PURPOSE AND VALUES OF THE IBERDROLA GROUP

1. Introduction

The Board of Directors of "IBERDROLA, S.A." (the "**Company**") hereby establishes the *Purpose and Values of the Iberdrola Group*, explaining the reach and scope thereof, as well as their role and anchoring in the *By-Laws* and in the rest of the Governance and Sustainability System.

The formulation of the *Purpose and Values of the Iberdrola Group* is based on the recognition and positive assessment of the Company's more than hundred-year history; of its identity and reality; of its status as a large company in the energy industry, as the largest electricity utility in Europe by stock market capitalisation and among the top three worldwide; as a player in and driver of sustainable development; as of undeniable importance for all of its Stakeholders and in the countries and territories in which it is present; and of an entity that is committed to sustainability, to defending human rights and to the highest standards and requirements in terms of transparency and good governance, human and social capital, natural capital and compliance, and, taking into account the sustainable value chain within its purview and in the context of current global society, which faces major challenges and opportunities like the electrification of energy through the development of sustainable energy generated from renewable sources and network infrastructure, digital transformation, climate action, reduction of polluting emissions and its own sustainability.

2. Purpose of the Iberdrola Group

The Board of Directors reaffirms that the purpose of the companies making up the group of which the Company is the controlling entity, within the meaning established by law (the "**Group**"), and thus their *raison d'être*, is "*to continue building together each day a healthier, more accessible energy model, based on electricity*". This purpose, focused on the well-being of people and on the preservation of the planet, reflects the strategy that the Group's companies have been sustainably implementing for years and their commitment to continue fighting along with all their Stakeholders for:

a) A real and global energy transition, based particularly on the electrification of the energy sector, and of the economy as a whole, generally contributes to sustainable development.

b) An energy model that is more electric, one that abandons the use of fossil fuels and generalises renewable energy sources, the efficient storage of energy, smart grids and digitalisation.

c) An energy model that is healthier for people, whose short-term health and well-being depend on the environmental quality of their environment.

d) The drive towards more accessible conditions of well-being for all, and towards the creation of a society that favours inclusion, equality, equity and development.

e) An energy model that is built in collaboration with all players involved and with society as a whole, based on best governance practices that contribute to its sustainability.

3. Values of the Iberdrola Group

Along with the purpose, the Company's Board of Directors also establishes the values of the companies of the Group. If the former summarises the "*raison d'être*", the latter summarise its "*way of being*", which consists of the fact that, in order to achieve the purpose of the Group's companies, their entire strategy and actions must be inspired by and based on the following three "*values*":

a) "*Sustainable energy*": because they must always seek to be a model of inspiration, creating environmental, social and economic value in all of their surroundings, and with the future in mind.

   The Company and the other companies of the Group act responsibly toward people, communities and the environment, with a strong commitment to the sustainable development strategy defined by the Company's Board of Directors, which seeks to maximise the social dividend generated by the activities and businesses of the Group's companies, from which all of their respective Stakeholders benefit.

   For this purpose, the professionals of the Group's companies engage in their activities in accordance with the principles of conduct set out in the *Code of Conduct for Directors, Professionals and Suppliers* in the case of the Company or in the corresponding code of conduct. They especially endeavour to ensure transparency, the safety of people and the sustainable creation of value, striving to identify and understand the expectations of the Stakeholders of the corresponding company and working to achieve the well-being of both present and future generations.

b) "*Integrating force*": because they have great strength and a deep sense of responsibility. This is why it works by combining talents, for a purpose that is to be achieved by all and for all.

   The Company's people form a diverse professional team prepared to achieve the success of the business enterprise. For these purposes, the Group's companies seek for them to work without geographic, cultural or operational barriers, to share talent, knowledge and information, and to have a global, long-term vision.

   To achieve such a team, the Group's companies drive the development of their professionals and contribute to the training of future generations in order to boost their enthusiasm, empathy and initiative at work, and to favour solidarity and creativity, as well as their respect for human relations. The Group's companies also encourage the maintenance of sincere and faithful dialogue between Iberdrola's people and their other Stakeholders.

c) "*Driving force*": because they make small and large changes a reality while being efficient and self-demanding, always seeking continuous improvement.

   They innovate and promote large and small changes that make life easier for people.

They expect their professionals to adopt a non-conformist attitude, to constantly seek excellence and opportunities for improvement, to embrace change and new ideas, to learn from mistakes, to evolve with feedback on their actions and to anticipate the needs and expectations of Stakeholders. To achieve this goal, the companies of the Group favour simple, agile and efficient processes for organising work and exchanging information that take advantage of technological advances and that are subject to continuous innovation.

4. Scope and Dimension of the Purpose and Values

The *Purpose and Values of the Iberdrola Group* endow the Company and the other companies of the Group with an immanent and specific purpose, which, in short, is the construction of an electric, healthy and accessible energy model, in line with sustainability and consistent with the highest standards and requirements in terms of transparency and good governance, human and social capital, natural capital and compliance, and taking into account the sustainable value chain, within the general framework of respect for human rights, the social market economy and generally accepted ethical principles.

By making all of this its *raison d'être* and purpose Company and the other companies of the Group stand as a business reality that transcends their nature as pure and simple commercial enterprises without denying such nature.

In this regard, although obtaining financial profits continues to be a primary objective for the Company, because they are essential to making the achievement of the purpose possible, they are not the ultimate goal, nor do they exhaust the deeper and more inherent and intrinsic respective purpose thereof.

Thus, the Company needs shareholders and investors who of course contribute capital and financial resources, but also, and above all, who share its fate and who participate in this great undertaking or endeavour that entails the achievement of such a far-reaching goal. Therefore, the corporate interest, which guides the lawful conduct of the corporate decision-making bodies, cannot be limited to the interest of the shareholders and partners who have contributed capital and financial resources, to merely a financial return on their contribution, but extends to the common interest of all of the shareholders of an independent company, with its own differentiated bylaw-based identity, focused on the creation of comprehensive and sustainable value by engaging in the activities included in its corporate object, taking into account the other Stakeholders related to its business activity and consistent with its institutional nature. This corporate interest, thus defined, is the one to which they allocate the financial capital they contribute or the investment they decide to make.

At the same time and consistently therewith, the Company and the other companies of the Group recognise as equally necessary types of capital or factors for achieving their purpose other no less important ones, such as human and social capital, natural capital, sustainable value chain-related capital, technological capital, institutional capital and economic and social governance capital, to which they have access and which they have or enjoy through relationships and procedures of various kinds and natures, and without

NOTICE. This document is a translation of a duly approved Spanish-language document, and is provided for informational purposes only. the proper combination and coordination of which (a task corresponding to and assumed by their respective boards of directors) their purpose could not be achieved.

The use of such different factors and means by the Company and the other companies of the Group and their performance of a business function that integrates all of them for the sake of their purpose and values mean that all of their actions must be focused on the sustainable creation of long-term value, the achievement of an overall result and of an equally comprehensive profit, which makes it possible to adequately remunerate the contributors of financial capital with financial returns and dividends, but also all other participants and groups involved, through the "social dividend", as set forth in the respective bylaw provisions of each of the companies of the Group. The financial and non-financial information that must be prepared, approved, validated and published in accordance with the legal and bylaw provisions in effect is focused on the determination of all of these variables.

The Company and the other companies of the Group are aware that, given their size and significance, as well as the basic and essential nature of the energy they produce and distribute for the economy and society, their business activities and the scope and dimension of their purpose and values are not limited to their already very broad internal sphere, but extend to their respective customers, supply chains and the other Stakeholders of each of them, and they are particularly aware that they also have a driving and multiplying effect on all of the economic, social and political communities in which they have a presence and in which they do business.

The Company and the other companies of the Group therefore recognise and reaffirm their desire to be active players and to assume, in compliance with and in furtherance of their purpose and values, the leadership that corresponds to them in the creation of a balanced and advanced society; and to participate, resolutely and responsibly, for the same reason, in the collective effort to ensure its global and sustainable development and progress.

5. Purpose and Values and the Governance and Sustainability Systems

The Company and the other companies of the Group reaffirm their determination to continue with the constant development and improvement of their respective governance and sustainability systems, in order to channel and ensure through such unique and specific internal rules the full achievement of the purpose and values, in all their scope and size, as well as their business goals and objectives and the creation of such long-term sustainable value, for all of their Stakeholders and in the countries and territories in which they are present.

As a result thereof, the Company's Governance and Sustainability System aspires, as do the other governance and sustainability systems of the other companies of the Group, to be a coherent unit unto itself, in which the *Purpose and Values of the Iberdrola Group*, a synthesis of its corporate ideology, inspire and underpin, as general principles, the preparation, application and interpretation of all of the rules, policies and procedures that guide and organise, direct and channel any conduct of the aforementioned companies, underpinned by the basic rules that characterise the Rule of Law, linked to the principles of legality and legal certainty.

In the event of any discrepancy between the text of this translation and the text of the original Spanish-language document that this translation is intended to reflect, the text of the original Spanish-language document shall prevail..

At the same time, given the full scope and dimension of the *Purpose and Values of the Iberdrola Group*, the governance and sustainability systems of each of the Group's companies are not conceived as a merely internal and isolated effort, but rather seek to become integrated with and contribute to the better governance and sustainability of the entire current global society in which the Company and the other companies of the Group are present and do business.

With the *Purpose and Values of the Iberdrola Group* and, in sum, with their respective governance and sustainability systems, which are based on and guided by the former, the companies of the Group identify with communities and their other Stakeholders, as comprehensive undertakings, i.e. as entities with a business, corporate and institutional dimension.

6. Acceptance

The professionals of the Group's companies expressly accept the *Purpose and Values of the Iberdrola Group*. Professionals who hereafter join or become part of the Group's companies must also expressly accept the content hereof.

In Bilbao, on 16 June 2026.

The Board of Directors of IBERDROLA, S.A.
