Plant is currently under construction with installed capacity

2024 operational and financial data

10.2 GW total installed capacity

1.3 GW onshore and offshore under construction

27.5 GW power pipeline

\$15 billion in assets

94% emissions-free capacity (9.6 GW)

24,498 GWh net production of electricity (79% wind, 16% thermal, 5% solar)

\$2 million in community support

1,231 employees

\$112 million paid in taxes

10,287 jobs supported

Sustained and consistent onshore growth

8.0 GW installed
onshore wind capacity
across 68 assets

1.4 GW installed
solar capacity
across 9 assets

0.6 GW
of thermal capacity
in Klamath, Oregon

Vineyard Wind 1: Nation's first utility-scale offshore project

806 MW
offshore wind energy project
about 15 miles off the coast
of Massachusetts

62 wind turbines
spaced 1 nautical mile apart
with each turbine generating
13 MW of electricity

Over 400,000 homes
powered and thousands
of jobs created

Pioneering innovation and empowering the future of energy

Power Control Center
State-of-the-art control center
with 24/7 remote monitoring
and control of power facilities

First generation-only
Balancing Authority to join the
Western Energy Imbalance
Market, ensuring stability of the
region's power system

National Training Center
A world-class training facility
empowers employees with
hands-on experience in cutting-edge
energy technologies
