ASC 606. The update introduces (1) a practical expedient allowing entities to assume current conditions remain unchanged over the remaining life of these assets, and (2) an accounting policy election for non-public entities, permitting consideration of post– balance sheet cash collections when estimating expected credit losses, provided the practical expedient is also elected. The amendment is effective for all entities in interim and annual periods for fiscal years beginning after December 15, 2025. We do not expect the new guidance to have a material impact on our consolidated results of operations, financial position and cash flows.

(b) Accounting for internal-use software costs

In September 2025 FASB issued guidance to modernize internal-use software guidance to eliminate the old stage-based capitalization model and to introduce a probable-to-complete threshold, requiring management authorization, funding commitment, and a probable expectation of completion before capitalization begins. It provides enhanced guidance and examples for applying this threshold, including factors for assessing significant development uncertainty such as novel features or ongoing revisions to performance requirements. Existing rules for external-use software, types of costs eligible for capitalization, and the point at which capitalization ceases remain unchanged. The amendment is effective for all entities in interim and annual periods for fiscal years beginning after December 15, 2027. We do not expect the new guidance to have a material impact on our consolidated results of operations, financial position and cash flows.

(**c) Hedge accounting improvements**

In November 2025, the FASB issued guidance, which provides refinements to hedge documentation and easing of certain operational requirements. The amendments primarily affect cash flow hedges, with targeted changes to fair value and net investment hedges. They (1) allow hedging a clearly related variable price component of a forecasted nonfinancial transaction, (2) permit grouping forecasted transactions with similar risk exposure, and (3) introduce a model for cash flow hedging “choose-your-rate” debt that lets borrowers change documented indexes or tenors without automatically ending hedge accounting. The amendment is effective for interim and annual reporting periods in fiscal years beginning after December 15, 2026, for public business entities, and after December 15, 2027, to all other entities. We are evaluating to determine the effect of this amendment on our hedge accounting programs and overall consolidated financial statements.

(d) Accounting for government grants

In December 2025, FASB issued amendments to provide comprehensive guidance on recognizing, measuring, and presenting government grants under ASC 832, Accounting for government grants by business entities, which previously only addressed disclosures. The amendment responds to the lack of explicit U.S. GAAP guidance that led to diverse practices and reliance on other GAAP or International Financial Reporting Standards (IFRS) by analogy. It classifies grants into asset-related and income-related categories, offering two approaches for asset-related grants: the cost accumulation approach (reducing the asset’s carrying amount) and the deferred income approach (recognizing income systematically over the asset’s useful

life). Income-related grants, such as operating expense reimbursements, are recognized over the period the related costs occur, while grants for past costs or immediate support are recognized when the probable threshold is met. The amendment also includes guidance for business combinations, specifying when deferred income should or should not be recognized by the acquirer. The amendment is effective for public entities in fiscal years beginning after December 15, 2028, and for others after December 15, 2029, with transition options including modified prospective, modified retrospective, or full retrospective approaches. We do not expect the new guidance to have a material impact on our consolidated results of operations, financial position and cash flows.

***Use of estimates and assumptions*:** The preparation of our consolidated financial statements in conformity with U.S. GAAP requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the consolidated financial statements, and the reported amounts of revenues and expenses during the reporting periods. Significant estimates and assumptions are used for, but not limited to: (1) allowance for credit losses and unbilled revenues; (2) asset impairments; (3) depreciable lives of assets; (4) income tax valuation allowances; (5) uncertain tax positions; (6) reserves for professional, workers' compensation, and comprehensive general insurance liability risks; (7) contingency and litigation reserves; (8) earnings sharing mechanism (ESM); (9) environmental remediation liabilities; (10) pension and other postretirement employee benefits (OPEB); (11) fair value measurements and (12) AROs. Future events and their effects cannot be predicted with certainty; accordingly, our accounting estimates require the exercise of judgment. The accounting estimates used in the preparation of our consolidated financial statements will change as new events occur, as more experience is acquired, as additional information is obtained, and as our operating environment changes. We evaluate and update our assumptions and estimates on an ongoing basis and may employ outside specialists to assist in our evaluations, as considered necessary. Actual results could differ from those estimates.

Union collective bargaining agreements: Approximately 40% of our employees are covered by a collective bargaining agreement. We have 100% of the collective bargaining agreements expiring during 2026.

Note 2. Industry Regulation

Electricity and Natural Gas Distribution

Our revenues are regulated, being based on tariffs established in accordance with administrative procedures set by the NYPSC. Tariffs are applied to regulated activities and are approved by the NYPSC and are based on the cost of providing service. Our revenues are set to be sufficient to cover all operating costs, including energy costs, finance costs, and the costs of equity, the last of which reflects our capital ratio and a reasonable return on equity (ROE).

Energy costs that are set in the New York wholesale markets are passed on to consumers. The difference between energy costs that are budgeted and those that are actually incurred by the utilities is offset by applying reconciliation procedures that result in either immediate or deferred tariff adjustments. Reconciliation procedures also apply to other costs, many of which are exceptional—such as those arising from extreme weather, environmental requirements, regulatory changes, accounting changes, and programs supporting vulnerable customers. Revenues that exceed target returns, usually the result of better-than-expected cost efficiency, are generally shared with our customers, resulting in future tariff reductions.

2023 RG&E Rate Case Filing

On May 26, 2022, RG&E made an initial filing to the NYPSC requesting increases to the delivery rates for its electric business of 19.0% and for its gas business of 20.9%. This initial filing started a lengthy process guided by NYPSC regulations. The Department of Public Service Staff and other parties to the rate cases submitted testimony on September 26, 2022.

On October 18, 2022, the Company submitted rebuttal testimony responding to testimony of Department of Public Service Staff and other parties to the proceedings. On October 19, 2022, the Company filed a notice of impending settlement negotiations. A Joint Proposal for a three-year rate plan term was filed on June 14, 2023. The NYPSC issued an Order on October 12, 2023, approving the Joint Proposal in its entirety with one modification to acknowledge that the "make whole" period would be effective from May 1, 2023, through November 1, 2023, rather than October 1, 2023, as originally proposed in the Joint Proposal. The effective date of new tariffs was November 1, 2023, with make-whole back to May 1, 2023. An Order was issued on April 18, 2024, approving the Companies filed tariff amendments on a permanent basis. The Joint Proposal bases delivery revenues on a 9.20% ROE and 48% equity ratio; however, for the proposed earnings sharing mechanism, the equity ratio is the lower of the actual equity ratio or 50%. The approved Joint Proposal was signed in whole or in part by eight parties, and includes levelized delivery rate increases as summarized below:

	May 1, 2023		May 1, 2024		May 1, 2025	
	Rate Increase (Millions)	Delivery Rate Increase* %	Rate Increase (Millions)	Delivery Rate Increase* %	Rate Increase (Millions)	Delivery Rate Increase* %
Electric	$51.0	11.0%	$56.6	11.0%	$65.3	11.0%
Gas	$18.2	10.2%	$20.1	10.2%	$22.4	10.2%

* Based on "net base delivery" revenues, which consist of gross base delivery revenue plus Bill Issuance Payment Process (BIPP), plus Gross Revenue Tax (GRT).

The approved Joint Proposal also reflects increased energy efficiency programs and distribution vegetation management, along with investments in aging infrastructure, resiliency, continued implementation of Advanced Metering Infrastructure (AMI), and increases in the Company's workforce. The approved Joint Proposal reflects the continued recovery of deferred RG&E Electric storm costs and continued reserve accounting for qualifying Major Storms ($4.5 million in Rate Year 1, $6.0 million in Rate Year 2 and $7.6M in Rate Year 3). Incremental maintenance costs incurred to restore service in qualifying divisions will be chargeable to the Major Storm Reserve provided they meet certain thresholds for each storm event.

The approved Joint Proposal continued the electric reliability performance measures (and associated potential negative revenue adjustments for failing to meet established performance levels) which include the system average interruption frequency index (SAIFI) and the customer average interruption duration index (CAIDI). The Proposal also maintains certain gas safety performance measures at the Company, including those relating to the replacement of leak prone main, leak backlog management, emergency response, and damage prevention. The approved Joint Proposal established threshold performance levels for designated aspects of customer service quality, with increases to potential negative revenue adjustments. The approved Joint Proposal continues bill reduction and arrears forgiveness Low Income Programs. Certain REV-related incremental costs and fees will be included in the revenue adjustment mechanism (RAM) to the extent cost recovery is not provided for elsewhere. Under the approved Joint Proposal, RG&E continues the RAM, which is applicable to all customers, to return or collect RAM Eligible Deferrals and Costs, including: (1) property taxes; (2) Major Storm deferral balances; (3) gas leak prone pipe replacement; (4) REV costs and fees which are not covered by other recovery mechanisms; (5) costs associated with the implementation of any

Commission-ordered EV program which are not covered by any other cost recovery mechanism; and (6) Covid-related uncollectibles (Rate Years 1 and 2 only).

The Proposal provided for partial or full reconciliation of certain expenses including but not limited to: pension and other postretirement benefits; property taxes; variable rate debt and new fixed rate debt; gas research and development; environmental remediation costs; Major Storms; nuclear electric insurance limited credits; economic development; Low Income Programs, and Covid-related Uncollectible Expense. The Proposal also includes downward-only Net Plant AMI and Resiliency Program reconciliations. In addition, the Proposal included downward-only reconciliations for the costs of electric distribution and gas vegetation management; pipeline integrity; and other incremental maintenance programs. The Proposal provided that the Company continue the electric and gas revenue decoupling mechanisms (RDM) on a total revenue per class basis.

The Proposal provides that with few exceptions, the provisions for electric and gas service under the Proposal for Rate Year 3 (the twelve-month period ending April 30, 2026) shall continue unless and until such provisions and base delivery rates for electric or gas service are changed by subsequent order of the New York Public Service Commission. Thus, from May 1, 2026, until such time as new rates are approved by the Commission, the current rates, and terms for Rate Year 3 of the prior Proposal remain in effect.

2025 RG&E Rate Case Filing

On June 30, 2025, Rochester Gas and Electric Corporation filed rate cases with the New York Public Service Commission for its electric and gas delivery services. The electric filing (Docket No. 25-E-0379) requests an annual revenue increase of 220.2 million, representing a 36.0% increase in base delivery revenues equivalent to 20.1% increase in total revenues, based on a proposed 10.0% return on equity. The average residential customer's monthly bill is estimated to increase by $33.01. Concurrently, the gas rate case (Docket No. 25-G-0380) seeks $72.9 million in additional annual revenues, representing a 32.0% increase in gas delivery revenues or a 17.1% increase in total revenues, also at a 10.0% return on equity. The average residential customer's monthly gas bill is estimated to increase by $18.87. These revenue requests were updated on December 5, 2025, as follows: RG&E Electric requests an annual revenue increase of $200.5 million, representing a 32.6% increase in base delivery revenues or a 17.5% increase in total revenues, and RG&E Gas requests $66.5 million in additional annual revenues, representing a 28.4% increase in base delivery revenues or a 14.8% increase in total revenues. These requests reflect cost recovery for capital investment, expiring regulatory amortizations, major storm allowances, labor and benefits, and other legacy cost deferrals and state policy-driven infrastructure investments.

RG&E supplemented its one-year test-year filings with four additional data years and detailed forward-looking analyses to support a five-year rate plan settlement. This longer-term framework is designed to levelize costs over time, reduce volatility in customer bills, and enhance the Company's ability to plan and invest in future infrastructure needs. By extending the rate plan horizon, RG&E can better address supply-chain constraints, manage long lead-time projects, and align with New York State's long-term energy and climate objectives.

The New York PSC has suspended the proposed effective dates for both filings through May 26, 2026. In July 2025 and October 2025, Administrative Law Judges issued rulings on party status and procedural schedules, followed by testimony, discovery, and evidentiary hearings between September and March 2026. A final PSC decision is anticipated in spring 2026, with new rates potentially effective on or before July 2026. We cannot predict the outcome of this matter.

Reforming the Energy Vision (REV)

New York's Reforming the Energy Vision (REV) initiative is an ongoing effort by the Public Service Commission to modernize the state's energy system and regulatory framework. The initiative aims to improve energy efficiency, expand renewable resources, and increase the use of distributed energy technologies such as storage, microgrids, and on-site generation. As part of this effort, utilities serve as Distribution System Platform providers and are required to regularly update long-term plans for operating a more distributed and dynamic grid.

REV has also driven changes to utility incentives, rate design, and compensation structures for distributed energy resources. This includes Earnings Adjustment Mechanisms, evolving approaches to rooftop and community solar compensation, improvements to billing and crediting processes, and programs designed to make clean energy more accessible, particularly for low-income customers and disadvantaged communities. The state has continued refining these programs through various orders that expand customer participation options, streamline processes, and encourage broader adoption of renewable energy.

Several related initiatives support REV's broader goals, including development of an integrated statewide energy data platform, expanded electric vehicle infrastructure and rate reforms, energy storage deployment policies, and enhancements to demand management programs. New York is also advancing a comprehensive "Grid of the Future" effort to identify the flexible resources, capabilities, and infrastructure investments needed for a more resilient, affordable, and clean energy system.

Customer Arrearages Reduction Order

New York established a multi-phase program to reduce utility arrears accumulated during the COVID-19 pandemic. Phase 1 provided one-time bill credits to low-income customers, funded partly by the State and partly by a surcharge on all customers that will be collected over five years starting in 2022. Phase 2 expanded relief to additional low-income, residential, and small business customers who had past-due balances from before May 2022, offering credits of up to about $1,500. For RG&E, the total projected cost of these Phase 2 credits is approximately $16 million.

The State also provided separate funding through the 2023–2024 budget to deliver immediate bill relief. Under this budget appropriation, RG&E was allocated about $7.2 million for electric customers and $3.7 million for gas customers, which resulted in one-time credits of approximately $18 per electric customer and $11 per gas customer.

Community Leadership and Climate Protection Act

Pursuant to the Community Leadership and Climate Protection Act of 2019 (CLCPA) and Accelerated Renewable Energy Growth and Community Benefit Act of 2020, the Commission has issued orders addressing investment in transmission by RG&E to support the state achieving the CLCPA's goal of 70% renewable energy by 2030. On February 16, 2023, the Commission issued an Order approving the investment of approximately $157 million by RG&E through 2030 in CLCPA "Phase 2" transmission projects. Phase 2 transmission projects are upgrades to the RG&E local transmission system that are being developed primarily to allow for the interconnection and delivery of renewable energy in the Southern Tier, an area that the Commission has designated as an "Area of Concern" for renewable energy development because there is substantial renewable energy development interest but inadequate

transmission. Unlike other transmissions owned by RG&E, the cost of CLCPA Phase 2 transmission will be recovered pursuant to a formula rate under the jurisdiction of the Federal Energy Regulatory Commission so that costs can be allocated statewide. RG&E and other transmission-owning utilities in New York negotiated a Cost Sharing and Recovery Agreement (CSRA), which was approved by the Commission on May 12, 2022, and by FERC on August 22, 2022. Under the terms of the CSRA the cost of CLCPA Phase 2 transmission projects approved by the Commission will be recovered through the New York Independent System Operator tariff, with ROE and capital structure determined by the Commission, subject to an ROE ceiling set by FERC. The CSRA requires utilities to obtain authorization from the Commission prior to seeking recovery of 100% construction work in progress (CWIP) incentive associated with CLCPA Phase 2 projects. In an April 19, 2024 Order, the Commission granted the Company's request for authorization to seek a 100% CWIP incentive for its CLCPA Phase 2 projects. On July 5, 2024, FERC conditionally accepted RG&E's application for CWIP and the 100% Abandoned Plant incentive (Abandoned Plant), subject to further compliance, for projects that are subject to subsequent permitting approval by the NYPSC under Article VII of New York State's Public Service Law, effective July 8, 2024, and denied the application for CWIP and Abandoned Plant for projects not subject to Article VII permitting approval. On August 2, 2024, RG&E sought clarification, or in the alternative rehearing, of the July 5, 2024 Order. On October 1, 2024, FERC ruled on RG&E's request for clarification/rehearing. FERC confirmed that any projects that receive state siting approval orders that include the required reliability and/or congestion reduction determinations can qualify for incentives, not limited to the projects listed in the July order as Article VII projects. FERC denied clarification and rehearing to include CWIP in rate base prior to FERC's acceptance of the state siting orders.

Proactive Planning Proceedings

In Docket 24-E-0364, the New York Public Service Commission launched a Proactive Planning Proceeding to ensure that the State's electric grid could accommodate the rapid load growth driven by transportation and building electrification under the CLCPA, recognizing that critical capacity constraints could otherwise delay customer interconnections and derail climate goals. Pursuant to its August 15, 2024, Order Establishing Proactive Planning Proceeding, the PSC directed all Joint Utilities—including RG&E—to identify and file "urgent upgrade projects" that must commence construction by mid-2026 to meet immediate capacity needs. On November 26, 2024, RG&E petitioned for three such projects, totaling $86 million, encompassing a substation expansion at Station 255 in Henrietta (net of a $4.7 million State grant), feeder and transformer reinforcements in the Rochester North load pocket, and capacity enhancements serving the Greater Rochester industrial corridor to unlock near-term electrification initiatives. In its June 12, 2025, Order Addressing Urgent Upgrade Filings, the Commission approved a subset of the filings for immediate development and cost recovery, most notably authorizing RG&E's 47 MW Capacity Expansion Project—a $33.2 million investment to significantly expand electric-vehicle charging capability and enable large-scale building electrification under the urgent project framework. On September 18, 2025, the Commission directed the Joint Utilities to develop two key components to support future proactive planning cycles including a Modified Proactive Planning Framework document filed on November 17, 2025, that identifies the data and sources to be considered and a Proactive Planning Study Report that assesses needs and proposes projects to be filed by September 2026. The Clean Energy Policy team is coordinating collaboration with the Joint Utilities to ensure alignment of Projects that RG&E's internal forecast team and the distribution planning team are working towards. Internally we expect to have some potential project proposals in the April/May timeframe.

Management Audit

On May 19, 2025, the New York State Public Service Commission released the final report of its management and operations audit of RG&E. The audit, conducted by a third party, covered the period from 2018 through 2023 and resulted in recommendations. In response, the Company submitted an implementation plan on June 18, 2025, outlining corrective actions and timelines to address each of the audit findings. Many of the recommendations have already been implemented. Implementation plans are currently under review and pending approval by the PSC for the remaining recommendations.

Compensation Audit

On February 13, 2025, the New York State Public Service Commission initiated a focused operations audit to examine management incentive compensation programs at major investor-owned electric, gas, and water utilities. On May 15, 2025, the Commission selected Overland Consulting as the independent auditor ordering all New York utilities including RG&E to execute a contract with Overland. The target date for the draft report is August 2026, with the final report scheduled for September 2026.

Minimum Equity Requirements for Regulated Subsidiaries

RG&E is subject to a minimum equity ratio requirement that is tied to the capital structure assumed in establishing revenue requirements. Pursuant to these requirements, RG&E must maintain a minimum equity ratio equal to the ratio in its currently effective rate plan or decision measured using a trailing 13-month average. On a monthly basis, RG&E must maintain a minimum equity ratio of no less than 300 basis points below the equity ratio used to set rates. The minimum equity ratio requirement has the effect of limiting the amount of dividends that may be paid and may, under certain circumstances, require that the parent contribute equity capital. RG&E is prohibited by regulation from lending to unregulated affiliates. RG&E has also agreed to minimum equity ratio requirements in certain short-term borrowing agreements. These requirements are lower than the regulatory requirements.

Note 3. Regulatory Assets and Liabilities

Pursuant to the requirements concerning accounting for regulated operations we capitalize, as regulatory assets, incurred and accrued costs that are probable of recovery in future electric and natural gas rates. We base our assessment of whether recovery is probable on the existence of regulatory orders that allow for recovery of certain costs over a specific period, or allow for reconciliation or deferral of certain costs. When costs are not treated in a specific order we use regulatory precedent to determine if recovery is probable. We also record, as regulatory liabilities, obligations to refund previously collected revenue or to spend revenue collected from customers on future costs. Of the total regulatory assets net of regulatory liabilities, approximately $126.6 million represents the offset of accrued liabilities for which funds have not been expended. The remainder is either included in rate base or accruing carrying costs.

Details of regulatory assets and regulatory liabilities are shown in the tables below. They result from various regulatory orders that allow for the deferral and/or reconciliation of specific costs. Regulatory assets and regulatory liabilities are classified as current when recovery or refund in the coming year is allowed or required through a specific order or when the rates related a specific regulatory asset or regulatory liability are subject to automatic annual adjustment.

On October 12, 2023, the NYPSC approved the proposal in connection with a three-year rate plan for electric and gas service at RG&E effective May 1, 2023. Following the approval of the proposal RG&E’s plant related tax items are amortized over the life of associated plant, and unfunded deferred taxes being amortized over a period of forty-three years. A majority of the

other items related to RG&E will be amortized over a three-year period. In accordance with the Schedule of Regulatory Amortizations included in the approved Joint Proposal, net amortization revenue for RG&E is approximately $42.6 million for the year ended December 31, 2025.

Regulatory assets at December 31, 2025 and 2024 consisted of:

December 31,	2025	2024
(Thousands)		
Asset retirement obligation	$ 3,191	$ 3,204
Debt rate reconciliations	29,710	20,841
Deferred meter replacement costs	11,175	11,232
Delivery rate shaping	6,575	21,291
Electric supply reconciliation	7,903	5,473
Electric vehicle deferrals	13,835	—
Environmental remediation costs	85,704	76,453
Federal tax depreciation normalization adjustment	39,342	40,748
Gas supply charge	5,092	5,007
Hedge losses	2,672	724
Low income program	—	2,139
Low income arrears forgiveness	11,243	22,488
Make-whole provision	3,646	15,559
NEIL (Nuclear Electric Insurance Limited) credits	11,466	—
Pension and other postretirement benefits	22,698	21,200
Pension and other postretirement benefits cost deferrals	18,575	13,926
Post term amortization	—	195
Rate adjustment mechanism	2,616	2,660
Revenue decoupling mechanism	16,528	26,072
Storm costs	—	64,844
Storm cost securitized balance	63,598	—
Unamortized losses on reacquired debt	2,781	3,233
Uncollectible reserve	77,901	66,311
Unfunded future income taxes	166,800	160,777
Value of Distributed Energy Resources (VDER) Program	23,795	19,648
Other	59,653	49,515
Total regulatory assets	**686,499**	**653,540**
Less: current portion	91,737	96,343
Total non-current regulatory assets	**$ 594,762**	**$ 557,197**

Asset retirement obligations represent the differences in timing of the recognition of costs associated with our AROs and the collection of such amounts through rates. This amount is being amortized at the related depreciation and accretion amounts of the underlying liability.

Debt rate reconciliations represent the over/under collection of costs related to fixed and variable rate debt instruments identified in the rate case. Costs would include interest, commissions and fees versus amounts included in rates.

Deferred meter replacement costs represent the deferral of the net book value of retired meters that were replaced by advanced metering infrastructure meters. This amount is being amortized at the related existing depreciation amounts.

Delivery rate shaping adjusts the New York delivery rate increases across the three-year plan to avoid unnecessary spikes and offsetting dips in customer rates. A portion of this balance is amortized through current rates, the remaining portion will be refunded in future periods through future rate cases.

Electric supply reconciliation represents over/under collection of costs related to electric supply in which RG&E supplies electricity as the default service option for customers.

Electric vehicle deferrals represent the deferral of EV-related costs in implementing and preparing for increased EV adoption.

Environmental remediation costs include spending that has occurred and is eligible for future recovery in customer rates. Environmental costs are currently recovered through a reserve mechanism whereby projected spending is included in rates with any variance recorded as a regulatory asset or a regulatory liability. A portion of this balance is amortized through current rates, the remaining portion will be refunded in future periods through future rate cases. The amortization period will be established in future proceedings and will depend upon the timing of spending for the remediation costs. It also includes the anticipated future rate recovery of costs that are recorded as environmental liabilities since these will be recovered when incurred. Because no funds have yet been expended for the regulatory asset related to future spending, it does not accrue carrying costs and is not included within rate base.

Federal tax depreciation normalization adjustment represents the revenue requirement impact of the difference in the deferred income tax expense required to be recorded under the IRS normalization rules and the amount of deferred income tax expense that was included in cost of service for rate years covering 2011 forward. The recovery period is being amortized over a thirty-two year period starting in 2023.

Gas supply charge reflects the actual costs of purchasing, transporting and storing of natural gas. Gas supply reconciliation is determined by comparing actual gas supply expenses to the monthly gas cost recoveries in rates. Prior rate year balances are collected/returned to customers beginning the next calendar year.

Hedge losses represents deferred fair value losses on electric and gas hedge contracts.

Low income programs represent various hardship and payment plan programs approved for recovery. A portion of this balance is amortized through current rates, the remaining portion will be refunded in future periods through future rate cases.

Low income arrears forgiveness program represents deferred bill credits in the State of New York based on the order issued by PSC on June 16, 2022, approving deferral of bill credits for low-income customers (Phase 1), and additional deferred bill credits for other residential and small commercial customers who did not qualify for Phase 1 based on the order issued by PSC on January 19, 2023 (Phase 2). The Phase 1 regulatory asset is recovered from all customers over five years through a surcharge that began August 1, 2022. The Phase 2 regulatory asset is recovered from all customers over three and a half years through a surcharge that began March 1, 2023.

Make-whole provision represents the regulatory asset to recover revenues that would have been received by RG&E had Rate Year 1 rates approved in the 22-E-0317 et al. joint proposal gone into effect on the effective date of May 1, 2023. The balance is being recovered through a separately stated make-whole rate, effective November 1, 2023, over 6-30 months.

NEIL (Nuclear Electric Insurance Limited) credits represents the difference between insurance credit amounts reflected in rates and actual credits received.

Pension and other postretirement benefits represent the actuarial losses on the pension and other postretirement plans that will be reflected in customer rates when they are amortized and recognized in future pension expenses. Because no funds have yet been expended for this regulatory asset, it does not accrue carrying costs and is not included within the rate base.

Pension and other postretirement benefits cost deferrals include the difference between actual expense for pension and other postretirement benefits and the amount provided for in rates. The recovery of these amounts will be determined in future proceedings.

Post term amortization represents the amortization costs deferred from previous rate cases. A portion of this balance is amortized through current rates, the remaining portion will be refunded in future periods through future rate cases.

Rate adjustment mechanism (RAM) represents a mechanism each business implements to return or collect the net balance of RAM eligible deferrals and costs. The primary driver of RAM collections is storm costs, but this also includes property taxes and REV costs and fees not covered in other recovery mechanisms.

Revenue decoupling mechanism represents the mechanism established to disassociate the utility's profits from its delivery/commodity sales.

Storm costs are allowed in rates based on an estimate of the routine costs of service restoration. RG&E is also allowed to defer unusually high levels of service restoration costs resulting from major storms when they meet certain criteria for severity and duration.

Storm cost securitized balance represents the regulatory asset being recovered through Storm Cost Recovery bonds issued pursuant to the Storm Recovery Cost Financing Order issued by the NYPSC. This balance is being amortized through current rates via a separate recovery surcharge over the life of the bonds, which have a final maturity of May 1, 2037.

Unamortized losses on reacquired debt represent deferred losses on debt reacquisitions that will be recovered over the remaining original amortization period of the reacquired debt.

Uncollectible reserve includes the anticipated future rate recovery of costs that are recorded as uncollectible since those will be recovered when incurred. Because no funds have yet been expended for the regulatory asset related to future uncollectible expense, it does not accrue carrying costs and is not included within rate base. It also includes the variance between actual uncollectible expense and uncollectible expense included in rates that is eligible for future recovery in customer rates. The amortization period will be established in future proceedings.

Unfunded future income taxes represent unrecovered federal and state income taxes primarily resulting from regulatory flow through accounting treatment. The income tax benefits or charges for certain plant related timing differences, such as removal costs, are immediately flowed

through to, or collected from, customers. This amount is being amortized as the amounts related to temporary differences that give rise to the deferrals are recovered in rates.

Value Distributed Energy Resource represents a mechanism to compensate energy created by distributed energy resources, like solar.

Other includes items such as make-ready, methane detection program, danger tree, and sales and use tax.

Regulatory liabilities at December 31, 2025 and 2024 consisted of:

December 31, (Thousands)	2025	2024
Accrued removal obligations	$ 162,199	$ 172,311
Asset retirement obligation	5,160	5,059
Carrying costs on deferred income tax bonus depreciation	—	514
Deferred property taxes	24,700	17,550
Deferred transmission congestion contracts	13,868	17,974
Earnings sharing	251	1,705
Energy efficiency programs	—	2,259
Hedge gains	15,541	—
Mixed use 263(a)	—	388
Net plant reconciliation	6,641	7,876
Pension and other postretirement benefits	17,671	18,799
Pension and other postretirement benefits cost deferrals	2,308	2,112
Positive benefit adjustment	—	2,176
Service quality performance mechanism	27,723	19,015
Storm costs	12,511	—
Tax Act – remeasurement	241,917	246,736
Theoretical reserve flow through impact	—	419
Other	39,849	46,562
Total regulatory liabilities	**570,339**	**561,455**
Less: current portion	18,261	40,363
Total non-current regulatory liabilities	**$ 552,078**	**$ 521,092**

Accrued removal obligations represent the differences between asset removal costs recorded and amounts collected in rates for those costs. The amortization period is dependent upon the asset removal costs of underlying assets and the life of the utility plant.

Carrying costs on deferred income tax bonus depreciation represent the carrying costs benefit of increased accumulated deferred income taxes created by the change in tax law allowing bonus depreciation. A portion of this balance is amortized through current rates, the remaining portion will be refunded in future periods through future rate cases.

Deferred property taxes represent the customer portion of the difference between actual expense for property taxes and the amount provided for in rates. A portion of this balance is amortized through current rates, the remaining portion will be refunded in future periods through future rate cases.

Deferred transmission congestion contracts represent the deferral of the right to collect day-ahead market congestions rents going forward in time. A portion of this balance is amortized through current rates, the remaining portion will be refunded in future periods through future rate cases.

Earning sharing provisions represents the annual earnings over the earning sharing threshold. A portion of this balance is amortized through current rates, the remaining portion will be refunded in future periods through future rate cases.

Energy efficiency programs standard represents the difference between revenue billed to customers through an energy efficiency charge and the costs of our energy efficiency programs as approved by the state authorities. A portion of this balance is amortized through current rates, the remaining portion will be refunded in future periods through future rate cases.

Hedge gains regulatory liability represents deferred fair value gains on electric and gas hedge contracts.

Mixed services 263(a) represent the carrying costs benefit of increased accumulated deferred income taxes created by Section 263(a) IRC. A portion of this balance is amortized through current rates, the remaining portion will be refunded in future periods through future rate cases.

Net plant reconciliation represents the reconciliation of the actual electric and gas net plant and book depreciation to the targets set forth in the Joint Proposal. A portion of this balance is amortized through current rates, the remaining portion will be refunded in future periods through future rate cases.

Pension and other postretirement benefits cost deferrals include the difference between actual expense for pension and other postretirement benefits and the amount provided for in rates. The recovery of these amounts will be determined in future proceedings.

Positive benefit adjustment resulted from Iberdrola's 2008 acquisition of AVANGRID (formerly Energy East Corporation). A portion of this balance is amortized through current rates, the remaining portion will be refunded in future periods through future rate cases.

Service quality performance mechanism represents positive or negative revenue adjustments from metric standards either missed or achieved. The standards are established in the rate case. A portion of this balance is amortized through current rates, the remaining portion will be refunded in future periods through future rate cases.

Storm costs are allowed in rates based on an estimate of the routine costs of service restoration. RG&E is also allowed to defer unusually high levels of service restoration costs resulting from major storms when they meet certain criteria for severity and duration.

Tax Act - remeasurement represents the impact from remeasurement of deferred income tax balances as a result of the Tax Act enacted by the U.S. federal government on December 22, 2017. Reductions in accumulated deferred income tax balances due to the reduction in the corporate income tax rates from 35% to 21% under the provisions of the Tax Act will result in amounts previously collected from utility customers for these deferred taxes to be refundable to such customers, generally through reductions in future rates.

Theoretical reserve flow through impact represents the difference from the rate allowance for applicable federal and state flow through impacts related to the excess depreciation reserve amortization. It also represents the carrying cost on the differences. A portion of this balance is

amortized through current rates; the remaining portion will be refunded in future periods through future rate cases.

Other includes items such as Clean Energy Fund (CEF), Direct Current Fast Charging (DCFC), pipeline integrity and Russell retainage.

Note 4. Revenue

We recognize revenue when we have satisfied our obligations under the terms of a contract with a customer, which generally occurs when the control of promised goods or services transfers to the customer. We measure revenue as the amount of consideration we expect to receive in exchange for providing those goods or services. Contracts with customers may include multiple performance obligations. For such contracts, we allocate revenue to each performance obligation based on its relative standalone selling price. We generally determine standalone selling prices based on the prices charged to customers. Certain revenues are not within the scope of ASC 606, such as revenues from leasing, derivatives, other revenues that are not from contracts with customers and other contractual rights or obligations, and we account for such revenues in accordance with the applicable accounting standards. We exclude from revenue amounts collected on behalf of third parties, including any such taxes collected from customers and remitted to governmental authorities. We do not have any material significant payment terms because we receive payment at or shortly after the point of sale.

The following describes the principal activities from which we generate revenue.

RG&E derives its revenue primarily from tariff-based sales of electricity and natural gas service to customers in New York with no defined contractual term. For such revenues, we recognize revenues in an amount derived from the commodities delivered to customers. Other major sources of revenue are electricity transmission and wholesale sales of electricity and natural gas.

Tariff-based sales are subject to the corresponding state regulatory authorities, which determine prices and other terms of service through the ratemaking process. In New York, customers have the option to obtain the electricity or natural gas commodity directly from the utility or from another supplier. For customers that receive their commodity from another supplier, the utility acts as an agent and delivers the electricity or natural gas provided by that supplier. Revenue in those cases is only for providing the service of delivery of the commodity.

Transmission revenue results from others' use of the utility's transmission system to transmit electricity and is subject to FERC regulation, which establishes the prices and other terms of service. Long-term wholesale sales of electricity are based on individual bilateral contracts. Short-term wholesale sales of electricity are generally on a daily basis based on market prices and are administered by the NYISO or PJM Interconnection, LLC (PJM), as applicable. Wholesale sales of natural gas are generally short-term based on market prices through contracts with the specific customer.

The performance obligation in all arrangements is satisfied over time because the customer simultaneously receives and consumes the benefits as RG&E delivers or sells the electricity or natural gas or provides the transmission service.

RG&E records revenue from Alternative Revenue Programs (ARPs), which is not ASC 606 revenue. Such programs represent contracts between the utilities and their regulators. The

RG&E ARPs include revenue decoupling mechanisms, other ratemaking mechanisms, annual revenue requirement reconciliations, and other demand side management programs.

RG&E also has various other sources of revenue including billing, collection, other administrative charges, sundry billings, rent of utility property, and miscellaneous revenue. It classifies such revenues as other ASC 606 revenues to the extent they are not related to revenue generating activities from leasing, ARPs, or other activities.

We have contract liabilities for revenue from transmission congestion contract (TCC) auctions, for which we receive payment at the beginning of an auction period, and amortize ratably each month into revenue over the applicable auction period. The auction periods range from six months to two years. TCC contract liabilities totaled $0.4 million at December 31, 2025, and $0.2 million at December 31, 2024, and are presented in "Other current liabilities" on our consolidated balance sheets. We recognized $0.5 million as revenue in 2025 and $0.7 million in 2024.

We apply a practical expedient to expense as incurred costs to obtain a contract when the amortization period is one year or less. We record costs incurred to obtain a contract within operating expenses, including amortization of capitalized costs.

Revenues disaggregated by major source for the years ended December 31, 2025 and 2024 are as follows:

Years Ended December 31,	2025	2024
(Thousands)		
Regulated operations – electricity	$ 999,696	$ 867,619
Regulated operations – natural gas	374,821	325,224
Other (a)	20,959	21,457
Revenue from contracts with customers	**1,395,476**	**1,214,300**
Leasing revenue	53	82
Alternative revenue programs	11,014	26,822
Other revenue	7,170	7,455
Total operating revenues	**$ 1,413,713**	**$ 1,248,659**

(a) Primarily includes certain intra-month trading activities, billing, collection, and administrative charges, sundry billings, and other miscellaneous revenue.

Note 5. Income Taxes

Current and deferred taxes charged to expense for the years ended December 31, 2025 and 2024 consisted of:

Years Ended December 31,		2025		2024
(Thousands)				
Current				
Federal	$	(1,160)	$	(3,342)
State		(4)		285
Current taxes charged to benefit		**(1,164)**		**(3,057)**
Deferred				
Federal		30,148		32,200
State		10,925		10,570
Deferred taxes charged to expense		**41,073**		**42,770**
Total Income Tax Expense	**$**	**39,909**	**$**	**39,713**

The differences between tax expense per the consolidated statements of income and tax expense at the 21% statutory federal tax rate for the years ended December 31, 2025 and 2024, respectively, consisted of:

Years Ended December 31,		2025		2024
(Thousands)				
Tax expense at federal statutory rate	$	37,991	$	38,414
Equity AFUDC tax impacts not normalized		(3,438)		(2,830)
Excess ADIT amortization		(3,530)		(3,403)
State tax expense, net of federal benefit		8,628		8,575
Other, net		258		(1,043)
Total Income Tax Expense	**$**	**39,909**	**$**	**39,713**

Income tax expense for the year ended December 31, 2025 was $1.9 million higher than it would have been at the statutory federal income tax rate of 21% due predominately to state tax expense, partially offset by excess Accumulated Deferred Income Tax (ADIT) amortization and Equity AFUDC tax effects. This resulted in an effective tax rate of 22.1%. Income tax expense for the year ended December 31, 2024, was $1.3 million higher than it would have been at the statutory federal income tax rate of 21% due predominately to state tax expense, partially offset by Excess ADIT amortization and Equity AFUDC tax effects. This resulted in an effective tax rate of 21.7%.

In 2020, RG&E began refunding previously deferred protected and unprotected Excess ADITs, established as a result of the 2017 Tax Act as part of the 2020 Joint Proposal and as determined by the NYPSC and IRS normalization rules.

Deferred tax assets and liabilities as of December 31, 2025 and 2024 consisted of:

December 31,		2025		2024
(Thousands)				
Non-current Deferred Income Tax Liabilities (Assets)				
Property related	$	688,580	$	646,164
Unfunded future income taxes		42,085		41,138
Storms		13,351		16,947
Regulatory liability due to "Tax Cuts and Jobs Act"		(63,234)		(64,484)
Pension and other postretirement benefits		(20,571)		(23,527)
Derivative assets		(8,778)		(8,777)
Environmental		4,264		2,037
Federal and state net operating loss		(68,518)		(78,236)
Other		45,024		48,453
Total Non-current Deferred Income Tax Liabilities	**$**	**632,203**	**$**	**579,715**
Deferred tax assets	$	161,101	$	175,024
Deferred tax liabilities		793,304		754,739
Net Accumulated Deferred Income Tax Liabilities	**$**	**632,203**	**$**	**579,715**

RG&E has gross federal net operating losses of $191.2 million and gross New York state net operating losses of $544.8 million for the year ended December 31, 2025. RG&E had gross federal net operating losses of $242.0 million and gross New York state net operating losses of $528.4 million for the year ended December 31, 2024.

In 2024, the IRS issued private letter rulings (“PLRs”) 20242002, 20242003, and 20242004 to a non-affiliate. Within these rulings the IRS held that the normalization rules do not permit a utility’s net operating loss carryforward (“NOL”) Deferred Tax Asset (related to certain depreciation differences) to be reduced by intercompany tax allocation payments. In response, RG&E analyzed its federal NOLs as of 12/31/2017 and recorded an excess ADIT adjustment of $1.2 million to comply with the IRS rulings, reducing its income tax expense for the year ended December 31, 2024.

Uncertain tax positions have been classified as non-current unless expected to be paid within one year. Our policy is to recognize interest and penalties on uncertain tax positions as a component of interest expense in the consolidated statements of income.

The reconciliation of unrecognized income tax benefits for the years ended December 31, 2025 and 2024 consisted of:

Years Ended December 31,		2025		2024
(Thousands)				
Beginning Balance	$	48,239	$	48,526
Reduction for tax positions related to prior years		(287)		(287)
Ending Balance	**$**	**47,952**	**$**	**48,239**

Unrecognized income tax benefits represent income tax positions taken on income tax returns but not yet recognized in the consolidated financial statements. The accounting guidance for uncertainty in income taxes provides that the financial effects of a tax position shall initially be recognized in the consolidated financial statements when it is more likely than not based on the technical merits that the position will be sustained upon examination, assuming the position will be audited and the taxing authority has full knowledge of all relevant information.

There were no additional accruals for interest and penalties on tax reserves as of December 31, 2025 and December 31, 2024.

Note 6. Long-term Debt

Long-term debt as of December 31, 2025 and 2024 consisted of:

As of December 31,		2025		2024	
(Thousands, except interest rates)	Maturity Dates	Balances	Interest Rates	Balances	Interest Rates
First mortgage bonds (a)	2027-2053	$ 2,015,500	1.85%-8.00%	$ 1,815,500	1.85%-8.00%
Storm recovery bonds	2037	70,861	4.93 %	—	—
Unsecured pollution control notes - fixed	2032	91,900	3.00%	91,900	3.00%
Unamortized debt issuance cost and discount		(18,144)		(16,938)	
Total Debt		**2,160,117**		**1,890,462**	
Less: debt due within one year, included in current liabilities		3,592		150,343	
Total Non-current Debt		**$ 2,156,525**		**$ 1,740,119**	

(a) The first mortgage bonds are secured by a first mortgage lien on substantially all of Net Utility Plant In Service. We have no other secured indebtedness. None of our other debt obligations are guaranteed or secured by any of our affiliates.

On November 20, 2024, RG&E issued a total $155 million aggregate principal amount of green mortgage bonds, consisting of $77 million maturing in 2035 at an interest rate of 5.41%, $78 million maturing in 2038 at an interest rate of 5.51%.

On February 14, 2025 RG&E Storm Funding, LLC issued $75 million aggregate principal amount of Storm Recovery bond maturing in 2037 at an interest of 4.93%.

On December 15, 2025, RG&E issued a total $200 million aggregate principal amount of green mortgage bonds, consisting of $75 million maturing in 2035 at an interest rate of 5.30%, $125 million maturing in 2037 at an interest rate of 5.45%.

Long-term debt, including sinking fund obligations, due over the next five years consist of:

2026	2027	2028	2029	2030	Total
(Thousands)					
$ 3,592	$ 450,000	$ 100,000	$ —	$ 200,000	$ 753,592

We have no financial debt covenant requirements related to our long-term debt at December 31, 2025 and 2024.

Note 7. Bank Loans and Other Borrowings

RG&E had no notes payables outstanding at December 31, 2025 and 2024. RG&E funds short-term liquidity needs through an agreement among Avangrid's regulated utility subsidiaries (the Virtual Money Pool Agreement), a bi-lateral intercompany credit agreement with Avangrid (the Bi-Lateral Intercompany Facility), and a bank provided credit facility to which RG&E is a party (the AGR Credit Facility), each of which are described below.

The Virtual Money Pool Agreement is an agreement among the investment grade-rated, regulated utility subsidiaries of Avangrid under which the parties to this agreement may lend to or borrow from each other. This Agreement allows Avangrid to optimize cash resources within the regulated utility companies which are prohibited by regulation from lending to unregulated affiliates. The interest rate on transactions under this agreement is the A2/P2 non-financial 30-day commercial paper rate published by the Federal Reserve. RG&E has a lending/borrowing limit of $100 million under this agreement. RG&E had no outstanding balance under this agreement as of December 31, 2025 and 2024.

The Bi-Lateral Intercompany Facility provides for borrowing of up to $500 million from Avangrid at the A2/P2 non-financial 30-day commercial paper rate published by the Federal Reserve. RG&E had no outstanding balance under this agreement as of December 31, 2025 and 2024.

On December 22, 2025, the utilities (New York State Electric and Gas Corporation (“NYSEG”), Rochester Gas and Electric Corporation (“RG&E”), Central Maine Power Company (“CMP”), The United Illuminating Company (“UI”), Connecticut Natural Gas Corporation (“CNG”), The Southern Connecticut Gas Company (“SCG”) and The Berkshire Gas Company (“BGC”)) executed a new credit facility with an aggregate limit of $1,500 million and a termination date of December 23, 2030. Under the terms of the revolving credit facility, each borrower has a maximum borrowing entitlement, or sublimit, which can be periodically adjusted to address specific short-term capital funding needs, subject to the maximum limit contained in the agreement. NYSEG has a maximum sublimit of $1,000 million, RG&E has $500 million, CMP has $375 million, UI has a maximum sublimit of $150 million, SCG has a maximum sublimit of $75 million, and CNG and BCG have maximum sublimits of $50 million. The new facility has set minimum sublimits of $600 million for NYSEG, $250 million for RG&E, $150 million for CMP, $25 million for UI, CNG, SCG, and BGC. The facility fees range from 5 to 25 basis points. RG&E had not borrowed under this agreement as of both December 31, 2025 and 2024.

In the AGR Credit Facility we covenant not to permit, without the consent of the lender, our ratio of total indebtedness to total capitalization to exceed 0.65 to 1.00 at any time. For purposes of calculating the maximum ratio of indebtedness to total capitalization, the facility excludes from net worth the balance of accumulated other comprehensive loss as it appears on the consolidated balance sheet. The facility contains various other covenants, including a restriction on the amount of secured indebtedness we may maintain. Continued un-remedied failure to comply with those covenants for five business days after written notice of such failure from the lender constitutes an event of default and would result in acceleration of maturity. Our ratio of indebtedness to total capitalization pursuant to the revolving credit facility was 0.51 to 1.00 at December 31, 2025. We are not in default as of December 31, 2025.

Note 8. Leases

We have operating leases for office buildings, facilities, vehicles and certain equipment. Our finance leases are primarily related to electric generation, distribution, transmission and other. Certain of our lease agreements include rental payments adjusted periodically for inflation or are based on other periodic input measures. Our leases do not contain any material residual value guarantees or material restrictive covenants. Our leases have remaining lease terms of 1 year to 11 years, some of which may include options to extend the leases for up to 25 years, and some of which may include options to terminate the leases within one year. We consider extension or termination options in the lease term if it is reasonably certain we will exercise the option.

The components of lease cost and other information related to leases were as follows:

For the Years Ended December 31,	2025	2024
(Thousands)		
Lease cost		
Finance lease cost		
Amortization of right-of-use assets	$ 3,137	$ 2,484
Interest on lease liabilities	952	846
Total finance lease cost	4,089	3,330
Operating lease cost	2,921	2,002
Short-term lease cost	341	1,579
Variable lease cost	1,256	562
Intercompany	20	73
Total lease cost	**$ 8,627**	**$ 7,546**

Consolidated balance sheet and other information for the years ended December 31, 2025 and 2024 was as follows:

As of December 31,	2025	2024
(Thousands, except lease term and discount rate)		
Operating Leases		
Operating lease right-of-use assets	$ 15,062	$ 17,268
Operating lease liabilities, current	2,080	1,899
Operating lease liabilities, long-term	15,634	17,480
Total operating lease liabilities	$ 17,714	$ 19,379
Finance Leases		
Other assets	$ 27,243	$ 30,378
Other current liabilities	2,324	2,270
Other non-current liabilities	25,587	27,791
Total finance lease liabilities	$ 27,911	$ 30,061
Weighted-average Remaining Lease Term (years):		
Finance leases	9.85	10.85
Operating leases	5.93	6.88
Weighted-average Discount Rate:		
Finance leases	3.38 %	3.38 %
Operating leases	4.79 %	4.76 %

Supplemental cash flows information related to leases was as follows:

For the Years Ended December 31,	2025	2024
(Thousands)		
Cash paid for amounts included in the measurement of lease liabilities:		
Operating cash flows from operating leases	$ 2,564	$ 2,202
Operating cash flows from finance leases	$ 952	$ 911
Financing cash flows from finance leases	$ 2,149	$ 1,976
Right-of-use assets obtained in exchange for lease obligations:		
Finance leases	$ —	$ (7,941)
Operating leases	$ 25	$ 17,255

As of December 31, 2025, maturities of lease liabilities were as follows:

	Finance Leases	Operating Leases
(Thousands)		
Years ending December 31,		
2026	$ 3,129	$ 2,639
2027	3,159	2,713
2028	3,189	2,678
2029	3,236	2,585
2030	3,352	2,672
Thereafter	16,593	7,720
Total lease payments	**32,658**	**21,007**
Less: imputed interest	(4,747)	(3,293)
Total	**$ 27,911**	**$ 17,714**

Most of our leases do not provide an implicit rate in the lease; thus we use our incremental borrowing rate based on the information available at the commencement date in determining the present value of lease payments.

Note 9. Commitments and Contingencies

Purchase power and natural gas contracts, including non-utility generators

RG&E is the provider of last resort for customers. As a result, the company buys physical energy and capacity from the NYISO. In accordance with the NYPSC's February 26, 2008 Order, RG&E is required to hedge on behalf of non-demand billed customers. The physical electric capacity purchases we make from parties other than the NYISO are to comply with the hedge requirement for electric capacity. The company enters into financial swaps to comply with the hedge requirement for physical electric energy purchases. RG&E also makes purchases from other independent power producers and New York Power Authority (NYPA) under existing contracts or long-term supply agreements in order to comply with the company’s Public Utility Regulatory Policies Act (PURPA) purchase obligation.

RG&E satisfies its natural gas supply requirements through purchases from various producers and suppliers, withdrawals from natural gas storage, capacity contracts and winter peaking supplies and resources. The company operates diverse portfolios of gas supply, firm

transportation capacity, gas storage and peaking resources. Actual gas costs incurred by the company are passed through to customers through state regulated purchased gas adjustment mechanisms, subject to regulatory review.

The company purchases the majority of its natural gas supply at market prices under seasonal, monthly or mid-term supply contracts and the remainder is acquired on the spot market. The company acquires firm transportation capacity on interstate pipelines under long-term contracts and utilizes that capacity to transport both natural gas supply purchased and natural gas withdrawn from storage to the local distribution system. The company acquires firm underground natural gas storage capacity using long-term contracts and fills the storage facilities with gas in the summer months for subsequent withdrawal in the winter months.

We recognized expenses of approximately $67.3 million for Normal Purchase Normal Sale (NPNS) purchase power and natural gas contracts including non-utility generators in 2025 and $60.9 million in 2024.

Note 10. Environmental Liability

From time to time environmental laws, regulations and compliance programs may require changes in our operations and facilities and may increase the cost of electric and natural gas service.

Waste sites

The Environmental Protection Agency (EPA) and the New York State Department of Environmental Conservation (NYSDEC), as appropriate, have notified us that we are among the potentially responsible parties that may be liable for costs incurred to remediate certain hazardous substances at nine waste sites. The nine sites do not include sites where coal gas was manufactured in the past, which are discussed below. With respect to the nine sites, eight sites are included in the New York State Registry of Inactive Hazardous Waste Disposal Sites and one site is also included on the National Priorities list.

Any liability may be joint and several for certain of those sites. We have recorded an estimated liability of $0.1 million at December 31, 2025, related to eight sites. We have recorded an estimated liability of $4.7 million related to another six sites where we believe it is probable that we will incur remediation costs and/or monitoring costs. It is possible the ultimate cost to remediate the sites may be significantly more than the accrued amount. Our estimate for costs to remediate these sites ranges from $4.4 million to $5.1 million as of December 31, 2025. Factors affecting the estimated remediation amount include the remedial action plan selected, the extent of site contamination and the portion attributed to us. It is anticipated that costs would be recovered in rates, typical of historical Site Investigation and Remediation rate recovery.

Manufactured gas plants

We have a program to investigate and perform necessary remediation and/or monitoring at our eleven sites where coal gas was manufactured in the past. The Company has advanced work under an existing order on consent with the NYSDEC at three of the sites, with a fourth site with the potential to be added to the order in 2026. The order requires us to investigate and, where necessary, remediate and/or monitor our eleven sites. Seven sites were advanced under NYS's former Voluntary Cleanup Program (VCP) that was discontinued in 2018. Work at those sites continues, as applicable in accordance with Site Management Plans (SMPs) and institutional controls.

Our estimate for costs related to investigation and remediation and/or monitoring of the eleven sites ranges from $60.0 million to $84.1 million at December 31, 2025. The estimate could change materially based on facts and circumstances derived from site investigations, changes in required remedial action, changes in technology relating to remedial alternatives, changes due to property use and changes to current laws and regulations.

The liability to investigate and perform remediation and/or monitoring, as necessary, at the known inactive coal gas manufacturing sites was $64.6 million at December 31, 2025, and $63.7 million at December 31, 2024. We recorded a corresponding regulatory asset, net of insurance recoveries, because we expect to recover the net costs in rates.

Our environmental liabilities are recorded on an undiscounted basis and are expected to be paid through the year 2056.

First Energy

RG&E sued FirstEnergy under the Comprehensive Environmental Response, Compensation, and Liability Act to recover environmental cleanup costs at two former manufactured coal gas sites, which are included in the discussion above. In 2008, the District Court issued a decision and order in RG&E's favor requiring FirstEnergy to pay RG&E for past and future clean-up costs at the two manufactured gas plant sites. As such, FirstEnergy is liable for a share of clean up expenses at the two sites. Based on current projections, FirstEnergy’s share is estimated at approximately $4.8 million. This amount is being treated as a contingent asset and has not been recorded as either a receivable or a decrease to the environmental provision. Any recovery will be flowed through to RG&E ratepayers.

Note 11. Accounting for Derivative Instruments and Hedging Activities

We are exposed to certain risks relating to our ongoing business operations. The primary risk we manage by using derivative instruments is commodity price risk. In accordance with the accounting requirements concerning derivative instruments and hedging activities, we recognize all derivative instruments as either assets or liabilities at fair value on our consolidated balance sheet.

The financial instruments we hold or issue are not for trading or speculative purposes.

Commodity price risk*:* Commodity price risk, due to volatility experienced in the wholesale energy markets, is a significant issue for the electric and natural gas utility industries. We manage this risk through a combination of regulatory mechanisms, such as the pass-through of the market price of electricity and natural gas to customers, and through comprehensive risk management processes. Those measures mitigate our commodity price exposure, but do not completely eliminate it. Owned electric generation and long-term supply contracts reduce our exposure to market fluctuations.

We have electricity commodity purchases and sales contracts for both capacity and energy (physical contracts) that have been designated and qualify for the normal purchases and normal sales exception in accordance with the accounting requirements concerning derivative instruments and hedging activities.

We currently have a non by-passable wires charge adjustment that allows us to pass through rates any changes in the market price of electricity. We use electricity contracts, both physical and financial, to manage fluctuations in electricity commodity prices in order to provide price

stability to customers. We include the cost or benefit of those contracts in the amount expensed for electricity purchased when the related electricity is sold. We record changes in the fair value of electric hedge contracts to derivative assets and/or liabilities with an offset to regulatory assets and/or regulatory liabilities in accordance with the requirements concerning accounting for regulated operations.

We have a purchased gas adjustment clause that allows us to recover through rates any changes in the market price of purchased natural gas, substantially eliminating our exposure to natural gas price risk. We use natural gas futures and forwards to manage fluctuations in natural gas commodity prices in order to provide price stability to customers. We include the cost or benefit of natural gas futures and forwards in the commodity cost that is passed on to customers when the related sales commitments are fulfilled. We record changes in the fair value of natural gas hedge contracts to derivative assets and/or liabilities with an offset to regulatory assets and/or regulatory liabilities in accordance with the requirements concerning accounting for regulated operations.

The amounts for electricity hedge contracts and natural gas hedge contracts recognized in regulatory liabilities and assets as of December 31, 2025 and 2024 and amounts reclassified from regulatory assets and liabilities into income for the years ended December 31, 2025 and 2024 are as follows:

(Thousands)	Loss (Gain) Recognized in Regulatory Assets/ Liabilities		Location of Loss (Gain) Reclassified from Regulatory Assets/ Liabilities into Income	Loss (Gain) Reclassified from Regulatory Assets/ Liabilities into Income	
As of			**Years Ended December 31,**		
December 31, 2025	**Electricity**	**Natural Gas**	**2025**	**Electricity**	**Natural Gas**

As of both December 31, 2025 and 2024, the derivative assets - non-current are presented within other non-current assets of the consolidated balance sheet. The derivative liabilities - non-current are presented within other non-current liabilities of the consolidated balance sheet.

Derivatives designated as hedging instruments

The effect of derivatives in cash flow hedging instruments on OCI and income for the years ended December 31, 2025 and 2024, respectively, consisted of:

Years Ended December 31,	(Loss) Gain Recognized in OCI on Derivatives	Location of Loss Reclassified From Accumulated OCI into Income	Loss (Gain) Reclassified From Accumulated OCI into Income	Total Amount per Income Statement
(Thousands)				
2025				
Interest rate contracts	$ —	Interest expense	$ (3,678)	$ 88,498
Total	**$ —**		**$ (3,678)**	
2024				
Interest rate contracts	$ —	Interest expense	$ (3,678)	$ 67,056
Total	**$ —**		**$ (3,678)**	

The amount in AOCI related to previously settled forward starting interest rate swaps and accumulated amortization at December 31, 2025 is a net loss of $29.9 million as compared to $33.6 million at December 31, 2024. For the year ended December 31, 2025, we recorded $3.7 million in net derivative losses related to discontinued cash flow hedges. We will amortize approximately $3.7 million of discontinued cash flow hedges in 2026.

We face risks related to counterparty performance on hedging contracts due to counterparty credit default. We have developed a matrix of unsecured credit thresholds that are dependent on a counterparty's or the counterparty guarantor's applicable credit rating (normally Moody's or Standard & Poor's). When our exposure to risk for counterparty exceeds the unsecured credit threshold, the counterparty is required to post additional collateral or we will no longer transact with the counterparty until the exposure drops below the unsecured credit threshold.

We have various master netting arrangements in the form of multiple contracts with various single counterparties that are subject to contractual agreements that provide for the net settlement of all contracts through a single payment. Those arrangements reduce our exposure to a counterparty in the event of default on or termination of any one contract. For consolidated financial statement presentation, we offset fair value amounts recognized for derivative instruments and fair value amounts recognized for the right to reclaim or the obligation to return cash collateral arising from derivative instruments executed with the same counterparty under a master netting arrangement.

Certain of our derivative instruments contain provisions that require us to maintain an investment grade credit rating on our debt from each of the major credit rating agencies. If our debt were to fall below investment grade, it would be in violation of those provisions, and the counterparties to the derivative instruments could request immediate payment or demand immediate and ongoing full overnight collateralization on derivative instruments in net liability positions. The aggregate fair value of all derivative instruments with credit-risk-related contingent features that are in a liability position on December 31, 2025 is $2.7 million for which we have posted collateral.

Note 12. Fair Value of Financial Instruments and Fair Value Measurements

The estimated fair value of debt amounted to $2,160 million as of December 31, 2025 and $1,826 million as of December 31, 2024. The estimated fair value was determined, in most cases, by discounting the future cash flows at market interest rates. The interest rate curve used to make these calculations takes into account the risks associated with the electricity industry and the credit ratings of the borrowers in each case. The fair value of these unsecured pollution

control notes-variable are determined using unobservable interest rates as the market for these notes is inactive. The fair value hierarchy for the fair value of debt is considered as Level 2.

The financial instruments measured at fair value as of December 31, 2025 and 2024 consisted of:

Description	Level 1	Level 2	Level 3	Netting	Total
(Thousands)					
As of December 31, 2025					
Assets

We had no transfers to or from Level 1 and 2 during the year ended December 31, 2025. Our policy is to recognize transfers in and transfers out as of the actual date of the event or change in circumstances that causes a transfer, if any.

Restricted cash was $4.5 million and $0 as of December 31, 2025 and 2024, respectively, and is included in “Other Assets” on our consolidated balance sheets.

Valuation techniques:

We determine the fair value of our various derivative assets and liabilities utilizing market approach valuation techniques:

- We enter into electric energy derivative contracts to hedge the forecasted purchases required to serve our electric load obligations. We hedge our electric load obligations using derivative contracts that are settled based upon Locational Based Marginal Pricing published by the NYISO. We hedge approximately 70% of their electric load obligations using contracts for a NYISO location where an active market exists. The forward market prices used to value the companies' open electric energy derivative contracts are based on quotes prices in active markets for identical assets or liabilities with no adjustment required and therefore we include the fair value in Level 1.
- We enter into natural gas derivative contracts to hedge the forecasted purchases required to serve our natural gas load obligations. The forward market prices used to value our open natural gas derivative contracts are exchange-based prices for the identical derivative contracts traded actively on the New York Mercantile Exchange. Because we use prices quoted in an active market, we include those fair value measurements in Level 1.

Note 13. Accumulated Other Comprehensive Loss

Accumulated other comprehensive loss for the years ended December 31, 2025 and 2024, consisted of:

	Balance December 31, 2023	2024 Change	Balance December 31, 2024	2025 Change	Balance December 31, 2025
(Thousands)					
Amortization of pension cost for non-qualified plans and current year actuarial gain, net of tax expense (benefit) of $72 for 2024 and ($120) for 2025	$ (420)	$ 204	$ (216)	$ (339)	$ (555)
Unrealized gain (loss) on derivatives qualified as hedges:

Accumulated Other Comprehensive Loss	**$ (27,943)**	**$ 2,920**	**$ (25,023)**	**$ 2,377**	**$ (22,646)**

Note 14. Postretirement and Similar Obligations

We have funded non-contributory defined benefit pension plans that cover the eligible employees. For most employees, generally those hired before 2002, the plans provide defined benefits based on years of service and final average salary. Employees hired in 2002 or later are covered under a cash balance plan or formula where their benefit accumulates based on a percentage of annual salary and credited interest. During 2013 the company announced that we would freeze the benefits for all non-union employees covered under the cash balance plans effective December 31, 2013. Their earned balances would continue to accrue interest, but would no longer be increased by a percentage of earnings. In place of the pension benefit for these employees, they will receive a minimum contribution to their account under their respective company's defined contribution plan. During 2022, the Company decided to freeze

pension benefit accruals and contribution credits for non-union employees and transition their retirement benefits to the 401(k) Plan.

The company maintains a 401(k) Savings and Retirement Plan (the Plan) for all eligible employees as defined in the Plan agreement. Participants in the Plan may contribute a percentage of their compensation and the company may match a predetermined percentage of the participant contributions. Expenses under the Plan for the Company totaled approximately $11.7 million in 2025 and $10.3 million in 2024.

We also have other postretirement health care benefit plans covering substantially all of our employees. The health care plans are contributory with participants' contributions adjusted annually.

Non-Qualified Retirement Benefit Plans

We also sponsor various unfunded pension plans for certain current employees, former employees and former directors. The total liability for these plans, which is included in Other non-current liabilities on our consolidated balance sheets, was $7.3 million and $7.4 million at December 31, 2025 and 2024, respectively.

Qualified Retirement Benefit Plans

Obligations and funded status as of December 31, 2025 and 2024 consisted of:

	Pension Benefits		Postretirement Benefits	
As of December 31,	**2025**	**2024**	**2025**	**2024**
(Thousands)				
Change in benefit obligation				
Benefit obligation at January 1	$ 215,516	$ 243,974	$ 38,751	$ 43,362

Settlements	—	(14,149)	—	—
Benefits paid	(29,151)	(20,414)	(3,803)	(3,486)
Fair value of plan assets at December 31	**$ 139,706**	**$ 152,234**	**$ —**	**$ —**
Funded status	**$ (63,566)**	**$ (63,282)**	**$ (34,569)**	**$ (38,751)**

During 2025, the pension benefit obligation had an actuarial loss of $6.7 million, primarily due to a $7.1 million loss from increase in discount rates. During 2025, the postretirement benefit obligation had a reduction of $2.7 million due to plan amendments. The amendments were driven by a Company decision to reduce postretirement benefit accruals for non-union employees.

During 2024, the pension benefit obligation had an actuarial gain of $4.1 million, primarily due to a $5.4 million gain from decrease in discount rates. In 2024, the pension benefit obligation had a reduction of $14.1 million from settlements. The settlements were lump sum payments made within the pension plan guidelines at the discretion of the plan participants who opted to retire. There were no significant gains or losses relating to the postretirement benefit obligations.

Amounts recognized in the consolidated balance sheet as of December 31, 2025 and 2024 consisted of:

Amounts recognized in the balance sheet	Pension Benefits		Postretirement Benefits	
December 31,	2025	2024	2025	2024
(Thousands)				
Other current liabilities	$ —	$ —	$ (4,170)	$ (4,465)
Pension and other postretirement benefits	(63,566)	(63,282)	(30,399)	(34,286)
Total	**$ (63,566)**	**$ (63,282)**	**$ (34,569)**	**$ (38,751)**

We have determined that we are allowed to defer as regulatory assets or regulatory liabilities items that would otherwise be recorded in accumulated other comprehensive income pursuant to the accounting requirements concerning defined benefit pension and other postretirement plans. Amounts recognized as regulatory assets or regulatory liabilities consist of:

	Pension Benefits		Postretirement Benefits	
December 31,	2025	2024	2025	2024
(Thousands)				
Net loss (gain)	$ 22,698	$ 21,200	$ (14,399)	$ (17,786)
Prior service credit	—	—	(3,272)	(1,013)

Our accumulated benefit obligation for all qualified defined benefit pension plans was $203.3 million at December 31, 2025 and $215.5 million at December 31, 2024.

The projected benefit obligation and the accumulated benefit obligation exceeded the fair value of pension plan assets for all of our qualified plans as of both December 31, 2025 and 2024. The following table shows the aggregate projected and accumulated benefit obligations and the fair value of plan assets of our plans as of December 31, 2025 and 2024.

December 31,	2025	2024
(Thousands)		
Projected benefit obligation	$ 203,272	$ 215,516
Accumulated benefit obligation	$ 203,272	$ 215,516
Fair value of plan assets	$ 139,706	$ 152,234

The postretirement benefits obligation for all qualified plans exceeded the fair value of plan assets as of December 31, 2025 and 2024.

Components of net periodic benefit cost and other changes in plan assets and benefit obligations recognized in income and regulatory assets and liabilities for the years ended December 31, 2025 and 2024 consisted of:

Years Ended December 31,	Pension Benefits 2025	Pension Benefits 2024	Postretirement Benefits 2025	Postretirement Benefits 2024
(Thousands)				
Net periodic benefit cost				
Service cost	$ —	$ —	$ 45	$ 54
Interest cost	10,229	10,236	1,760	1,912
Expected return on plan assets	(10,688)	(13,006)	—	—
Amortization of prior service credit	—	—	(423)	(224)
Amortization of net (gain) loss	(755)	6,319	(2,888)	(1,791)
Settlement charge	—	1,345	—	—
Net periodic benefit cost	**$ (1,214)**	**$ 4,894**	**$ (1,506)**	**$ (49)**
Other changes in plan assets and benefit obligations recognized in regulatory assets and regulatory liabilities				
Net loss (gain)	$ 743	$ 6,576	$ 498	$ (3,091)
Amortization of net loss (gain)	755	(6,319)	2,888	1,791
Settlement charge	—	(1,345)	—	—
Effect of curtailments on gain	—	—	(2,681)	—
Amortization of prior service credit	—	—	423	224
Total recognized in regulatory assets and regulatory liabilities	**$ 1,498**	**$ (1,088)**	**$ 1,128**	**$ (1,076)**
Total recognized in net periodic benefit cost and regulatory assets and regulatory liabilities	**$ 284**	**$ 3,806**	**$ (378)**	**$ (1,125)**

We include the service component of net periodic benefit cost in other operating expenses and the non-service component in other income and deductions. The net periodic benefit cost for postretirement benefits represents the amount expensed for providing health care benefits to retirees and their eligible dependents.

The weighted-average assumptions used to determine benefit obligations as of December 31, 2025 and 2024 consisted of:

	Pension Benefits 2025	Pension Benefits 2024	Postretirement Benefits 2025	Postretirement Benefits 2024
Discount rate	4.52%	5.12%	4.65%	5.19%
Rate of compensation increase	N/A	N/A	N/A	N/A
Interest crediting rate	3.00%	3.00%	N/A	N/A

The discount rate is the rate at which the benefit obligations could presently be effectively settled. We determined the discount rate by developing a yield curve derived from a portfolio of high grade non-callable bonds with above median yields that closely matches the duration of the expected cash flows of our benefit obligations.

The weighted-average assumptions used to determine net periodic benefit cost for the years ended December 31, 2025 and 2024 consisted of:

	Pension Benefits		Postretirement Benefits	
	2025	2024	2025	2024
Discount rate	5.12%	4.70% / 4.22%	5.19%/4.78%	4.66%
Expected long-term return on plan assets	7.00%	7.25%	N/A	N/A
Rate of compensation increase	N/A	N/A	N/A	N/A

We developed our expected long-term rate of return on plan assets assumption based on a review of long-term historical returns for the major asset classes, the target asset allocations and the effect of rebalancing of plan assets discussed below. That analysis considered current capital market conditions and projected conditions. Our policy is to calculate the expected return on plan assets using the market related value of assets. We amortize unrecognized actuarial gains and losses over 10 years from the time they are incurred.

Assumed health care cost trend rates used to determine benefit obligations as of December 31, 2025 and 2024 consisted of:

	2025	2024
Health care cost trend rate (pre 65/post 65)	8.40% / 10.10%	8.90% / 10.60%
Rate to which cost trend rate is assumed to decline (the ultimate trend rate)	4.50%	4.50%
Year that the rate reaches the ultimate trend rate	2039 / 2039	2039 / 2039

***Contributions*:** In accordance with our funding policy, we make annual contributions of not less than the minimum required by applicable regulations. We expect to contribute $21.3 million to our pension benefit plan in 2026. We expect to contribute $4.2 million to our postretirement benefit plans during 2026.

***Estimated future benefit payments*:** Our expected benefit payments and expected Medicare Prescription Drug, Improvement and Modernization Act of 2003 (Medicare Act) subsidy receipts, which reflect expected future service, as appropriate, are:

	Pension Benefits	Postretirement Benefits	Medicare Act Subsidy Receipts
(Thousands)			
2026	$ 29,419	$ 4,169	$ —
2027	$ 25,192	$ 3,760	$ —
2028	$ 23,206	$ 3,575	$ —
2029	$ 21,237	$ 3,380	$ —
2030	$ 19,008	$ 3,194	$ —
2031-2035	$ 71,264	$ 13,406	$ —

Plan assets: Our pension benefits plan assets are held in a master trust providing for a single trustee/custodian, a uniform investment manager lineup, and an efficient, cost-effective means of allocating expenses and investment performance to each plan under the master trust. Our primary investment objective is to ensure that current and future benefit obligations are adequately funded and with volatility commensurate with our tolerance for risk. Preservation of capital and achievement of sufficient total return to fund accrued and future benefits obligations are of highest concern. Our primary means for achieving capital preservation is through

diversification of the trust's investments while avoiding significant concentrations of risk in any one area of the securities markets. Within each asset group, further diversification is achieved through utilizing multiple asset managers and systematic allocation to various asset classes; providing broad exposure to different segments of the equity, fixed-income and alternative investment markets.

The asset allocation policy is the most important consideration in achieving our objective of superior investment returns while minimizing risk. We have established a target asset allocation policy within allowable ranges for our pension benefits plan assets within broad categories of asset classes made up of Return-Seeking and Liability-Hedging investments. We have targets of 15%-70% for Return-Seeking assets and 30%-85% for Liability-Hedging assets. Return-Seeking investments generally consist of domestic, international, global, and emerging market equities invested in companies across all market capitalization ranges. Return-Seeking assets also include investments in real estate, global asset allocation strategies and hedge funds. Liability-Hedging investments generally consist of long-term corporate bonds, annuity contracts, long-term treasury STRIPS, and opportunistic fixed income investments. Systematic rebalancing within the target ranges increases the probability that the annualized return on the investments will be enhanced, while realizing lower overall risk, should any asset categories drift outside their specified ranges.

The fair values of pension benefits plan assets, by asset category, as of December 31, 2025, consisted of:

		Fair Value Measurements at December 31, Using		
Asset Category	**Total**	**Level 1**	**Level 2**	**Level 3**

Valuation techniques: We value our pension benefits plan assets as follows:

- Cash and cash equivalents - Level 1: at cost, plus accrued interest, which approximates fair value. Level 2: proprietary cash associated with other investments, based on yields currently available on comparable securities of issuers with similar credit ratings.
- U.S. government securities, common stocks and registered investment companies - at the closing price reported in the active market in which the security is traded.
- Corporate bonds - based on yields currently available on comparable securities of issuers with similar credit ratings.
- Preferred stocks - at the closing price reported in the active market in which the individual investment is traded.
- Equity commingled funds – the fair value is primarily derived from the quoted prices in active markets of the underlying securities. Because the fund shares are offered to a limited group of investors, they are not considered to be traded in an active market.
- Other investments, principally annuity and fixed income - Level 1: at the closing price reported in the active market in which the individual investment is traded. Level 2: based on yields currently available on comparable securities of issuers with similar credit ratings. Level 3: when quoted prices are not available for identical or similar instruments, under a discounted cash flows approach that maximizes observable inputs such as current yields of similar instruments but includes adjustments for certain risks that may not be observable such as credit and liquidity risks.
- Other investments measured at net asset value (NAV) – alternative investments, such as private equity and real estate oriented investments, partnership/joint ventures and hedge funds are valued using the NAV as a practical expedient.

Pension plan equity securities did not include any Iberdrola common stock as of both December 31, 2025 and 2024.

Note 15. Other Income and Other Deductions

Other income and deductions for the years ended December 31, 2025 and 2024, consisted of:

Years Ended December 31,		2025		2024
(Thousands)				
Interest and dividend income	$	646	$	544
Allowance for funds used during construction		19,285		15,999
Carrying costs on regulatory assets		11,890		12,747
Miscellaneous		750		386
Total other income	**$**	**32,571**	**$**	**29,676**
Pension non-service components	$	2,275	$	(4,839)
Miscellaneous		(6,036)		(854)
Total other deductions	**$**	**(3,761)**	**$**	**(5,693)**

Note 16. Related Party Transactions

Certain Networks subsidiaries borrow from AGR, the parent of Networks, through intercompany revolving credit agreements, including RG&E. For RG&E the intercompany revolving credit agreements provide access to supplemental liquidity. See Note 7 for further detail on the credit facility with AGR.

Avangrid Service Company provides some administrative and management services to Networks operating utilities, including RG&E, pursuant to service agreements. The cost of those services is allocated in accordance with methodologies set forth in the service agreements. The cost allocation methodologies vary depending on the type of service provided. Management believes such allocations are reasonable. The cost for services provided to RG&E by AGR and its affiliates was approximately $80.7 million in 2025 and $82.8 million in 2024. Cost for services includes amounts capitalized in utility plant, which was approximately $16.3 million in 2025 and $14.6 million in 2024. The remainder was primarily recorded as operations and maintenance expense. The charge for services provided by RG&E to AGR and its subsidiaries was approximately $36.0 million in 2025 and $26.9 million in 2024. All charges for services are at cost. All of the charges associated with services provided are recorded as revenues to offset other operating expenses on the consolidated financial statements.

The balance in accounts payable to affiliates of $54.1 million at December 31, 2025 and $60.4 million at December 31, 2024 is mostly payable to Avangrid Service Company. The balance in accounts receivable from affiliates of $3.5 million at December 31, 2025 and $2.5 million at December 31, 2024 is from various companies.

Notes receivable from affiliates at December 31, 2025 and at December 31, 2024 were $0.01 million and $45.4 million, respectively. Notes receivable from affiliates relate to the Virtual Money Pool Agreement as discussed in Note 7 of these consolidated financial statements.

AGR, on behalf of RG&E, guarantees $123 million to fund the clean-up of the Ginna Nuclear Power Plant, LLC.

Note 17. Subsequent Events

The company has performed a review of subsequent events through March 25, 2026, which is the date these consolidated financial statements were available to be issued.
